**Referto:** Subsection 6.1, “Enrollment” in this handbook for more information about acute care hospital enrollment.

Privately-operated psychiatric facilities must:

- Be licensed by HHSC.
- Providers must be accredited by a CMS-approved accrediting organization for psychiatric hospitals.

To be eligible to participate in the Comprehensive Care Program (CCP) to render services to Texas Health Steps clients, privately- and publicly-operated psychiatric facilities (henceforth, referred to as ‘psychiatric facilities’) must:

- Be accredited by a CMS-approved accrediting organization for psychiatric hospitals.
- Have a valid provider agreement with HHSC.
- Complete the TMHP enrollment process.

**Note:** *Acute care hospitals cannot enroll as CCP facilities.*

**Referto:** Section 2, “Medicaid Children’s Services Comprehensive Care Program (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information.

Psychiatric facilities must enroll in Texas Medicaid as Institutions for Mental Disease (IMD).

**Note:** According to TAC Rule §419.373(6) and based on 42 Code of Federal Regulations (CFR) §435.1009, an IMD is a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of individuals with mental illness, including medical attention, nursing care, and related services.

**Note:** Acute care hospitals are not considered IMDs, even if the hospital has a psychiatric ward.

Acute care hospitals must comply with Centers for Medicare & Medicaid Services (CMS) Conditions of Participation for general hospitals.

Psychiatric facilities certified by Medicare must meet accreditation requirements from a CMS-approved accrediting organization for psychiatric hospitals and comply with CMS Conditions of Participation for both general hospitals and psychiatric hospitals.

### 3.4.2 General Information

Admissions to acute care hospitals for inpatient psychiatric services are a benefit of Texas Medicaid for persons of all ages in fee-for-service (FFS) Medicaid or managed care.

Admissions to psychiatric facilities, i.e. IMDs, for inpatient psychiatric services are a benefit of Texas Medicaid for:

- Persons 20 years of age and younger and 65 years of age and older in FFS Medicaid.
- Persons 21 through 64 years of age enrolled in managed care as an in lieu of service if the MCO and the person receiving services agree to an IMD as the setting for inpatient psychiatric services. The benefit is for a maximum of 15 calendar days per month, not per stay.

**Note:** In lieu of services are services substituted for Medicaid State Plan services or settings, as allowed by 42 CFR §438.3(e).

Admissions to acute care hospitals and psychiatric facilities must be medically necessary. Court orders for inpatient psychiatric services constitute the determination of medical necessity and are not subject to utilization management reviews to include prior authorizations, concurrent reviews or retrospective reviews that have the effect of denying, reducing or controverting the court-ordered service. Court-ordered services include:

- Mental health commitments.
- Condition of probation.

**Referto:** Section 4, “Outpatient Mental Health Services” in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about court-ordered services.

Upon admission, or once a person who is 20 years of age or younger becomes Medicaid eligible while in the facility, a certification of need for services, as required by Title 42, Code of Federal Regulations (CFR), Section 441.152, must be completed and placed in the person’s medical record within 14 days of the admission.

All Early and Periodic Screening, Diagnostic and Treatment (EPSDT) services, known as Texas Health Steps in Texas, are available to persons 20 years of age and younger in a Medicaid covered inpatient psychiatric facility, as required by Section 12005 of the 21st Century Cures Act.

#### 3.4.2.1 Documentation Requirements

The certification of need for services (42 CFR §441.152) for persons 20 years of age and younger must specifically address:

- Why community-based services cannot meet the treatment needs of the person.

- Why inpatient psychiatric services under the care of a psychiatrist are required to treat the acute episode of the person.
- How inpatient psychiatric services can reasonably be expected to improve the condition, or prevent further regression of the person's condition in a proximate period.

Documentation of medical necessity for persons of all ages for inpatient psychiatric services in an acute care hospital or psychiatric facility, to include the certification of need for services (42 CFR §441.152) for persons 20 years of age and younger, must be:

- Documented in the person's medical record.
- Maintained by each facility, as applicable to state and federal guidelines.
- Readily available for review whenever requested by HHSC or designee.

### **3.4.2.2 Noncovered Services**

Inpatient psychiatric services are not a benefit of Texas Medicaid for the following:

- Persons with a single diagnosis of a substance use disorder, as classified in the current edition of the American Psychiatric Association (APA) Diagnostic and Statistical Manual of Mental Disorders (DSM).
- Persons with a single diagnosis of Intellectual or Developmental Disability, as classified in the current edition of the APA's DSM.
- Persons with a neurocognitive disorder (due to a general medical condition, not a mental disorder), e.g., delirium, dementia, traumatic brain injury, etc.
- Persons who are considered incarcerated, which is defined as when a criminal justice facility, such as a city or county jail or state prison, has custody of the person.

**Referto:** Section 4, "Outpatient Mental Health Services" in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about court-ordered services.

### **3.4.2.3 CLIA Certification for Laboratory Services**

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments of 1988 (CLIA). Providers that do not comply with CLIA are not reimbursed for laboratory services.

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate-holders.

**Referto:** The CMS website at <https://www.cms.gov/medicare/quality/clinical-laboratory-improvement-amendments/categorization> for information about procedure code and modifier QW requirements.

For waived tests, providers must use modifier QW as indicated on the CMS website.

## **3.4.3 Initial and Extended Inpatient Psychiatric Services Criteria**

### **3.4.3.1 Initial Inpatient Psychiatric Services**

The person must have as the principal reason for admission a psychiatric diagnosis, as listed in the current version of the APA DSM, and documented reasons by a psychiatrist for why an inpatient level of care is required or that outpatient treatment has been attempted and failed.

The person must meet one of the following criteria:

- A present danger to self, e.g., recent suicide attempt, active suicidal ideations with intent to act, recent self-mutilative behaviors that cause or intend to cause significant medical harm, command auditory or visual hallucinations or delusions that are likely to lead to serious self-harm, and other indirect or direct acts that are hazardous to the life of the person.
- A present danger to others (behavior must be attributed to the DSM diagnosis and can be adequately treated in an inpatient setting), e.g., recent life threatening actions, homicidal threats with a deadly plan and available means to act on, or carry out, the plan, recent serious assaultive behaviors or active threats of same with a likelihood of acting, or command auditory or visual hallucinations or delusions that are likely to lead to harm to others.
- The person is at risk of substantial physical or mental deterioration because of the mental illness, e.g., acute or chronic psychosis or thought disorganization or severe disorientation to person, place or time.
- The person exhibits behaviors because of the mental illness that prevent, or interfere with, safe or effective treatment in a less restrictive setting.
- The person exhibits psychiatric symptoms, is involved in the legal system, and is ordered by a court to undergo a comprehensive assessment in an inpatient psychiatric setting to clarify the diagnosis and treatment needs.

The proposed treatment must require 24-hour-a-day medical observation, supervision and intervention and include:

- Active supervision, in accordance with facility guidelines, state and federal requirements and accreditation standards, by a psychiatrist with the appropriate credentials, as determined by the Texas Medical Board.
  - For children and adolescents, a psychiatrist must also have documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents.
- Formulation and implementation of a person-centered recovery plan (also known as a plan of care or treatment plan).
- Formulation and implementation of an initial discharge plan, to include documented contact with a community-based mental health provider.
- Provision of services are reasonably expected to improve the person's condition or prevent further regression, so that a lesser level of care may be implemented.

The treatment of the person's psychiatric condition must be provided in the least restrictive appropriate setting available and ambulatory care resources available in the community do not meet the needs of the person.

### **3.4.3.2 Extended Inpatient Psychiatric Services**

Extended inpatient psychiatric services, i.e. extended stays, are considered for persons who require an inpatient level of care beyond the initial five-day admission period, as evidenced by continuing to meet at least one of the medical criteria listed in the initial inpatient psychiatric services section above.

Treatment must include:

- Active supervision, in accordance with facility guidelines, state and federal requirements and accreditation standards, by a psychiatrist with the appropriate credentials, as determined by the Texas Medical Board.

- For children and adolescents, a psychiatrist must also have documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents.
- Formulation and implementation of an initial discharge plan, to include documented contact with a community-based mental health provider.

Extended stays are considered medically necessary for children and adolescents in the conservatorship of the Texas Department of Family and Protective Services (DFPS) when there are barriers to an immediate return to the child's or adolescent's residence, placement, or next setting for services. The extended stay facilitates an efficient transfer to the new setting without disrupting needed services. If DFPS is in the process of finalizing placement for the child or adolescent, up to five days may be authorized, per request, to allow alternative placement to be located. Up to three 5-day extensions may be authorized.

### **3.4.4 Prior Authorization and Authorization Requirements**

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically-signed documents must have an electronic date on the same page as the signature. Electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable. All electronically-signed transactions and electronically-signed documents must be kept in the person's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, persons receiving services and responsible adults of persons receiving services may sign prior authorization forms and supporting documentation using electronic or wet signatures.

To complete the prior authorization process by paper, the provider must fax or mail the completed prior authorization request form to the TMHP Prior Authorization Department and retain a copy of the signed and dated prior authorization form in the person's medical record.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated prior authorization form in the person's medical record.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the services requested. The physician must maintain documentation of medical necessity in the person's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested services.

Court-ordered inpatient psychiatric services are not subject to the five-day initial admission limitation or the seven-day extended stay limitation.

Providers must submit the following documentation for authorization of court-ordered inpatient psychiatric services no later than seven calendar days after the date on which services began:

- A copy of the court order signed by the presiding judge or magistrate that includes the statute under which the court is ordering services to determine incarceration status of the person.

Prior authorization is not required for persons in FFS Medicaid admitted to a psychiatric unit in an acute care hospital.

Prior authorization is not required for initial admissions to psychiatric facilities for persons who are birth through 20 years of age or 65 years of age and older in FFS Medicaid for a maximum of five days, based on medical necessity.

Prior authorization is required for extended stays in psychiatric facilities for persons who are birth through 20 years of age and 65 years of age and older in FFS Medicaid for up to seven days per extension request.

Providers must submit a completed Psychiatric Inpatient Extended Stay Request Form that describes the necessary inpatient psychiatric services and reflects the need for an extended stay in relation to the original need for admission to include any change in the diagnosis of the person. Additional documentation or information supporting the need for an extended stay may be attached to the form.

Requests for an extension of stay must be received on or before the fifth day of an initial admission and/or on or before the last day authorized or denied for subsequent stay requests. If an extended stay is requested and the fifth day of the initial admission or the last date authorized or denied of the previous stay falls on a holiday or a weekend, the request for an extended stay is due by 5:00 p.m. of the next business day. The provider is notified of the decision in writing by the TMHP Prior Authorization Department.

- Extended stay requests for persons who are 11 years or age or younger require review by a psychiatrist.
- Extended stay requests for persons who are 12 through 20 years of age require review by a mental health professional. Any requests for extended stays that do not meet the medical necessity criteria for extended stays shall be referred to a psychiatrist for final determination.

#### **3.4.4.1 Prior Authorization Appeals**

All prior authorization requests not submitted or received by the TMHP Prior Authorization Department in accordance with established policies are denied through the submission date, and claim payment is not made for the dates of service denied.

All denials may be appealed. The TMHP Prior Authorization Department must receive appeals within 15 days of receipt of the TMHP Prior Authorization Department denial notice.

- Appeals of a denial for an extended stay must be accompanied by the documentation supporting medical necessity that the provider believes warrants reconsideration.
- Appeals of a denial for late submission of information must be accompanied by documentation which the provider believes supports the compliance with HHSC claims submission guidelines.

Appeals are reviewed first by an experienced psychiatric licensed clinical social worker, licensed professional counselor, or a registered nurse to determine if the required criteria is documented and then forwarded to a psychiatrist for final determination. The provider will be notified of all denial determinations in writing by the TMHP Prior Authorization Department.

#### **3.4.5 Reimbursement Guidelines**

Revenue code 124 must be used for inpatient psychiatric services for persons birth through 20 years of age and 65 years of age and older in psychiatric facilities for FFS Medicaid.

Procedure codes 99238 (30 minutes or less) and 99239 (more than 30 minutes) must be used for a hospital discharge.

Professional services in an acute care hospital may be reimbursed to the professional who provides the service.

Professional services in psychiatric facilities, i.e. IMDs, for persons 20 years of age and younger and 65 years of age and older may be reimbursed to the professional who provides the service.

- Services that are rendered in psychiatric facilities must be identified in the person-centered recovery plan of the person receiving services. Services that are not included in the person-centered recovery plan are subject to recoupment.
- Services that are rendered on the date of admission to and the date of discharge from a psychiatric facility may be reimbursed.
- If the person receiving services has not been discharged from a psychiatric facility, the facility is responsible for acute care services that are rendered to the person in an acute care facility. Claims that are submitted for these services will be denied as a duplicate service that has been paid to another provider.

**Referto:** Subsection 9.2.60.6.1, “Inpatient or Observation Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) and Section 4, “Outpatient Mental Health Services” in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*) for more information.

**Important:** *Claims for professional services rendered during an inpatient stay in a psychiatric facility must include the psychiatric facility’s ten-digit National Provider Identifier (NPI). Claims that do not include the psychiatric facility’s NPI will be denied.*

Except for court-ordered services, admissions to acute care hospitals and psychiatric facilities are subject to the Texas Medicaid retrospective utilization review requirements.

### 3.4.5.1 Medicare Coinsurance and Deductible Reimbursement

Psychiatric facilities that are enrolled in Medicare may also receive Medicaid payment for the Medicare coinsurance or deductible according to current Medicaid guidelines.

**Exception:** *IMD services for clients who are 21 through 64 years of age are not eligible for fee-for-service reimbursement. If delivered through managed care and the managed care organization and client agree to an IMD as the setting for inpatient services, IMD services for clients who are 21 through 64 years of age are eligible for reimbursement for a total of 15 days per calendar month. The 15-day limitation is counted per calendar month, not per stay. As such, a stay of up to 15 days in a single month and a stay of up to 15 days in a following month may both be eligible for reimbursement. Medicaid will not reimburse coinsurance and deductible payments for psychiatric services that are rendered to these clients in an IMD beyond 15 days per calendar month.*

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, *General Information*) additional information about Medicaid guidelines for Medicare coinsurance and deductible payments.

### 3.4.6 Providing IMD Client Information to TMHP

IMD providers are requested to inform TMHP of the Medicaid clients who are residing in their facilities before submitting inpatient claims for those clients.

IMD providers can use the TMHP secure web page to enter client information and the admission and discharge dates by going to My Account and choosing the Manage IMD Clients Segment link in the Acute Care Online Portal field.

IMD providers can search for Medicaid client records that are associated with their NPIs.

Providers will be asked to submit the client’s identification number and admission date. After the client is discharged, providers will be requested to enter the discharge date on the same Manage IMD Clients Segment screen.

Providers will not be able to change previously reported client information except for the To Date of Service information.

Providers that submit inaccurate information can call the Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638 to have that client segment inactivated if the request is made within 24 hours of submission. After the erroneous client segment has been inactivated by TMHP, providers may submit a new client segment to replace it. After 24 hours have elapsed, providers must contact HHSC to request a correction to the information. This change must include the appropriate documentation of the client's patient control number (PCN) and the admission and discharge dates.

The change request and appropriate documentation must be submitted in writing to the following address:

Texas Health and Human Services Commission  
Mail Code 91X PO Box 204077  
Austin, Texas 78720-4077

### 3.5 Inpatient Utilization Review

UR activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system or the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 are required by Title XIX of the Social Security Act, Sections 1902 and 1903. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to UR monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of Texas Medicaid.

The HHSC Office of Inspector General (OIG) UR Unit is responsible for retrospective review of inpatient DRG and TEFRA admissions. These reviews are accomplished through onsite visits, electronic access, or mail-in.

### 3.6 Utilization Review Process

The inpatient UR process for admissions reimbursed under the DRG prospective payment system consists of sampling medical records of paid Medicaid claims. The review process consists of three major components:

- *Admission review.* Determination of the medical necessity of the admission. For purposes of the Texas Medical Review Program (TMRP), TEFRA, and facility-specific per diem methodology reviews, medical necessity means the client has a condition requiring treatment that can be safely provided only in the inpatient setting.
- *Quality review.* Assessment of the quality of care provided to determine if it meets generally accepted standards of medical and hospital care practices or puts the client at risk of unnecessary injury or death. Quality of care review includes the use of discharge screens and generic quality screens.
- *DRG validation.* Determination that the critical elements necessary to assign a DRG are present in the medical record and the diagnosis and procedures are sequenced correctly. The critical elements are age, sex, admission date, discharge date, patient discharge status, principal diagnosis, secondary diagnoses (complications or comorbidities), and principal and secondary procedures.

The HHSC OIG UR Unit staff reviews the complete medical record to make decisions about the medical necessity of the admission, validity of the DRG, including the present on admission (POA) indicator, and quality of care. The medical record must reflect that any services reimbursed by Texas Medicaid were ordered by a physician or non-physician provider.

When an admission denial or a denial of extended stay is issued, or when a technical denial becomes final, all money is recouped from the hospital for the admission or days of stay that are denied. When a DRG is reassigned as a result of UR, the payment to the hospital is adjusted.

**Referto:** Subsection 3.6.3, “Technical Denials (DRG Prospective Payment)” in this handbook.

If an inpatient admission is denied, but a physician’s order is present documenting the client originally was placed in observation, the UR unit may authorize the resubmission of services rendered during the first 48 hours on an outpatient claim.

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action, such as recoupment or referral to the HHSC OIG Medicaid Program Integrity (MPI) or Sanctions Unit.

### **3.6.1 Admission Review**

All services, supplies, or items submitted as certified on the claim submission must be medically necessary for the client’s diagnosis or treatment. Heath and Human Services Commission-Office of Inspector General-Utilization Review (HHSC-OIG-UR) personnel evaluate the medical necessity of an admission by comparing the medical record documentation to Change Healthcare InterQual® evidence-based guidelines. Non-physician reviewers use this criteria to determine medical necessity for initial approval of admission. If the case does not meet the initial approval criteria, the reviewer refers the case to a physician consultant who will determine the medical necessity of the inpatient admission. If the initial approval criteria are met but the medical necessity of the admission is still questionable, the non-physician reviewer refers the case to a physician consultant for a determination. If a physician consultant determines the admission is not medically necessary, HHSC-OIG-UR will issue a denial.

#### **3.6.1.1 Readmission Review**

If a hospital admission or readmission occurs within 30 days of a discharge from the same or a different hospital for the same or closely related diagnosis, or for a condition identified during the previous admission, it may be reviewed for medical necessity, quality, and DRG validation including POA indicators.

Transfers from one facility to another and readmissions are also subject to review.

#### **3.6.1.2 Hospital-Based Ambulatory (HASC) Surgical Procedures**

Inpatient admissions for surgical procedures listed as ambulatory surgical codes in the current fee schedule are denied if documentation does not support the need for the inpatient admission.

#### **3.6.1.3 Quality Review**

Each Medicaid case is evaluated for quality of client care, adequacy of discharge planning, and medical stability of the client at discharge. Quality of care review includes the use of discharge screens and generic quality screens. Potential quality of care issues are identified by the physician. HHSC contracts with physician consultants to review medical records for quality of care. Physician consultants, of the specialty related to the care rendered, may make clinical recommendations or determine corrective actions when deemed appropriate. Child and adolescent psychiatrists may make recommendations based on review of inpatient psychiatric services provided to Medicaid clients younger than 21 years of age. Failure to verify completion of any corrective action recommendation within the specified time frame may result in referral of the case to the HHSC OIG MPI or Sanctions Unit.

#### **3.6.1.4 Diagnosis-Related Group Validation**

Each medical record is reviewed to validate the elements critical to the DRG assignment. These elements are the client’s age, sex, admission date, patient discharge date, patient discharge status, principal diagnosis, secondary diagnoses (complications or co-morbidities), POA indicators, and principal and secondary procedures. Documentation of these critical DRG elements in the medical record is evaluated for the correlation to the information provided on the claim form.

The principal diagnosis is the diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The condition must be treated or evaluated during this admission to the hospital.

The secondary diagnoses are conditions that affect client care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, increased nursing care and monitoring, or have clinically significant implications for future health-care needs.

The coding of diagnoses that have clinically significant implications for future health-care needs applies only to newborns and must be identified by the physician. Normal newborn conditions or routine procedures are not to be considered as complications or co-morbidities for DRG assignment.

**Referto:** Subsection 1.11, “Texas Medicaid Limitations and Exclusions” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

The POA review will validate the POA indicator assigned to the principal and secondary diagnoses codes reported on claim forms. If it is determined that the principal and/or secondary diagnoses were not present at the time the order for inpatient admission occurs, the Commission will revise the POA indicator for the diagnosis code. Conditions that develop during an outpatient encounter, including emergency department, observation, or outpatient surgery are considered POA.

If the principal diagnosis, secondary diagnoses (complications or co-morbidities), or procedures are not substantiated in the medical record; sequenced correctly; have an incorrect POA indicator; or have been omitted, codes may be deleted, changed, or added. All diagnosis or procedure coding changes potentially resulting in a DRG change are referred to a physician consultant. When it is determined that the diagnoses and procedures are substantiated and sequenced correctly, the information will be entered into the applicable version of the Grouper software for a DRG determination. The CMS-approved DRG software considers each diagnosis and procedure and the combination of all codes and elements to make a determination of the final DRG assignment. When the DRG is reassigned, the payment to the provider is adjusted.

### **3.6.2 Recommendations to Enhance Compliance with Texas Medicaid Fee-for-Service Hospital Claims Submission**

The following information highlights an area for physician and hospital providers where collaboration in client care delivery exists but can improve. Texas Medicaid, through its hospital UR activities, has identified this area for both compliance with provider responsibilities and the reduction of the submission of inappropriate inpatient hospital claims.

To enhance compliance with Texas Medicaid fee-for-service hospital claims submission and decrease the submission of inappropriate inpatient hospital claims, providers should adhere to the following:

- The hospital may admit clients in observation status if the physician has the reasonable expectation that the client will be discharged within 48 hours. If an inpatient claim was denied per retrospective UR, the hospital may resubmit the claim for the first 48 hours as an outpatient claim if the client was initially admitted in observation status (per physician order) and the stay was more than 48 hours.
- When a client is admitted to the hospital as an inpatient and is discharged in less than 48 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This practice is acceptable when the physician makes changes to the admitting order before the hospital submits the claim for payment.
- The correction in admission status, when the above criteria are met avoids errors in claims submission and the potential need for a more lengthy appeal process.
- If the physician admitting orders do not accurately reflect the services provided, the hospital inpatient claim may be denied and the inappropriate payment recovered from both the hospital and the admitting physician.

### 3.6.3 Technical Denials (DRG Prospective Payment)

#### 3.6.3.1 On-Site Reviews

The following information describes on-site reviews:

- If the complete medical record is not made available during the on site review, a preliminary technical denial is issued on site. The hospital is allowed 60 calendar days from the date of the exit conference to provide the complete medical record to HHSC. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.
- If a complete medical record is made available on site, but a copy is required for further review, and the copy is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

**Note:** *A notarized business record affidavit in the format approved by HHSC is required for paper and electronic copies of requested medical records. A provider failing to provide this documentation must resubmit the requested records with the affidavit.*

**Referto:** Subsection 1.7.4, “Retention of Records and Access to Records and Premises” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

#### 3.6.3.2 Mail-In Reviews

If the complete medical record is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

Hospital inpatient claim payments that have been recouped because of a technical denial may not be resubmitted on an outpatient claim.

**Note:** *A notarized business record affidavit in the format approved by HHSC is required for paper and electronic copies of requested medical records. A provider who fails to provide this documentation must resubmit the requested records with the affidavit.*

**Referto:** Subsection 1.7.4, “Retention of Records and Access to Records and Premises” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

### 3.6.4 Acknowledgment of Penalty Notice

Hospitals must have on file a signed acknowledgment from the physician stating that the physician received the following notice:

**“Notice to Physicians:** Medicaid payment to hospitals is based, in part, on each client’s principal and secondary diagnoses and the major procedures performed on the client, as attested to by the client’s attending physician by virtue of his or her signature in the medical record. Anyone who misrepresents, falsifies, or conceals essential information required for payment of federal or state funds, may be subject to fine, imprisonment, or civil penalty under applicable federal and state laws.”

The acknowledgment of penalty notice must be specific to Texas Medicaid. Medicare penalty notices are not accepted.

### 3.6.5 Sanctions

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action such as recoupment or referral to HHSC OIG MPI or Sanctions Unit.

### 3.6.6 Utilization Review Appeals

Hospital providers may appeal adverse decisions by HHSC OIG UR Unit to the HHSC UR Medical Appeals Unit. A UR Medical Appeals decision is the final administrative decision of HHSC. Neither HHSC OIG UR Unit nor TMHP are responsible for Medical UR appeals.

**Referto:** Subsection 7.3.3, “Utilization Review Appeals” in “Section 7: Appeals” (*Vol. 1, General Information*).

## 3.7 Claims Filing and Reimbursement

### 3.7.1 Medicaid Relationship to Medicare

Texas Medicaid may make deductible or coinsurance payments according to current Medicaid payment guidelines on valid, assigned Part A (hospital) and Part B (medical) Medicare claims.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for information about coinsurance and deductible payment guidelines.

Texas Medicaid provides reimbursement for 30 inpatient benefit days per spell of illness. When the 30 days coincide with the first 30 days of the Medicare benefit period and the client is eligible for both Medicare and Medicaid, Texas Medicaid pays the:

- Inpatient hospital deductible under Medicare Part A.
- Medicare Part A deductible for the first three pints of whole blood or packed red cells.

When the client only has Medicare Part B coverage, the hospital must follow these guidelines:

- Submit to Medicare the charges for certain inpatient ancillary services on a Medicare Claim Form 1483 for payment under the client’s Part B coverage. The ancillary charges include the following:
  - Diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests
  - X-ray, radium, and radioactive isotope therapy, including materials and services of technicians
  - Surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations
  - Prosthetic devices (other than dental) that replace all or part of an internal body organ or member (including contiguous tissue) or all or part of the function of a permanently inoperative or malfunctioning internal body organ or member including replacement or repairs of such devices (e.g., cardiac pacemakers, breast prostheses, maxillofacial devices, colostomy bags, and prosthetic lenses)
  - Leg, arm, back, and neck braces, and artificial legs, arms, and eyes, including replacements and adjustments (if required) because of a change in the client’s physical condition
  - Physical therapy (PT) services
  - Speech pathology services
  - Dialysis treatments

- Submit to TMHP the remaining Part A charges on a UB-04 CMS-1450 paper claim form (or its electronic equivalent) indicating in Block 80 that the client is eligible for Medicare Part B benefits only. The client's Medicare number must appear on the Medicaid claim in Block 80. TMHP must receive these charges within 95 days of the last date of service on the claim.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

### 3.7.2 Inpatient Claims Information

Medicaid present on admission (POA) reporting is required for all inpatient hospital claims.

All hospital providers are required to submit a POA value for each diagnosis on the claim form, and no hospital is exempt from this POA requirement. Medicare crossover hospital claims must also comply with the Medicaid requirement to include the POA values.

POA is defined as present at the time the order for inpatient admission occurs. Conditions that develop during an outpatient visit, including emergency department, observation, or outpatient surgery, are considered POA.

The following table shows the POA values:

| POA Value                                                                                      | Description                                        | Payment                                                                              |
|------------------------------------------------------------------------------------------------|----------------------------------------------------|--------------------------------------------------------------------------------------|
| Y                                                                                              | Diagnosis was present at the time of admission     | Payment will be made by Medicare when a hospital-acquired condition (HAC) is present |
| N                                                                                              | Diagnosis was not present at the time of admission | No payment will be made by Medicare when an HAC is present                           |
| U                                                                                              | Documentation was insufficient                     | No payment will be made by Medicaid when an HAC is present                           |
| W                                                                                              | Clinically undetermined                            | Payment will be made by Medicaid when an HAC is present:                             |
| (blank)                                                                                        | Exempt from POA reporting                          | Exempt from POA reporting                                                            |
| <b>Note:</b> Texas Medicaid follows Medicare guidelines for payments referenced in this table. |                                                    |                                                                                      |

**Note:** *If a diagnosis code is exempt from POA reporting, providers should leave the POA indicator field blank on the claim.*

TMHP will not recalculate the DRG based on POA indicator values for Medicare crossover claims or MCOs.

Depending on the POA indicator value, the DRG may be recalculated, resulting in a lower payment to the hospital facility provider. If the number of days on an authorization is higher than the number of days allowed as a result of a POA DRG recalculation, the lesser of the number of days will be reimbursed.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*).  
“Section 6: Claims Filing” (*Vol. 1, General Information*).

A complete list of POA exempt diagnosis codes can be found on the [CMS website](#).

Claims for inpatient hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

In Block 44 of the UB-04 CMS-1450, enter the accommodation rate per day. Match the appropriate diagnoses listed in Blocks 67A through 67Q corresponding to each procedure. If a procedure corresponds to more than one diagnosis, enter the primary diagnosis. Each service and supply must be itemized on the claim.

Hospitals may submit information only claims to TMHP when one of the following situations exists. Hospitals must use TOB 110 to file these claims:

- Inpatient 30-day spell of illness benefit is exhausted.
- Payment made by a third party resource or other insurance exceeds the Medicaid allowed amount.

Additional claims information can be found within individual topic areas in this section.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*).  
“Section 6: Claims Filing” (*Vol. 1, General Information*).

The [Claim Form Examples](https://www.tmhp.com/claim-form-examples) page on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

### **3.7.3 Inpatient Claims Submission**

Inpatient hospital claims for traditional Medicaid clients must be submitted to TMHP if the client is enrolled in traditional Medicaid at the time of service or during the time of the admission.

### **3.7.4 Inpatient Reimbursement**

#### **3.7.4.1 Prospective Payment Methodology**

Inpatient hospital stays except state-owned teaching hospitals, and psychiatric facilities (CCP) are reimbursed according to a prospective payment methodology based on diagnosis-related groups (DRGs). The reimbursement method itself does not affect inpatient benefits and limitations. Inpatient admissions must be medically necessary and are subject to Texas Medicaid’s UR requirements.

The DRG reimbursement includes all facility charges (e.g., laboratory, radiology, and pathology). Hospital-based laboratories and laboratory providers who deliver referred services outside the hospital setting must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. The technical services are not billable to Texas Medicaid clients.

Texas Medicaid does not distinguish types of beds or units within the same acute care facility for the same inpatient stay (e.g., psychiatric or rehabilitation). Because all Medicaid inpatient hospitalizations are included in the DRG database that determines the DRG payment schedule, psychiatric and rehabilitation admissions are not excluded from the DRG payment methodology. To ensure accurate payment, Texas Medicaid requires that only one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. The discharge and admission hours (military time) are required on the UB-04 CMS-1450 paper claim form, to be considered for payment.

The number of days of care charged to a beneficiary for inpatient hospital or skilled nursing facility (SNF) care services is always in units of full days. A day begins at midnight and ends 24 hours later. The midnight-to-midnight method is to be used in counting days of care for reporting purposes even if the hospital or SNF uses a different definition of day for statistical or other purposes.

A part of a day, including the day of admission and day on which a patient returns from leave of absence, counts as a full day. However, the day of discharge, death, or a day on which a patient begins a leave of absence is not counted as a day unless discharge or death occur on the day of admission.

If admission and discharge or death occur on the same day, the day is considered a day of admission and counts as one inpatient day.

Reimbursement to acute care hospitals for inpatient services is limited to \$200,000 per client, per benefit year (November 1 through October 31). Claims may be subject to retrospective review, which may result in recoupment. This limitation does not apply to services related to certain organ transplants or services to THSteps clients when provided through CCP.

A new provider is given a reimbursement inpatient interim rate of 50 percent until a cost audit has been performed. A default standard dollar amount (SDA) rate is assigned for newly enrolled providers or newly constructed facilities.

Payment is calculated by multiplying the SDA for the hospital's payment division indicator times the relative weight associated with the DRG assigned by Grouper.

Hospital reimbursement is made in accordance with the following TAC rules:

- 1 TAC §355.761 - Reimbursement Methodology for Institutions of Mental Diseases (IMD)
- 1 TAC §355.8052 - Inpatient Hospital Reimbursement
- 1 TAC §355.8056 - State-Owned Teaching Hospital Reimbursement Methodology
- 1 TAC §355.8058 - Inpatient Direct Graduate Medical Education (GME) Reimbursement
- 1 TAC §355.8060 - Reimbursement Methodology for Freestanding Psychiatric Facilities
- 1 TAC §355.8061 - Outpatient Hospital Reimbursement
- 1 TAC §355.8065 - Disproportionate Share Hospital Reimbursement Methodology
- 1 TAC §355.8066 - Hospital-Specific Limit Methodology

Medicaid providers that are cost-reimbursed are subject to cost reporting, cost reconciliation, and cost settlement processes, as defined in the following TAC rules:

- 1 TAC §355.8061 (a)(2) - Outpatient Hospital Remibursement
- 1 TAC §355.8052 (i)(i) - Inpatient Hospital Reimbursement
- 1 TAC §355.8056 - State-Owned Teaching Hospital Reimbursement Methodology

### **3.7.4.2 Client Transfers**

#### **3.7.4.2.1 Admission Dates**

To ensure correct payor identification, providers that receive transfer patients from another hospital must enter the actual date on which the client was admitted into each facility in Block 12 on the UB-04 CMS-1450.

#### **3.7.4.2.2 Continuous Stays – Client Transfers and Readmissions**

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. Texas Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be submitted as one admission under the NPI and taxonomy code.

Readmissions to the same facility within 24 hours of a previous acute hospital or facility discharge are also considered one continuous stay and receive only one DRG payment.

Readmissions are considered a continuous stay regardless of the original or readmission diagnosis. Admissions submitted inappropriately are identified and denied during the UR process and may result in intensified review.

When more than one hospital provides care for the same client, the hospital providing the most significant amount of care receives consideration for a full DRG payment. The other hospitals are paid a per diem rate based on the lesser of either the mean length of stay for the DRG or the eligible days in the facility. The DRG modifier, PT, on the R&S Report indicated per diem pricing related to a client transfer. Services must be medically necessary and are subject to Texas Medicaid's UR requirements.

HHSC performs a postpayment review to determine if the hospital providing the most significant amount of care received the full DRG. If the review reveals that the hospital providing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

To ensure correct payor identification, providers that receive transfer patients from another hospital must enter the actual date that the client was admitted into each facility in Block 12 on the UB-04 CMS-1450. Inpatient authorization requirements are based on the requirements that are specified by the program in which the client is enrolled on the date of the original admission. Providers must adhere to the authorization requirements for claims to be considered for reimbursement. Providers are reimbursed at the rate in effect on the date of discharge.

### 3.7.4.3 Observation Status to Inpatient Admission

The dates of the inpatient admission must be reported as follows:

- *Date of inpatient admission:* The date of admission must reflect the date that the client was admitted to the hospital as an inpatient.
- *Dates of service:* The from date of service (FDOS) must reflect the date that the client first presented at the hospital for services including, but not limited to, emergency room (ER), observation, labor and delivery, or inpatient services.

If services that are rendered before the inpatient admission must be submitted on the inpatient claim, the number of preadmission days that are related to the inpatient admission cannot exceed the days of allowed for the rendered services:

| Services                     | Days Allowed                                             | Units              |
|------------------------------|----------------------------------------------------------|--------------------|
| Emergency room (ER) services | One day (24 hours) before the inpatient admission        | Submitted per day  |
| Observation services         | Up to two days (48 hours) before the inpatient admission | Submitted in hours |
| Labor and Delivery           | Up to three days before the inpatient admission          | Submitted per day  |

Diagnosis-Related Group (DRG) hospital claims allow for a total of three days of pre-admit services. Non-DRG hospital claims are allowed one day of pre-admit services, and a second day if additional observation hours occurred.

**Note:** *If the client is admitted as an inpatient more than 24 hours after presenting in the ER without being placed in observation status or more than 48 hours after being placed in observation status, the ER and observation services may be reimbursed separately as outpatient services and must not be included on the inpatient claim.*

### 3.7.4.4 Outliers

TMHP makes outlier payment adjustments to DRG hospitals for admissions that meet the criteria for exceptionally high costs or exceptionally long lengths of stay for clients who are 20 years of age and younger as of the date of the inpatient admission. If a client's admission qualifies for both a day and a cost outlier, the outlier resulting in the higher payment to the hospital is paid.

Providers can view their day and cost outlier payment information for inpatient hospital claims on the Electronic Remittance and Status (ER&S) Report. The R&S Report reflects the outlier reimbursement payment and defines the type of outlier paid. To view the day and cost outlier payment information, providers, facilities, and third party vendors may need to update their 835 electronic file format. For information about how to update the 835 electronic file format, refer to the [revised electronic data interchange \(EDI\) companion guide](#) (ANSI ASC X12N 835 Healthcare Claim Payment/Advice-Acute Care Companion Guide) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

3.7.4.4.1 Day Outliers

All of the following criteria must be met to qualify for a day outlier payment:

- Inpatient days must exceed the mean length of stay (MLOS) by more than two days.
- Inpatient days must exceed the DRG day threshold for the specific DRG.

Once the outlier payment criteria are met:

- Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 60 percent of the per diem amount of a full DRG payment.
- The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

In compliance with 1 TAC §355.8052, all DRG inpatient hospital day outlier payments must not exceed the allowed cost for the service. All hospitals except in-state children’s hospitals, both day and cost outlier payments have been reduced by 10 percent.

TMHP calculates payments as follows:

- 1) Calculate the day outlier.  
Calculate the allowed cost for the service (i.e., the cap amount) by taking the difference between the Tax Equity and Fiscal Responsibility Act (TEFRA) and DRG-payable amounts.  
Take the lesser of the day outlier or the cap amount.  
Reduce the day outlier by 10 percent for all hospitals except in-state children’s hospitals.
- 2) Calculate the cost outlier:  
Reduce the cost outlier by 10 percent for all hospitals except in-state children’s hospitals.

Reimbursement is made for day or cost outliers on claims that qualify. If a client’s admission qualifies for both a day and a cost outlier, the outlier resulting in the higher payment to the hospital is paid.

Example

| Calculations                                                                                                                                                                                                                                                                                                                                               | Example amount |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Day Outlier Calculation:</b><br>([SDA x DRG relative weight / Mean Length of Stay] x Outlier Days) x 0.6 = day outlier amount                                                                                                                                                                                                                           | \$500.00       |
| <b>Apply Cap and Reduce by 10 Percent</b><br>Calculate the allowed cost for the service (i.e., the cap amount) by taking the difference between the TEFRA and DRG payable amounts (in this example, \$600.00).<br>Take the lesser of the day outlier or the cap amount (in this example it would be the day outlier of \$500.00).<br>Reduce by 10 percent. | \$450.00       |
| <b>Calculation1: Cost Threshold</b><br>11.14 x Universal Mean (\$10,161.08) = <amount A><br>11.14 x SDA = <amount B><br>1.5 x DRG Relative Weight x SDA = <amount C><br>Cost threshold = The greater of <amount C> compared with (the lesser of <amount A> and <amount B>)                                                                                 | \$550.00       |

| Calculations                                                                                                                                                                          | Example amount |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| <b>Calculation2: Cost Outlier</b><br>Allowed amount x reimbursement rate = TEFRA amount<br>TEFRA amount - cost threshold x 0.6 percent = cost outlier amount<br>Reduce by 10 percent. | \$495.00       |

The calculations in this example would result in one of the following payments:

- If the claim qualifies for the day outlier payment only, payment will be made up to \$450.00.
- If the claim qualifies for the cost outlier payment only, payment will be made up to \$495.00.
- If the claim qualifies for both the day outlier and cost outlier payment, the payment will be made up to \$495.00, which is the greater of the day outlier or the cost outlier payment.

### 3.7.4.5 Maternal Level of Care Designation for Inpatient and Outpatient Services

Hospitals enrolled in Texas Medicaid may be reimbursed for inpatient and outpatient maternal services only if the hospitals have received a maternal level of care designation from the Department of State Health Services in accordance with 25 Texas Administrative Code §§133.201-133.210. The maternal level of care designation applies to Texas Medicaid and Texas Medicaid Managed Care Organizations.

Providers can refer to the [DSHS](#) website for more information for Maternal Level of Care Designation.

### 3.7.4.6 Hospitals That Do Not Meet Minimum Requirements for Maternal Level of Care Designation

A hospital that does not meet the minimum requirements for any level of care designation for maternal services will not be reimbursed for inpatient and outpatient maternal services rendered to Texas Medicaid and Medicaid MCO clients. Hospitals without a maternal level of care designation may be reimbursed for emergency services provided or reimbursed under state or federal law to stabilize the mother prior to transport to a facility capable of providing the appropriate level of care.

**Note:** *Maternal LOC Designation is not required for state-owned providers.*

Claims for inpatient and outpatient maternal services submitted by hospitals that do not have a maternal level of care designation on file will be denied. Providers can appeal the claim with documentation of the emergency services required.

If maternal inpatient and outpatient services are rendered by a facility which has applied for (but not yet received) a maternal designation, the facility must still adhere to existing claim filing deadlines (95 days from the date of discharge) and is also responsible for keeping their claim appeals active while awaiting maternal level of care designations to adhere to the 120-day claim appeal deadline.

Requirements to obtain a maternal level-of-care designation only apply to facilities located in Texas. Those entities physically located outside of Texas but enrolled in Texas Medicaid (i.e., out-of-state or border state facilities) are exempt from requiring a maternal level of care designation for inpatient and outpatient services rendered to maternal clients.

**Note:** *When submitting paper claims for inpatient and outpatient maternal services rendered at a facility with an address that is different from the provider's billing address, providers must enter the address of the facility where services were rendered in the remarks field.*

### 3.7.4.7 Other Requirements

The submitted facility address on the claim must match the physical address of the location that has been issued a maternal level of care designation. If the facility address is not included on the claim, the submitted billing address must match the physical address of the location that was issued a maternal level of care designation.

**Important:** *Claims will be denied if the address submitted on the claim does not match the physical address of the location that was issued a maternal level of care designation. For example, numbers must be spelled out as words or left numeric on the claim to match the address on the maternal level of care designation on file. “Street” or “avenue” must either be spelled out or abbreviated, etc.*

### 3.7.4.8 Crossover Claims for Dual-eligible Clients

Maternal level of care designation requirements will also apply for maternal inpatient and outpatient crossover claims.

### 3.7.4.9 Neonatal Level of Care Designation for Inpatient Services

Hospitals enrolled in Texas Medicaid may be reimbursed for inpatient neonatal services only if the hospitals have received a neonatal level of care designation from DSHS in accordance with Title 25 Texas Administrative Code §§133.181-133.190.

A neonatal service is any inpatient hospital service rendered to a client who is 28 days of age or younger.

**Referto:** The [DSHS website](#) for more information on Neonatal Level of Care Designation.

### 3.7.4.10 Hospitals that Do Not Meet Minimum Requirements for Neonatal Level of Care Designation

A hospital that does not meet the minimum requirements for any level of care designation for neonatal services will not be reimbursed for inpatient neonatal services rendered to Texas Medicaid and CSHCN Services Program clients. Hospitals without a neonatal level of care designation may be reimbursed for emergency services to stabilize an infant prior to transport to a facility capable of providing the appropriate level of care.

Claims for inpatient neonatal services submitted by hospitals that do not have a neonatal level of care designation on file will be denied. Providers can appeal claims by providing documentation that emergency services were required.

If neonatal inpatient services are rendered by a facility that has applied for (but not yet received) a neonatal designation, the facility must still adhere to existing claim filing deadlines (95 days from the date of discharge). While awaiting neonatal level of care designation the facility is responsible for maintaining active claims appeals to adhere to the 120-day claim appeal deadline.

Requirements to obtain a neonatal level of care designation only apply to facilities located in Texas. Those entities that are physically located outside of Texas and enrolled in Texas Medicaid (i.e., out-of-state or border state facilities) are exempt from requiring a neonatal level of care designation for inpatient services rendered to neonatal clients.

**Note:** *When submitting paper claims for inpatient neonatal services rendered at a facility with an address that is different from the provider’s physical address, providers must enter the address of the facility where services were rendered in the remarks field.*

**Referto:** “Section 7: Appeals” (Vol. 1, General Information) for more information.

### 3.7.4.11 Other Requirements

The submitted facility address on the claim must match the physical address of the location that has been issued a neonatal level of care designation. If the facility address is not included on the claim, the submitted billing address must match the physical address of the location that was issued a neonatal level of care designation.

**Important:** *The hospital address on the health facilities license must match the address billed on the claim. Claims will be denied if the address submitted on the claim does not match the address on file. Providers should refer to the DSHS approval letter to verify the correct address.*

**Referto:** The [DSHS website](#) for more information for more information on address updates.

### 3.7.4.12 Transfers

When Texas Medicaid or CSHCN Services Program clients are 28 days of age and younger on the date of admission and are subsequently transferred to another facility, neonatal level of care designation requirements will apply to all facilities involved in that client's continuous inpatient stay.

### 3.7.4.13 Crossover Claims for Dual Eligible Clients

Neonatal level of care designation requirements will also apply to services rendered to a client who is less than 28 days old and has dual Medicare and Medicaid eligibility on the date of admission.

### 3.7.4.14 Children's Hospitals

Children's hospitals are reimbursed using the prospective payment methodology based on APR-DRG methodology.

With the exception of designated children's hospitals, hospitals that are reimbursed by APR-DRG payment methodology receive one SDA rate.

Designated children's hospitals receive two SDA rates:

- One rate for obstetric delivery services rendered to clients who are 18 years of age and older.
- One rate for all other services rendered to clients who are 18 years of age and older and all services rendered to clients who are 17 years of age and younger, including obstetric delivery services.

### 3.7.4.15 Potentially Preventable Complications (PPC) and Potentially Preventable Readmissions (PPR)

#### Potentially Preventable Complications (PPCs)

By definition, potentially preventable complications (PPCs) are harmful events or negative outcomes that develop after hospital admission and may result from processes of care and treatment rather than from the natural progression of the underlying illness. A PPC is an inpatient hospital complication that was potentially preventable based on criteria such as hospital characteristics, reason for admission, procedures, and the interrelationships between underlying medical conditions.

S.B. 7, Chapter 526, the 82nd Texas Legislature, 2011, establishes the authority of HHSC, and Texas Government code 543A.0151 requires HHSC to identify PPCs in the Medicaid population. HHSC must confidentially report the results to each hospital that serves Texas Medicaid clients, and each of those hospitals must distribute the information to its care providers.

HHSC also produces a public version of the report, which does not specifically identify any of the hospitals. A statewide average PPC rate is calculated for all hospitals within Texas. Each hospital has an individual rate. Hospitals are able to compare their rate of PPC to the statewide average.

The PPC analysis is performed in accordance with TAC, §354.1446 Potentially Preventable Complications.

**Potentially Preventable Readmission (PPRs)**

By definition, potentially preventable readmissions (PPRs) are return hospitalizations of a person within a period specified by HHSC that results from deficiencies in the care or treatment provided to the person during a previous hospital stay or from deficiencies in post-hospital discharge follow-up.

Texas Medicaid uses a 15 day readmission interval.

Section 531.913, House Bill (H.B.) 1218, 81st Legislature, 2009, Texas Government Code 543A.0151, requires the HHSC to identify PPRs in the Medicaid population. HHSC must confidentially report the results to each hospital that serves Texas Medicaid clients, and each of those hospitals must distribute the information to its care providers.

HHSC delivers an annual, confidential report of the results to each hospital that is enrolled in Texas Medicaid, and each of those hospitals must distribute the information to their care providers. HHSC also produces a public version of the report, which does not specifically identify any of the hospitals. Patients are never identified in the reports.

**PPR Analysis**

The PPR analysis is performed in accordance with TAC, §354.1445 Potentially Preventable Readmissions.

**Referto:** The HHS website at [www.hhs.texas.gov/about/process-improvement/improving-services-texans/medicaid-chip-quality-efficiency-improvement/potentially-preventable-events](http://www.hhs.texas.gov/about/process-improvement/improving-services-texans/medicaid-chip-quality-efficiency-improvement/potentially-preventable-events) for more information on Potentially Preventable Events (PPE).

**3.7.4.16 State-owned Teaching Hospitals**

Inpatient hospital stays in designated state-owned teaching hospitals are reimbursed according to the TEFRA payment methodology.

State-owned teaching hospitals are defined specifically in 1 TAC §355.8052 as the following hospitals: University of Texas Medical Branch (UTMB); University of Texas Health Center Tyler; University of Texas Southwestern Medical Center (UTSW) and M.D. Anderson Hospital.

**3.7.4.17 Payment Window Reimbursement Guidelines****3.7.4.17.1 Guidelines for Services Preceding an Inpatient Admission**

The following payment window reimbursement guidelines apply to services that are rendered by the hospital or an entity that is wholly owned or operated by the hospital. The three-day (or one-day) payment window does not apply if:

- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100 percent owner of the entity.

Texas Medicaid inpatient hospital providers must submit, as part of the client's inpatient hospital claim, all related professional and outpatient services that were rendered on the date of the client's inpatient admission or one of the following dates immediately before admission:

- Within three calendar days before the client's inpatient admission for hospitals that receive DRG reimbursement, with the exception of children's hospitals.
- Within one calendar day before the client's inpatient admission for hospitals that receive reimbursement other than DRG.
- Within one calendar day before the client's inpatient admission for children's hospitals.

Professional and outpatient services that must be submitted as part of the inpatient hospital claim include the following services if they are rendered by the hospital or an entity that is wholly owned or operated by the hospital:

- **Diagnostic services.** Diagnostic services include outpatient laboratory and radiology services that are related to the inpatient admission and submitted by physician and outpatient hospital providers. Affected services will include the total and technical components. The professional interpretation component will not be included in the payment windows identified above.
- **Non-diagnostic services.** Non-diagnostic services include surgeries and other non-diagnostic procedures and services that are related to the inpatient admission and submitted by physician, outpatient hospital, or other providers.

**Important:** *Related professional and outpatient services that were rendered within the specified time frames must be submitted on the inpatient hospital claim and not on an outpatient hospital claim. An outpatient hospital claim for these services will be denied as part of the payment for the inpatient hospital stay.*

### 3.7.4.17.2 Exceptions

The following services are excluded from the payment window and may be submitted and reimbursed separately from the inpatient admission:

- Services rendered by federally qualified health center (FQHC) providers
- Services rendered by rural health clinic (RHC) providers
- Professional services that are rendered in the inpatient hospital setting (place of service 3)
- Non-emergency and emergency ambulance services

The outpatient emergency and maintenance renal dialysis procedure codes in the tables below are also exceptions to the one-day payment window reimbursement guidelines:

| Procedure Codes                                                  |       |       |       |       |       |       |       |       |       |
|------------------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| G0257                                                            |       |       |       |       |       |       |       |       |       |
| ESRD Physician Services                                          |       |       |       |       |       |       |       |       |       |
| 90951                                                            | 90952 | 90953 | 90954 | 90955 | 90956 | 90957 | 90958 | 90959 | 90960 |
| 90961                                                            | 90962 | 90963 | 90964 | 90965 | 90966 | 90967 | 90968 | 90969 | 90970 |
| Physician Services for Hemodialysis or Other Dialysis Procedures |       |       |       |       |       |       |       |       |       |
| 71010                                                            | 71020 | 78300 | 78305 | 78306 | 80069 | 81050 | 82040 | 82310 | 82374 |
| 82435                                                            | 82565 | 83615 | 83735 | 84075 | 84100 | 84132 | 84155 | 84295 | 84450 |
| 84520                                                            | 85004 | 85007 | 85008 | 85014 | 85018 | 85025 | 85027 | 85041 | 85345 |
| 85347                                                            | 85610 | 87340 | 90935 | 90937 | 90945 | 90947 | 93005 |       |       |
| Equipment and Supplies                                           |       |       |       |       |       |       |       |       |       |
| A4216                                                            | A4217 | A4651 | A4652 | A4657 | A4660 | A4663 | A4670 | A4680 | A4690 |
| A4706                                                            | A4707 | A4708 | A4709 | A4714 | A4719 | A4720 | A4721 | A4722 | A4723 |
| A4724                                                            | A4725 | A4726 | A4730 | A4736 | A4737 | A4740 | A4750 | A4755 | A4760 |
| A4765                                                            | A4766 | A4772 | A4773 | A4774 | A4802 | A4860 | A4911 | A4913 | A4918 |
| A4927                                                            | A4928 | A4929 | A4930 | A4931 | A4932 | E0424 | E0431 | E0434 | E0439 |
| E0441                                                            | E0442 | E0443 | E0444 | E1510 | E1520 | E1530 | E1540 | E1550 | E1560 |
| E1570                                                            | E1575 | E1580 | E1590 | E1592 | E1594 | E1600 | E1620 | E1630 | E1632 |
| E1635                                                            | E1637 |       |       |       |       |       |       |       |       |

### 3.7.4.17.3 Professional and Outpatient Claims for Services Related to the Inpatient Admission

Professional and outpatient services that are rendered on the date of admission, or within one of the one-day or three-day timeframes indicated above by the hospital or an entity that is wholly owned or operated by the hospital, are considered part of the inpatient stay. Professional and outpatient claims submitted for services that are related to the inpatient admission will be denied or recouped if they are submitted with the specified payment window.

When modifier PD is appended to a professional or outpatient service, the modifier indicates that the service is related to the inpatient admission. The total and technical components for professional and outpatient services that are related to the inpatient admission will be denied when submitted with modifier PD.

**Note:** *The professional interpretation component for professional and outpatient services that are related to the inpatient stay may be reimbursed separately even if accompanied by PD modifier.*

### 3.7.4.17.4 Professional and Outpatient Claims for Services Unrelated to the Inpatient Admission

Professional and outpatient services that are rendered within the specified timeframe by the hospital or an entity that is wholly owned or operated by the hospital may be reimbursed if they are identified as unrelated to the inpatient admission as follows:

- Professional and outpatient claims for diagnostic services that are unrelated to the inpatient admission must be submitted with modifier U4, which indicates the service is unrelated to the inpatient admission.
- Professional claims for non-diagnostic services that are unrelated to the inpatient admission will be identified by comparing the referenced diagnosis code that is on the professional claim to the principal inpatient diagnosis. Professional services must be submitted with modifier U4 if the services are unrelated and up to six digits of the referenced professional diagnosis code match the principle inpatient diagnosis code.
- Outpatient claims for non-diagnostic services that are unrelated to the inpatient admission will be identified by comparing the referenced diagnosis code that is on the outpatient claim to the principal inpatient diagnosis. The outpatient services must be submitted with condition code 51 if the services are unrelated and up to six digits of the referenced outpatient diagnosis code match the principle inpatient diagnosis code.

Unrelated services that are denied as part of the inpatient admission can be appealed with modifier U4 or condition code 51, which indicates that the service is unrelated to the inpatient admission.

**Note:** *Claims that are submitted with modifier U4 or condition code 51 will be subject to retrospective review and may be recouped if there is not sufficient documentation to indicate the service was unrelated to the inpatient admission.*

These benefit changes do not impact services rendered by providers that are not wholly owned or operated by the hospital.

### 3.7.4.18 Potentially Preventable Readmissions (PPR)

H.B. 1218, 81st Legislature, Regular Session 2009, requires that HHSC identify potentially preventable readmissions (PPRs) in the Medicaid population and report results confidentially to each hospital. The law also requires each hospital to distribute the information to its care providers.

### 3.7.5 Provider Cost and Reporting

The method of determining reasonable cost is similar to that used by Title XVIII (Medicare). Hospitals must include inpatient and outpatient costs in the cost reports submitted annually. The provider must prepare one copy of the applicable CMS Cost Report Form along with the required PCCM supplemental worksheets. The PCCM supplemental worksheets include the Inpatient PCCM D-4 worksheet, available from CMS, and the Outpatient PCCM D, Part V worksheet. A sample of the Outpatient PCCM D, Part V is available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 2.2.2, “Cost Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

If a change of ownership or provider termination occurs, the cost report is due within five months after the date of the change in ownership or termination. Any request for an extension of time to file must be made on or before the cost report due date and sent to TMHP Medicaid Audit at the address indicated under “Written Communication With TMHP” in the “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*). For questions or assistance, call TMHP Medicaid Audit at 1-512-506-7630 or email [audit.costreport@tmhp.com](mailto:audit.costreport@tmhp.com).

Annual cost reports must be filed as follows:

- Submit one copy of the cost report to TMHP Medicaid Audit within five months of the end of the hospital’s fiscal year along with any amount due to Texas Medicaid.
- TMHP Medicaid Audit performs a desk review of the cost report and makes a tentative settlement with the hospital. A tentative settlement letter requests payment for any balance due to Texas Medicaid or instructs TMHP to pay the amount due to the provider. Interim payment rates are changed at this time based on the cost report.
- Field audits are conducted when necessary.
- Medicaid final settlement is made after a copy of all the following information is received from the provider or the Medicare intermediary. The provider must send TMHP a copy of one of the following:
  - Audited or settled without audit Medicare Cost Report
  - Medicare Notice of Amount of Program Reimbursement
  - Medicare Audit Adjustment Report, if applicable

Medicaid hospitals may request copies of their claim summaries for their cost reporting fiscal year. The summaries for tentative settlements include three additional months of claim payments for the fiscal year. The summaries for final settlements include ten months of claim payments for the fiscal year. TMHP Medicaid Audit uses this data to determine the tentative and final settlements and interim rates.

The Medicaid claim summary data are only generated once each month, and the logs are received by the 15th of the following month. Requests for tentative settlement logs are submitted within 30 days after the fiscal year-end. Final settlement log requests are submitted within nine months after the fiscal year-end.

The Medicaid logs can be requested through the provider’s administrator account on the TMHP website at [www.tmhp.com](http://www.tmhp.com). Medicaid logs can also be requested by calling 1-512-506-7630, by emailing [audit.costreport@tmhp.com](mailto:audit.costreport@tmhp.com), or by sending a written request to the following address:

Texas Medicaid & Healthcare Partnership  
Medicaid Audit  
PO Box 200345  
Austin, TX 78720-0345

Allow 45 days for receipt of these logs.

### 3.7.6 Third Party Liability

**Referto:** “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*).

[Other Insurance Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

[Tort Response Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

## 4 Outpatient Hospital (Medical and Surgical Acute Care Outpatient Facility)

This section contains benefit, limitation, authorization, and claims filing information for outpatient hospital facility emergency, observation, and other services.

**Referto:** “Section 6: Claims Filing” (*Vol. 1, General Information*) for more comprehensive information about claims filing and appeals.

“Section 7: Appeals” (*Vol. 1, General Information*) for more comprehensive information about claims filing and appeals.

Hospital providers are encouraged to review the other handbooks for applicable information, prior authorization requirements, and for specific requirements for special programs.

### 4.1 General Information

Outpatient diagnostic, therapeutic, and surgical services that are rendered in an acute care hospital setting are services that are provided to clients by or under the direction of a physician.

Outpatient hospital services include those services that are rendered:

- In the emergency room (ER)
- As day surgery
- In the observation room
- By ancillary departments such as the laboratory, radiology, physical or occupational therapy, cardiac rehabilitation, hyperbaric chamber, infusion services, and other areas able to provide services in the outpatient setting.

#### 4.1.1 Drugs and Supplies

##### 4.1.1.1 Self-Administered Drugs

Self-administered drugs are defined as drugs that the client administers themselves at home and may include, but are not limited to, prescription drugs, vitamins, and supplements.

These drugs that are provided by the hospital during an outpatient hospital visit are included in the hospital reimbursement and are not reimbursed separately. The client cannot be billed for self-administered drugs that are provided by the hospital during an outpatient hospital stay.

##### 4.1.1.2 Take-Home Drugs and Supplies

Benefits do not include drugs and biologicals provided by the hospital and taken home by the client. Supplies provided by a hospital for use in physicians' offices are not reimbursable.

Take-home drugs and supplies are a benefit for services rendered to clients in the outpatient setting when supplied by prescription through the VDP.

#### 4.1.2 Outpatient Services Provided Without Charge

Texas Medicaid pays the clinic registration fee in lieu of other benefits when a hospital provides outpatient services without charge, and if the registration fee is less than the allowed Medicaid payment.

**Referto:** TAC Rule §354.1073 for information about authorized outpatient hospital services.

Subsection 1.11, “Texas Medicaid Limitations and Exclusions” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about noncovered items or services.

**4.1.3 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission**

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in this handbook for additional information about the payment window reimbursement guidelines.

**4.2 Services, Benefits, Limitations, and Prior Authorization**

**4.2.1 Prior Authorization Requirements**

The hospital is responsible for requesting prior authorization for the non-emergency transport to the client’s home or to a nursing home after a non-scheduled outpatient visit.

**Referto:** [Non-emergency Ambulance Prior Authorization Request](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

**4.2.2 Emergency Department Services**

An emergency department is defined as an organized hospital-based facility for the provision of unscheduled episodic services to clients who present for immediate medical attention. The facility must be available 24 hours a day, 7 days a week.

Hospital-based emergency departments are reimbursed for services based on a reasonable cost, based on the hospital’s most recent tentative Medicaid cost report settlement. The reasonable cost is reduced by a percentage determined by the state.

All claims that are submitted by outpatient hospital providers must include a procedure code with each revenue code for services that are rendered to Texas Medicaid clients. This procedure code must be listed on the same claim detail line as the emergency department revenue code.

The procedure code billed may include, but is not limited to, E/M, surgical or other procedure, or any other service rendered to the client in the emergency room. The procedure code must accurately reflect the services rendered in the hospital’s emergency department.

Emergency department reimbursement may include room charges and ancillary charges. Emergency department room charges may be submitted using the following revenue codes:

| Revenue Code | Description                                       |
|--------------|---------------------------------------------------|
| 450          | Emergency room                                    |
| 451          | Emergency room-EMTALA emergency medical screening |
| 456          | Emergency room, urgent care                       |
| 459          | Emergency room, other                             |

Emergency department ancillary services include, but are not limited to, the following:

- Laboratory services

- Radiology services
- Respiratory therapy services
- Diagnostic studies (including, but not limited to, ECGs, computed tomography (CT) scans, and supplies)

The administration of the injection will not be reimbursed to outpatient hospital providers. An injection or infusion administered by a nurse is included in the emergency room charge and is not reimbursed separately to the outpatient facility.

Ancillary services must be submitted on the UB-04 CMS-1450 paper claim form using the appropriate procedure codes or revenue codes for rendered services.

If a client visits the emergency room more than once in one day, the times must be given for each visit.

If the client ultimately is admitted as an inpatient within 48 hours of treatment in the ER or clinic, the ER or clinic charges must be submitted on the inpatient hospital claim form as an ancillary charge. The date of inpatient admission is the date the client initially was seen in the ER or clinic.

According to the Emergency Medical Treatment and Active Labor Act (EMTALA) of 1986, if any individual presents at the hospital's emergency department requesting an examination or treatment, the hospital must provide an appropriate medical screening examination and stabilization services within the capability of the hospital's emergency department, including ancillary services routinely available to the emergency department, to determine whether an emergency medical condition exists.

EMTALA medical screening code (451) may be considered for reimbursement when submitted as a stand-alone service and provided by a qualified medical professional as designated by the facility. Ancillary, professional, or facility services will not be considered for separate reimbursement. Services beyond screening (451) can be submitted with the appropriate corresponding emergency services code (450).

Medicaid claims administrators are prohibited from requiring prior authorization or primary care provider notification for emergency services including those needed to evaluate or stabilize an emergency medical condition or emergency behavioral health condition.

Texas Medicaid provides that certain undocumented aliens and legalized aliens who require treatment of an emergency medical condition or emergency behavioral health condition are eligible to receive that treatment. After the emergency condition requiring care is stabilized and is no longer an emergency, the coverage ends. If the alien continues to receive ongoing treatment after the emergency ceases, the ongoing treatment is not a benefit.

Texas Medicaid provides for medical services for eligible clients while out-of-state. The attending physician or other provider must document that the client was treated for an emergency condition. Out-of-state emergency services are also a benefit when the client's health would be in danger if he or she were required to travel back to Texas.

Emergency department services are subject to retrospective review.

In instances of sudden illness or injury, the client may receive treatment in the ER and be discharged, placed on observation status, or admitted as an inpatient.

#### **4.2.2.1 Emergency Department Payment Reductions**

Nonemergent and nonurgent evaluation and management (E/M) services rendered in the emergency room may be reimbursed at 125 percent of the adult, physician office visit fee for procedure code 99202. Reimbursement is based on the E/M procedure code submitted on the same line item as the emergency room revenue code.

Imaging services rendered by outpatient hospital providers are reimbursed at the flat fee that is based on the procedure code submitted on the same line item as the imaging revenue code.

**Note:** *Evaluation and management services that are rendered in the emergency room for critically ill or critically injured Texas Medicaid clients of any age, are not subject to reduction in payment.*

**Exception:** *Rural hospitals, nonemergent and nonurgent E/M services rendered in the emergency room may be reimbursed at 55 percent of the allowed rate.*

### 4.2.3 Day Surgery

Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

These procedures are for clients who are scheduled for a day surgery procedure and are not inpatient at the time the day surgery is performed.

#### 4.2.3.1 Inpatient Admissions for Day Surgeries

If a client is admitted for a day surgery procedure—whether scheduled or emergency—one of the following classifications may be considered an inpatient procedure.

- ASA Classification of Physical Status of III (P3), IV (P4), or V (P5)
- Classification of Heart Disease IV

The day surgery services must be submitted on an inpatient claim (TOB 111) using the hospital's NPI and taxonomy code. The reason for the surgery (principal diagnosis), any additional substantiated conditions, and the procedure must be included on one inpatient claim.

**Referto:** The Anesthesia standards at [www.asahq.org/standards-and-guidelines/asa-physical-status-classification-system](http://www.asahq.org/standards-and-guidelines/asa-physical-status-classification-system) for a description of the ASA classes of physical status.

The descriptions for ASA classes of physical status are as follows:

- **Class I.** A normal healthy patient, without organic, physiological, or psychiatric disturbance.  
**Example:** *Healthy patient with good exercise tolerance.*
- **Class II.** A patient with mild systemic disease, controlled medical conditions without significant systemic effects.  
**Example:** *Controlled hypertension or diabetes mellitus without system effects, cigarette smoking without evidence of chronic obstructive pulmonary disease (COPD), anemia, mild obesity, age less than 1 or greater than 70 years, or pregnancy.*
- **Class III.** A patient exhibiting severe systemic disturbance that may or may not be associated with the surgical complaint and that seriously interferes with the patient's activities.  
**Example:** *Severely limiting organic heart disease, severe diabetes with vascular complications; moderate to severe degrees of pulmonary insufficiency; angina pectoris or healed myocardial infarction.*
- **Class IV.** A patient exhibiting extreme systemic disturbance that may or may not be associated with the surgical complaint, that interferes with the patient's regular activities, and that has already become life-threatening.  
**Example:** *Organic heart disease with marked signs of cardiac insufficiency present (for example, cardiac decompensation); persistent anginal syndrome, or active myocarditis; advanced degrees of pulmonary, hepatic, renal, or endocrine insufficiency present.*

- *Class V.* The rare person who is moribund (in a dying state) before operation, whose pre-operative condition is such that he or she is expected to die within 24 hours even if not subjected to the additional strain of operation.

**Example:** *Burst abdominal aneurysm with profound shock; major cerebral trauma with rapidly increasing intracranial pressure; massive embolus.*

The Classification of Heart Disease consists of four classes:

- *Class I.* No limitation of physical activity. Ordinary physical activity does not cause undue fatigue, palpitation, dyspnea, or anginal pain.
- *Class II.* Slight limitation of physical activity. Comfortable at rest, but ordinary physical activity results in fatigue, palpitation, dyspnea, or anginal pain.
- *Class III.* Marked limitation of physical activity. Comfortable at rest, but less than ordinary activity causes fatigue, palpitation, dyspnea, or anginal pain.
- *Class IV.* Unable to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency, or of the anginal syndrome, may be present even at rest. If any physical activity is undertaken, discomfort occurs.

#### **4.2.3.2 Complications Following Elective or Scheduled Day Surgeries**

If a condition of the scheduled day surgery requires additional care beyond the recovery period, the client may be placed in outpatient observation (stay less than 48 hours). The observation period must be submitted on an outpatient claim (TOB 131) using the hospital's NPI and taxonomy code. If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation placement (excluding the surgical procedure) must be included on the inpatient claim (TOB 111) using the hospital's NPI and taxonomy code. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must still be submitted as an outpatient procedure under the HASC NPI and taxonomy code.

#### **4.2.3.3 Inpatient Admissions After Day Surgery**

If a complication occurs for which the client requires inpatient admission immediately following the day surgery (no observation period), the day surgery must be submitted as an outpatient procedure (TOB 131), using the appropriate hospital or HASC NPI and taxonomy code. The inpatient admission is to be submitted as an inpatient claim (TOB 111), using the hospital's NPI and taxonomy code. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must not be included on the inpatient claim. The inpatient admission must be medically necessary and is subject to retrospective review.

#### **4.2.3.4 Emergency or Unscheduled Day Surgeries**

These procedures are for clients who require an unscheduled (emergency) day surgery procedure and are not inpatient at the time the day surgery is performed.

If a client is first treated in the ER and then requires emergency surgery as an outpatient, claims for emergency, unscheduled outpatient surgical procedures must be filed itemizing each service, such as room charge, laboratory, radiology, anesthesia, and supplies. Providers must submit claims for unscheduled day surgery procedures and emergency services as outpatient procedures using the hospital NPI and taxonomy code. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status. The observation period must be submitted on the same outpatient claim.

Providers must submit claims for the unscheduled day surgery procedures and emergency services as outpatient procedures (TOB 131) using the hospital's NPI and taxonomy code. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status (stay less than 48 hours). The observation period must be submitted on the same outpatient claim (TOB 131) using the hospital's NPI and taxonomy code.

#### **4.2.3.5 Complications Following Emergency or Unscheduled Day Surgery**

If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation status (excluding surgical procedures and emergency services) must be included on the inpatient claim (TOB 111) using the hospital's NPI and taxonomy code. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery and emergency services must not be included on the inpatient claim since they are to be submitted using TOB 131 as outpatient procedures under the hospital's NPI and taxonomy code.

#### **4.2.3.6 Incomplete Day Surgeries**

Facilities must use either diagnosis codes Z5309, Z5329, Z538, or modifiers 73 (Discontinued outpatient procedure prior to anesthesia administration) or 74 (Discontinued outpatient procedure after anesthesia administration) to indicate that a surgical procedure, type of service (TOS) "F," was not completed. Claims billed with Z5309, Z5329, Z538, or modifiers 73 or 74 will be suspended for review of the medical documentation submitted with the claim.

Providers must submit the following documentation with the claim:

- The operative report
- The anesthesia report
- The reason that the operation was not complete

Reimbursement to HASC facilities for canceled or incomplete surgeries because of patient complications, is made according to the following criteria, depending on the extent to which the anesthesia or surgery proceeded:

- Reimburse at 0 percent of HASC payment for a procedure that is terminated for nonmedical or medical reasons before the facility has expended substantial resources.
- Reimburse at 33 percent of HASC payment up to the administration of anesthesia.
- Reimburse at 67 percent of HASC payment after the administration of anesthesia but before incision.
- Reimburse at 100 percent of HASC payment after incision.

Surgeries canceled because of incomplete pre-operative procedures are not reimbursed.

#### **4.2.4 Outpatient Observation Room Services**

Observation care is defined by the CMS as "a well-defined set of specific, clinically appropriate services, which include ongoing short term treatment, assessment, and reassessment, that are furnished while a decision is being made regarding whether clients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital."

Outpatient observation services are usually ordered for clients who present to the emergency department and who then require a significant period of treatment or monitoring in order to make a decision about their admission or discharge. The decision whether to discharge a client from the hospital following resolution of the reason for the observation care or to admit the client as an inpatient can be made in less than 48 hours, usually in less than 24 hours.

Outpatient observation services require the use of a hospital bed and periodic monitoring by the hospital's nursing or other ancillary staff to evaluate the client's condition and to determine the need for an inpatient admission. Outpatient observation services can be provided anywhere in the hospital. The level of care, not the physical location of the bed, dictates the observation status.

Outpatient observation services (revenue codes 760, 761, 762, and 769) are a benefit only when medically necessary and when provided under a practitioner's order or under the order of another person who is authorized by state licensure law and hospital bylaws to admit clients to the hospital and to order outpatient services.

Outpatient observation services are considered medically necessary if the following conditions are met (this list is not all-inclusive):

- The client is clinically unstable for discharge and one of the following additional conditions apply:
  - Laboratory, radiology, or other testing is necessary to assess the client's need for an inpatient admission.
  - The treatment plan is not established or, based on the client's condition, is anticipated to be completed within a period not to exceed 48 hours.
  - The client had a significant adverse response to therapeutic services, invasive diagnostic testing, or outpatient surgery and requires short-term monitoring or evaluation.
- The medical necessity for inpatient treatment is unclear, that is:
  - The client's medical condition requires careful monitoring and evaluation, or treatment to confirm or refute a diagnosis in order to determine whether an inpatient admission is necessary
  - There is a delayed or slow progression of the client's signs and symptoms that makes diagnosis difficult and the monitoring or treatment does not meet the criteria for an inpatient level of care.
  - The client is undergoing treatment for a diagnosed condition, and continued monitoring of clinical response to therapy may prevent an inpatient admission.
- The admitting practitioner anticipates that the client will require observation care for a minimum of eight hours.

Medically necessary services that do not meet the definition of observation care should be submitted separately or included as part of the emergency department or clinic visit, and are not reimbursed as observation care.

Outpatient observation services are not a substitute for a medically appropriate inpatient admission. If a client meets the medical necessity criteria for an inpatient admission and an inpatient admission is ordered by the practitioner, an inpatient admission is a benefit regardless of the length of stay. Claims for observation services may be denied in their entirety if the services should have initially been inpatient admissions or if a reason for an inpatient admission developed, but the observation stay was not converted to inpatient.

The determination of an inpatient or outpatient status for any given client is specifically reserved to the admitting practitioner. The decision must be based on the practitioner's expectation of the care that the client will require.

#### **4.2.4.1 Direct Outpatient Observation Admission**

A client may be directly admitted to outpatient observation from the evaluating practitioner's office without being seen in the emergency room by a hospital-based practitioner. The practitioner's order should clearly specify that the practitioner wants the client to be admitted to outpatient observation status. An order for "direct admission" will be considered an inpatient admission unless otherwise specified by the practitioner's orders.

Brief observation periods following an office visit or at the direction of an off-site practitioner that involve a simple procedure (e.g., a breathing treatment) would be more appropriately coded as a treatment room visit.

#### **4.2.4.2 Observation Following Emergency Room**

A client may be admitted to outpatient observation through the emergency room if the client presents to the facility with an unstable medical condition and the evaluating practitioner determines that outpatient observation is medically necessary to determine a definitive treatment plan. An unstable medical condition is defined as one of the following:

- A variance in laboratory values from what is considered the generally accepted, safe values for the individual client.
- Clinical signs and symptoms that are above or below those of normal range and that require extended monitoring and further evaluation.
- Changes in the client's medical condition are anticipated, and further evaluation is necessary.

If a client is admitted to observation status from the emergency room, the hospital is reimbursed only for the observation room charges. The emergency room charges are not reimbursed separately, but must be submitted on a separate detail on the same claim as the observation room charges.

Brief observation periods following an emergency room evaluation will not be reimbursed if the service would normally have been provided within the time frames and facilities of an emergency room visit.

#### **4.2.4.3 Observation Following Outpatient Day Surgery**

If a medical condition or complication of a scheduled day surgery requires additional care beyond the routine recovery period, the client may be placed in outpatient observation. The observation period should be submitted as an outpatient claim.

Reimbursement for outpatient observation after a scheduled day surgery is limited to situations in which the client exhibits an unusual reaction to the surgical procedure and requires monitoring or treatment beyond what is normally provided in the immediate post-operative period. Examples include, but are not limited to:

- Difficulty in awakening from anesthesia.
- A drug reaction.
- Other post-surgical complications.

#### **4.2.4.4 Observation Following Outpatient Diagnostic Testing or Therapeutic Services**

A client may be admitted to outpatient observation if the client develops a significant adverse reaction to a scheduled outpatient diagnostic test or to a therapeutic service, such as chemotherapy, that requires further monitoring. Observation services begin when the reaction occurred and end when the practitioner determines that the client is stable for discharge, or that an inpatient admission is appropriate.

#### **4.2.4.5 Documentation Requirements for Outpatient Observation**

Documentation that supports the medical necessity of the outpatient observation services must be maintained by the facility in the client's medical record. Documentation must include:

- The order of the ordering practitioner for admission to observation care, which must be dated and timed.
- The practitioner's admission and progress notes, which must be dated and timed, confirm the need for observation care, and outline the client's condition, treatment, and response to treatment.

- Nurse's notes, which must be dated and timed, reflect the time at which the client was admitted to the observation bed, and the reason for the observation stay.
- All supporting diagnostic and ancillary testing reports, including orders for the testing or any preadmission testing.
- Procedure notes and operative notes that address any complication that would support admission to observation status and must be dated and timed.
- Anesthesia and recovery room/post anesthesia care unit notes from the practitioner and the nurse, which must be dated and timed and detail orders and any complications that require admission to observation status.
- Documentation related to an outpatient clinic visit or critical care service that was provided on the same date of service as the observation service. The documentation must address any need for observation services and be dated and timed.
- All of the client education that was provided during the observation stay.
- The order for discharge from observation care, which must be signed, dated, and timed.
- The discharge notes, including nurse's notes that reflect the date and time at which the client was discharged from observation.

The client must be in the care of a practitioner during the period of observation, as documented in the medical record by admission, discharge, and other appropriate progress notes that are dated, timed, written, and signed by the practitioner.

Claims submitted for outpatient procedures in which the original intention was to keep the client for an extended period of time, such as overnight or for a 48-hour period, will be denied unless significant medical necessity is documented.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the outpatient observation services. Medical records will be evaluated to determine whether the practitioner's order (practitioner intent) and the services that were actually provided were consistent.

The medical records must clearly support the medical necessity of the outpatient observation services and must include a timed order for observation services that will support the number of hours that the client was under observation care and the hours that were submitted for payment.

#### **4.2.4.6 Reporting Hours of Observation**

Providers must submit the number of observation hours the client was under observation care.

Observation time begins at the clock time documented in the client's medical record. This time should coincide with the time that the client is placed in a bed for the purpose of initiating observation care in accordance with the practitioner's order.

Observation time ends when all medically necessary services related to observation care are completed. The end time of observation services may coincide with the time the client is actually discharged from the hospital or is admitted as an inpatient.

Hospitals should round clock times for the beginning and end of observation to the nearest hour and submit the total number of hours for the observation stay on the claim. For the purposes of submitting claims for observation services, one unit equals one hour. Partial units or hours should be rounded up or down to the nearest hour. Claims submitted with observation room units exceeding 48 hours will be denied.

Any service that was ordered within the observation period may be included on the outpatient claim if a practitioner's order for the service was made within the observation period time frame but hospital scheduling limitations prevented the service from being performed before the 48 hours expired. Any

services ordered after 48 hours must not be included on the outpatient claim nor billed to the client. If a period of observation spans more than one calendar day (i.e., extends past midnight), all of the hours for the entire period of observation must be included on a single line, and the date of service for that line is the date on which the observation care began.

Observation time may include medically necessary services and follow-up care that is provided after the time the practitioner writes the discharge order, but before the client is discharged. Reported observation time does not include the time the client remains in the observation area after treatment is completed for reasons such as waiting for transportation home.

Observation services must not be submitted concurrently with diagnostic or therapeutic services for which active monitoring is part of the procedure. In situations where a diagnostic or therapeutic procedure interrupts the observation stay, hospitals should record for each period of observation services the beginning and ending times of the observation period and add the lengths of time for the periods of observation services together to reach the total number of units reported on the claim.

Recovery room hours that are associated with an outpatient procedure must not be submitted simultaneously with hours of observation time.

Revenue code 761 will be denied if it is submitted for the same date of service by the same provider as revenue code 760, 762, or 769.

#### **4.2.4.7 Client Status Change**

When a client's status changes from outpatient observation to inpatient admission within the allowed 48-hour observation period, both the outpatient observation service and the inpatient admission must be submitted as separate details on the same inpatient claim.

The inpatient claim must include:

- The provider must submit the correct FDOS and Date of Admission (DOA) on the claim header.
- Charges for the observation room on the inpatient claim may be coded using the appropriate revenue code (760, 761, 762, or 769).
- The observation services are considered part of the facility's DRG payment, and are not separately reimbursed.

The practitioner's order for a change in client status from outpatient observation to inpatient admission must be written, dated, and timed before the outpatient observation claim is submitted for reimbursement.

#### **4.2.4.8 Inpatient Admission to Outpatient Observation**

When a client is admitted to the hospital as an inpatient and a subsequent internal utilization review (UR) determines that the services did not meet inpatient criteria, the hospital may change the client's status from inpatient to outpatient observation. The order to change from an inpatient to outpatient observation admission is effective for the same date and time as the inpatient order. This practice is acceptable under Texas Medicaid if all of the following conditions are met:

- The change in client status is made before the claim is submitted.
- The hospital has not submitted a claim for the inpatient admission.
- The practitioner responsible for the care of the client concurs with the hospital UR determination to change to outpatient status.
- The practitioner's concurrence with the UR decision is documented in the client's medical record.

**Note:** *When the hospital has determined that it may submit an outpatient claim according to the conditions described above, the entire episode of care should be billed as an outpatient episode of care.*

Reimbursement for emergency room (ER) and observation services are considered part of the inpatient DRG payment and must be submitted as separate details on the inpatient claim when the client is admitted as an inpatient under one or both of the following circumstances:

- The client has spent fewer than 24 hours after presenting in the ER without being placed in observation status.
- The client has spent fewer than 48 hours in observation status after presenting in the ER.

The date of admission on the inpatient claim must reflect the date the client presents at the hospital.

If the client is admitted as an inpatient more than 24 hours after presenting in the ER without being placed in observation status or more than 48 hours after being placed in observation status, the ER and observation services may be reimbursed separately as outpatient services.

### Examples

The following examples indicate the appropriate dates of admission and claim submissions for different scenarios:

#### Scenario 1

In scenario 1, the ER and outpatient observation services must be submitted on the inpatient hospital claim, because the ER services are within 24 hours of the observation services, and the observation services are within 48 hours of the inpatient admission, and the client was not discharged and sent home before being admitted as an inpatient.

The inpatient admission date reflects the date the patient presented at the ER.

| Date and Time       | Patient Services                                                                                |
|---------------------|-------------------------------------------------------------------------------------------------|
| 5/1/12 (11:50 p.m.) | Patient presents in the ER                                                                      |
| 5/2/12 (12:30 a.m.) | 40 minutes later, patient is placed in observation status                                       |
| 5/3/12 (12:00 a.m.) | 23.5 hours later, after placement is in observation status, patient is admitted as an inpatient |

Claims submissions are as follows:

- *ER visit:* Submitted on the inpatient claim as a separate detail (part of the DRG payment)
- *Observation services:* Submitted on the inpatient claim as a separate detail (part of the DRG payment)
- *Date of inpatient admission:* May 1, 2012

#### Scenario 2

In scenario 2, the ER service was more than 24 hours before the observation period began and must be submitted on an outpatient hospital claim. The observation service must be billed on the inpatient hospital claim because the service was within 48 hours of the inpatient admission, and the client was not discharged and sent home before being admitted as an inpatient.

The inpatient admission date reflects the date the patient was placed in observation status.

| Date and Time       | Patient Services                                          |
|---------------------|-----------------------------------------------------------|
| 5/1/12 (11:50 p.m.) | Patient presents in the ER                                |
| 5/2/12 (11:55 p.m.) | 24 + hours later, patient is placed in observation status |
| 5/3/12 (4:00 a.m.)  | 4 hours later, patient admitted as an inpatient           |

Claims submissions are as follows:

- *ER visit*: Submitted on an outpatient claim and reimbursed separately from the observation and inpatient services
- *Observation services*: Submitted on the inpatient claim as a separate detail (part of the DRG payment)
- *Date of inpatient admission*: May 2, 2012

### Scenario 3

In scenario 3, the ER service must be submitted on an outpatient claim as part of the observation service because the ER service was within 24 hours of the observation service. The observation service may be reimbursed separately from the inpatient admission because the observation service was more than 48 hours before the inpatient admission, and the client was not discharged and sent home before being admitted as an inpatient.

The inpatient admission date reflects the date the patient was admitted as an inpatient.

| Date and Time       | Patient Services                                       |
|---------------------|--------------------------------------------------------|
| 5/1/12 (11:50 p.m.) | Patient presents in the ER                             |
| 5/2/12 (12:30 a.m.) | 40 minutes later, patient placed in observation status |
| 5/4/12 (12:45 a.m.) | 48 + hours later patient admitted as an inpatient      |

Claims submissions are as follows:

- *ER visit*: Submitted on an outpatient claim and reimbursed as part of the outpatient observation services
- *Observation services*: Submitted on the outpatient claim and reimbursed separately from the inpatient services
- *Date of inpatient admission*: May 4, 2012

### Scenario 4

In scenario 4, the ER service may be reimbursed separately because it was more than 24 hours before the client was placed in observation status. The observation service may be reimbursed separately because it was more than 48 hours before the client was admitted as an inpatient.

The inpatient admission date reflects the date the patient was admitted as an inpatient.

| Date and Time       | Patient Services                                          |
|---------------------|-----------------------------------------------------------|
| 5/1/12 (11:50 p.m.) | Patient presents in the ER                                |
| 5/2/12 (11:55 p.m.) | 24 + hours later, patient is placed in observation status |
| 5/4/12 (12:00 p.m.) | 48 + hours later, patient admitted as an inpatient        |

Claims submissions are as follows:

- *ER visit*: Submitted on an outpatient claim and reimbursed separately from the observation and inpatient services.
- *Observation services*: Submitted on an outpatient claim and reimbursed separately from the inpatient services.
- *Date of inpatient admission*: May 4, 2012

**Scenario 5**

In scenario 5, the ER service must be submitted on an outpatient claim as part of the observation service because the ER service was within 24 hours of the observation service. The observation service may be reimbursed separately from the inpatient admission because the client was discharged and sent home without being admitted as an inpatient.

The inpatient admission date reflects the date the patient presented at the ER after being discharged and sent home 14 hours earlier.

| Date and Time       | Patient Services                                                                 |
|---------------------|----------------------------------------------------------------------------------|
| 5/1/12 (11:50 p.m.) | Patient presents in the ER                                                       |
| 5/2/12 (12:30 a.m.) | 40 minutes later, patient is placed in observation status.                       |
| 5/2/12 (10:00 a.m.) | 9.5 hours later, patient is discharged and sent home                             |
| 5/3/12 (12:05 a.m.) | 14 hours later, patient presents at the ER again and is admitted as an inpatient |

Claims submissions are as follows:

- *ER visit*: Submitted on an outpatient claim and reimbursed as part of the observation services
- *Observation services*: Submitted on the outpatient claim and reimbursed separately from the inpatient services
- *Date of inpatient admission*: May 3, 2012

When the hospital has determined that it may submit an outpatient claim according to the conditions described above, the entire episode of care should be submitted as an outpatient episode of care.

**4.2.4.9 Observation Services that are not a benefit**

Outpatient observation services that are not medically necessary or appropriate are not benefits of Texas Medicaid, including, but not limited to, services provided under the following circumstances:

- As a substitute for an inpatient admission.
- Without a practitioner's order, including services ordered as inpatient services by the ordering practitioner, but submitted as outpatient by the billing office.
- For clients awaiting transfer to another facility, such as for nursing home placement.
- For clients with lack of or delay in transportation.
- As a convenience to the client, client's family, the practitioner, hospital, or hospital staff.
- For routine preparation before, or recovery after, outpatient diagnostic or surgical services.
- When an overnight stay is planned before diagnostic testing.
- To medically stable clients who need diagnostic testing or outpatient procedures that are routinely provided in an outpatient setting.
- Following an uncomplicated treatment or procedure.
- As standing orders for observation following outpatient surgery.
- For postoperative monitoring during a standard recovery period of four to six hours, which is considered part of the recovery room service.
- For outpatient blood or chemotherapy administration and concurrent services.
- For services that would normally require an inpatient admission.
- Beyond 48 hours from the time of the observation admission.

- For a medical examination for clients who do not require skilled support.

#### 4.2.5 Hospital-Based Rural Health Clinic Services

Hospital-based RHCs must use the encounter code T1015. A hospital-based RHC is paid based on an all-inclusive encounter rate. One of the following modifiers must be submitted for general medical services: AH, AJ, AM, SA, TD, TE, or U7.

The services listed below must be submitted using the RHC NPI and the appropriate benefit code:

- THSteps medical checkups
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations provided in hospital-based RHCs

These services must be submitted with an AM, SA, or U7 modifier if performed in an RHC setting. Claims are paid under the Prospective Payment System (PPS) reimbursement methodology.

When submitting a claim on the CMS-1500 paper claim form, providers must use the appropriate national POS (72) for an RHC setting.

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be submitted using the individual or group physician NPI and taxonomy code.

Hospital-based RHCs must submit claims for pneumococcal and influenza vaccines as non- RHC services, under their hospital NPI and taxonomy code.

**Note:** *A visit is a face-to-face encounter between an RHC client and a physician, PA, nurse practitioner (NP), certified nurse-midwife (CNM), visiting nurse, or clinical NP. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one or the other of the following conditions exists:*

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The RHC client has a medical visit and an other health visit.

An other health visit includes, but is not limited to, a face-to-face encounter between an RHC client and a clinical social worker.

#### 4.2.6 Cardiac Rehabilitation

Cardiac rehabilitation is a physician-supervised program that furnishes physician-prescribed exercise, cardiac risk factor modification, psychosocial assessment, and outcomes assessment.

Outpatient cardiac rehabilitation is considered reasonable and necessary for clients who have had one of the following within 12 months of beginning the cardiac rehabilitation program:

- Acute myocardial infarction
- Coronary artery bypass surgery (CABG)
- Percutaneous transluminal coronary angioplasty or coronary stenting
- Heart valve repair or replacement
- Major pulmonary surgery
- Sustained ventricular tachycardia or fibrillation
- Class III or class IV congestive heart failure

- Chronic stable angina

**Note:** *A cardiac rehabilitation program in which the cardiac monitoring is done using telephonically transmitted electrocardiograms to a remote site is not covered by Texas Medicaid.*

Cardiac rehabilitation must be provided in a facility that has the necessary cardiopulmonary, emergency, diagnostic, and therapeutic life-saving equipment (i.e. oxygen, cardiopulmonary resuscitation equipment, or defibrillator) available for immediate use. If no clinically significant arrhythmia is documented during the first three weeks of the program, the provider may have the client complete the remaining portion without telemetry monitoring by the physician's order.

Although cardiac rehabilitation may be considered a form of physical therapy, it is a specialized program conducted by non-physician personnel who are trained in both basic and advanced cardiac life support techniques and exercise therapy for coronary disease, and provide the services under the direct supervision of a physician.

Direct supervision of a physician means that a physician must be immediately available and accessible for medical consultations and emergencies at all times when items and services are being furnished under cardiac rehabilitation programs. Outpatient cardiac rehabilitation begins after the client has been discharged from the hospital. A physician's prescription is required after the acute convalescent period and after it has been determined that the client's clinical status and capacity will allow for safe participation in an individualized progressive exercise program. Outpatient cardiac rehabilitation requires close monitoring and direct supervision by a physician and includes:

- Medical evaluation performed by the physician responsible for prescribing the client's rehabilitation program and includes a clinical examination, a medical history, and an initial plan or goal.
- An education and counseling program to modify risk factors (nutritional counseling, stress reduction, smoking cessation, weight loss, etc.).
- Prescribed exercise concurrent with and without electrocardiogram (ECG) monitoring.
- Services performed in an approved facility by trained professionals.

**Note:** *Direct supervision is met when the services are performed on hospital premises or within 250 yards of the hospital.*

Cardiac rehabilitation will be limited to a maximum of 2 one-hour sessions per day and 36 sessions over 18 weeks per rolling year.

Providers must obtain prior authorization for additional cardiac rehabilitation sessions, which will be limited to a maximum of 36 sessions in an extended period of time in a 52-week period from the date of authorization of additional sessions.

To confirm that a continuation of cardiac rehabilitation is at the request of, and coordinated with the attending physician, the medical record must include evidence of communication between the cardiac rehabilitation staff and either the medical director or the referring physician. If the physician responsible for such follow-up is the medical director, then his or her notes must be evident in each client's medical record.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions if the medical record contains documentation that the client has had another cardiac event, or if the prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. Medical necessity documentation must include the following:

- Progress made from the beginning of the cardiac rehabilitation period to the current service request date, including progress towards previous goals
- Information that supports the client's capability of continued measurable progress

- A proposed treatment plan for the requested extension dates with specific goals related to the client's individual needs

Prior authorization must be obtained through the TMHP Special Medical Prior Authorization (SMPA) Department. Providers must send prior authorization requests, along with documentation to support medical necessity, to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727  
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

The evaluation provided by the cardiac rehabilitation team at the beginning of each cardiac rehabilitation session is not considered a separate service and will be included in the reimbursement for the cardiac rehabilitation session. Evaluation and management (E/M) services unrelated to cardiac rehabilitation may be submitted with modifier 25 appended to the E/M code when supporting documentation in the medical record demonstrates a separately identifiable E/M service was provided on the same day by the same provider who renders the cardiac rehabilitation.

Physical and occupational therapy will not be reimbursed separately when furnished in addition to cardiac rehabilitation exercise program services unless there is also a diagnosis of a non-cardiac condition requiring such therapy.

**Example:** *If a client is recuperating from an acute phase of heart disease and has had a stroke that requires physical or occupational therapy, the physical or occupational therapy for the stroke may be reimbursed separately from the cardiac rehabilitation services for the acute phase of heart disease.*

When provided as part of the cardiac rehabilitation program, client education services, such as formal lectures and counseling on diet, nutrition, and sexual activity to assist the client in adjusting living habits because of the cardiac condition, will not be separately reimbursed.

Procedure code S9472 (cardiac rehabilitation program nonphysician provider per diem) is used for hospitals submitting claims for cardiac rehabilitation, and it must be submitted with revenue code 943 (other therapeutic services-cardiac rehabilitation) and one of the following diagnosis codes:

| Diagnosis Codes |        |       |       |       |        |        |        |
|-----------------|--------|-------|-------|-------|--------|--------|--------|
| I110            | I160   | I161  | I169  | I201  | I202   | I208   | I209   |
| I2101           | I2102  | I2109 | I2111 | I2119 | I2121  | I2129  | I213   |
| I214            | I219   | I21A1 | I21A9 | I220  | I221   | I222   | I228   |
| I229            | I2720  | I2721 | I2722 | I2723 | I2724  | I2729  | I2783  |
| I501            | I5020  | I5021 | I5022 | I5023 | I5030  | I5031  | I5032  |
| I5033           | I5040  | I5041 | I5042 | I5043 | I50810 | I50811 | I50812 |
| I50813          | I50814 | I5082 | I5083 | I5084 | I5089  | I509   | I5A    |
| Z941            | Z943   | Z951  | Z952  | Z953  | Z954   | Z955   | Z9861  |
| Z98890          |        |       |       |       |        |        |        |

Coverage of cardiac rehabilitation programs is considered reasonable and necessary only for clients who have documentation of acute myocardial infarction, coronary artery bypass surgery (CABG), percutaneous transluminal coronary angioplasty or coronary stenting heart valve repair/replacement, major

pulmonary surgery, sustained ventricular tachycardia or fibrillation, class III or class IV congestive heart failure, or chronic stable angina within the past twelve (12) months prior to the beginning of the program.

**4.2.7 Chemotherapy Administration**

Hospitals must submit outpatient charges using the appropriate revenue codes for room charges, supplies, IV equipment, and pharmacy.

Revenue code 636 may be reimbursed for the technical component of prolonged infusion of chemotherapeutic agents. The most appropriate chemotherapy procedure code must be billed with revenue code 636.

**4.2.8 Colorectal Cancer Screening**

Fecal occult blood tests, multi-targeted stool DNA (mt-sDNA) tests, screening colonoscopies, and sigmoidoscopies evidence-based methods of colorectal cancer screening.

**4.2.8.1 Fecal Occult Blood Tests**

Procedure codes G0328 (with modifier QW) and 82270 may be reimbursed one service per rolling year for clients who are 45 years of age and older.

**4.2.8.2 MT-sDNA Tests**

Procedure code 81528 may be reimbursed once every 3 years for clients who are 45 years of age and older for services rendered in the laboratory setting.

**4.2.8.3 Sigmoidoscopies**

Procedure code G0104 may be reimbursed once every 5 years and is limited to one of the following diagnosis codes:

| Diagnosis Codes                                                                                                                                                                                                      |        |        |         |         |         |        |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|---------|---------|---------|--------|--------|
| Z0000*                                                                                                                                                                                                               | Z0001* | Z1210  | Z1211   | Z1213   | Z859    | Z86002 | Z86003 |
| Z86004                                                                                                                                                                                                               | Z86006 | Z86007 | Z860100 | Z860102 | Z860109 |        |        |
| *Diagnosis code Z0000 or Z0001 may be used for screening if no other diagnosis is appropriate for the service rendered, but no more frequently than recommended by the U.S. Preventive Services Task Force (USPSTF). |        |        |         |         |         |        |        |

**4.2.8.4 Colonoscopies**

Procedure code G0105 may be reimbursed once every two years for clients who meet the definition of high-risk. Procedure code G0105 must be submitted with one of the following diagnosis codes:

| Diagnosis Codes |         |        |        |        |        |        |        |
|-----------------|---------|--------|--------|--------|--------|--------|--------|
| K5000           | K50011  | K50012 | K50013 | K50014 | K50018 | K5010  | K50111 |
| K50112          | K50113  | K50114 | K50118 | K5080  | K50811 | K50812 | K50813 |
| K50814          | K50818  | K5090  | K50911 | K50912 | K50913 | K50914 | K50918 |
| K50919          | K5120   | K51211 | K51212 | K51213 | K51214 | K51218 | K5130  |
| K51311          | K51312  | K51313 | K51314 | K51318 | K5180  | K51811 | K51812 |
| K51813          | K51814  | K51818 | K5190  | K51911 | K51912 | K51913 | K51914 |
| K51918          | K51919  | K523   | K5281  | K5282  | K52831 | K52832 | K52838 |
| K52839          | K5289   | K529   | Z800   | Z83710 | Z83711 | Z83718 | Z83719 |
| Z8372           | Z85038  | Z85048 | Z859   | Z86002 | Z86003 | Z86004 | Z86006 |
| Z86007          | Z860101 |        |        |        |        |        |        |

**Referto:** Subsection 9.2.15.1.1, “Colorectal Cancer Screening” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

**4.2.8.5 Exclusions**

Barium enemas for colorectal cancer screening are not a benefit of Texas Medicaid.

**4.2.9 Computed Tomography and Magnetic Resonance Imaging**

Prior authorization is required for all outpatient nonemergent (i.e., those that are scheduled) CT, computed tomography angiography (CTA), magnetic resonance imaging (MRI), and magnetic resonance angiography (MRA) studies before services are rendered. Authorization is not required for the emergency department or inpatient hospital radiology services. Retroactive authorization may be required for some outpatient emergent studies.

Reimbursement for procedures with descriptions that specify “with contrast” include payment for contrast materials. Some diagnostic radiopharmaceuticals are benefits of Texas Medicaid. Outpatient hospitals may submit the total component of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 77371           | 77372 | 77373 | 77422 | 77423 | 77520 | 77525 | G0339 |  |  |

Procedure code 77399 may be submitted as either the total component or the technical component.

Providers can refer to the [OFL](#) or the applicable fee schedules on the TMHP website at [www.tmhp.com](http://www.tmhp.com) to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid. OFL and static fee schedules available on the TMHP website display fees after applicable rate reductions have been applied. Previously, the OFL and static fee schedules did not reflect all rate reductions, and providers were required to calculate the 1- and 2-percent reductions implemented.

**Referto:** Subsection 4.2.9, “Computed Tomography and Magnetic Resonance Imaging” in this handbook for additional information about prior authorization requirements.

Subsection 4.2.6, “Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information about emergency outpatient imaging services.

**4.2.10 Electrodiagnostic (EDX) Testing**

Electromyography (EMG) and nerve conduction studies (NCS), collectively known as EDX testing, must be medically indicated and may be reimbursed to outpatient hospitals. Testing must be performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

NCS and EMG studies are diagnosis restricted and may require prior authorization.

**Referto:** Subsection 9.2.26.7, “Esophageal pH Probe Monitoring” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

**4.2.11 Fluocinolone Acetonide**

The fluocinolone acetonide intravitreal implant may be reimbursed for services rendered to clients who are 12 years of age and older. Procedure code J7311 is only payable with a posterior uveitis diagnosis of more than six months duration and the condition has been unresponsive to oral or systemic medication treatment.

#### 4.2.11.1 Prior Authorization for Fluocinolone Acetonide

To request prior authorization, providers must submit requests by fax or mail to the SMPA Department at:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727  
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### 4.2.12 Fetal Nonstress Testing and Contraction Stress Test

Claims for nonstress and contraction stress testing conducted in the outpatient setting must be submitted with revenue code 729. Services during an inpatient hospital stay are reimbursed under the hospital's DRG.

**Referto:** Section 4.1.1, "Antepartum and Fetal Invasive Procedures" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

#### 4.2.13 Hyperbaric Oxygen Therapy (HBOT)

HBOT is a type of therapy that increases the environmental oxygen pressure to promote the movement of oxygen from the environment into the client's body tissues. Such treatment may be a benefit of Texas Medicaid when it is performed in specially constructed hyperbaric chambers, pressurized to 1.4 atmosphere absolute (atm abs) or higher, which may hold one or more clients (sea-level pressure is equal to 1 atm.abs). Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, this use of oxygen is not considered hyperbaric oxygen treatment in itself.

HBOT procedure codes 99183 and G0277 require prior authorization before the date that service is initiated.

The number of billable units of procedure code G0277 is based upon the time that the client receives treatment with hyperbaric oxygen.

In calculating how many 30-minute intervals to report, hospitals should take into consideration the time spent under pressure during descent, air breaks, and ascent, (in minutes), as follows:

- The first unit is for the time spent in the chamber receiving hyperbaric oxygen and must be for a minimum of 16 minutes.
- To bill for a second (or subsequent unit), all previous units of time must have been for the full thirty minutes, and the last unit must be for 16-30 minutes.

Procedure code 99183 equates to one total treatment (one professional session).

Procedure code G0277 must be billed with revenue code B-413 on the same claim. If procedure code G0277 is not on the same claim as revenue code B-413, the claim will be denied.

**Referto:** Subsection 9.2.33, "Hyperbaric Oxygen Therapy (HBOT)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

#### 4.2.14 Laboratory Services

Routine laboratory services, directly related to the surgical procedure being performed, are not reimbursed separately. Claims for nonroutine laboratory services provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery. Outpatient claims for laboratory services must reflect only tests actually performed by the hospital laboratory.

**Exception:** Hospital laboratories may submit claims for all the tests performed on a specimen if some but not all the tests are done by another laboratory on referral from the hospital submitting the claim.

The billing hospital must enter the name and NPI and taxonomy code of the performing laboratory in Block 80 of the UB-04 CMS-1450 paper claim form and must enter the performing laboratory's NPI and taxonomy code next to the service provided by the performing laboratory.

Hospitals may submit claims for a handling fee (procedure code 99001) for collecting and forwarding a specimen to a referral laboratory when the laboratory handling fee is not being billed through other methods. Only one handling fee may be charged per day, per client, unless specimens are sent to two or more different laboratories; this must be documented on the claim.

**Referto:** The *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

#### 4.2.14.1 Clinical Laboratory Improvement Amendments (CLIA)

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA will not be reimbursed for laboratory services.

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about CLIA.

The *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

#### 4.2.15 Lung Volume Reduction Surgery (LVRS)

LVRS surgery must be performed in a facility that meets at least one of the following requirements:

- Certified under the Disease Specific Care Certification Program for LVRS by the Joint Commission on Accreditation of Health Care Organization (JCAHO)
- Approved by Medicare as a lung or heart-lung transplant facility

The surgery must be both preceded and followed by a program of diagnostic and therapeutic services that are consistent with those provided in the National Emphysema Treatment Trial (NETT) and designed to maximize the client's potential to successfully undergo and recover from surgery. The program must meet all of the following requirements:

- Include a 6-to 10-week series of at least 16, and no more than 20, pre-operative sessions, each lasting a minimum of 2 hours
- Include at least 6, and no more than 10, post-operative sessions, each lasting a minimum of 2 hours, within 8 to 9 weeks after the LVRS
- Be consistent with the care plan that was developed by the treating physician following the performance of a comprehensive evaluation of the client's medical, psychosocial, and nutritional needs
- Be arranged, monitored, and performed under the coordination of the facility where the surgery takes place. Prior authorization is required for the LVRS procedure. However; prior authorization is not required for the pre-operative and post-discharge pulmonary services

LVRs must be prior authorized and is limited to clients who have severe emphysema, disabling dyspnea, and evidence of severe air trapping. Prior authorization is not required for the associated preoperative pulmonary surgery services for preparation of LVRs (procedure codes G0302, G0303, and G0304) or the associated postdischarge pulmonary surgery services after LVRs (procedure code G0305).

LVRs and post-discharge LVRs are restricted to the following emphysema diagnosis codes:

| Diagnosis Codes |      |      |      |      |
|-----------------|------|------|------|------|
| J430            | J431 | J432 | J438 | J983 |

Procedure codes 32491, G0302, G0303, G0304 and G0305 are limited to one per rolling year per client any provider.

Procedure code G0305 may be reimbursed only if a claim for LVRs (procedure code 32491) has been submitted within the past 12 months.

**Referto:** Subsection 9.2.44, “Lung Volume Reduction Surgery (LVRs)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

#### 4.2.16 Magnetoencephalography (MEG) Services

Inpatient and outpatient hospitals must use revenue code 860 or 861 for reimbursement of magnetoencephalography (MEG) services. The appropriate MEG procedure code must be listed on the claim.

**Note:** Reimbursement to an outpatient hospital will be based on the submitted procedure code.

**Referto:** Subsection 9.2.66, “Magnetoencephalography (MEG)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

#### 4.2.17 Neurostimulators

Neurostimulators may be a benefit in the outpatient hospital setting when medically necessary. All procedures require prior authorizations.

**Referto:** Subsection 9.2.46, “Neurostimulators” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Subsection 4.2.17.1, “Prior Authorization for Neurostimulators” in this handbook.

##### 4.2.17.1 Prior Authorization for Neurostimulators

All devices and related procedures for the initial application or surgical implantation of the stimulator device require prior authorization. Requests for prior authorization must be submitted to the SMPA Department.

**Referto:** Subsection 9.2.46.15, “Prior Authorization of Neurostimulator Devices Procedure Codes” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

#### 4.2.18 Occupational and Physical Therapy Services

**Referto:** The *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for more information about therapy services.

#### 4.2.19 Radiation Therapy Services

Take-home drugs given during the course of therapy can be reimbursed separately through the VDP.

Hospitals use revenue code 333, Radiation therapy, on the UB-04 CMS-1450 paper claim form when submitting charges for these services.

The following radiation therapy services provided in an outpatient setting are allowed only once per day unless documentation of medical necessity supports the need for repeated services:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment
- Intracavity radiation source application
- Interstitial radiation source application
- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization, and radioisotope therapy

**4.2.19.1 Radiopharmaceuticals**

Radiopharmaceuticals may be considered for separate reimbursement when used for therapeutic treatment.

The following procedure codes are payable to outpatient hospitals:

| Procedure Codes               |       |       |       |       |       |       |       |  |  |
|-------------------------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 79403*                        | A9513 | A9542 | A9543 | A9563 | A9564 | A9600 | A9699 |  |  |
| *Total or technical component |       |       |       |       |       |       |       |  |  |

Strontium-89 chloride may be billed using procedure code A9600 and will be limited to a total of 10 mci intravenously injected every 90 days, any provider.

Strontium-89 chloride is reimbursed as one service per 90 days for any provider.

Strontium-89 chloride will be considered when submitted with diagnosis code C7951 or C7952.

Sodium phosphate p-32, therapeutic, will be considered when submitted with one of the following diagnoses:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C7951           | C7952 | C9110 | C9112 | C9192 | C91Z2 | C9292 | C92Z2 |
| C9512           | C9592 | D45   |       |       |       |       |       |

Chromic phosphate p-32 suspension will considered when submitted with diagnosis code C782 (secondary malignant neoplasm of the pleura) and diagnosis code C786 (secondary malignant neoplasm of the retroperitoneum and peritoneum).

**Referto:** Subsection 9.2.64, “Radiation Therapy” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*).

### Prior Authorization for Therapeutic Radiopharmaceuticals

Procedure codes A9542 and A9543 require prior authorization. Ibritumomab tiuxetan will be considered when submitted with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C8259           | C8399 | C8499 | C84A9 | C84Z9 | C8519 | C8529 | C8589 |
| C8599           |       |       |       |       |       |       |       |

Prior authorization is required for procedure codes A9542 and A9543, which will be considered with documentation of all of the following:

- A diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin's lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy.
- Marrow involvement is less than 26 percent.
- Platelet count is 100,000 cell/mm<sup>3</sup> or greater.
- Neutrophil count is 1,500 cells/mm<sup>3</sup> or greater.
- Client has failed a trial of rituximab.

Lutetium lu 177 dotatate (Lutathera) intravenous injection (procedure code A9513) is indicated for the treatment of clients who are 18 years of age or older with a diagnosis of gastroenteropancreatic-neuroendocrine tumors. For all other indications, Lutetium lu 177 dotatate (Lutathera) injection for intravenous use is not proven to be medically effective and is considered experimental.

Lutetium lu 177 dotatate (Lutathera) procedure code A9513 must be administered under the control of an oncologist or a nuclear medicine specialist who is licensed and authorized to administer radiopharmaceuticals in an outpatient setting. Prior authorization requests must be submitted to the Special Medical Prior Authorization (SMPA) department at TMHP using the Special Medical Prior Authorization (SMPA) Request Form.

An SMPA Request Form must be completed, signed, and dated by the prescribing provider. The SMPA form will not be accepted after 90 days from the date of the prescribing provider's signature.

The completed SMPA Request Form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review.

Section C of the SMPA Request Form under the Statement of Medical Necessity must contain the following:

- Documentation of the client's dosage
- The administration schedule
- The number of injections to be administered during the prior authorization period
- The requested units and millicuries per injection
- The dosage calculation

Prior authorization must be requested through the SMPA department with appropriate documentation. Requests can be mailed or faxed to:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727  
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 9.2.78.2, “Other Limitations on Therapeutic Radiopharmaceuticals” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

**4.2.20 Respiratory Services**

**4.2.20.1 Aerosol Treatment**

Nebulized aerosol treatments with short-acting beta-agonists provided in the outpatient setting are considered medically necessary for certain acute medical problems when breathing is compromised. Authorization is not required for aerosol treatments.

Outpatient facilities must submit claims for aerosol treatments using revenue code 412 and the appropriate beta-agonist procedure code.

**4.2.20.2 Diagnostic Testing**

Nitric oxide expired gas determination (FeNO) measurement provided in the physician’s office or outpatient hospital setting is considered medically necessary as an adjunct to the established clinical and laboratory assessments for diagnosing and assessing asthma, predicting exacerbations, and evaluating the response of a patient with asthma to anti-inflammatory therapy.

Claims for nitric oxide treatments may be submitted using procedure code 95012. Hospital providers must include the following when submitting claims for procedure code 95012:

- Revenue code 419 must appear on the same line as procedure code 95012.
- The claim must have a line item for either procedure code 94010 or 94060. This line item must also indicate revenue code 419.

**Note:** Procedure code 94010 or 94060, when submitted in conjunction with procedure code 95012, may only be reimbursed in an office or outpatient hospital setting, and is not reimbursed for critical care, emergency care, or anesthesiology.

**4.2.20.3 Pulmonary Function Studies**

Pulmonary function studies considered for reimbursement to outpatient hospitals include, but are not limited to, the following procedures when submitted with the total component (TOS 5):

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 94010           | 94060 | 94070 | 94150 | 94200 | 94375 | 94450 | 94452 | 94453 | 94617 |
| 94618           | 94619 | 94621 | 94726 | 94727 | 94728 | 94729 | 95012 |       |       |

High Altitude Simulation Test (HAST) procedure codes 94452 and 94453 must be submitted with one of the following diagnosis codes:

| Diagnosis Codes |       |        |       |        |        |        |        |
|-----------------|-------|--------|-------|--------|--------|--------|--------|
| E840*           | E8411 | E8419* | E848* | E849*  | I270*  | I271*  | I2720  |
| I2721           | I2722 | I2723  | I2724 | I2729  | I2781* | I2783  | I2789* |
| I279*           | J410* | J411*  | J418* | J42*   | J430*  | J431*  | J432*  |
| J438*           | J439* | J440*  | J441* | J4489* | J449*  | J471*  | J479*  |
| J60*            | J700* | J701   | J708* | J709*  | J8281  | J8282  | J8283  |
| J8289           | J8401 | J8402  | J8403 | J8409  | J8410  | J84170 | J84178 |
| J849            | J9610 | J9611  | J9612 | J982   | P270*  | P271*  | P278*  |
| Q332*           | Q334  | Q336   |       |        |        |        |        |

**Note:** When billing for HAST (procedure code 94452 or 94453) with one of the diagnosis codes indicated in the table with an asterisk (\*), evidence of hypoxemia must be documented in the client's medical record.

When multiple procedure codes are submitted, the most inclusive code of the related codes will be reimbursed and all other related codes will be denied.

When unrelated pulmonary function studies are submitted together, each will be considered for reimbursement.

#### 4.2.21 Screening, Brief Intervention, and Referral to Treatment (SBIRT)

**Referto:** Subsection 9, "Screening, Brief Intervention, and Referral to Treatment (SBIRT)" in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)*.

### 4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including hospital services. Hospital services are subject to retrospective review and recoupment if documentation does not support the service that was submitted for reimbursement.

### 4.4 Outpatient Utilization Review

UR activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system are required by Title XIX of the Social Security Act, Sections 1902 and 1903. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need, of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to UR monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of Texas Medicaid.

TMHP is responsible for a comprehensive integrated review process to identify misuse and inappropriate claim submission patterns by outpatient hospitals and HASCs. All providers are subject to TMHP's UR monitoring. Providers are selected for review based on a comparison of their individual resource utilization with a peer group of similar specialty and geographic locality. The main goal of the required utilization control is to identify those providers whose practice patterns are aberrant from their peers and provide the necessary educational actions to help the provider achieve Texas Medicaid compliance. An analysis of UR data is completed by a registered nurse analyst for review by the medical director and staff. If the analyst substantiates that a provider's practice and claim submission patterns are inconsistent with the federal requirements and Texas Medicaid's scope of benefits, a TMHP repre-

sentative contacts the provider. The purpose of the contact is to discuss appropriate claim submission guidelines and to assist the provider in resolving the inappropriate claim submission patterns identified in the review.

TMHP uses the following criteria when reviewing all hospital outpatient medical records. Services must be:

- Medically necessary.
- Ordered by a physician, signed, and dated. Signature stamps are valid if initialed and dated by the physician.
- Submitted in the quantities ordered and documented as provided.
- Program benefits.
- Specifically identified on the charge tickets or itemized statement submitted with the claim or by the HCPCS procedure code on the claim.
- Indicated by the documentation in the medical record.
- Submitted to Texas Medicaid only after other medical insurance resources have been exhausted.

**Referto:** Subsection 4.1.1, “Your Texas Benefits Medicaid Card” in “Section 4: Client Eligibility” (*Vol. 1, General Information*).

The determination of the TMHP UR process may result in the following:

- Educational letters and visits
- Mail-in of medical records for review
- On-site medical record review (outpatient, HASC, or inpatient records not reviewed)
- Referral of questionable claims to HHSC or HHSC OIG
- Recoupment
- Prepayment review

The intent of these actions is to ensure the most effective and appropriate use of available services and facilities and provide appropriate, cost-effective care to clients with Medicaid coverage.

## 4.5 Claims Filing and Reimbursement

### 4.5.1 Outpatient Claims Information

Claims for scheduled procedures that are performed in a HASC must be submitted using the HASC NPI and taxonomy code with type of bill (TOB) 131. Claims for emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted using the hospital NPI and taxonomy code and appropriate revenue and HCPCS code (if required) with TOB 131.

Claims for outpatient hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form.

Freestanding ambulatory surgical centers must submit claims on the CMS-1500 claim form. The performing surgeon or referring physician name and number must be identified in Block 17. Identification of outpatient charges must be in Block 44 if submitting by HCPCS code. If appropriate, the revenue code must be indicated in Block 42. Texas Medicaid recommends the use of specific procedure codes for claim submission. Do not use the revenue code description in Block 43; the HCPCS narrative description must be identified in this block. For example, when submitting charges for physical therapy, do not use the description associated with revenue code 420. To receive reimbursement for physical therapy services, providers must identify the specific modality used (e.g., gait training).

**Examples:**

- *Emergency Room.* Submit as “Emergency room” or “Emergency room charge per use.” If the client visits the emergency room more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 13, using 00 to 23 hours military time (e.g., 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code. Claims for emergency CT, CTA, MRI, or MRA studies provided in the emergency department must have the appropriate corresponding emergency services revenue code (450, 451, 456, or 459) to be considered for payment.
- *Observation Room.* Submit as “observation room.” (Revenue code 762).
- *Operating Room.* Submit as “Operating Room.” (Revenue code 360, 361, or 369).
- *Recovery Room.* Submit as “Recovery Room” or “Cast Room” as appropriate. (Revenue code 710 or 719).
- *Injections.* Must have “Inj.-name of drug; route of administration; the dosage and quantity” or the injection code.
- *Drugs and Supplies.* The drug description must include the name, strength, and quantity. Take-home drugs and supplies are not a benefit of Texas Medicaid:
  - Take-home drugs must be submitted with revenue code 253.
  - Take-home supplies must be submitted with revenue code 273.
  - Self-administered drugs must be submitted with revenue code 637.
- *Radiology.* Facilities must submit claims using the most appropriate revenue and HCPCS code. The physician must submit claims for professional services by a physician separately. The license number of the ordering physician must be in Block 83. If the client receives the same radiology procedure more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 13, using 00 to 23 hours military time (such as 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.
- *Laboratory.* Provide a complete description or use the procedure codes for the laboratory procedures. The physician must submit claims for professional services by a physician separately. Blocks 78–79 must have the license number of the ordering physician. If laboratory work is sent out, enter the name of the test and name and address or Medicaid number of the laboratory where the work was forwarded. If the client receives the same laboratory procedure more than once in one day, give the time for each visit. The time of the first visit must be identified in Block 13, using 00 to 23 hours military time (e.g., 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.
- *Nuclear Medicine.* Provide a complete description.
- *Day Surgery.* Day surgery must be submitted as an inclusive charge using TOS F. Providers must not submit claims for separate services that were provided in conjunction with the surgery (e.g., lab, radiology, and anesthesia). File claims for unscheduled emergency outpatient surgical procedures with separate charges (e.g., lab, radiology, anesthesia, and emergency room) for all services using TOB 131 and the hospital’s NPI and taxonomy code.

Claims for emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted using the hospital NPI and taxonomy code and appropriate revenue and HCPCS code (if required) with TOB 131.

Refer to the ambulatory surgical center/hospital-based ambulatory surgical center (ASC/HASC) section for information on scheduled procedures. Additional claims information can be found within individual topic areas within this section.

Charges on claims must be itemized on the face of the UB-04 CMS-1450 paper claim form instead of submitting attachments or charge details. TMHP uses information attached to the claim for clarification purposes only.

If a claim contains more than 28 details, continue the claim on additional UB-04 CMS-1450 paper claim forms or electronic equivalent. Total each claim form as a stand-alone claim. If you do not total each page, your claim may be denied for being over the limitation, and must be resubmitted with 28 or less details.

Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Outpatient hospital services must be itemized by date of service. Procedures repeated over a period of time must be submitted for each separate date of service. Do not combine multiple dates of service on the same line detail.

**4.5.2 Outpatient Reimbursement**

Outpatient services are reimbursed on a reasonable cost based on a percentage of the hospital’s most recent tentative Medicaid cost report settlement.

The reimbursement rate for non-high-volume hospitals is as follows with the application of the hospital specific interim rate:

| Non-high-volume Provider       | Current Allowable Rate                 |
|--------------------------------|----------------------------------------|
| Children’s hospitals           | 72.27 percent of the allowable charges |
| Rural hospitals                | 100 percent of the allowable charges   |
| State-owned teaching hospitals | 72.27 percent of the allowable charges |
| Other hospitals                | 68.44 percent of the allowable charges |

The reimbursement rate for high-volume hospitals is as follows with the application of the hospital specific interim rate:

| High-volume Provider                             | Current Allowable Rate                           |
|--------------------------------------------------|--------------------------------------------------|
| Children’s hospitals                             | 76.03 percent of the allowable charges           |
| Rural hospitals                                  | 100 percent of the allowable charges             |
| State-owned teaching hospitals                   | 76.03 percent of the allowable charges           |
| Other hospitals                                  | 72 percent of the allowable charges              |
| ASCs/HASCs that qualify as high-volume providers | Additional 5.2 percent increase in payment rates |

High-volume providers are eligible for additional payments on Texas Medicaid fee-for-service claims. A high-volume outpatient hospital provider is defined as one that was paid at least \$200,000 during calendar year 2004.

All clinical laboratory services are reimbursed at a percentage of the prevailing charge. Hospitals that are identified by Medicare as sole community hospitals are reimbursed at a higher percentage of the prevailing charges for services that are provided to clients in the outpatient setting.

Clinical pathology consultations are also allowed for reimbursement.

**Referto:** The HHSC Rate Analysis web page at [pfd.hhs.texas.gov/hospitals-clinic-services](https://pfd.hhs.texas.gov/hospitals-clinic-services) for additional information about hospital reimbursement.

Subsection 3.7.5, “Provider Cost and Reporting” in this handbook for more information about the calculation of the interim rate.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### 4.5.3 Provider Cost and Reporting

**Referto:** Subsection 3.7.5, “Provider Cost and Reporting” in this handbook.

### 4.5.4 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to National Correct Coding Initiative (NCCI) relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

### 4.5.5 Outpatient Hospital Revenue Codes

UB-04 CMS-1450 revenue codes must be used to submit claims for outpatient hospital facility services. In some instances, a HCPCS procedure code is required in addition to the revenue code for accurate claims processing:

| Revenue Code                              | Description                                 | Comments                |
|-------------------------------------------|---------------------------------------------|-------------------------|
| <b>Special Charges – Canceled Surgery</b> |                                             |                         |
| 220                                       | Special Charges                             | Procedure code required |
| <b>Pharmacy</b>                           |                                             |                         |
| 250                                       | General classification                      |                         |
| 251                                       | Generic drugs                               |                         |
| 252                                       | Nongeneric drugs                            |                         |
| 253                                       | Take-home drugs                             | Not a benefit           |
| 254                                       | Drugs incident to other diagnostic services |                         |
| 255                                       | Drugs incident to radiology                 |                         |
| 256                                       | Experimental drugs                          | Not a benefit           |
| 257                                       | Nonprescription drugs                       |                         |
| 258                                       | IV solutions                                |                         |
| 259                                       | Other pharmacy                              |                         |
| 260                                       | General classification                      |                         |

| Revenue Code                                 | Description                                           | Comments                |
|----------------------------------------------|-------------------------------------------------------|-------------------------|
| 261                                          | Infusion pump                                         |                         |
| 262                                          | IV therapy/pharmacy services                          |                         |
| 263                                          | IV therapy/drug/supply delivery                       |                         |
| 264                                          | IV therapy/supplies                                   |                         |
| 269                                          | Other IV therapy                                      |                         |
| <b>Medical/Surgical Supplies and Devices</b> |                                                       |                         |
| 270                                          | General classification                                |                         |
| 271                                          | Nonsterile supply                                     |                         |
| 272                                          | Sterile supply                                        |                         |
| 273                                          | Take-home supplies                                    | Not a benefit           |
| 274                                          | Prosthetic/orthotic devices                           | Not a benefit           |
| 275                                          | Pacemaker                                             |                         |
| 276                                          | Intraocular lens                                      |                         |
| 277                                          | Oxygen take-home                                      | Not a benefit           |
| 278                                          | Medical/surgical supplies and devices- other implants | Procedure code required |
| 279                                          | Medical/surgical supplies and devices- other          | Procedure code required |
| 280                                          | General Classification                                |                         |
| 289                                          | Other oncology                                        |                         |
| 300                                          | Laboratory                                            | Procedure code required |
| 301                                          | Laboratory- chemistry                                 | Procedure code required |
| 302                                          | Laboratory- immunology                                | Procedure code required |
| 303                                          | Laboratory- renal patient (home)                      | Procedure code required |

## 5 Lung Cancer Screening

### 5.1 Services, Benefits, and Limitations

Lung Cancer Screening is a benefit of Texas Medicaid and include the preventive service of lung cancer screening utilizing annual Low Dose Computed Tomography (LDCT) screening.

Preventive lung cancer screening that uses low dose computed tomography (LDCT) (procedure code 71271) is a benefit of Texas Medicaid once per year for asymptomatic high-risk clients meeting screening criteria. Screening may be initiated by a referral from a physician, physician assistant (PA), nurse practitioner (NP), or clinical nurse specialist (CNS). Physicians, PAs, NPs, and CNSs can order radiological procedures appropriate to their licensure.

Procedure code 71271 is a radiological procedure that provides high-resolution three-dimensional images of the lungs to detect lung nodules, which may indicate lung cancer in an asymptomatic high-risk client.

Lung cancer is commonly diagnosed in most clients when the disease is in an advanced stage and when the chances of curative therapy can be lower. Screening for early lung cancer detection can decrease mortality in high-risk clients. When used as a component of routine preventive screening, this might result in a more favorable treatment outcome.

Lung cancer commonly develops because of smoking for a greater number of years and many packs per day. A calculation derived from these numbers is referred to as pack years. A pack year of smoking history is defined as twenty cigarettes smoked daily for one year.

Potential risks that may be associated with LDCT lung cancer screening are false-positives and over-diagnosis that could result in further testing follow-ups. Additional risks include low dose cumulative exposure to low dose ionizing radiation over multiple years.

#### 5.1.1 Client Eligibility

High-risk clients should be informed of tobacco smoking cessation counseling and that the annual lung cancer screening is not a substitute for smoking cessation.

The United States Preventive Services Task Force (USPSTF) has determined LDCT lung cancer screening to be a component of an annual routine health screening for clients who meet the high-risk category. Before the first annual LDCT lung cancer screening, the client should complete a counseling and shared decision-making visit with the provider, per the USPSTF Guidelines.

A high-risk client must meet all the following eligibility criteria for LDCT lung cancer screening, per the USPSTF:

- Be 50 through 80 years of age
- Have at least a 20-pack year smoking history
- Be a current smoker or have quit smoking within the previous 15 years
- Be asymptomatic (no signs or symptoms of lung cancer)
- Be engaged in shared decision-making about screening with their provider, including discussion of its potential health benefits, limitations, and harms
- Receive a referral for LDCT lung cancer screening, preferably to a facility with experience and expertise in lung cancer screening

A client that does not meet the USPSTF criteria for LDCT lung cancer screening but presents with chronic obstructive pulmonary disorder and associated symptoms (such as cough and shortness of breath), may also qualify for LDCT lung cancer screening.

A client is no longer eligible to receive annual LDCT lung cancer screening after meeting one or more of the following criteria, per the USPSTF:

- Non-smoker for 15 years
- Life expectancy is substantially limited
- The client is not willing or able to have curative lung surgery

Clients with signs or symptoms of lung cancer are not eligible to receive LDCT lung cancer screening. Symptomatic clients should undergo a diagnostic work up that is appropriate to their clinical presentation. Presumptive lung cancer signs or symptoms that are not attributable to other causes may include the following:

- An unexplained cough
- A cough producing blood (hemoptysis)
- Unexplained weight loss of greater than 15 pounds in the last 12 months
- Abnormal chest x-ray, presence of bony or soft tissue masses in combination with abnormally enlarged or changed consistency of the lymph nodes (lymphadenopathy)

### **5.1.2 Prior Authorization and Documentation Requirements**

Prior authorization must be obtained before performing LDCT lung cancer screening (procedure code 71271). Approved prior authorization requests will be valid for up to 90 days.

The client's ordering provider must submit a prior authorization request on the Radiology Prior Authorization Request Form, which must include all the following documentation:

- The client's diagnosis
- A statement confirming that the patient meets all the eligibility criteria for LDCT lung cancer screening
- Client's current smoking status — current smoker or non-smoker with less than 15 years since their quit date

Prior authorization requests for procedure code 71271 may only be approved for clients with one of the following diagnosis codes, which must be included on the Radiology Prior Authorization Request Form:

| Diagnosis Codes |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|
| F17210          | F17211 | F17213 | F17218 | F17219 | F17290 | F17291 |
| F17293          | F17298 | F17299 | Z720   | Z87891 |        |        |

Prior authorization for LDCT lung cancer screening is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the service and must be maintained in the client's medical record, both by the ordering physician and the performing facility.

**Referto:** Subsection 4.2.6.2, "Request Form and Documentation" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* and Subsection 4.2.6.3, "Methods of Submission" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information about submitting prior authorization requests for CT services.

### 5.1.3 Exclusions

Annual LDCT lung cancer screening is not covered for any indications other than the possibility of lung cancer.

The following services are not a benefit of Texas Medicaid:

- Screening for clients who do not meet the high-risk criteria
- Positron emission tomography (PET), which is considered investigational and experimental for lung cancer screening and is therefore excluded as a lung cancer screening benefit since the effectiveness of PET for lung cancer screening has not been established
- Chest radiography and sputum cytology, which are not valid methods for lung cancer screening and are not covered benefits for lung cancer screening
- LDCT lung cancer screening using the following methods of testing:
  - Computer-aided detection with physician review and interpretation of digital film or radiographic images of chest
  - Computed tomography of thorax without contrast
- LDCT lung cancer screening for the following diagnosis codes: F17200, F17201, F17203, F17208, F17209, F17220, F17221, F17223, F17228, F17229, or Z77090

## 6 Ambulatory Surgical Center and Hospital Ambulatory Surgical Center

### 6.1 Enrollment

To enroll in Texas Medicaid, an ASC must:

- Meet and comply with applicable state and federal laws, rules, regulations, and provisions of the state plan under Title XIX of the Social Security Act.
- Be enrolled in Medicare.
- Meet and comply with state licensure requirements for ASCs.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

All hospitals enrolling in Texas Medicaid (except psychiatric and rehabilitation hospitals) are issued an HASC provider number at the time of enrollment.

An out-of-state provider may enroll in Texas Medicaid if it is the customary or general practice for clients in a particular locality to use medical resources in another state. An out-of-state provider located within 50 miles of the Texas border is automatically considered to meet this criterion.

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*).

The *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

## **6.2 Services, Benefits, Limitations, and Prior Authorization**

ASCs, both freestanding and hospital-based, provide same day elective surgery for clients who do not require a hospital admission and who are not expected to require extensive postoperative care.

### **6.2.1 Drugs and Supplies**

Outpatient prescribed medications are a benefit to eligible clients when obtained through a pharmacy contracted with the Medicaid Vendor Drug Program. Prescribed take-home supplies are a benefit to eligible clients when obtained through Medicaid durable medical equipment (DME).

**Referto:** Section 1.1, “About the Vendor Drug Program” in the *Outpatient Drug Services Handbook* (*Vol. 2, Provider Handbooks*)) for information about this program.

Subsection 2.2.4, “Medical Supplies” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (*Vol. 2, Provider Handbooks*).

### **6.2.2 Incomplete Surgical Procedures**

**Referto:** Subsection 4.2.3.6, “Incomplete Day Surgeries” in this handbook for information about incomplete surgical procedures.

### **6.2.3 Complications Following Day Surgery Requiring Outpatient Observation or Inpatient Admission**

If the client is placed in outpatient observation or inpatient status following an HASC day surgery, the day surgery procedure must still be submitted as an outpatient procedure under the HASC NPI and taxonomy code.

**Referto:** Subsection 4.2.3.2, “Complications Following Elective or Scheduled Day Surgeries” in this handbook.

Subsection 4.2.3.4, “Emergency or Unscheduled Day Surgeries” in this handbook in this handbook.

### **6.2.4 Planned Admission for Day Surgery**

Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

### **6.2.5 Cochlear Implants**

A cochlear implant is a benefit of Texas Medicaid when medically indicated. ASC and HASC providers may be reimbursed for the implantation procedure using procedure code 69930, and for the cochlear implant devices using procedure code L8614. L8614 will process as part of another service for ASC and HASC providers since payment will be applied to the procedure code 69930 for the global rate.

**Referto:** Subsection 9.2.22, “Cochlear Implants” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

## 6.2.6 Colorectal Cancer Screening

Procedure codes G0104, G0105, and G0121 are a benefit of Texas Medicaid in the ASC or HASC setting.

### 6.2.6.1 Sigmoidoscopies

Procedure code G0104 may be reimbursed once every 5 years and is limited to one of the following diagnosis codes:

| Diagnosis Codes                                                                                                                                                                |        |        |         |         |         |        |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|---------|---------|---------|--------|--------|
| Z0000*                                                                                                                                                                         | Z0001* | Z1210  | Z1211   | Z1213   | Z859    | Z86002 | Z86003 |
| Z86004                                                                                                                                                                         | Z86006 | Z86007 | Z860100 | Z860102 | Z860109 |        |        |
| *Diagnosis code Z0000 or Z0001 may be used for screening if no other diagnosis is appropriate for the service rendered, but no more frequently than recommended by the USPSTF. |        |        |         |         |         |        |        |

### 6.2.6.2 Colonoscopies

Procedure code G0121 may be reimbursed once every ten rolling years for clients who are 45 years of age and older. Procedure code G0121 must be submitted with one of the following diagnosis codes:

| Diagnosis Codes                                                                                                                                                                |        |       |       |       |  |  |  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|-------|-------|-------|--|--|--|
| Z0000*                                                                                                                                                                         | Z0001* | Z1210 | Z1211 | Z1213 |  |  |  |
| *Diagnosis code Z0000 or Z0001 may be used for screening if no other diagnosis is appropriate for the service rendered, but no more frequently than recommended by the USPSTF. |        |       |       |       |  |  |  |

Procedure code G0105 may be reimbursed once every two years for clients who meet the definition of high-risk. Procedure code G0105 must be submitted with one of the following diagnosis codes:

| Diagnosis Codes |        |         |        |        |        |        |        |
|-----------------|--------|---------|--------|--------|--------|--------|--------|
| K5000           | K50011 | K50012  | K50013 | K50014 | K50018 | K5010  | K50111 |
| K50112          | K50113 | K50114  | K50118 | K5080  | K50811 | K50812 | K50813 |

| Z86006          | Z86007 | Z860101 |        |        |        |        |        |

**Referto:** Subsection 9.2.15.1.1, “Colorectal Cancer Screening” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

## 6.2.7 Dental Therapy Under General Anesthesia

Facilities must use procedure code G0330 to submit claims for dental therapy under general anesthesia. Prior authorization is not required for ASCs and HASCs unless the client is enrolled in a Medicaid managed care organization.

**Referto:** Subsection 3.2.29.2.1, “Dental Therapy Under General Anesthesia” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*).

Subsection 3.2.24, “Hospitalization and ASC/HASC” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*).

## 6.2.8 Fluocinolone Acetonide

Procedure code 67027 for implantation may be reimbursed to HASCs. This benefit is limited to clients who are 12 years of age and older and requires prior authorization.

**Referto:** [Non-emergency Ambulance Prior Authorization Request](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

Subsection 4.2.11, “Fluocinolone Acetonide” in this handbook.

## 6.2.9 Implantable Infusion Pumps

Implantable infusion pumps are a benefit of Texas Medicaid. Implantable infusion pumps may be medically necessary in the following circumstances:

- Administration of intrathecal or epidural antispasmodic drugs to treat refractory intractable spasticity
- Administration of intrathecal, epidural, or central venous analgesic (opioid or non-opioid) drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy for primary liver cancer or metastatic cancer with metastases limited to the liver

An IIP is not a benefit for the following uses:

- Continuous insulin infusion for diabetes
- Continuous heparin infusion for recurrent thromboembolic disease
- Continuous intralesional infusion for severe chronic intractable pain
- Continuous intra-arterial infusion
- Continuous intra-articular infusion for severe chronic intractable pain
- Administration of antibiotics for osteomyelitis

All supplies associated with an IIP are included with the reimbursement for the surgery to implant the infusion pump and are not reimbursed separately.

Providers may be reimbursed for implantable infusion pumps using procedure codes E0782, E0783, and E0786.

If procedure codes E0782 and E0783 are billed with the same date of service, only one may be reimbursed.

**Referto:** Subsection 9.2.40, “Implantable Infusion Pumps” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*).

### 6.2.9.1 Prior Authorization for Implantable Infusion Pump

Implantable infusion pumps (procedure codes E0782, E0783, and E0786) require prior authorization.

Prior authorization is not required for the physician services associated with the insertion, revision, removal, refilling, or maintenance of the IIP.

Providers must request prior authorization for the implantable infusion pump through the SMPA department with the supporting documentation for medical necessity. Send authorization requests to:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727  
Fax: 1-512-514-4213

**Note:** ASCs are paid based on a global fee, with the exception that certain pieces of equipment may be reimbursed separately from the ASC or HASC global rate.

Requests for prior authorization can be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 9.2.40.0.1, “Prior Authorization for Implantable Infusion Pumps” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

**6.2.10 Brachytherapy**

The following procedure codes are payable to ASC and HASC facilities:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 19296           | 19297 | 19298 | 31643 | 55860 | 55874 | 55875 | 57155 | 58346 |

Prior authorization is not required for brachytherapy services.

**Referto:** Subsection 9.2.64, “Radiation Therapy” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

**6.2.11 Neurostimulators**

Neurostimulators are a benefit of Texas Medicaid when medically necessary. All procedures require prior authorization.

**Referto:** Subsection 9.2.46, “Neurostimulators” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Neurostimulator devices may be reimbursed separately from the global fee.

**Referto:** The [Texas Medicaid fee schedules](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for procedure codes that may be reimbursed to ASC providers.

**6.2.12 Prior Authorization**

Some procedures require the performing provider to obtain prior authorization. When prior authorization is required, providers can mail or fax the request to:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727  
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 6.2.13 Gynecological and Reproductive Health and Family Planning Services

The following gynecological and reproductive health services and family planning services procedure codes may be reimbursed to ASC and HASC providers:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 11976           | 11981 | 11982 | 11983 | 55250 | 56620 | 56805 | 57335 | 57410 | 58260 |
| 58262           | 58353 | 58356 | 58541 | 58545 | 58546 | 58550 | 58552 | 58555 | 58558 |
| 58559           | 58560 | 58561 | 58562 | 58563 | 58565 | 58600 | 58615 | 58670 | 58671 |
| 58673           | 58674 | 59150 | 59151 | 59840 | 59841 |       |       |       |       |

**Referto:** The *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for additional information about these procedure codes.

The Texas Medicaid fee schedules on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for additional information about procedure codes that may be reimbursed to ASC providers.

The online fee lookup (OFL) or the static fee schedules for on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for additional information about rate information for individual procedure codes.

## 6.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including ASC and HASC services. ASC and HASC services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

## 6.4 Claims Filing and Reimbursement

### 6.4.1 Claims Information

Freestanding ASC claims must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Hospital-based ASCs must submit claims to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form.

Claims must contain the billing provider's complete name, address, and a NPI and taxonomy code. When completing a UB-04 CMS-1450 or a CMS-1500 paper claim form, providers must include all required information on the claim; TMHP does not key any information from claim attachments. Providers must purchase UB-04 CMS-1450 and CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

Scheduled procedures performed in a HASC must be submitted for reimbursement using the HASC NPI and taxonomy code with TOB 131. Emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted for reimbursement using the hospital NPI and taxonomy code with TOB 131.

To submit claims for services performed by certified registered nurse anesthetists (CRNAs), an ASC must enroll as a CRNA group provider and indicate the CRNA performing NPI and taxonomy code on claims for those services.

**Referto:** Section 4, "Certified Registered Nurse Anesthetist (CRNA)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for specific billing instructions for CRNA services.

"Section 6: Claims Filing" (*Vol. 1, General Information*).

Section 11, "Claim Form Examples" in this handbook.

## 6.4.2 Reimbursement

Reimbursement is limited to the lesser of the amount reimbursed to an ASC for similar services, the hospital's actual charge, or the allowable cost determined by HHSC. When multiple surgical procedures are performed on the same day, only the procedure with the highest reimbursement rate on the fee schedule will be reimbursed.

Claims for physician and CRNA services performed in an ASC or HASC must be submitted under the physician or CRNA NPI and taxonomy code and are reimbursed separately.

### 6.4.2.1 ASC and HASC Global Services

The ASC or HASC payment represents a global payment and includes room charges and supplies. Covered services provided are submitted as one inclusive charge. All facility services provided in conjunction with the surgery (e.g., laboratory, radiology, anesthesia supplies, medical supplies) are considered part of the global payment and cannot be itemized or submitted separately.

Routine X-ray and laboratory services directly related to the surgical procedure being performed are not reimbursed separately. All nonroutine laboratory and X-ray services provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery.

Medical and prosthetic devices such as intraocular lenses may be supplied by the ASC or HASC and implanted, inserted, or otherwise applied during a covered surgical procedure and is considered part of the global surgical fee.

**Exception:** *Certain pieces of equipment may be reimbursed separately from the ASC or HASC global rate.*

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 4.2.3, "Day Surgery" in this handbook for information about HASCs.

### 6.4.2.2 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 7 Military Hospitals

### 7.1 Military Hospital Enrollment

To enroll in Texas Medicaid, a military hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Veterans Administration (VA) hospitals are eligible to receive Texas Medicaid payment only on claims that have crossed over from Medicare.

Military hospital providers must comply with CLIA rules and regulations. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

## 7.2 Services, Benefits, Limitations and Prior Authorization

### 7.2.1 Military Hospital Inpatient Services

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Reimbursement to hospitals for inpatient services is limited to the Medicaid “spell of illness.” The spell of illness is defined as “30 days of inpatient hospital care, which may accrue intermittently or consecutively.”

After 30 days of inpatient care have been provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. Exceptions are made in the following instances:

- THSteps-eligible clients do not have a 30-day spell of illness limitation, if medically necessary conditions exist (covered under THSteps-CCP).

**Referto:** The *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

Subsection 3.1.2, “Spell of Illness” in this handbook.

Hospitals may submit information only claims to TMHP when one of the following situations exists:

- The inpatient 30-day spell of illness benefit is exhausted.
- Payment that was made by a third party resource or other insurance exceeds the Medicaid allowed amount.

For clients who are 21 years of age and older, there is an inpatient expenditure cap of \$200,000 per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments exceeding \$200,000 will be recouped.

It is appropriate to submit information only claims using TOB 110.

The following hospital services must be medically necessary and are subject to the utilization review requirements of Texas Medicaid. Medicaid reimbursement for services cannot exceed the limitations of Texas Medicaid.

Inpatient hospital services include the following items and services:

- Bed and board in semiprivate accommodations or in an intensive care or coronary care unit, including meals, special diets, and general nursing services; or an allowance for bed and board in private accommodations, including meals, special diets, and general nursing services up to the hospital’s charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations are provided in full if required for medical reasons, as certified by the physician. Additionally, the hospital must document the medical necessity for a private room, such as the existence of a critical or contagious illness or a condition that could result in disturbance to other patients. This type of information is included in Block 80 or attached to the claim.
- Whole blood and packed red cells that are reasonable and necessary for treatment of illness or injury, provided they are not available without cost.
- All medically necessary services or supplies ordered by a physician.

Medicaid benefits are not available for take-home or self-administered drugs or personal comfort items except when received by prescription through the VDP.

Only inpatient claims that have an emergency diagnosis on the claim are considered for reimbursement.

## 7.2.2 Military Hospital Outpatient and Physician Services

Although Medicare reimburses for emergency outpatient and inpatient services, Medicaid does not reimburse for either outpatient or physician services. Military hospitals are not reimbursed for outpatient day surgery.

## 7.2.3 Prior Authorization

Prior authorization is not required for services rendered in military hospitals.

## 7.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including military hospital services. Military hospital services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

### 7.3.1 Documentation for Nursing Facility Admissions

The admission Minimum Data Set (MDS) must be used for admissions to a nursing facility. There are instances in which hospital social workers and discharge nurses might also complete the admission MDS, such as:

- If the client is in a long-term care acute center.
- If the potential receiving nursing facility wants a better clinical picture of the client, a paper copy of the admission MDS is completed by the hospital staff before the client is accepted for admission into the nursing facility.

**Referto:** The [Long Term Care Program](#) page on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for additional information, including instructions for all forms and assessments.

## 7.4 Claims Filing and Reimbursement

### 7.4.1 Military Hospital Claims Information

If TOB 110 is used to submit a claim, all charges must be noncovered and the claim will finalize with EOB 217, “Payment reduced through hospital action.”

It is appropriate to submit information only claims using TOB 110.

Military hospitals may submit total charges in one line with appropriate accommodation revenue codes. Emergency hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form. Providers may purchase claim forms from the vendor of their choice. TMHP does not supply the forms.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claims supplements.

**Referto:** Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for paper claims completion instructions. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

[Military Hospital \(Emergency Inpatient\)](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

7.4.2 Military Hospital Reimbursement

Reimbursement is limited to claims submitted for emergency inpatient care only.

Allowed inpatient hospital stays are reimbursed according to a prospective payment methodology based on DRGs. The reimbursement method itself does not affect inpatient benefits and limitations. Texas Medicaid requires that one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. Providers must submit only one claim per inpatient stay to Medicaid, regardless of the diagnosis, to ensure accurate payment. The DRG reimbursement includes all facility services provided to the client while registered as an inpatient.

Reimbursement to hospitals for inpatient services is limited to \$200,000 per client, per benefit year (November 1 through October 31). This limitation does not apply to services related to certain organ transplants or services to clients who are 20 years of age and younger and covered by the CCP.

Military hospitals should keep a Medicaid client as an inpatient for only the length of time necessary to stabilize the client. The Medicaid client, once stabilized, should be transferred to the nearest Medicaid acute care hospital facility for further treatment.

When more than one hospital provides care for the same client, the hospital that furnishes the most significant amount of care receives consideration for a full DRG payment.

The other hospital is paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility.

Client transfers within the same facility or readmissions to the same facility within 24 hours of a previous acute hospital or facility discharge are considered one continuous stay. These readmissions are considered a continuous stay regardless of the original or readmission diagnosis. Texas Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be included in one submission under the NPI and taxonomy code. Admissions that were submitted inappropriately are identified and denied during the utilization review process and may result in an intensified review.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine if the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

The inpatient DRG reimbursement includes payment for all radiology and laboratory services, including those sent to referral laboratories.

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

8 Claims Resources

Refer to the following sections and forms when filing claims:

| Resource                       | Location                                                                                                                                                     |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 1 General Information

The information in this handbook is intended for Texas Medicaid managed care providers, including providers who are enrolled in a managed care organization (MCO) that is contracted by Texas Medicaid to provide managed care coverage for Texas Medicaid clients.

This handbook provides information about the following managed care programs and services:

- STAR
- STAR+PLUS
- STAR Kids
- STAR Health
- Children's Medicaid Dental Services

**Referto:** The [Medicaid and CHIP Programs](https://www.hhs.texas.gov/programs/medicaid-and-chip) page of the HHS website at [hhs.texas.gov](https://www.hhs.texas.gov).

## 2 Overview of Medicaid Managed Care

Texas Medicaid, which is administered by the Texas Health and Human Services Commission (HHSC), operates Medicaid managed care under the authority of federal waivers and state plan amendments that were approved by the Centers for Medicare & Medicaid Services (CMS).

Medicaid managed care is administered by MCOs and dental maintenance organizations (DMOs) that are contracted by HHSC to provide services for Medicaid managed care clients. The Medicaid managed care MCOs and DMOs provide most of the same benefits that Texas Medicaid provides for Medicaid fee-for-service clients. Some plans may also offer value-added services.

**Referto:** Subsection 8, “Carve-Out Services” in this handbook.

The principal objectives of Medicaid managed care are early intervention and improved access to quality care, which significantly improve health outcomes for clients, with a special focus on prenatal and well-child care.

In Medicaid managed care, clients assume responsibility for their personal health care by choosing a health plan and primary care provider and by making use of preventive primary care services. Eligible clients may also choose a DMO and a main dentist. This collaborative approach to health-care delivery helps to reduce costs by eliminating duplicate services and unnecessary emergency and inpatient care.

Medicaid managed care uses MCOs to cover services in 13 service areas (SAs).

Medicaid managed care consists of the following programs:

- The STAR program uses MCOs to cover acute care services for children, newborns, pregnant women, and some families. STAR is available statewide, and clients have the choice of at least two STAR MCOs in each SA. The STAR program operates under a federal 1115 waiver.
- The STAR Kids program uses MCOs to cover integrated acute care and long-term services and supports (LTSS) for children and adults who are 20 years of age or younger and have a disability. STAR Kids is available statewide, and clients have the choice of at least two STAR Kids MCOs in each SA. The STAR Kids program operates under a federal 1115 waiver.
- The STAR+PLUS program uses MCOs to cover integrated acute care and LTSS for adults who are 65 years of age or older (including those who are dually eligible for Medicare and Medicaid) and adults who are 21 years of age or older and have a disability. STAR+PLUS also serves those who are

eligible for Medicaid for Breast and Cervical Cancer (MBCC). The STAR+PLUS program is available statewide, and clients have the choice of at least two STAR+PLUS MCOs in each SA. The STAR+PLUS program operates under a federal 1115 waiver.

- The STAR Health program uses one MCO to deliver health-care and dental services to children who are in foster care throughout the state. STAR Health is administered by Superior HealthPlan and operates under federal 1915(a) authority. The STAR Health program manages the health and dental care of most children in foster care.
- Children's Medicaid dental services are administered by DMOs that process dental authorization requests and claims for most Medicaid fee-for-service and Medicaid managed care clients who are 20 years of age or younger regardless of their medical benefit plan.

**Referto:** Section 7, "Children's Medicaid Dental Services" in this handbook for exceptions and additional information.

The [Medicaid Managed Care](https://www.tmhp.com) page of the Provider section of the TMHP website at [www.tmhp.com](https://www.tmhp.com) for a current list of managed care service areas.

## 2.1 Managed Care Services

MCOs and DMOs administer most of the services that are rendered to Medicaid managed care clients, including, but not limited to:

- Professional, inpatient facility, and outpatient facility medical services.
- Prescription drug/pharmacy services.
- Children's Medicaid dental services for most clients who are 20 years of age or younger.
- Orthodontia services.
- Services rendered to Medicaid managed care SSI clients.
- Value-added services that an individual MCO or DMO elects to provide.

Administrative procedures, such as prior authorization, precertification, referrals, and claims/encounter data filing may differ from traditional Medicaid (fee-for-service) and from MCO to MCO. Providers should contact the client's specific MCO for details.

### 2.1.1 Medical Services

Most medical service benefits including professional, inpatient, and outpatient services rendered to Medicaid managed care clients are administered by individual MCOs. Medical services include all those administered by TMHP for fee-for-service clients as well as any value-added services covered by the individual MCOs.

Some services rendered to Medicaid managed care clients are considered "carve-out" services. Carve-out services are administered and paid by TMHP and not by the client's MCO.

**Referto:** Section 8, "Carve-Out Services" in this handbook.

### 2.1.2 Prescription Drug/Pharmacy Services

The client's MCO administers and pays for pharmacy services.

Pharmacy providers must first be enrolled by the Medicaid or Children's Health Insurance Program (CHIP) Vendor Drug Program before they can enroll with an MCO.

**Referto:** Subsection 2.2, "Provider Enrollment and Responsibilities" in this handbook.

Generally, there is no monthly prescription limit for managed care clients.

**Referto:** The MCO that administers the client's Medicaid managed care benefits for information about prescription drug and pharmacy benefits.

Each MCO contracts one Pharmacy Benefit Manager (PBM). The MCOs and PBMs must adhere to Medicaid preferred drug list (PDL) and HHSC Medicaid and CHIP formularies. HHSC manages the Texas Medicaid and CHIP formularies.

**Important:** *MCOs and PBMs cannot require clients to use a mail-order pharmacy.*

The MCOs must:

- Perform drug utilization review for managed care clients.
- Monitor pharmacy providers for compliance.
- Establish help lines for providers and clients.
- Ensure that all clients have access to a minimum of one network pharmacy:
  - Within 15 miles of the client's residence.
  - With 24-hour coverage within 75 miles of the client's residence.
- Provide e-prescribing abilities to:
  - Verify client eligibility.
  - Review medication history.
  - Review formulary and PDL information.
- Process correct pharmacy claims that are submitted electronically within 18 days of submission.

#### 2.1.2.1 Prescription Drug Prior Authorizations

Prescribers may be required to request prior authorization for a prescription drug. The prescriber must contact the client's MCO or PBM and follow MCO or PBM guidelines and procedures for prior authorization requests.

**Important:** *TMHP does not have access to the MCOs' or PBMs' guidelines and procedures for prior authorizations. The provider must contact the MCOs or PBMs for information. Individual PBMs will have their own PA processes and telephone lines.*

The MCO must notify the prescriber's office of a prior authorization approval or denial:

- Within 24 hours of a request submitted by fax or web.
- Immediately for telephone requests.

Prior authorization is required for non-preferred drugs or any drug requiring a clinical prior authorization.

If the pharmacy cannot dispense the client's prescription because prior authorization is required but it has not been requested, the pharmacy should contact the MCO or PBM to request prior authorization. The prescribing provider is required to submit certain prior authorization requests including, but not limited to, non-preferred drug prior authorizations.

##### 2.1.2.1.1 Emergency 72-Hour Prescriptions

If the prescribing provider cannot be reached or is unable to request a prior authorization, the pharmacy should submit an emergency 72-hour prescription. The request for an emergency 72-hour prescription claim should not be used for routine and continuous overrides.

A 72-hour emergency prescription will be paid in full to pharmacy providers and does not count toward the three-prescription limit for adults who have not already received their maximum prescriptions for the month.

**Reminder:** *There is no prescription limit for clients who are 20 years of age or younger.*

Federal and Texas law allow a 72-hour emergency supply of prescribed medication to be dispensed any time a prior authorization is not available and the prescription must be filled without delay for a medical condition. This rule applies to non-preferred drugs on the Preferred Drug list and any drug for which prior authorization must be requested by the prescribing physician.

#### 2.1.2.1.2 Formulary

The MCOs or PBMs are responsible for informing network providers about how to access the formulary and PDL.

**Referto:** The Medicaid and CHIP formularies on the VDP website at [www.txvendordrug.com](http://www.txvendordrug.com) and at [www.epocrates.com](http://www.epocrates.com) for more information.

MCOs may also selectively contract with pharmacies for specialty drugs.

### 2.1.3 Service and Care Coordination

Texas Medicaid has different types of service and care coordination. Clients who are enrolled in Medicaid may receive service or care coordination from MCOs or providers.

#### 2.1.3.1 Service Coordination in STAR Kids and STAR+PLUS

In STAR Kids and STAR+PLUS, service coordination is specialized care management. Service coordination is provided by STAR Kids and STAR+PLUS MCOs and is available to all clients.

MCO service coordinators:

- Identify physical health, mental health, and LTSS needs and develop a service plan.
- Help clients get timely access to providers and covered services.
- Coordinate covered services with non-managed care programs, such as FFS waivers.

#### 2.1.3.2 Service Coordination in STAR and CHIP

In STAR, service coordination is an administrative service that is provided by STAR and CHIP MCOs. Service coordination is available to STAR and CHIP clients who have special health care needs.

MCO service coordinators:

- Work with clients to develop a service plan and coordinate services with the client's primary care provider, specialty providers, and non-medical providers.
- Help clients get access to and use appropriately medically necessary covered services, services with non-managed care programs, such as FFS waivers, and other services and supports.

#### 2.1.3.3 STAR Health Service Coordination and Service Management

In STAR Health, service coordination and service management have distinct functions that are different from the other managed care programs.

STAR Health defines service coordination and service management as follows:

- Service coordination is an administrative service that helps caregivers manage information, such as medical information for court hearings, and coordinate services with non-managed care programs, such as FFS waivers. Service coordination is available to STAR Health clients who have a medical or behavioral need or as requested.

- Service management is a clinical service that is provided to clients who have a complex medical or behavioral need. Service management helps the client implement a service plan, and it coordinates services between the client's primary care provider and specialty care providers to ensure that the client has access to and appropriately uses medically necessary covered services. Service management may also be requested.

#### **2.1.3.4 Provider Administered Care Coordination**

Several types of care coordination are administered at the provider level. These services do not duplicate the service coordination or service management provided by MCOs.

Care coordination services include targeted case management for:

- Early Childhood Intervention (ECI).
- Individuals with intellectual or developmental disabilities.
- Clients who have a mental illness.
- Children and pregnant women.
- Community Living Assistance and Support Services (CLASS) and Deaf Blind with Multiple Disabilities (DBMD).
- Home- and Community-Based Services (HCBS)-Adult Mental Health (AMH) recovery management.

## **2.2 Provider Enrollment and Responsibilities**

**Important:** *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*) for more information about enrollment procedures.

Subsection 1.1, “About the Vendor Drug Program” in the *Outpatient Drug Services Handbook* (Vol. 2, *Provider Handbooks*) for information about this program.

### **2.2.1 Enrollment, Contracting, and Credentialing**

Providers must be enrolled in Texas Medicaid before they can be enrolled by an MCO or DMO. Individual MCOs and DMOs have their own guidelines for contracting providers.

All Medicaid MCOs must use the Texas Association of Health Plans' (TAHP's) contracted credentialing verification organization (CVO) as part of its credentialing and recredentialing process regardless of membership in the TAHP.

**Important:** *Enrollment in Texas Medicaid does not guarantee that an MCO or DMO will contract enroll or credential a particular provider.*

Providers must refer all questions about enrollment to the MCO or DMO that administers the clients' managed care benefits. TMHP does not have access to the enrollment requirements for the individual MCOs and DMOs.

All questions about Texas Medicaid enrollment can be referred to the TMHP Contact Center.

**Note:** *Providers who render only carve-out services are not required to enroll in Medicaid MCOs and DMOs.*

**Referto:** Section 8, "Carve-Out Services" in this handbook for a list of services that are carved out of the Medicaid Managed Care program.

Subsection 1.1, "About the Vendor Drug Program" in the *Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks)* for information about this program.

### **2.2.2 Online Provider Lookup (OPL)**

Clients can search for providers using a particular county, SA, or name to find providers who participate in a managed care area. Providers that participate in MCOs and DMOs are responsible for declaring themselves as managed care providers on the OPL. Clients can search for providers that are enrolled in Medicaid managed care on the OPL. The OPL has links to the websites of the MCOs and DMOs, which allows clients to search each MCO's and DMO's network of participating providers.

### **2.2.3 Terminated Enrollment**

Texas Medicaid monitors provider claim activity. Providers that have not submitted a claim to Texas Medicaid or a Medicaid MCO or DMO within an 18-month period are notified that their Texas Medicaid enrollment will be terminated at 24 months if they have not submitted any claims.

If a provider's Texas Medicaid enrollment is terminated, the provider's Medicaid managed care contracts with individual MCOs or DMOs will also be terminated.

To reactivate an NPI that has been terminated, the provider must complete the Texas Medicaid Provider Re-enrollment Application.

### **2.2.4 Excluded Entities and Providers**

Title 42 Code of Federal Regulations (CFR) §1003.400(a)(2) states that civil monetary penalties may be imposed against MCOs that employ or enter into contracts with excluded individuals or entities to provide items or services to Medicaid clients. No Medicaid payments can be made to an MCO for any items or services directed or prescribed by an excluded physician or other authorized person if the MCO either knew or should have known of the exclusion. This prohibition applies even when the Medicaid payment itself is made to another provider, practitioner, or supplier that is not excluded.

### **2.2.5 Accounts Receivable**

Providers that have outstanding accounts receivables on their weekly Remittance & Status (R&S) reports must settle them with TMHP even if they no longer submit claims to TMHP.

Payments from the MCOs and DMOs may be held until the debt with TMHP is resolved. Providers can refund payments to TMHP as follows:

- If the provider no longer receives claim payments from TMHP, the provider must issue a check for the refund amount to TMHP. Payment options may be available. If a refund check is mailed to TMHP, the provider must also submit Form 7.2, "Texas Medicaid Refund Information Form."
- If the provider continues to receive claim payments from TMHP, a recoupment of the funds may be requested through the paper appeal process. If the provider requests a recoupment through the paper appeal process, the provider must not issue a check to TMHP. The refund amounts will be deducted from future payments, and the deductions will appear on the provider's R&S Reports.

### 2.2.6 Educating Clients about Managed Care

Providers cannot enroll Medicaid clients; however, providers are encouraged to educate clients about Medicaid managed care.

Providers that participate in one or more Texas Medicaid managed care plans should follow these rules when educating clients:

- Providers may not influence clients to choose one MCO or DMO over another.
- Providers must inform clients of all Medicaid managed care health plans and DMOs in which the providers participate.
- Providers and subcontractors may only directly contact potential clients with whom they have an established relationship.
- Providers may inform clients of special services offered by all Medicaid managed care health and DMOs in which the providers participate.
- Providers may inform clients of particular hospital services, specialists, or specialty care available in all plans in which the providers participate.
- Providers may assist a client by contacting a plan (or plans) to determine if a particular specialist or service is available, if the client requests this information.
- Providers may not influence clients based on reimbursement rates or methodology used by a particular plan.
- At the client's request, providers can provide the necessary information for the client to contact a particular plan but cannot promote any plan over another.
- In no instances can providers stock, reproduce, assist in filling out, or otherwise handle the enrollment form. Information can be provided as outlined on the previous page, and clients can be reminded that they can easily enroll over the telephone with the enrollment broker. However, the call must be made by the client, not by the provider or the provider's agent.
- Providers may assist clients with completing the Medicaid application.
- Providers may display stickers that indicate that they participate in a particular Medicaid managed care health or DMO as long as they do not indicate anything more than "(health plan or DMO) is accepted or welcomed here" (provided the sticker meets Medicaid/CHIP Marketing Guide- lines regarding size limitations).
- Providers may display state-approved, health-related marketing materials in their offices, provided it is done equally for all MCOs and DMOs in which they participate. MCO and DMO providers cannot give out or display plan-specific marketing items or giveaways to clients.

**Important:** *Providers must comply with their applicable licensing agency's laws and regulations, including any related to marketing and advertising, and any applicable state and federal laws and regulations, contractual requirements, and other guidance documents. Providers are encouraged to review the [Provider Marketing Guidelines](#) page of the HHS website.*

## 2.3 General Information About Client Enrollment in Managed Care

Most of the clients who have been determined to be eligible for Texas Medicaid are first enrolled in fee-for-service. Specific client groups within the Texas Medicaid population are eligible for managed care based on certain established criteria. If the client is eligible for Medicaid managed care, the client will choose an MCO and primary care provider or a DMO and main dentist or both. The managed care enrollment date is generally separate from the Medicaid eligibility date. In most cases, Medicaid managed care enrollment is not retroactive.

**Referto:** Section 3, “STAR Program” in this handbook.

Section 4, “STAR Kids Program” in this handbook.

Section 5, “STAR+PLUS Program” in this handbook.

Section 6, “STAR Health Program” in this handbook.

Claim and authorization transactions for services rendered during the client’s fee-for-service eligibility must be submitted to TMHP, and claim and authorization transactions for services rendered during the client’s Medicaid managed care enrollment must be submitted to the appropriate entity (i.e., TMHP for carve-out services and the MCO or DMO for managed care services).

If a client loses Medicaid eligibility and then regains eligibility within a certain amount of time, the client is automatically reassigned to the same health plan and primary care provider or DMO that the client had before the client lost Medicaid eligibility.

**Referto:** Subsection 2.4, “Primary Care Provider/Main Dentist Guidelines for Medicaid Managed Care Clients” in this handbook.

“Section 4: Client Eligibility” (*Vol. 1, General Information*).

### 2.3.1 Client Enrollment in Managed Care Programs

Each MCO contracts with primary care providers, hospitals, and other providers to create a healthcare delivery network. Medicaid clients who are eligible for STAR, STAR Kids, or STAR+PLUS choose an MCO and a primary care provider, those eligible for STAR Health choose only a primary care provider, and those eligible for Children’s Medicaid Dental Services choose a DMO and a main dentist.

To maximize enrollment, clients may enroll in Medicaid managed care in any of the following ways:

| Method of Enrollment | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Method of Enrollment | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Default              | <p>Clients may be enrolled through an assignment process.</p> <p>If a client does not exercise the right to choose an MCO and primary care provider, the client will be assigned to a health plan and primary care provider. The following factors are considered when processing a default enrollment:</p> <ul style="list-style-type: none"> <li>Client's past claims history, taking into account an established relationship with a participating primary care provider</li> <li>Client's age, sex, and geographic proximity to the primary care provider</li> </ul> <p>If a client does not exercise the right to choose a DMO and main dentist, the client will be assigned to a DMO. After the default assignment is made, the DMO will assign the client a Main Dentist.</p> |

### 2.3.1.1 Managed Care Enrollment Timeline

#### Example 1

Benefits under Medicaid managed care usually begin on the first day of the next month following the client's selection of a managed care plan and primary care provider. The following example shows the managed care enrollment date for a client who selects a health plan and primary care provider before the designated cutoff date (approximately the 15th of the month):

| Task                                                                                | Date       |
|-------------------------------------------------------------------------------------|------------|
| Client certified for Texas Medicaid                                                 | January 1  |
| Medicaid benefits begin                                                             | January 1  |
| Client selects health plan and primary care provider (before the 15th of the month) | January 10 |
| Managed care benefits begin                                                         | February 1 |

#### Example 2

The following example shows the managed care enrollment date for a client who selects a health plan and primary care provider after the designated cutoff date (approximately the 15th of the month):

| Task                                                                               | Date       |
|------------------------------------------------------------------------------------|------------|
| Client certified for Texas Medicaid                                                | January 10 |
| Medicaid benefits begin                                                            | January 10 |
| Client selects health plan and primary care provider (after the 15th of the month) | January 20 |
| Managed care benefits begin                                                        | March 1    |

### 2.3.1.2 Eligibility Verification Resources

The provider must verify the client's eligibility before providing services except in cases of emergency. If emergency care is provided, the provider should determine the client's MCO and primary care provider as soon as possible. The provider must also verify and abide by the prior authorization and administrative requirements established by the MCO or DMO.

STAR MCOs provide their clients with an MCO identification card. Providers should check the MCO identification card and the Your Texas Benefits Medicaid card to determine whether the client is a managed care client.

**Referto:** "Section 4: Client Eligibility" (*Vol. 1, General Information*) for more information.

The client's MCO and DMO enrollment information can be verified by:

- Checking the client's MCO or DMO ID card (if applicable).
- Visiting the client's Medicaid MCO or DMO's website.
- Calling the client's MCO or DMO.
- Visiting TexMedConnect, accessing the Medicaid Client Portal for Providers, or calling the TMHP Contact Center at 800-925-9126.

The client's managed care eligibility can also be verified using:

- The TMHP Automated Inquiry System (AIS) at 800-925-9126.
- Third-party software that uses the TMHP EDI Gateway.
- National Council for Prescription Drug Programs (NCPDP) Eligibility Verification (E1) transaction. The E1 transaction is submitted through a pharmacy's point-of-sale system.
- The Vendor Drug Eligibility Verification Portal (EVP). EVP is a browser-based application that is free for all contracted pharmacy providers.

## **2.3.2 Enrollment in Managed Care for Specific Groups**

### **2.3.2.1 Expedited Enrollment of Pregnant Women (Program Type 40)**

If a pregnant woman applies for program type 40 and is eligible for Medicaid managed care, she has 15 days from the date on which the Enrollment Broker receives the eligibility determination to choose an MCO that participates in her managed care program. If she does not choose an MCO, one will be chosen for her.

The Enrollment Broker contacts the client to begin the enrollment process and helps the client select an MCO. The client can also contact the Enrollment Broker directly. To protect continuity of care and client choice, the Enrollment Broker will work with each pregnant woman to select an MCO that includes her current prenatal care provider or to choose an obstetrical care provider that meets her needs.

Clients will be covered under Texas Medicaid fee-for-service until their Medicaid MCO coverage begins. To ensure proper billing, providers should call the Enrollment Broker to obtain the name of the client's health plan. However, client eligibility should always be verified at the time the service is rendered.

Women who are certified as Medicaid program type 40 may be retroactively enrolled in managed care. Women who are certified as Medicaid program type 40 on or before the 10th of the month will be enrolled in managed care beginning on the first day of the month of certification. Those who are certified after the 10th of the month will be enrolled in Texas Medicaid fee-for-service for the month of certification and will be enrolled in managed care beginning on the first day of the month following the month of certification.

There are exceptions to this rule:

- Women who are certified at any time in their estimated month of delivery will be enrolled in managed care on the first day of the following month (prospective enrollment).
- Women who are certified at any time in their actual month of delivery (if known by HHSC before certification) will be enrolled in managed care on the first day of the following month (prospective enrollment).
- Women who are not identified as a candidate for program type 40 within three days of certification after her enrollment has been processed will be enrolled in managed care prospectively.

- In cases where the Medicaid effective date is a future date, prospective enrollment rules will be used.

**Important:** Providers must verify the client's plan and primary care provider information.

The following examples show when benefits begin in relation to certification:

| Example 1: Woman Certified in Her 6th Month |          |
|---------------------------------------------|----------|
| Client certified for Texas Medicaid         | August 1 |
| Medicaid benefits begin                     | August 1 |
| Managed care start date                     | August 1 |

| Example 2: Woman Certified in Her 6th Month |             |
|---------------------------------------------|-------------|
| Client certified for Texas Medicaid         | August 12   |
| Medicaid benefits begin as fee-for-service  | August 1    |
| Managed care start date                     | September 1 |

| Example 3: Woman Certified in Her 9th Month |             |
|---------------------------------------------|-------------|
| Client certified for Texas Medicaid         | August 5    |
| Medicaid benefits begin as fee-for-service  | August 1    |
| Managed care start date                     | September 1 |

**Note:** Expedited enrollments of pregnant women (program type 40) into Medicaid managed care may be retroactive.

### 2.3.2.2 Newborn Enrollment

The effective date of the newborn's enrollment is the same as the newborn's date of birth. Claims for services provided to newborns should be filed with the mother's MCO. Health-care providers should file newborn claims using the newborn's Medicaid identification number as soon as the number is made available. Providers that file claims for services provided to newborns are still responsible for meeting the Medicaid filing deadlines, which, in most cases, is within 95 days of the date of service.

MCOs must pay providers for labor- and delivery-related inpatient and professional services that are rendered to mothers for:

- Up to 48 hours following an uncomplicated vaginal delivery.
- Up to 96 hours following an uncomplicated Caesarian delivery.

MCOs must provide neonatal care for newborn clients until the time of discharge. Prior authorizations and primary care provider assignments cannot be a reason to deny claims.

MCOs must notify providers involved in the care of mothers and newborn clients, including out-of-network providers and hospitals, of the MCO's prior authorization requirements. MCOs cannot require prior authorization for services provided to a mother or newborn client for a medical condition that requires emergency services, regardless of when the emergency condition arises.

Authorization requests, utilization review questions, and claim status inquiries and appeals should be directed to the MCO in which the client is enrolled.

**Note:** Telephone numbers and addresses for MCO claims submission and appeals can be found in the appropriate MCO provider policies and procedures manual for the appropriate service.

In the STAR Program, newborns are automatically assigned to the STAR MCO the mother is enrolled with at the time of the newborn's birth for at least 90 days following the date of birth unless the mother requests a plan change as a special condition. The effective date of the newborn's enrollment is the same as the newborn's DOB.

STAR MCOs are responsible for all covered services provided to newborn clients.

### STAR Example

Enrollments of newborns born to mothers who are enrolled in STAR are retroactive to the newborn's date of birth. The following example shows the managed care enrollment date for a newborn:

| Task                                                         | Date                              |
|--------------------------------------------------------------|-----------------------------------|
| Client's date of birth (mother enrolled in STAR)             | January 3                         |
| Client certified for Texas Medicaid                          | February 1                        |
| Medicaid benefits begin                                      | January 3<br>(retroactive to DOB) |
| STAR enrollment begins (mother's STAR plan at time of birth) | January 3<br>(retroactive to DOB) |

Children born to STAR+PLUS or STAR Kids clients will be automatically enrolled with the STAR MCO in the SA operated by the same STAR+PLUS or STAR Kids MCO, if available. If the STAR+PLUS or STAR Kids MCO does not also operate a STAR MCO in the SA, the newborn will be enrolled in Texas Medicaid fee-for-service, and the mother will be given the opportunity to choose a STAR MCO for the newborn. Children born to STAR Health clients will be automatically enrolled in the STAR Health MCO. The effective date of the newborn's enrollment is the same as the newborn's date of birth. The newborn will remain enrolled for at least 90 days following the date of birth unless the mother requests a plan change as a special condition.

#### 2.3.2.2.1 Timely Notification and Assignment of Medicaid ID for Newborns

There may be a delay of up to several months from the DOB for a newborn to receive a Medicaid ID number. Providers should check with each MCO to determine the claim filing requirements for newborns who do not yet have a Medicaid client number. Medicaid MCOs must adjudicate claims for services provided to newborns in accordance with HHSC's claims processing requirements using the proxy ID number or state-issued Medicaid ID number. The MCO cannot deny claims based on a provider's non-use of state-issued Medicaid ID number for a newborn. The MCO must accept provider claims for newborn services based on the mother's name or Medicaid ID number with accommodations for multiple births, as specified by the MCO.

Hospitals that submit their birth certificate information using the DSHS Vital Statistics Unit (VSU) electronic Certificate Manager software and the Hospital Report (Newborn Child or Children) (Form 7484), receive a rapid and efficient assignment of a newborn Medicaid ID number. This process expedites reimbursement to hospitals and other providers involved in newborn care, including pharmacies that provide outpatient prescription benefits for medically needy newborns.

**Note:** *The enrollment of newborns that are born to mothers who are enrolled in an MCO on the date of birth are retroactive to the newborn's date of birth (DOB).*

#### 2.3.2.3 Breast Pump Claims Filing for MCO Services

Texas Medicaid and CHIP cover breast pumps and equipment after a baby is born when they are medically necessary.

| Coverage in prenatal period                                                  | Coverage at delivery | Coverage for newborn                     | Breast pump coverage & billing                                                                                                                                                                                     |
|------------------------------------------------------------------------------|----------------------|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| STAR                                                                         | STAR                 | STAR                                     | STAR covers breast pumps when medically necessary for mothers or newborns. Breast pump equipment may be billed under the mother's Medicaid ID or the newborn's Medicaid ID.                                        |
| CHIP Perinatal, with income at or below 198% of federal poverty level (FPL)* | Emergency Medicaid   | Medicaid fee-for-service (FFS) or STAR** | Medicaid FFS and STAR cover breast pumps when medically necessary for newborns when the mother does not have coverage under CHIP. The breast pump must be billed under the newborn's Medicaid ID.                  |
| CHIP Perinatal, with income above 198% FPL                                   | CHIP Perinatal       | CHIP Perinatal                           | CHIP covers breast pumps when medically necessary for CHIP Perinatal newborns. Breast pump equipment must be billed under the newborn's CHIP Perinatal ID.                                                         |
| STAR Kids                                                                    | STAR Kids            | Medicaid FFS or STAR**                   | Medicaid FFS, STAR, STAR Kids, and STAR+PLUS cover breast pumps when medically necessary for mothers or newborns. Breast pump equipment may be billed under the mother's Medicaid ID or the newborn's Medicaid ID. |
| STAR+PLUS                                                                    | STAR+PLUS            | Medicaid FFS or STAR**                   | Medicaid FFS, STAR, STAR Kids, and STAR+PLUS cover breast pumps when medically necessary for mothers or newborns. Breast pump equipment may be billed under the mother's Medicaid ID or the newborn's Medicaid ID. |

\* CHIP Perinatal clients who have household incomes at or below 198% FPL must apply for Emergency Medicaid coverage for labor and delivery services. HHSC mails the pregnant woman an Emergency Medicaid application 30 days before her reported due date. When Emergency Medicaid covers a birth, the newborn is certified for 12 months of Medicaid coverage, beginning on the date of birth.

\*\* These newborns will be in FFS Medicaid until they are enrolled with a STAR MCO. Claims should be filed with TMHP using the newborn's Medicaid ID if the mother does not have coverage.

| Coverage in prenatal period                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Coverage at delivery | Coverage for newborn   | Breast pump coverage & billing                                                                                                                                                            |

### 2.3.2.4 Medicaid for Transitioning Foster Care Youth (MTFCY) and Former Foster Care Children (FFCC)

Medicaid for Former Foster Care Children (FFCC) covers Medicaid clients who are 18 years of age or older and were receiving Medicaid when they aged out of foster care, but would otherwise not be eligible to continue Medicaid coverage. FFCC clients are automatically enrolled in STAR Health through the last day of the month in which they turn 21 years of age. FFCC clients may opt out of STAR Health for STAR, which allows clients to choose their MCO.

Medicaid clients who were receiving Medicaid and SSI when they aged out of foster care are automatically enrolled in STAR Kids.

Eligibility for STAR Health and STAR Kids ends on the last day of the month in which they turn 21 years of age and then coverage transfers to STAR unless the client is eligible for STAR+PLUS.

Medicaid for Transitioning Foster Care Youth (MTFCY) covers former foster care youth who were not receiving Medicaid when they aged out of foster care at 18 years of age. MTFCY clients are eligible through the last day of the month in which they turn 21 years of age to receive services through the fee-for-service or managed care models.

### 2.3.3 Client Rights

In Texas, Medicaid managed care clients have defined rights and responsibilities. Each health plan and primary care provider share the responsibility to ensure and protect client rights and to assist clients in understanding and fulfilling their responsibilities as plan clients.

Medicaid managed care clients have the right to:

- Be treated fairly and with dignity and respect.
- Know that their medical records and discussions with their providers will be kept private and confidential.
- Request changes to their medical records (if incorrect).
- A reasonable opportunity to choose a health-care plan and primary care provider (the doctor or health-care provider they will see most of the time and who will coordinate their care) and to change to another plan or provider in a reasonably easy manner. These opportunities include the right to:
  - Be informed of available health plans and primary care providers in their areas.
  - Be informed of how to choose and change health plans and primary care providers.
  - Choose any health plan that is available in their area and choose a primary care provider.
  - Change their primary care provider at any time for any reason.
  - Change health plans without penalty.
  - Be educated about how to change health plans or primary care providers.
  - Know that doctors, hospitals, and others who provide care can advise clients about their health status, medical care, and treatment. The health plan cannot prevent them from giving clients this information, even if the care or treatment is not a covered service.
  - Know that clients are not responsible for paying for covered services. Doctors, hospitals, and others cannot require clients to pay copayments or any other amounts for covered services.
- Ask questions and get answers about anything the client doesn't understand, and that includes the right to:
  - Have their provider explain their health-care needs to them and talk to them about the different ways their health-care problems can be treated.
  - Be told why care or services were denied and not given.
- Consent to or refuse treatment and actively participate in treatment decisions, and that includes the right to:
  - Work as part of a team with their provider in deciding what health care is best for them.
  - Say yes or no to the care recommended by their provider.
- Utilize each available complaint and appeal process through the MCO and through Medicaid, receive a timely response to complaints, appeals, and fair hearings. These processes include the right to:
  - Make a complaint to their health plan or to the state Medicaid program about their health-care, provider, or health plan.
  - Receive a timely answer to their complaint.
  - Access the health plan appeal process and the procedures for doing so.
  - Request a fair hearing from the state Medicaid program and request information about the process for doing so.
- Timely access to care that does not have any communication or physical access barriers. They have the right to:
  - Have telephone access to a medical professional 24 hours a day, 7 days a week in order to obtain any needed emergency or urgent care.

- Receive medical care in a timely manner.
- Be able to get in and out of a health-care provider's office, including barrier free access for persons with disabilities or other conditions limiting mobility, in accordance with the *Americans with Disabilities Act*.
- Have interpreters, if needed, during appointments with their providers and when talking to their health plan. Interpreters include people who can speak in their native language, assist with a disability, or help them understand the information.
- Be given an explanation they can understand about their health plan rules, including the health-care services they can get and how to get them.
- Not be restrained or secluded when doing so is for someone else's convenience, or is meant to force them to do something they are unwilling to do, or to punish them.

### 2.3.3.1 Advance Directives

Federal and state law require providers and MCOs to maintain written policies and procedures for informing and providing written information to all adult clients who are 18 years of age and older about their rights under state and federal law, in advance of their receiving care (*Social Security Act* §§1902[a][57] and 1903[m][1][A]). The written policies and procedures must contain procedures for providing written information regarding the client's right to refuse, withhold, or withdraw medical treatment advance directives.

These policies and procedures must comply with provisions contained in 42 *Code of Federal Regulations* (CFR) §§434.28 and 489, SubPart I, relating to the following state laws and rules:

- A client's right to self-determination in making health-care decisions.
- The Advance Directives Act, Chapter 166, Texas Health and Safety Code, which includes:
  - A client's right to execute an advance written directive to physicians and family or surrogates, or to make a nonwritten directive to administer, withhold or withdraw life-sustaining treatment in the event of a terminal or irreversible condition.
  - A client's right to make written and nonwritten Out-of-Hospital Do-Not-Resuscitate Orders.
  - A client's right to execute a Medical Power of Attorney to appoint an agent to make health-care decisions on the client's behalf if the client becomes incompetent.
- The Declaration for Mental Health Treatment, Chapter 137, Texas Civil Practice and Remedies Code, which includes a client's right to execute a Declaration for Mental Health Treatment in a document making a declaration of preferences or instructions regarding mental health treatment.

These policies can include a clear and precise statement of limitation if a participating provider cannot or will not implement a client's advance directive. A statement of limitation on implementing a client's advance directive should include at least the following information:

- A clarification of the provider's conscience objections.
- Identification of the state legal authority permitting a provider's conscience objections to carrying out an advance directive.
- A description of the range of medical conditions or procedures affected by the conscience objection.

A provider cannot require a client to execute or issue an advance directive as a condition for receiving health-care services. A provider cannot discriminate against a client based on whether or not the client has executed or issued an advance directive.

A provider's policies and procedures must require the provider to comply with the requirements of state and federal law relating to advance directives.

### **2.3.4 Client Responsibilities**

Medicaid managed care health plans and primary care providers should help clients understand their responsibilities. These include the responsibility to:

- Learn and understand each right they have under Medicaid. That includes the responsibility to:
  - Learn and understand their rights under the Medicaid program.
  - Ask questions if they do not understand their rights.
  - Learn what choice of health plan is available in their area.
- Abide by the health plan and Medicaid managed care policies and procedures. That includes the responsibility to:
  - Learn and follow their health plan rules and Medicaid rules.
  - Choose their health plan and a primary care provider.
  - Make any changes in their health plan and primary care provider in the ways established by Medicaid managed care and by the health plan.
  - Keep their scheduled appointments.
  - Cancel appointments in advance when they cannot keep them.
  - Always contact their primary care provider first for nonemergency medical needs.
  - Be sure they have approval from their primary care provider before going to a specialist (except for self-referred services).
  - Understand when they should and should not go to the ER.
- Share information relating to their health status with their primary care provider and become fully informed about service and treatment options. That includes the responsibility to:
  - Tell their primary care provider about their health.
  - Talk to their providers about their health-care needs and ask questions about the different ways their health-care problems can be treated.
  - Help their providers get their medical records.
- Actively participate in decisions relating to service and treatment options, make personal choices, and take action to maintain their health. That includes the responsibility to:
  - Work as a team with their providers in deciding what health care is best for them.
  - Understand how the things they do can affect their health.
  - Do the best they can to stay healthy.
  - Treat providers and staff with respect.
  - Talk to their provider about all of their medications.

## **2.4 Primary Care Provider/Main Dentist Guidelines for Medicaid Managed Care Clients**

In Medicaid managed care, eligible Medicaid clients choose a primary care provider or a main dentist who will work with the client to coordinate the client's health care or dental services.

The managed care client's primary care provider/main dentist is responsible for the following:

- Furnishes primary-care related services

- Arranges for and coordinates referrals for all medically necessary specialty services
- Is available directly or through on-call arrangements 24 hours a day, 7 days a week for urgent or emergency care

**Referto:** Subsection 2.4.4, “Continuous Access” in this handbook.

Primary care includes ongoing responsibility for preventive health or dental care, health or dental maintenance, treatment of illness and injuries, and the coordination of access to specialist providers and other services. The primary care provider or main dentist either furnishes or arranges for most of the client’s health-care or dental-care needs, including well-checkups, office visits, referrals, outpatient surgeries, hospitalizations, and health- and dental-related services. Primary care providers/main dentists can choose to contract with various MCOs or DMOs.

Although primary care providers are encouraged to help clients access these services, Medicaid managed care enrollees may self-refer for the following services:

- Emergency services
- Family planning services
- THSteps medical services
- Immunizations
- Early Childhood Intervention (ECI)
- Case Management for Children and Pregnant Women
- Obstetric or gynecological services
- School Health and Related Services (SHARS)
- DSHS case management
- HHSC case management
- Behavioral health services (contact client’s health plan for specific requirements)
- Vision care (including ophthalmologic or therapeutic optometry)

### **2.4.1 Enrolling as a Primary Care Provider or Main Dentist**

Various providers may be eligible to enroll in Medicaid managed care as primary care providers or main dentist. Providers must contact the individual Medicaid managed care health plans or DMOs for enrollment information.

The following provider types are eligible to serve as primary care providers:

- Pediatricians
- Family/general practitioners
- Internists
- Obstetrician/gynecologists
- Advanced Practice Registered Nurses (APRNs) under the supervision of a physician who qualifies as a primary care provider
- Certified nurse-midwives (CNM) practicing under the supervision of a physician
- Physician assistants (PAs) practicing under the supervision of a physician who qualifies as a primary care provider
- Rural health clinics (RHCs)

- Federally Qualified Health Centers (FQHCs)
- Community Clinics
- Specialists willing to provide medical homes to clients who have special needs
- The following provider types are eligible to serve as main dentists:
- General dentist
- Pediatric dentist
- Rural health clinics (RHCs)
- Federally Qualified Health Centers (FQHCs)

## 2.4.2 Primary Care Provider Requirements for THSteps Medical Services

THSteps providers must be enrolled with Medicaid to be reimbursed for services provided to clients. THSteps medical services are self-referred. Medicaid MCOs determine how their clients will access THSteps services. The MCO may require the client to go to an in-network THSteps provider or may allow the client to go to any Medicaid THSteps provider, whether or not they are in the MCO's network. Providers that render THSteps services must work in collaboration with the client's primary care provider to ensure continuity of care.

THSteps providers are required to bill claims as an exception to periodicity when the client's visit is outside of the periodicity schedule because of extenuating circumstances.

**Referto:** Section 4, "THSteps Medical" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about billing an exception-to-periodicity checkup  
 Subsection 4.3.7, "Exception-to-Periodicity Checkups" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about billing an exception-to-periodicity checkup  
 Subsection 3.2.13.1, "Exceptions to Periodicity" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about billing an exception-to-periodicity checkup.

## 2.4.3 Primary Care Provider and Main Dentist Changes

Primary care provider and main dentist changes may be requested or initiated by any of the following:

- A client who is enrolled in a Medicaid MCO or DMO may request a primary care provider or main dentist change at any time and for any reason.
- The MCO or DMO may reassign the client to another primary care provider or main dentist for any of the following reasons:
  - The primary care provider or main dentist is sanctioned by HHSC.
  - The primary care provider or main dentist exhibits a documented pattern of unacceptable quality of care.
  - The primary care provider or main dentist inappropriately reduces the client's right to access specialty services covered under Medicaid managed care.
  - The provider leaves Medicaid, retires, or dies.
- A provider may request a client be reassigned to another primary care provider or main dentist for any of the following reasons:
  - The client is not included in the primary care provider's or main dentist's scope of practice.
  - The client is noncompliant with medical or dental advice.

- The client consistently displays unacceptable office decorum.
- The client's relationship with the primary care provider or main dentist is not mutually agreeable.

Any request by a provider to reassign a client to another primary care provider or main dentist must be processed through the applicable Medicaid MCO or DMO. Before a request for reassignment can be initiated, reasonable measures must be taken to correct the client's behavior. Reasonable measures may include education or counseling by the MCO or DMO staff. The MCO or DMO will notify the client of the reassignment if all attempts to remedy the situation have failed. Providers should also notify the client about the reassignment in writing and send a copy of the notification to the MCO or DMO.

The MCOs and DMOs can affect a primary care provider or main dentist change immediately if necessary; however, the Medicaid client eligibility verification systems may not immediately reflect the change.

#### **2.4.4 Continuous Access**

Continuous access is an important feature of Medicaid managed care. Twenty-four-hour primary care provider and main dentist availability enables clients to access and use services appropriately, instead of relying on ERs for after-hours care.

Continuous access can be provided through direct access to a primary care provider's or main dentist's office or through on-call arrangements with another office or service. Clients should be informed of the primary care provider's or main dentist's normal office hours and should be instructed how to access urgent medical care after normal office hours.

##### **2.4.4.1 After-Hours Guidelines**

Primary care providers and main dentists are required to have at least one of the following arrangements in place to provide 24-hour, 7-day a week access for managed care clients:

- The office telephone is answered after-hours by an answering service, which meets language requirements of the major population groups and which can contact the primary care provider, main dentist, or another designated provider. All calls answered by an answering service must be returned within 30 minutes.
- The office telephone is answered after normal business hours by a recording in the language of each of the major population groups served, directing the patient to call another number to reach the primary care provider, main dentist, or another provider designated by the primary care provider or main dentist. Someone must be available to answer the designated provider's telephone. Another recording is not acceptable.
- The office telephone is transferred after office hours to another location where someone will answer the telephone and be able to contact the primary care provider, main dentist, or another designated medical practitioner, who can return the call within 30 minutes.

##### **2.4.4.2 Unacceptable Telephone Arrangements**

The telephone answering procedures listed below are not acceptable:

- The office telephone is only answered during office hours.
- The office telephone is answered after-hours by a recording that tells clients to leave a message.
- The office telephone is answered after-hours by a recording that directs clients to go to an Emergency Room for any services needed.
- Returning after-hours calls outside of 30 minutes.

## 2.5 Cultural Competency and Sensitivity

HHSC values the diversity of the Texas Medicaid population and requires Medicaid managed care to provide programs to support clients from diverse cultural backgrounds. Helplines are staffed by both Spanish- and English-speaking customer service representatives who, at any time, may access a multi-language translation service for assistance.

Providers must comply with the laws concerning discrimination on the basis of race, color, national origin, or sex.

### 2.5.1 Limited English Proficiency

Medicaid providers are required to provide services in the languages of the major Medicaid population groups they serve and to ensure quality appropriate translations. Title VI, section 601, of the *Civil Rights Act* of 1964 states that “no person in the United States shall on the basis of race, color, or national origin, be excluded from participating in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.”

HHSC requires Medicaid providers to ensure persons with limited English proficiency have equal access to the Medicaid services to which they are legally entitled.

Meeting the requirements of Title VI may require the primary care provider or main dentist to take all or some of the following steps at no cost or additional burden to the beneficiary with limited English proficiency:

- Have a procedure for identifying the language needs of patients/clients.
- Have access to proficient interpreters during hours of operation (MCOs or DMOs arrange interpreters).
- Develop written policies and procedures regarding interpreter services (MCOs or DMOs arrange interpreters).
- Disseminate interpreter policies and procedures to staff and ensure staff awareness of these policies and procedures and of their Title VI obligations to persons with limited English proficiency.

To meet interpretation requirements, providers may choose to incorporate into their business practice any of the following (or equally effective) procedures:

- Hire bilingual staff. (Does not apply to MCOs.)
- Hire staff interpreters. (Does not apply to MCOs.)
- Use qualified volunteer staff interpreters. (Does not apply to MCOs.)
- Arrange for the services of volunteer community interpreters—excluding the client’s family or friends. (Does not apply to MCOs.)
- Contract with an outside interpreter service. (MCO or DMO must provide.)
- Use a telephone interpreter service.
- Develop a notification and outreach plan for beneficiaries with limited English proficiency.

It is the provider’s responsibility to ensure that interpretive services are available to his practice to meet requirements on limited English proficiency and communication disabilities. Interpretive services include language and American Sign Language (ASL) interpreters.

Language Line Services operate 24 hours a day, 7 days a week. Language Line Services provides over-the-telephone interpretation, video interpreting, document translation, interpreter testing and training, and other language products as well. Language Line Services charges a fee for the service. For complete details about their billing practices and services, providers should visit the Language Line Services website at [www.language-line.com](http://www.language-line.com) or call 800-752-6096.

Complaints and reports of non-compliance with Title VI regulations are handled by the Office for Civil Rights (OCR). Additional information, including the complete guidance memorandum on prohibition of discrimination against persons with limited English proficiency issued by the OCR, can be found on the Internet at <https://www.hhs.gov/civil-rights/for-individuals/special-topics/limited-english-proficiency/index.html>.

**Note:** MCOs are responsible for providing interpreter services.

## 2.6 Reimbursement

Providers must read and comply with “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information).

Reimbursement for benefits that are administered by a Texas Medicaid MCO or DMO is determined by the MCO or DMO. Providers should contact the MCO or DMO for additional information.

**Note:** The MCOs and DMOs are not limited to following the Texas Medicaid fee schedules. There may be some differences in reimbursement based on decisions made by the individual health and DMOs.

Texas Medicaid reimburses carve-out services according to the appropriate reimbursement methodology defined in the applicable Texas Medicaid Provider Procedures Manual handbook and the applicable Texas Medicaid fee schedules, which are available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 2.6.1 Coinsurance and Deductible Payments for Dual-Eligible Clients

Crossover claims for payment for deductibles or coinsurance according to current payment guidelines are processed by TMHP and not the client’s MCO.

For clients who are enrolled in a Medicare Advantage Plan (MAP) and/or Special Needs Plan (SNP), crossover claims for coinsurance and deductible payments are processed by the MAP and/or SNP. These claims are not processed by TMHP.

### 2.6.2 Third Party Liability (TPL)

**Referto:** “Section 8: Third Party Liability (TPL)” (Vol. 1, General Information) for additional information.

### 2.6.3 Out-of-Network Reimbursement

MCOs must ensure their clients have access to covered services on a timely basis. They are required to have a defined network of providers to meet client needs, and to provide support to clients who need help finding a doctor or setting up appointments. MCOs must maintain access to network providers based on federal and state requirements. If an in-network provider is not available, the MCO is still required to locate a willing provider to ensure clients have access to medically necessary and appropriate services.

If medically necessary covered services are not available through in-network providers, MCOs must allow a referral to an out-of-network Medicaid provider. The referral must be requested by an in-network provider and within the time appropriate to the circumstances relating to the delivery of the services and the condition of the client but no longer than five business days after the request.

The MCO must fully reimburse the non-network provider in accordance with the out-of-network methodology for Medicaid as defined by HHSC in 1 TAC § 353.4.

MCOs must allow pregnant clients, past the 24th week of pregnancy to remain under their current OB/GYN’s care through the client’s postpartum checkup, even if the OB/GYN provider is, or becomes, out-of-network.

For newly enrolled clients, MCOs must pay the existing out-of-network Medicaid providers for medically necessary covered services for up to 90 days, until the client’s records and care can be transferred to an in-network provider, or until the client is no longer enrolled with the MCO.

MCOs are not responsible for payment for unauthorized nonemergency services by out-of-network providers, except when that provider is an Indian Health Care Provider (IHCP) enrolled as a FQHC.

2.7 Managed Care Plan Changes

The MCO or DMO changes can be initiated by clients, MCOs, or DMOs.

2.7.1 Client-Initiated Plan Changes

Clients have the right to change plans. Clients must call the Enrollment Broker at 800-964-2777 to initiate a plan change. If a plan change request is received before the middle of the month, the plan change is effective on the first day of the following month. If the request is received after the middle of the month, the plan change will be effective on the first day of the second month following the request, as shown below.

| Example                       |         |
|-------------------------------|---------|
| Request received on or before | Mid-May |
| Change effective              | June 1  |
| Request received after        | Mid-May |
| Change effective              | July 1  |

*Note: All plan change requests must be processed by the Enrollment Broker.*

The STAR Health Program only has one plan choice available. As a result, clients cannot change plans, but may change primary care providers within their assigned STAR Health MCO.

2.7.2 Plan Administrator-Initiated Changes

Each health plan and DMO has a limited right to request that a client be disenrolled without the client’s consent. HHSC must approve any request for such disenrollment.

Health plans and DMOs may request that a client be disenrolled for the following reasons:

- The client loans his or her Your Texas Benefits Medicaid card to another person to obtain services.
- The client continually disregards the advice of his primary care provider or main dentist.
- The client repeatedly uses the ER inappropriately.
- Client is disruptive, unruly, threatening, or uncooperative to the extent that client’s membership seriously impairs MCO’s, DMO’s, or provider’s ability to provide services to the client or to obtain new patients, and the client’s behavior is not caused by a physical or behavioral health condition.
- Client refuses to comply with managed care restrictions (e.g., repeatedly using emergency room in combination with refusing to allow MCO to treat the underlying medical condition).
- For STAR+PLUS MCOs, under limited conditions, the MCO may request disenrollment of clients who are totally dependent on a ventilator or who have been diagnosed with End Stage Renal Disease.

Before a request for disenrollment can be initiated, reasonable measures must be taken to correct the client’s behavior. Reasonable measures may include education or counseling conducted by health plan or DMO staff. HHSC will notify the client in writing of the disenrollment if all attempts to remedy the situation have failed. HHSC will also notify the client in writing of the availability of appeal procedures and the HHSC fair hearing process.

Health plans, DMOs, and providers can not request a client's disenrollment because of an adverse change in the client's health or the utilization of services that are medically necessary for the treatment of a client's condition.

### **2.7.3 Managed Care Organization (MCO) Clients Who Transition to Medicaid Fee-For Service (FFS)**

When clients transition from an MCO to FFS, providers can request that previously approved authorizations for Comprehensive Care Program (CCP) services, occupational therapy (OT), physical therapy (PT), private duty nursing (PDN), and speech therapy (ST) be transferred from the MCO to FFS.

#### **2.7.3.1 Submission Guidelines**

TMHP will consider the reimbursement of claims for services that were rendered on or after the MCO's disenrollment date only when the provider submits a request to TMHP to transfer the previously approved authorization for CCP services. The request to TMHP must be received on or before the end date of the previously approved MCO authorization. Any requests submitted after the MCO's authorization end date will have to meet the regular submission guidelines for the specific service type.

#### **2.7.3.2 Documentation Requirements**

All of the requests to transfer the authorizations from the MCO to FFS must include:

- A copy of the previously approved authorization letter.
- All of the documentation that was sent in the original authorization request, including any physician orders that were used to determine the start of care. TMHP will accept the physician orders as the required documentation for the requested services.
- The completed CCP prior authorization form, Special Medical Prior Authorization (SMPA) form, Home Health Plan of Care, or Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form, whichever is applicable for the requested service. The form must include the dates of service and quantities that are being requested from TMHP, which must match the dates of service and quantities that were approved in the original authorization.

**Note:** *It is not necessary to obtain signatures or dates on the forms listed above when submitted to TMHP for the purpose of transferring an authorization from an MCO to FFS Medicaid.*

Authorizations for services transferred from an MCO to FFS Medicaid are subject to retrospective review.

TMHP will verify the client's eligibility, the dates of service, and the quantities requested.

TMHP will process reimbursement claims as follows:

- Claims for services that were rendered before the date on which the transfer request was received will be denied as a late submission, and the provider will be notified of their administrative appeal rights through the Health and Human Services Commission (HHSC).
- Claims for services that were rendered on or after the date of receipt use the required information from the transferred authorization and will be processed as if the request was received in a timely manner.
- Claims for services that were paid by an MCO and then recouped must contain the recoupment EOB from the MCO for consideration of payment. The claims must meet the 95-day deadline from the recoupment disposition date.

**Note:** *Letter requests for refunds will not be accepted. A recoupment EOB with a disposition date is required.*

If a request to transfer an MCO authorization is submitted after the end date of the MCO authorization, or the provider does not have an authorization letter from the MCO, TMHP will process the request to transfer the authorization based on established TMHP authorization submission guidelines for CCP services, PDN, OT, PT, and ST.

All new requests for rendered services must meet the documentation requirements.

### **2.7.3.3 New Services and Extension of Services**

For new services that occur after the client's MCO disenrollment change date, the provider is responsible for submitting all TMHP required paperwork and meeting all established submission guidelines for prior authorization.

Requests for the extension of services that occur after the MCO disenrollment change date must include all of the paperwork that is required by TMHP and meet all established submission guidelines for prior authorization.

### **2.7.3.4 Loss of Eligibility**

If an MCO disenrolled a client and the client also loses Medicaid eligibility, providers must anticipate, if and when Medicaid eligibility is restored, that the client will initially be considered a Medicaid FFS client and will have a retroactive eligibility period.

All requests for services that require prior authorization and that occur during the client's retroactive eligibility period, must be submitted to TMHP following the process that is outlined in subsection 5.1.1, "Prior Authorization Requests for Clients with Retroactive Eligibility" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*).

If a client is retroactively disenrolled by an MCO, all of the services that are rendered by the provider during this retroactive disenrollment period (specifically from the date on which the client was eligible for FFS to the date of the client's MCO eligibility change) will be denied by TMHP, and the provider will be notified of their administrative appeal rights.

**Referto:** Subsection 6.4.2.9, "Attachments to Claims" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

TMHP may consider services for the MCO transition beginning on the date of the client's MCO eligibility change date and going forward. TMHP uses the MCO transition process for the submission of paperwork and the processing of provider requests.

## **2.8 Authorizations for Managed Care Services**

MCOs must have a process in place that allows prior authorizations eligible for recertification to be submitted by providers and reviewed by the MCO within the timeframes as outlined in Section 5: Fee-for-Service Prior Authorizations.

Authorization requests for services administered by the client's MCO or DMO must be submitted to the client's MCO or DMO according to the guidelines specific to the plan under which the client is covered.

Health plan prior authorizations do not automatically transfer with a client who moves to another plan.

When a client or provider notifies the new MCO that there is an existing prior authorization, the new MCO must ensure that the client gets a continued authorization of those services for the same amount, duration, and scope. The new MCO must get the continued authorization within the shortest of the following time periods:

- Within 90 Days of the transition to a new MCO
- Until the end of the current authorization period
- Until the MCO has evaluated and assessed the client and issued or denied a new authorization

If a client who is transitioning from FFS to managed care was receiving a service that did not require a prior authorization in FFS, but does require one in the new MCO, the MCO must ensure that the client receives services for the same amount, duration, and scope. The continued authorization must last for the shortest period of the following:

- Within 90 days of the transition to the new MCO
- Until the MCO has evaluated and assessed the client and issued or denied a new authorization

Dental prior authorizations may transfer from one DMO to another.

## 2.9 Claims Filing for Managed Care Services

Claims for services administered by an MCO or DMO must be submitted to the client's MCO or DMO. Providers may submit directly to the appropriate MCO or DMO using the methods established by the MCO or DMO.

Providers must contact the appropriate MCO or DMO for information about filing electronic or paper claims directly to the MCO or DMO.

MCOs may also subcontract with behavioral health organizations (BHOs) and pharmacy benefit managers (PBMs). Providers must contact the client's MCO to verify the claims process.

**Referto:** The TMHP website at [www.tmhp.com/topics/managed-care](http://www.tmhp.com/topics/managed-care) for additional information, including MCO and DMO contact information.

**Important:** *Providers must call the client's MCO or DMO who processed the claim for information about the MCO's or DMO's explanation of benefits (EOB), claims payment, claim rejection, how to correct a rejected claim, or any other questions about the MCO or DMO claim guidelines and processes. TMHP does not have any information about the MCO's or DMO's claims, benefits, or processes.*

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (Vol. 1, General Information) for information on electronic claims submissions to TMHP.

**Reminder:** *Claims for Medicaid managed care clients must be submitted to the MCO or DMO in which the client is enrolled at the time of service. Providers can contact the client's MCO or DMO for additional details. Claims for hospital facility charges for inpatient hospital stays for Medicaid managed care clients must be submitted to the program, MCO, or DMO in which the client is enrolled at the time of admission. The responsible party will pay the hospital facility charge until the earlier of either the date of discharge from the hospital, date of transfer, or loss of Medicaid eligibility. Providers must submit the claims with the corresponding prior authorizations for the hospital facility charge to the appropriate entity for reimbursement. Providers can contact the appropriate MCO or DMO for additional details. If Medicaid managed care clients receive other services during an inpatient hospital stay, including hospital professional charges, claims for these services (from the date of hospital admission to the date of release) are submitted to the program, MCO, or DMO in which the client is enrolled at the time of the requested service. The MCO or DMO, as a payor of last resort, does not determine payment based on the primary payor's (i.e., TPR or other primary source of insurance) authorization of services or approval of hospital stays.*

**Referto:** "Section 8: Third Party Liability (TPL)" (Vol. 1, General Information) for additional information.

The TMHP Medicaid Managed Care web page at [www.tmhp.com/topics/managed-care](http://www.tmhp.com/topics/managed-care) for additional information.

## 2.9.1 Filing Deadlines

The following table summarizes the filing deadlines that apply for MCO and DMO claim submissions:

| Submission                                              | Filing Deadline                                                                                                                           |
|---------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Initial submission submitted to the correct plan        | 95 days from the DOS                                                                                                                      |
| Initial submission submitted to the wrong plan          | 95 days of the date on the Remittance and Status (R&S) Report from the other (wrong) carrier (documentation of timely filing is required) |
| Initial submission to TPR (not the Medicaid MCO or DMO) | 95 days from the date of disposition by the other insurance resource                                                                      |
| Initial submission for newborns                         | Submit to the client's or mother's MCO within 95 days of the DOS                                                                          |

Claims must be submitted to the appropriate entity whether TMHP or the MCO or DMO within 95 days of the date of service. If the claim is not received by the MCO or DMO within 95 days, the claim will be denied.

If the provider files with the wrong plan within the 95 day submission requirement (e.g., State Claims Administrator but not with the MCO or DMO), the provider must resubmit the claim with documentation that shows the claim was submitted within the appropriate time frame but to the wrong plan. The MCO or DMO must honor the initial filing date and process the claim without denying the resubmission for the sole reason of passing the filing timeframe. The provider must file the claim with the correct MCO within 95 days of the date on the Remittance and Status (R&S) Report from the other (wrong) carrier.

When a service is billed to other insurance, the claim must be refiled and received by the Medicaid MCO or DMO within 95 days from the date of disposition by the other insurance resource. The MCO or DMO will determine, as a part of its provider claims filing requirements, the documentation required when a provider refiles these types of claims with the MCO or DMO.

MCOs and DMOs are subject to the requirements related to coordination of benefits for secondary payers in the Texas Insurance Code section 843.349 (e) and (f).

**Referto:** Subsection 2.9, “Claims Filing for Managed Care Services” in this handbook for details about managed care claims.

Subsection 6.1, “Claims Information” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for information about MCO claims processed by TMHP and not the client's MCO.

## 2.10 MCO/DMO Appeals, Complaints, and Fair Hearings

Providers can submit their appeals directly to the MCO or DMO that administers the clients' managed care benefits.

Claims that were originally submitted to TMHP for routing to the appropriate MCO or DMO can be appealed to TMHP using TexMedConnect or EDI. The appeals will be routed to the appropriate entity for processing.

### 2.10.1 Medicaid Managed Care Complaints and Fair Hearings

Medicaid managed care providers may file complaints with HHSC if they find they did not receive full due process from the respective managed care health plan.

Appeals, grievances, or dispute resolution is the responsibility of each MCO or DMO. Providers are encouraged to exhaust the complaints or grievance process with their MCO or DMO before filing a complaint with HHSC.

**Referto:** The respective MCO or DMO for information about specific complaint policies and procedures.

The respective health plan's policies and procedures for information about the MCO appeals and fair hearing process.

Subsection 7.1.5, "Paper Appeals" in "Section 7: Appeals" (*Vol. 1, General Information*) for information about paper appeals.

Once the MCO's or DMO's complaints or grievance process has been exhausted, complaint requests may be sent to HHSC.

Complaints about STAR, STAR+PLUS, STAR Kids, STAR Health, and DMO can be:

- Emailed to HHSC at [HPM\\_Complaints@hhsc.state.tx.us](mailto:HPM_Complaints@hhsc.state.tx.us).
- Mailed to HHSC at:

Health and Human Services Commission  
MCCO Research and Resolution  
PO Box 149030  
MC: 0210  
Austin, TX 78714-9030

### 3 STAR Program

The principal objectives of the STAR Program are to emphasize early intervention and to promote improved access to quality care thereby significantly improving health outcomes for the target populations. The special focus of the STAR Program is on prenatal and well-child care.

#### 3.1 STAR Program Clients

Most clients in Texas Medicaid get their coverage through the STAR Program. STAR provides primary care, acute care, behavioral health care, and pharmacy services for pregnant women, newborns, and children and parents with limited income. Some former foster care children and youth are eligible for the STAR Program as well.

STAR is available statewide in 13 service areas (SAs). STAR Medicaid clients can select from at least two MCOs in each service area.

**Referto:** Subsection 2.3.2.4, "Medicaid for Transitioning Foster Care Youth (MTFCY) and Former Foster Care Children (FFCC)" in this handbook.

#### 3.2 STAR Program Benefits

STAR Program clients receive all the benefits of Texas Medicaid fee-for-service and the following additional benefits:

- Removal of the inpatient spell of illness limitation for adults
- Unlimited medically necessary prescription drugs for adults
- Waiver of the \$200,000 individual annual limit on inpatient services

### 3.2.1 Spell of Illness

STAR clients are not limited to the 30-day spell of illness. The spell of illness limitation is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. All Medicaid clients who are 20 years of age and younger are already not limited to the 30-day spell of illness.

### 3.2.2 Prescriptions

STAR clients who are 21 years of age or older receive unlimited medically necessary prescription drugs. The elimination of the three prescription limit per month for adult clients enrolled in STAR allows the provider greater flexibility in treating and managing a client's health-care needs. All Medicaid clients who are 20 years of age or younger already receive unlimited medically necessary prescription drugs.

## 4 STAR Kids Program

The STAR Kids Program is designed to improve access to care, coordinate care across service areas, improve ease of program participation for clients, managed care organizations, and providers, and achieve cost efficiency and cost containment. The STAR Kids program integrates acute care and long-term services and supports (LTSS) into a Medicaid managed care delivery system for children and adults who are 20 years of age or younger and have a disability.

STAR Kids also provides Medically Dependent Children's Program (MDCP) services for eligible clients.

**Referto:** The STAR Kids website at [www.hhs.texas.gov/services/health/medicaid-chip/medicaid-chip-members/star-kids](http://www.hhs.texas.gov/services/health/medicaid-chip/medicaid-chip-members/star-kids).

### 4.1 STAR Kids Clients

STAR Kids is available statewide in 13 service areas (SAs). STAR Kids Medicaid clients can select from at least two MCOs in each service area.

Participation in the STAR Kids program is required for Medicaid clients who are 20 years of age or younger and meet at least one of the following:

- Receive Supplemental Security Income (SSI).
- Receive SSI and Medicare.
- Receive services through the Medically Dependent Children Program (MDCP) waiver.
- Receive services through the Youth Empowerment Services (YES) waiver.
- Live in a community-based intermediate care facility for individuals with an intellectual disability or related condition (ICF/IID) or nursing facility.
- Receive services through a Medicaid Buy-In program.
- Receive services through any of the following HHSC intellectual and developmental disability (IDD) waiver programs.
  - Community Living Assistance and Support Services (CLASS)
  - Deaf Blind with Multiple Disabilities (DBMD)
  - Home and Community-based Services (HCS)
  - Texas Home Living (TxHmL)

Children and youth who receive SSI or SSI-related Medicaid or are enrolled in MDCP receive all of their Medicaid services through the STAR Kids program.

Children and youth who receive services through other 1915(c) waiver programs receive their basic Medicaid health services through STAR Kids, while receiving their LTSS through their waiver program.

Children who are dually eligible receive most of their acute care services through Medicare but receive LTSS and service coordination through STAR Kids.

## 4.2 STAR Kids Benefits

STAR Kids Program clients receive all the benefits of Texas Medicaid fee-for-service, including Texas Health Steps and Comprehensive Care Program services. STAR Kids clients who have an assessed need for LTSS, identified by the STAR Kids Screening and Assessment Instrument (SK-SAI), may receive services through their STAR Kids MCO.

### 4.2.1 Spell-Of-Illness

No spell-of-illness limitation exists for THSteps-eligible clients who are 20 years of age or younger when a medically necessary condition exists.

### 4.2.2 Prescriptions

All Medicaid clients who are 20 years of age or younger receive unlimited medically necessary prescription drugs.

### 4.2.3 Service Coordination

*Referto:* Subsection 2.1.3, “Service and Care Coordination” in this handbook.

The [STAR Kids Handbook](https://www.hhs.texas.gov/starkids) page of the HHS website at [hhs.texas.gov](https://www.hhs.texas.gov).

## 5 STAR+PLUS Program

The STAR+PLUS Program is designed to improve access to care, provide care in the least restrictive setting, and provide more accountability and control on costs. The STAR+PLUS program integrates acute care and long-term services and supports (LTSS) into a Medicaid managed care delivery system for SSI-eligible Medicaid clients.

The STAR+PLUS Program serves adults with a disability, clients age 65 and older (including those dually eligible for Medicare and Medicaid), as well as women in the Medicaid Breast and Cervical Cancer Program.

### 5.1 STAR+PLUS Program Clients

Medicaid clients who are 21 years of age or older and enrolled in any of the following HHSC programs must enroll in STAR+PLUS for acute care benefits, unless the member is dual-eligible for Medicaid and Medicare:

- Community-based Intermediate Care Facility of Individuals with Intellectual Disabilities (ICF-IID)
- Home and Community-based Services (HCS)
- Community Living Assistance and Support Services (CLASS)
- Texas Home Living (TxHmL)
- Deaf Blind with Multiple Disabilities (DBMD)

Enrollment in the STAR+PLUS program is required for clients of Medicaid who meet one or more of the following criteria:

- Receive Supplemental Security Income (SSI) benefits or SSI-related Medicaid
- Qualify for STAR+PLUS Home and Community-Based Waiver Services

- Are 21 years of age or older and receive Medicaid because they are in a Social Security Exclusion program and meet financial criteria for STAR+PLUS Home and Community-Based Services Program
- Are 21 years of age or older and reside in a nursing facility
- Qualify for Medicaid for Breast and Cervical Cancer (MBCC)
- Former Foster Care Children (FFCC) clients who are 21 years of age through the end of the month of their 26th birthday, who are dual eligible, and who reside in a community-based ICF-IID or receive services under the following Medicaid 1915(c) waivers:
  - HCS
  - CLASS
  - TxHmL
  - DBMD

**Exception:** *Clients who receive Medicare Part B in addition to Medicaid will remain in FFS for all Medicaid services.*

**Referto:** Subsection 4.8, “Medicaid for Breast and Cervical Cancer (MBCC)” in “Section 4: Client Eligibility” (*Vol. 1, General Information*) for more information about the MBCC Program.

After selecting an MCO, STAR+PLUS Program clients who are not dual-eligible are required to select a primary care provider from the MCO provider directory.

#### **5.1.0.1 Dual Demonstration**

The Dual Eligible Integrated Care Demonstration Project, or Dual Demonstration, is a fully integrated managed care model for individuals age 21 and older who are dually eligible for Medicare and Medicaid and required to be enrolled in the STAR+PLUS program. This model involves a three-party contract between an MCO with an existing STAR+PLUS contract, HHSC, and the Centers for Medicare & Medicaid Services (CMS) for the provision of the full array of Medicaid and Medicare services.

Under this initiative, the MCO is responsible for the full array of Medicare and Medicaid covered services, including acute care and LTSS. The demonstration does not include clients who reside in an ICF/IID and individuals with IDD who receive services through CLASS, DBMD, HCS, or TxHmL waivers. The demonstration operates in Bexar, Dallas, El Paso, Harris, Hidalgo, and Tarrant counties.

#### **5.1.0.2 Medicare Advantage Dual Eligible Special Needs Plan**

A Dual Eligible Special Needs Plan (D-SNP) is a managed care delivery model specifically designed to coordinate care between Medicare and Medicaid covered services for individuals that are dually eligible for both programs.

Under this managed care delivery option, D-SNPs are responsible for the coordination of care between Medicare and Medicaid covered services. D-SNPs that also operate in STAR+PLUS deliver Medicaid services through the STAR+PLUS program. D-SNPs that do not also operate in STAR+PLUS are only responsible for paying beneficiary cost-sharing.

### **5.1.1 Clients who are Ineligible for The STAR+PLUS Program**

Clients who meet the following criteria are not eligible to enroll in STAR+PLUS and will remain in Texas Medicaid fee-for-service:

- Residents in a State Supported Living Center
- Residents in an ICF-IID who are dual eligible in Medicare and Medicaid
- Residents of state hospitals or institutions for mental diseases

- Program of All-Inclusive Care for the Elderly (PACE)
- In-Home and Family Support Program Services clients
- Qualified Medicare Beneficiaries (QMBs) that do not receive Medicaid benefits other than Medicare deductible or coinsurance liabilities according to current payment guidelines
- Clients who receive limited Medicaid benefits and do not qualify for participation in the VDP

## 5.2 STAR+PLUS Program Benefits

STAR+PLUS Program clients receive all the benefits of Texas Medicaid fee-for-service and the following additional benefits:

- Unlimited medically necessary prescription drugs for adults who are not dual-eligible
- Waiver of the \$200,000 individual annual limit on inpatient services

**Referto:** Subsection 3.2.2, “Prescriptions” in this handbook for more information about prescription benefits.

**Note:** *Dual eligible adults continue to be limited to three prescriptions unless they have joined the Medicare MCO also offered by their STAR+PLUS MCO.*

### 5.2.1 Prescriptions

STAR+PLUS clients who are 21 years of age and older and do not receive Medicare receive unlimited medically necessary prescription drugs. The elimination of the three prescription limit per month for adult clients enrolled in STAR+PLUS allows the provider greater flexibility in treating and managing a client’s health care needs. All Medicaid clients who are 20 years of age and younger already receive unlimited medically necessary prescription drugs.

### 5.2.2 Spell of Illness

The spell-of-illness limitation applies to clients in the STAR+PLUS Program.

A spell-of-illness is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days.

An individual may be discharged from and readmitted to a hospital several times, regardless of the admittance reasons, and still be considered to be in the same spell of illness if 60 days have not elapsed between discharge and readmission.

The spell-of-illness limitation does not apply in the following situations:

- A prior-approved solid organ transplant has an additional 30-day spell of illness, which begins on the date of the transplant.
- No spell-of-illness limitation exists for THSteps-eligible clients who are 20 years of age and younger when a medically necessary condition exists.
- The client is enrolled in the Medicaid managed care STAR program.
- The client is not eligible for Medicare and is admitted to an inpatient facility with a diagnosis of bipolar disorder, major depressive disorder, recurrent depressive disorder, schizoaffective disorder, or schizophrenia.

For confirmation of spell-of-illness limitation contact the client’s MCO.

### 5.2.3 Service Coordination

The MCO must furnish a service coordinator to all STAR+PLUS clients who request one, or when the MCO determines the need for a service coordinator through an assessment. A service coordinator is the person with primary responsibility for providing service coordination and care management to STAR+PLUS clients.

**Referto:** Subsection 2.1.3, “Service and Care Coordination” in this handbook.

## 6 STAR Health Program

The STAR Health program ensures that children and youth in state conservatorship are able to receive all services they need immediately upon entry into conservatorship. Benefits under STAR Health begin the date the client is placed in conservatorship.

HHSC has selected Superior HealthPlan as the MCO for this program. Superior HealthPlan is responsible for assigning a to clients when they are enrolled in the STAR Health Program. Foster care families are given the opportunity to change their primary care provider after this initial assignment.

### 6.1 STAR Health Program Clients

All Medicaid clients in foster care are placed in this program with the following exceptions:

- Children adjudicated and placed with the Texas Juvenile Justice Department
- Children from other states who are placed in Texas Children in Medicaid-paid facilities such as children in nursing homes, ICF-IIDs, or State-Supported Living Centers
- Children who are active SSI-related Medicaid clients
- Children who are in state conservatorship who are placed outside of Texas
- Children who are in adoption assistance

Clients who participate in the Medicaid for Transitioning Foster Care Youth (MTFCY) program and the Former Foster Care Children (FFCC) program are eligible for the STAR Health program.

The following table shows the age ranges for clients who may be eligible for the STAR Health program:

| Group Clients Belong to                                                                     | Age Ranges                                                                                                                                                                      |
|---------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Client under DFPS conservatorship                                                           | DFPS can retain conservatorship through the month of the client’s 18th birthday. (Eligibility ends the month conservatorship ends.)                                             |
| Clients who voluntarily continue in a foster care placement after DFPS conservatorship ends | 18 through 21 years of age (Eligibility ends the month of their 22nd birthday.)                                                                                                 |
| Clients who are participating in the MTFCY program                                          | 18 through 20 years of age (Eligibility ends the month of their 21st birthday.)                                                                                                 |
| Clients who are participating in the FFCC program                                           | 18 through 20 years of age (Eligibility for STAR Health ends the month of their 21st birthday, and then coverage transfers to STAR unless the client is eligible for STAR+PLUS) |

STAR Health clients can gain eligibility on any day of the month. To ensure the accurate confirmation of STAR Health eligibility, it is essential that all health-care providers verify eligibility by contacting the STAR Health MCO. The STAR Health MCO receives updated eligibility information on a daily basis, so it will have the most current eligibility information.

The Department of Family and Protective Services (DFPS) Form 2085 as well as the Your Texas Benefits Medicaid card may also be used to verify eligibility in the STAR Health Program.

Newborns born to a mother who is enrolled in the STAR Health program are automatically enrolled in STAR Health.

Newborns that are taken into State conservatorship while still in the hospital will be enrolled in STAR Health on the date the State takes conservatorship.

**Referto:** Subsection 2.3.2.4, “Medicaid for Transitioning Foster Care Youth (MTFCY) and Former Foster Care Children (FFCC)” in this handbook.

Subsection 2.3.2.2, “Newborn Enrollment” in this handbook.

## 6.2 STAR Health Program Benefits

STAR Health Program clients receive all the benefits of traditional Texas Medicaid as well as service coordination to assist in making appointments and accessing services; and service management to assist with managing the health care of those with ongoing and serious medical needs.

**Referto:** Subsection 2.1.3, “Service and Care Coordination” in this handbook.

Most Medicaid foster care claims are capitated services and must be submitted to Superior HealthPlan.

**Referto:** Section 8, “Carve-Out Services” in this handbook for the list of non-capitated services that may be reimbursed by TMHP.

All THSteps dental, medical, vision, and mental health providers should submit claims for services rendered to foster care clients to Superior HealthPlan’s dental, vision, and mental health contractors.

For general provider information or authorizations, from STAR Health subcontractors, contact Superior Health Plan.

### 6.2.1 Spell-Of-Illness

No spell-of-illness limitation exists for THSteps-eligible clients who are 20 years of age and younger when a medically necessary condition exists.

### 6.2.2 Prescriptions

All Medicaid clients who are 20 years of age and younger receive unlimited medically necessary prescription drugs.

**Note:** *HIPP program clients who are enrolled in STAR Health should be removed from the HIPP program and continue to receive their benefits under the STAR Health program.*

**Referto:** Subsection 4.10, “Health Insurance Premium Payment (HIPP) Program” in “Section 4: Client Eligibility” (*Vol. 1, General Information*) for more information about the HIPP program.

Subsection 1.1, “About the Vendor Drug Program” in the *Outpatient Drug Services Handbook* (*Vol. 2, Provider Handbooks*) for information about this program.

## 7 Children’s Medicaid Dental Services

### 7.1 Overview

The principal objectives of children’s Medicaid managed care dental services are to provide quality, comprehensive dental services in a manner that improves oral health of clients through preventative care, health education, and early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target populations.

## 7.2 Children's Medicaid Dental Services Model

Clients' primary and preventive Medicaid dental services are provided statewide through Medicaid managed care DMOs. Each Medicaid managed care DMO is responsible for contracting with general dentists, pediatric dentists, and dental specialists to create a delivery network. Clients who receive their dental services through a Medicaid managed care DMO are required to select a DMO and a main dentist (or main dental home provider or dental home). The client selects the main dentist from a provider directory.

A main dentist means a provider who has agreed with a DMO to provide a dental home to clients and who is responsible for providing routine preventive, diagnostic, urgent, therapeutic, initial, and primary care to patients, maintaining the continuity of patient care, and initiating referral for care. Provider types that can serve as main dental home providers are general dentist and pediatric dentist. RHCs and FQHCs are also eligible to serve as a Main Dentist.

The First Dental Home Initiative is included in this model.

**Referto:** Subsection 3.2.9, "First Dental Home" in the *Children's Services Handbook* (Vol. 2, *Provider Handbooks*).

## 7.3 Client Eligibility

Most children who are 20 years of age and younger will receive their dental services through Medicaid managed care DMO.

Populations that will not receive services through the children's Medicaid managed care DMOs are:

- Medicaid recipients who are 21 years of age or older.
- Recipients who reside in an institution (i.e. nursing homes, state supported living centers, or ICF-IID).
- Recipients in the STAR Health Program.

## 7.4 Client Enrollment

Clients choose a DMO and Main Dentist. To maximize enrollment, the children's Medicaid dental services offer four alternative ways that clients can enroll:

- Telephone Enrollment. A client can enroll in a DMO by calling 800-964-2777 (telecommunications device for the deaf (TDD): 800-267-5008) A customer care representative will provide essential education about the program and details needed for enrollment.
- Mail-in Enrollment. If calling is not convenient, a client may enroll by completing the an enrollment form and dropping it in the mail using the postage-paid, self-addressed envelope. Enrollment forms are mailed to all eligible mandatory clients along with information explaining the services and how to choose a Main Dentist.
- Onsite Enrollment. In addition to telephone and mail-in enrollment, clients can enroll by talking with customer care representative at a local HHSC office, at Women, Infants, and Children (WIC) classes, community facilities, or during enrollment events.
- Default Enrollment. The final method of enrollment is through an assignment process. If a client does not exercise the right to choose a dental and Main Dentist, the client will be assigned to a DMO. After the default assignment is made, the DMO will assign the client a Main Dentist.

## 7.5 Authorizations for Children’s Medicaid Managed Care Dental Services (Non-orthodontia Services)

Authorization requests for services administered by the client’s DMO must be submitted to the client’s DMO according to the guidelines specific to the plan under which the client is covered.

If a client is new to a DMO and has an open authorization for covered dental services from TMHP or another HHSC-contracted Medicaid managed care DMO, the DMO must accept that authorization and cannot require additional authorization or review.

TMHP authorizes and processes dental and emergent orthodontic services for clients who are 20 years of age and younger but have not yet enrolled in a DMO.

TMHP also authorizes services for the following clients:

- Dental services for Medicaid clients who are 21 years of age and older
- Dental and orthodontia services for all Medicaid clients, regardless of age, who reside in Medicaid-paid facilities such as nursing homes, state-supported living centers, or ICF-IIDs

**Exception:** *STAR Health Foster Care Program clients receive dental and orthodontic services through DentaQuest.*

## 7.6 Children’s Medicaid Dental Orthodontia Services

The Medicaid managed care DMOs will be responsible for authorizing, processing, and reimbursing any orthodontic services rendered to Texas Medicaid managed care clients. Claims for orthodontic services that were initially authorized by TMHP but later transitioned to a managed care DMO will be processed and reimbursed by the DMO. Providers should check client eligibility to identify the managed care DMO in which the client is enrolled.

TMHP will continue to process claims and claims adjustments for orthodontia services claims for clients who are ICF-IID residents.

If a Medicaid client is enrolled in a DMO for at least one month, is receiving orthodontic treatment, and either ages out of the program or loses eligibility, the DMO is responsible for completion of the course of treatment. The only exception is if the client is disenrolled with cause but is still Medicaid-eligible. For example, if a client goes into a State Supported Living Center, the DMO will no longer be responsible for services rendered.

## 8 Carve-Out Services

Some services are “carved out” of one or more of the managed care programs. Carved out services are those that are rendered to Medicaid managed care clients but are processed for payment consideration by TMHP rather than an MCO or DMO.

The following tables shows the services that are partially or completely carved out of the MCO and DMO managed care program:

| Carve Out                                                                                                    | STAR | STAR Kids | STAR+PLUS | STAR Health |
|--------------------------------------------------------------------------------------------------------------|------|-----------|-----------|-------------|
| Nutritional products through WIC                                                                             | TMHP | TMHP      | TMHP      | TMHP        |
| DSHS MH rehabilitation (w/ Modifier HZ)                                                                      | TMHP | TMHP      | TMHP      | MCO         |
| County Indigent Health Care Program (CIHCP)                                                                  | TMHP | TMHP      | TMHP      | TMHP        |
| * CFC services are carved out for STAR Kids clients who receive services through CLASS, DBMD, HCS, or TxHmL. |      |           |           |             |

| Carve Out                                                                                                    | STAR | STAR Kids | STAR+PLUS | STAR Health |
|--------------------------------------------------------------------------------------------------------------|------|-----------|-----------|-------------|
| Early Childhood Intervention (ECI) case management                                                           | TMHP | TMHP      | TMHP      | TMHP        |
| ECI specialized skills training                                                                              | TMHP | TMHP      | TMHP      | TMHP        |
| Family planning services for Dell Children's managed care health plan                                        | TMHP | N/A       | N/A       | N/A         |
| Texas School Health and Related Services (SHARS)                                                             | TMHP | TMHP      | TMHP      | TMHP        |
| Elevated lead investigation services                                                                         | TMHP | TMHP      | TMHP      | TMHP        |
| DSHS TB providers                                                                                            | TMHP | TMHP      | TMHP      | TMHP        |
| DSHS targeted case management (w/ Modifier HZ)                                                               | TMHP | TMHP      | TMHP      | TMHP        |
| HHSC Blind Children's Vocational Discovery and Development Program                                           | TMHP | TMHP      | TMHP      | TMHP        |
| Case Management for Children and Pregnant Women                                                              | MCO  | MCO       | MCO       | MCO         |
| Community First Choice (CFC) services*                                                                       | TMHP | MCO       | MCO       | MCO         |
| Personal Care Services (PCS)                                                                                 | TMHP | MCO       | MCO       | MCO         |
| Youth Empowerment Services (YES) Waiver                                                                      | TMHP | TMHP      | TMHP      | TMHP        |
| Home and Community Based Services Adult Mental Health (HCBS-AMH)                                             | TMHP | TMHP      | TMHP      | TMHP        |
| * CFC services are carved out for STAR Kids clients who receive services through CLASS, DBMD, HCS, or TxHmL. |      |           |           |             |

| Dental Carve Out                                                 | Children's Medicaid Dental | STAR Health |
|------------------------------------------------------------------|----------------------------|-------------|
| THSteps Dental                                                   | DMO                        | MCO         |
| Orthodontia for most clients who are 20 years of age and younger | DMO                        | MCO         |
| ICF-IID Dental Services                                          | TMHP                       | TMHP        |

**Note:** Authorizations and claims for SSI clients who are enrolled in the STAR Program are submitted to the client's MCO or DMO.

Providers must submit authorization requests and claims for services that are carved out of the managed care program to TMHP according to the fee-for-service guidelines that are established for the same service.

**Referto:** "Section 6: Claims Filing" (Vol. 1, General Information) for more information about applicable authorization request and claims filing guidelines.

## 8.1 Family Planning Carve-Out Services

Some family planning services are carved-out services for Texas Medicaid clients whose managed care benefits are administered through Dell Children's Health Plan. These carved out services may be considered for payment by Texas Medicaid through TMHP if the service has been denied by the health plan as a family planning service.

All Dell Children's Medicaid providers should submit family planning claims using the CMS-1500 paper claim form, or electronic equivalent, to the client's managed care health plan to receive the health plan's denial.

**Important:** *Services that are denied by the health plan for any other reason will not be considered for reimbursement by Texas Medicaid.*

### 8.1.1 Professional and Outpatient Claims

For affected claims to be eligible for reimbursement through TMHP, providers must do the following:

- 1) Submit the claim to the client's managed care health plan to receive the health plan's denial. Claims that are submitted electronically using TexMedConnect will automatically be forwarded to the client's Medicaid managed care plan.
- 2) Submit a paper claim to TMHP upon receipt of the health plan's denial. All applicable documentation must be included with the paper claim, including, but not limited to:
  - The health plan's EOB document that indicates the denial code with its description and the date the EOB was issued. The denial must indicate that the service was denied because it was a family planning service. The EOB date will be used to calculate the filing deadline for the claim submission.
  - All documentation for family planning services including the Sterilization Consent Form and any other documentation that is required by Texas Medicaid.

**Note:** *A paper claim is required because TMHP automatically forwards electronic claims to the client's health plan without processing. Providers must comply with all filing deadlines unless otherwise specified below in this article.*

**Referto:** *The Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks) for Texas Medicaid guidelines for family planning services.*

#### 8.1.1.1 Claim Forms for Submission to TMHP

After receiving the health plan's denial, Medicaid family planning services providers should submit paper claim forms to TMHP as follows:

- Providers that contract with the HHSC Family Planning Program should submit claims on a 2017 paper claim form along with the health plan's denial.
- Providers that do not contract with the HHSC Family Planning Program should submit claims on a CMS-1500 paper claim form along with the health plan's denial.

Providers should submit the health plan's EOB document that indicates the denial code with its description and the date that the EOB was issued. The denial must indicate that the service was denied because it was a family planning service. The EOB date will be used to calculate the filing deadline for the claim submission.

Providers must comply with all filing deadlines.

The initial paper claim will be denied by TMHP. TMHP will automatically reprocess for payment consideration any claim that has been denied only with EOB 00081, "Services billed to TMHP in error. Bill HMO."

TMHP will reprocess only those claims that were denied with EOB 00081 as the only EOB message on the claim. If a claim has been denied with other EOB messages in addition to EOB 00081, the provider must resolve the other reasons for denial through the standard appeals process before TMHP can reprocess the claim for payment of the carved-out services.

### 8.1.2 Inpatient Claims

For affected claims to be eligible for reimbursement through TMHP, providers must do the following:

- 1) Submit the claim to the client's managed care health plan to receive the health plan's denial. Claims that are submitted electronically using TexMedConnect will automatically be forwarded to the client's Medicaid managed care plan.
- 2) Submit a paper claim to HHSC Administrative Appeals upon receipt of the health plan's denial. All applicable documentation must be included with the paper claim, including, but not limited to:
  - The health plan's EOB document that indicates the denial code with its description and the date the EOB was issued. The denial must indicate that the service was denied because it was a family planning service. The EOB date will be used to calculate the filing deadline for the claim submission.
  - All documentation for family planning services including Sterilization Consent Forms and Hysterectomy Acknowledgements Forms, and any other documentation that is required by Texas Medicaid.

HHSC Administrative Appeals will send the family planning services inpatient claims to TMHP for reprocessing. Medical portions of the claims will be denied by Texas Medicaid because they are covered under the client's health plan and will not be considered for reimbursement through TMHP. The services that were denied by the health plan as family planning services will be considered for payment according to Medicaid guidelines.

**Referto:** *The Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for Texas Medicaid guidelines for family planning services.

“Section 7: Appeals” (*Vol. 1, General Information*) for additional information about administrative appeals.

## 9 Other State Health-Care Programs

The services available under the following programs are administered by TMHP or other state programs and not by the client's MCO or DMO:

- Healthy Texas Women (HTW) program - HHSC/TMHP
- HHSC Family Planning Program contracted services - HHSC/TMHP
- Medicaid Medical Transportation Program (MTP)
- CHIP Perinatal—CHIP Perinatal provides prenatal care to the unborn children of pregnant women who have an income of up to 202 percent of the federal poverty level and who are not eligible for other Medicaid programs or traditional CHIP. CHIP Perinatal covered services include prenatal care, labor with delivery, and two postpartum visits.
  - For CHIP perinates in families that have an income at or below the Medicaid eligibility threshold, facility charges associated with labor and delivery are covered by Emergency Medicaid, and professional charges associated with labor and delivery are covered by the CHIP Perinatal MCO.
  - For CHIP perinates in families that have an income above the Medicaid eligibility threshold, the facility and professional charges associated with labor with delivery are covered by the CHIP Perinatal MCO.

- Health Insurance Premium Payment (HIPP) Program—The HIPP Program reimburses clients for the cost of medical insurance premiums when Medicaid finds it more cost-effective to reimburse a Medicaid client’s group health insurance premiums than to reimburse the client’s medical bills directly through Medicaid.

**Referto:** Subsection 6.19, “Children’s Health Insurance Program (CHIP) Perinatal Claims” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

“Section 4: Client Eligibility” (*Vol. 1, General Information*).

Subsection 4.10, “Health Insurance Premium Payment (HIPP) Program” in “Section 4: Client Eligibility” (*Vol. 1, General Information*).

Claims and authorization requests for the services listed above must be submitted according to the established guidelines.

## 10 Dual Eligible Members in Managed Care

Some STAR+PLUS, STAR Kids, and STAR Health clients are eligible for Medicaid and Medicare. Dual eligible clients who participate in these Medicaid managed care programs receive most acute care services through their Medicare provider and LTSS through the MCO. Dual eligible clients enrolled in these managed care programs also receive Medicaid-only acute care services through their MCO. Dual eligible clients may receive some additional services, such as value-added services.

Providers bill for Medicare acute care services through the client’s Medicare MCO or Medicare fee-for-service insurer following the rules of the Medicare insurer. Providers bill the Medicaid MCO for the Medicaid-covered services following the rules of the Medicaid MCO.

If the client is in both a Medicare MCO and a Medicaid MCO, the client uses the Medicare primary care provider. The client chooses a Medicaid MCO but does not choose a Medicaid primary care provider. For Medicare-covered services, providers follow the Medicare MCO’s medical management rules for authorization, concurrent review, etc. For Medicaid-covered services, providers follow the Medicaid MCO’s medical management rules for authorization, concurrent review, etc., and provides Medicaid services in the same amount, duration, and scope as outlined in the *Texas Medicaid Provider Procedures Manual (TMPPM)* for Medicaid-covered services.

**Referto:** Subsection 4.9, “Medicare and Medicaid Dual Eligibility” in “Section 4: Client Eligibility” (*Vol. 1, General Information*) for more information.

## 11 Contact Information

The following information can be used to communicate with TMHP:

| Correspondence                                                                                                           | Contact Information                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| All correspondence for services rendered to clients who are enrolled with a Texas Medicaid health/DMO                    | Contact the client’s health/DMO.                                                                                             |
| Claims, authorizations, and other TMHP correspondence for transactions that are processed by TMHP.                       | Volume 1, “Written Communication With TMHP,” for the list of post office box addresses that must be used for specific items. |
| HHSC contact information for clients of STAR+PLUS, STAR, STAR Kids, STAR Health, and Children’s Medicaid dental services | 800-252-8263                                                                                                                 |
| TMHP Contact Center                                                                                                      | 800-925-9126                                                                                                                 |

# **MEDICAL AND NURSING SPECIALISTS, PHYSICIANS, AND PHYSICIAN ASSISTANTS HANDBOOK**

**TEXAS MEDICAID PROVIDER PROCEDURES MANUAL: VOL. 2**

**OCTOBER 2025**

MEDICAL AND NURSING SPECIALISTS,  
PHYSICIANS, AND PHYSICIAN ASSISTANTS

Table of Contents

1 General Information ..... 13

1.1 Payment Window Reimbursement Guidelines for Services Preceding an  
Inpatient Admission.....13

2 Chiropractic Manipulative Treatment (CMT) .....14

2.1 Enrollment .....14

2.2 Services, Benefits, Limitations, and Prior Authorization.....14

2.2.1 Prior Authorization ..... 15

2.3 Documentation Requirements .....15

2.4 Claims Filing and Reimbursement.....15

2.4.1 Claims Information ..... 15

2.4.2 Reimbursement ..... 15

3 Certified Nurse Midwife (CNM) .....16

3.1 Provider Enrollment.....16

3.1.1 Enrollment in Texas Health Steps (THSteps) ..... 17

3.2 Services, Benefits, Limitations, and Prior Authorization.....17

3.2.1 Deliveries ..... 17

3.2.2 Newborn Services ..... 17

3.2.3 Prenatal and Postpartum Services..... 17

3.2.4 Laboratory and Radiology Services..... 17

3.2.5 Prior Authorization ..... 17

3.2.6 Documentation Requirements ..... 18

3.2.7 Claims Filing and Reimbursement..... 18

4 Certified Registered Nurse Anesthetist (CRNA) .....19

4.1 Enrollment .....19

4.2 Services, Benefits, Limitations, and Prior Authorization.....19

4.2.1 Prior Authorization ..... 20

4.3 Documentation Requirements .....20

4.4 Claims Filing and Reimbursement.....20

4.4.1 Claims Information ..... 20

4.4.1.1 Interpreting the R&S Report..... 20

4.4.2 Reimbursement ..... 20

5 Geneticists .....21

5.1 Enrollment .....21

5.1.1 Geneticists ..... 21

5.2 \* Services, Benefits, Limitations, and Prior Authorization .....21

5.2.1 Family History ..... 22

5.2.2 \* Genetic Counseling ..... 22

5.2.3 Genetic Counselors ..... 22

|            |                                                                          |           |
|------------|--------------------------------------------------------------------------|-----------|

## 1 General Information

The information in this handbook is intended for Texas chiropractors, nurse practitioners (NP), clinical nurse specialists (CNS), certified nurse midwives (CNM), certified registered nurse anesthetists (CRNA), podiatrists, geneticists, maternity service clinics, physicians, and physician assistants. The handbook provides information about Texas Medicaid's benefits, policies, and procedures.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers may also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information).

Subsection 2.2, “Provider Enrollment and Responsibilities” in the *Medicaid Managed Care Handbook* (Vol. 2, Provider Handbooks).

Section 4, “THSteps Medical” in the *Children’s Services Handbook* (Vol. 2, Provider Handbooks).

For information on Advanced Practice Registered Nurses (APRNs), refer to:

Section 3, “Certified Nurse Midwife (CNM)” in this handbook.

Subsection 4.1, “Enrollment” in this handbook for information about CRNAs.

Subsection 5.2 \*, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for information about geneticists.

Subsection 8.1, “Enrollment” in this handbook for information about NPs and CNSs

Section 9, “Physician” in this handbook.

### 1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

2      **Chiropractic Manipulative Treatment (CMT)**

2.1      **Enrollment**

To enroll in Texas Medicaid, a doctor of chiropractic medicine (DC) must be licensed by the Texas Board of Chiropractic Examiners and enrolled as a Medicare provider.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

2.2      **Services, Benefits, Limitations, and Prior Authorization**

CMT performed by a chiropractor licensed by the Texas State Board of Chiropractic Examiners is a benefit of Texas Medicaid.

CMT is limited to an acute condition or an acute exacerbation of a chronic condition for a maximum of 12 visits in a consecutive 12-month period, and a maximum of one visit per day. The 12-month period consists of 12 consecutive months, beginning with the date the client receives the first treatment.

If the condition persists more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute.

- CMT is not a benefit of Texas Medicaid for maintenance therapy when:
- Further clinical improvement cannot reasonably be expected from continuous ongoing care.
  - The chiropractic treatment becomes supportive rather than corrective in nature.

CMT may be reimbursed when billed using procedure codes 98940, 98941, or 98942.

Procedure codes 98940, 98941, and 98942 must be submitted with the AT modifier. The AT modifier is used to identify treatment provided for an acute condition or an exacerbation of a chronic condition that persists for 180 days or less from the start date of treatment. Providers may file an appeal for a claim denied beyond the 180 days of treatment with documentation supporting that further clinical improvement can be reasonably expected, maximal improvement has not been reached, and further improvement has not ceased.

Procedure code 98940 will be denied as part of another service when billed for the same date of service as 98941 or 98942 by any provider.

Procedure code 98941 will be denied as part of another service when billed for the same date of service as 98942 by any provider.

Texas Medicaid does not reimburse chiropractors for X-ray services, office visits, injections, supplies, appliances, spinalator treatments, laboratory services, physical therapy, or other adjunctive services furnished by themselves or by others under their orders or directions. Additionally, braces or supports, even though ordered by a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) and supplied by a chiropractor are not reimbursable items.

CMT is reimbursed only for a diagnosis of subluxation of the spine. The level of subluxation must be indicated by the appropriate diagnosis codes listed below:

| Diagnosis Codes |       |       |       |       |       |       |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|
| M9900           | M9901 | M9902 | M9903 | M9904 | M9905 | M9908 |  |

### 2.2.1 Prior Authorization

Prior authorization is not required for CMT services.

## 2.3 Documentation Requirements

Manipulations must be provided in accordance with an ongoing, written treatment plan that supports medical necessity of an acute condition or an acute exacerbation of a chronic condition.

Documentation that supports medical necessity for the treatment plan includes all of the following:

- Diagnosis
- Region(s) treated
- Degree of severity
- Impairment characteristics
- Physical examination findings, X-ray, or other pertinent findings
- Specific statements of short- and long-term goals
- A reasonable estimate of when the goals will be reached (estimated duration of treatment)
- Frequency of treatment (number of times per week)
- Equipment and/or the techniques utilized

The treatment plan must be updated as the client's condition changes. Treatment plans must be maintained in the medical records and are subject to retrospective review.

## 2.4 Claims Filing and Reimbursement

### 2.4.1 Claims Information

Chiropractic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection , “Section 6: Claims Filing” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 2.4.2 Reimbursement

The Medicaid rates for chiropractic manipulative treatment (CMT) are reimbursed in accordance with 1 TAC §355.8085. See the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Note:** *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

### 3 Certified Nurse Midwife (CNM)

#### 3.1 Provider Enrollment

To enroll in Texas Medicaid, a CNM must be licensed as a registered nurse and as an advanced practice registered nurse (APRN) by the Texas Board of Nursing (BON), and be authorized to practice as a nurse-midwife. A registered nurse under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as documentation of appropriate licensure and certification for enrollment.

The American Midwifery Certification Board (AMCB) is responsible for the certification requirements of CNMs.

**Referto:** The HHSC website at [www.healthytexaswomen.org](http://www.healthytexaswomen.org) for information about family planning and the locations of family planning clinics that receive funding from the HHSC Family Planning Program.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

All APRNs (including CNMs, CRNAs, CNSs, and NPs) are enrolled within the categories of practice as determined by the Texas BON. CNSs and NPs must enroll as an APRN; CNMs and CRNAs may enroll using their specific titles.

A CNM must identify the licensed physician or group of physicians with whom there is an arrangement for referral and consultation if medical complications arise. All enrollment and re-enrollments are completed through the Provider Enrollment and Management System (PEMS). PEMS portal and upon initial enrollment and upon re-enrollment, the CNM must complete the Physician’s Letter of Agreement form that affirms the CNM’s referring or consulting physician arrangement. A separate letter of agreement must be submitted for each physician or group of physicians with whom an arrangement is made. This agreement must be signed by the CNM and the physician. The collaborating physician does not have to be a participating provider in Texas Medicaid. According to TAC, §354.1252 (3), if the collaborating physician or group is not a participating provider in Texas Medicaid, the CNM must inform clients of their potential financial responsibility. If the arrangement is changed or canceled, the CNM must notify TMHP and submit a PEMS Existing Enrollment request to update the agreement within 10 business days of the change or cancellation.

CNMs are encouraged to participate in or make referrals to family planning agencies.

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment in Texas Medicaid.

Subsection 4.2, “Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about enrollment in the THSteps Program.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### **3.1.1 Enrollment in Texas Health Steps (THSteps)**

CNMs may enroll as providers of THSteps medical checkups for newborns and adolescent females.

## **3.2 Services, Benefits, Limitations, and Prior Authorization**

CNM providers may be reimbursed for family planning, obstetrical, neonatal, and primary care services.

### **3.2.1 Deliveries**

CNM providers may be reimbursed for procedure code 59409, 59410, 59612, or 59614 for delivery services.

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for billing requirements.

### **3.2.2 Newborn Services**

Routine newborn care may be reimbursed to CNM providers.

**Referto:** Subsection 4.3.10, “Newborn Examination” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 9.2.47, “Newborn Services” in this handbook for additional guidelines and limitations.

### **3.2.3 Prenatal and Postpartum Services**

CNM and physician providers are limited to a combined total of 20 outpatient prenatal care visits and 1 postpartum care visit per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation should reflect the need for increased visits and is subject to retrospective review.

When billing for prenatal services, use modifier TH with the appropriate evaluation and management procedure code to the highest level of specificity.

Postpartum care provided after discharge must be billed using procedure code 59430. Only one postpartum visit is allowed per pregnancy.

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for billing requirements.

### **3.2.4 Laboratory and Radiology Services**

Laboratory (including pregnancy tests) and radiology services that are rendered during pregnancy must be billed separately from prenatal care visits.

### **3.2.5 Prior Authorization**

Prior authorization is not required for any of these services except delivery in the home. For prior authorization of a home delivery and the related supplies (procedure code S8415), the CNM must submit a written request for prior authorization during the client’s third trimester of pregnancy. The CNM must include a statement signed by a licensed physician who has examined the client during the third

trimester and determined at that time that she is not at high risk and is suitable for a home delivery. Documentation must also include a plan for access to emergency transport for mother and neonate, if needed. Requests for home delivery prior authorizations must be submitted to the TMHP Medical Director at the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax: 1-512-514-4213

Claims submitted for home deliveries performed by a CNM without prior authorization will be denied.

### 3.2.6 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including CNM services.

CNM services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 3.2.7 Claims Filing and Reimbursement

CNMs must bill maternity services in one of two ways: itemizing each service individually on one claim form and filing at the time of delivery (the filing deadline is applied to the date of delivery) or itemizing each service individually and submitting claims as the services are rendered (the filing deadline is applied to each individual date of service).

CNM services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

According to 1 TAC §355.8161(a), the Medicaid rate for CNMs is 92 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

**Note:** *CNM providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps National Provider Identifier (NPI) as the billing provider.*

Physicians who submit a claim using the physician's own NPI for services provided by a CNM must submit modifier SB on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit.

Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by a CNM if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, and injections provided by a CNM.

Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Referto:** Subsection 4.1, “General Medicaid Eligibility” in “Section 4: Client Eligibility” (*Vol. 1, General Information*) for information about crossover payments.

“Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

## **4 Certified Registered Nurse Anesthetist (CRNA)**

### **4.1 Enrollment**

To enroll in Texas Medicaid, a CRNA must be licensed as a registered nurse (RN) and as an APRN by the Texas BON and must be currently certified by the Council on Certification of Nurse Anesthetists or the Council on Recertification of Nurse Anesthetists. An RN under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as acceptable documentation of appropriate licensure and certification for enrollment.

Medicare enrollment is a prerequisite for enrollment as a Medicaid provider. A current copy of the provider’s Council on Certification of Nurse Anesthetists or Recertification of Nurse Anesthetists Certificate must be submitted with the Medicaid provider enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

### **4.2 Services, Benefits, Limitations, and Prior Authorization**

Medically necessary services that are performed by a CRNA are benefits if the services are within the scope of the CRNA’s practice as defined by state law; are prescribed, supervised by, and provided under the direction of a supervising physician (MD or DO), dentist, or podiatrist licensed in the state in which they practice and to the extent allowed by state law; and are provided under one of the following conditions:

- There is no physician anesthesiologist on the medical staff of the facility where the services are provided (e.g., rural settings).
- There is no physician anesthesiologist available to provide the services, as determined by the policies of the facility in which the services are provided.
- The physician, dentist, or podiatrist who performs the procedure that requires the services specifically requests the services of a CRNA.
- The eligible client who requires the services specifically requests the services of a CRNA.
- The CRNA is scheduled or assigned to provide the services according to the policies of the facility in which the services are provided.
- The services are provided by the CRNA in connection with a medical emergency.

Texas Medicaid does not reimburse the CRNA for equipment, drugs, or supplies.

**Referto:** Subsection 4.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for information about drugs, equipment and supplies.

#### **4.2.1 Prior Authorization**

Services performed by a CRNA are subject to the same prior authorization guidelines as services performed by other provider types.

### **4.3 Documentation Requirements**

All services require documentation to support the medical necessity of the services rendered, including CRNA services. CRNA services are subject to retrospective review and recoupment if documentation does not support the service billed.

### **4.4 Claims Filing and Reimbursement**

#### **4.4.1 Claims Information**

All CRNA services must be billed with a CRNA individual NPI or a CRNA group NPI. No payment for CRNA services will be made under a hospital or physician NPI.

CRNA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 9.2.7.9.3, “CRNA, AA, and Other Qualified Professional Services” in this handbook for more information on billing for CRNA services.

##### **4.4.1.1 Interpreting the R&S Report**

The Billed Qty field on the Remittance and Status (R&S) Report reflects only the number of time units TMHP processes. The Relative Value Units (RVUs) assigned for the procedure code are not shown in the Billed Qty field.

#### **4.4.2 Reimbursement**

A CRNA is reimbursed the lesser of either the CRNA’s billed charges or 92 percent of the reimbursement for the same service paid to a physician (M.D. or D.O.) other than an anesthesiologist in accordance with 1 TAC §355.8221. A CRNA under the supervision of an anesthesiologist is reimbursed the lesser of the billed charges or 50 percent of the calculated payment for a supervised anesthesia service.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Note:** *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

**Referto:** Subsection 9.2.7.8, “Reimbursement Methodology” in this handbook for more information about flat fees and time based fees.

## 5 Geneticists

### 5.1 Enrollment

#### 5.1.1 Geneticists

Geneticists may enroll in Texas Medicaid as both a physician or physician group and as a geneticist. Enrollment as a geneticist allows enhanced reimbursement for specific procedure codes when a claim is submitted using the geneticist NPI.

A provider of genetic services that wishes to enroll in Texas Medicaid as a geneticist must complete the required Medicaid provider enrollment process through PEMS and enter into a written agreement with HHSC.

Prior to enrollment, applicant qualifications for the provision of genetic services are verified and approved by DSHS. Verification and approval are administered through the Newborn Screening Unit. Basic contract requirements are as follows:

- The provider must be a clinical geneticist (MD or DO) who is board eligible or board certified by the American Board of Medical Geneticists (ABMG).

**Note:** *Board eligible providers are required to provide documentation reflecting completion of education requirements in a residency program in genetics.*

- The provider must use a team of professionals to provide genetic evaluative, diagnostic, and counseling services. The team rendering the services must consist of professional staff including the clinical geneticist and at least one of the following: nurse, social worker, medical geneticist, or genetic counselor.
- Upon DSHS approval, National Plan and Provider Enumeration System (NPPES) issues an NPI and a performing NPI for the provision of genetic services.
- Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

### 5.2 \* Services, Benefits, Limitations, and Prior Authorization

Genetic services may be used to diagnose a condition, optimize disease treatment, predict future disease risk, and prevent adverse drug response. Genetic services may be provided by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and typically include one or more of the following:

- Comprehensive physical exams
- Diagnosis, management, and treatment for clients with genetically-related health problems
- Evaluation of family histories for the client and the client’s family members
- Genetic risk assessment

- Genetic laboratory tests

*Referto: [Revised] Section 3 \*, “Genetic Testing” in the **Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)** for additional information.*

- Interpretation and evaluation of laboratory test results
- Education and counseling of clients, their families, and other medical professionals on the causes of genetic disorders
- Consultation with other medical professionals to provide treatment

### **5.2.1 Family History**

It is important for primary care providers to recognize potential genetic risk factors in a client so that they can make appropriate referrals to a genetic specialist.

Obtaining an accurate family history is an important part of clinical evaluations, even when genetic abnormalities are not suspected. Knowing the family history may help health-care providers identify single-gene disorders or chromosomal abnormalities that occur in multiple family members or through multiple generations. Some genetic disorders that can be traced through an accurate family history include diabetes, hypertension, certain forms of cancer, and cystic fibrosis. Early identification of the client’s risk for one of these diseases can lead to early intervention and preventive measures that can delay onset or improve health conditions.

Using a genetics-specific questionnaire helps to obtain the information needed to identify possible genetic patterns or disorders. The most commonly used questionnaires are provided by the American Medical Association and include the Prenatal Screening Questionnaire, the Pediatric Clinical Genetics Questionnaire, and the Adult History Form.

### **5.2.2 \* Genetic Counseling**

Any genetic testing and screening procedure must be accompanied by appropriate non-directive counseling, both before and after the procedure. Information must be provided to the client and family (if appropriate) about the possible risks and purpose and nature of the tests being performed.

*[Revised] Providers who are uncertain whether a test is appropriate are encouraged to contact a geneticist or other specialist to discuss the client’s needs.*

The interpretation of certain tests, such as nuchal translucency, requires additional education and experience. Texas Medicaid supports national certification standards when available.

*[Revised] For many heritable diseases and conditions, test performance and interpretation of test results require information about client race/ethnicity, family history, and other pertinent clinical and laboratory information. To facilitate test requests and ensure prompt initiation of appropriate testing procedures and accurate interpretation of test results, the requesting provider must be aware of the specific client information needed by the laboratory before tests are ordered.*

### **5.2.3 Genetic Counselors**

Genetic counselor services may be billed by a physician when the genetic counselor is under physician supervision and is an employee of the physician. Services provided by independent genetic counselors are not a benefit of Texas Medicaid.

### **5.2.4 Genetic Evaluation and Counseling by a Geneticist**

A provider enrolled in Texas Medicaid as a geneticist may bill the following evaluation and management codes and receive an enhanced reimbursement. All other procedure codes must be billed under the geneticist’s individual, group, or laboratory NPI.

| Procedure Code                                                                                                                  | Limitations                         |
|---------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| 96041                                                                                                                           | None                                |
| 99213                                                                                                                           | None                                |
| 99214                                                                                                                           | None                                |
| 99215                                                                                                                           | One per year, any provider          |
| 99244                                                                                                                           | One every three years, per provider |
| 99245                                                                                                                           | One every three years, per provider |
| 99254                                                                                                                           | One every three years, per provider |
| 99255                                                                                                                           | One every three years, per provider |
| 99402                                                                                                                           | One per pregnancy, per provider*    |
| 99404                                                                                                                           | One every three years, per provider |
| * Exception: Additional services are allowed when documentation of medical necessity to repeat a procedure accompanies a claim. |                                     |

One office or other outpatient consultation, performed by a geneticist, (procedure code 99244 or 99245) may be considered for reimbursement if procedure code 99244, 99245, 99254, or 99255 has not been submitted by and reimbursed to that geneticist in the previous three years.

Inpatient or observation consultations, performed by a geneticist, (procedure code 99254 or 99255) may be reimbursed once every three years regardless of whether an office consultation has been reimbursed in the previous three years.

### 5.2.5 Prior Authorization

Prior authorization is not required for services billed by a geneticist.

## 5.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including genetic services. Genetic services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 5.4 Claims Filing and Reimbursement

### 5.4.1 Claims Information

Genetic services must be submitted to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

TMHP representatives are available for provider questions about genetic services, such as reimbursement rates and procedures. For more information, call the TMHP Contact Center at 1-800-925-9126.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 5.4.2 Reimbursement

Genetic services providers are reimbursed according to the established allowable maximum fee schedule. Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

## 6 Licensed Midwife (LM)

### 6.1 Provider Enrollment

To enroll in Texas Medicaid, an LM must be licensed as a midwife by the Texas Department of Licensing and Regulation (TDLR).

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

An LM must identify the licensed physician or group of physicians with whom there is an arrangement for referral and consultation if medical complications arise. All enrollment and re-enrollments are completed through the PEMS portal and upon initial enrollment and upon re-enrollment, the LM must complete the Physician’s Letter of Agreement form that affirms the LM’s referring or consulting physician arrangement. A separate letter of agreement must be submitted for each physician or group of physicians with whom an arrangement is made. This agreement must be signed by the LM and the physician.

If the arrangement is changed or canceled, the LM must notify TMHP and submit a PEMS Existing Enrollment request to update the agreement within 10 business days after the change or cancellation.

The referral physician or group does not have to be a participating provider in Texas Medicaid. According to TAC, §354.1253(c), if the referral physician or group is not a participating provider in Texas Medicaid, the LM must inform clients of their potential financial responsibility.

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment in Texas Medicaid.

### 6.2 Services, Benefits, Limitations, and Prior Authorization

LM providers may be reimbursed for obstetrical and newborn care services provided in a freestanding birthing center that is also enrolled as a Texas Medicaid provider.

### 6.2.1 Deliveries

LM providers may be reimbursed for procedure code 59409 for delivery services.

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for billing requirements.

### 6.2.2 Newborn Services

Newborn care procedure codes 99460 and 99463 may be reimbursed to LM providers.

**Referto:** Subsection 9.2.47, “Newborn Services” in this handbook for additional guidelines and limitations.

### 6.2.3 Prenatal Services

LM providers must include modifier TH with the appropriate evaluation and management procedure code (99202, 99211, or 99212) for prenatal services.

LM providers are limited to a total of 20 outpatient prenatal care visits, performed in a birthing center, per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation should reflect the need for increased visits and is subject to retrospective review.

If a client is discharged before delivery, LM providers may submit procedure code 99221, 99222, or 99223 for labor services only. Clinical documentation that clearly demonstrates the level of medical decision-making (i.e., moderate or complex) must be included in the client’s medical record. All medical documentation is subject to retrospective review. Services that are not supported by the medical documentation are subject to recoupment.

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for billing requirements.

### 6.2.4 Prior Authorization

Prior authorization is not required for services billed by an LM.

### 6.2.5 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including LM services.

LM services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 6.2.6 Claims Filing and Reimbursement

LM services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

According to 1 TAC §355.8161 (b), the Medicaid rate for LMs is 70 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service.

Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

## 7 Maternity Service Clinics (MSC)

### 7.1 Provider Enrollment

To enroll in Texas Medicaid, MSCs must submit a complete application and meet the following requirements:

- Must be a facility that is not an administrative, organizational, or financial part of a hospital.
- Must be organized and operated to provide maternity clinic services to outpatients.
- Must comply with all applicable federal, state, and local laws and regulations.
- Must employ or have a contractual agreement or formal arrangement with a licensed MD or DO who assumes professional responsibility for the services provided to the clinic’s patients.
- Must adhere to the Bureau of Maternal and Child Health Maternity Guidelines, dated June 20, 1988, and subsequent revisions issued by the Texas Department of State Health Services, unless otherwise specified by the department or its designee.
- Must ensure that services provided to each patient are commensurate with the patient’s risk assessment and are documented in the patient’s medical record.

The supervising physician’s license information must be provided. Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days.

Medicare certification is not a prerequisite for MSC enrollment.

#### 7.1.1 Physician Responsibility

To meet the requirement to assume professional responsibility for the services provided to the clinic’s clients, the supervising physician must do the following:

- See the client at least once
- Prescribe the type of care to be provided or approve the client’s plan of care (POC)
- Periodically review the need for continued care (if the services are not limited by the prescription)

The physician must base the POC on a risk assessment completed by the physician or by licensed, professional clinic staff. The assessment must be based on findings obtained through a health history, laboratory or screening services, and a physical examination.

#### 7.1.2 Case Management Services to High-Risk Individuals

An MSC that wants to bill and receive reimbursement for case management services to high-risk individuals including infants, pregnant adolescents, and women must meet the eligibility criteria for case management services. To be considered for reimbursement for case management for these clients, the MSC must enroll as a group in Case Management for Children and Pregnant Women, and each eligible case manager must enroll as a performing provider.

**Referto:** Section 3, “Case Management for Children and Pregnant Women” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for case management services provider eligibility criteria.

7.2 Services, Benefits, Limitations, and Prior Authorization

Services billed by an MSC are those provided by a physician or by licensed, professional clinic staff and are determined to be reasonable and medically necessary for the care of a pregnant adolescent or woman during the prenatal period and subsequent 60-day postpartum period. MSC benefits do not include deliveries.

MSCs are limited to 20 prenatal care visits and 1 postpartum care visit per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation must reflect the need for increased visits and is subject to retrospective review.

Procedure codes in the following table are for prenatal and postpartum care visits:

| Procedure Codes                                                                                                       |          |          |          |          |          |          |
|-----------------------------------------------------------------------------------------------------------------------|----------|----------|----------|----------|----------|----------|
| 59430*                                                                                                                | 99202-TH | 99203-TH | 99204-TH | 99205-TH | 99211-TH | 99212-TH |
| 99213-TH                                                                                                              | 99214-TH | 99215-TH |          |          |          |          |
| * Procedure code 59430 is not submitted with modifier TH<br>Note: The prenatal visits must be billed with modifier TH |          |          |          |          |          |          |

Providers must bill the most appropriate new or established prenatal visit code or postpartum visit code. New patient codes may be used when the client has not received any professional services from the provider, or another provider of the same specialty who belongs to the same group practice, within the past three years (36 months).

An MSC may be reimbursed for prenatal and postpartum care visits only. Hemoglobin, hematocrit, and urinalysis procedures are included in the charge for prenatal care and not separately reimbursed. Services other than prenatal and postpartum care visits will be denied. MSCs that are enrolled in Case Management for Children and Pregnant Women as a group may be reimbursed for these services under the group NPI assigned to their facility.

Medical services must be furnished on an outpatient basis by the physician or by licensed, professional clinic staff under the direction of the physician and must be within the staff’s scope of practice or licensure as defined by state law. Although the physician does not necessarily have to be present at the clinic when services are provided, the physician must assume professional responsibility for the medical services provided at the clinic and ensure through approval of the POC that the services are medically appropriate. The physician must spend as much time in the clinic as is necessary to ensure that clients are receiving medical services in a safe and efficient manner in accordance with accepted standards of medical practice.

MSCs must follow the procedures outlined throughout this manual. All service, frequency, and documentation requirements are applicable.

Providers submitting charges for high-risk prenatal care must document the high-risk diagnosis on the claim form and document the condition in the client’s medical record.

7.2.1 Initial Prenatal Care Visit Components

The following initial prenatal care visit components should be completed as early as possible in the client’s pregnancy.

7.2.1.1 History

History includes OB-GYN, present pregnancy, medical and surgical, substance use, environmental, nutritional, psychosocial (including violence), and family support system.

### **7.2.1.2 Physical Examination**

Physical examination includes height, weight, blood pressure; head, neck, lymph, breasts, heart, lungs, back, abdomen, pelvis, rectum, extremities, and skin; and uterine size, fetal heart rate, and location.

### **7.2.1.3 Laboratory Tests**

The initial hematocrit or hemoglobin and each subsequent hematocrit or hemoglobin is included in the visit fee and is not separately reimbursable to MSCs.

The laboratory services listed may not be billed using the MSC NPI. These services may be ordered by MSC personnel and provided by a reference laboratory.

MSCs must supply the client's Medicaid number and the MSC NPI to the reference laboratory when laboratory services are requested.

The laboratory services requested by an MSC may include, but are not limited to, the following:

- Hemoglobin, hematocrit, or complete blood count (CBC)
- Urinalysis
- Blood type and Rh
- Antibody screen
- Rubella antibody titer
- Serology for syphilis
- Hepatitis B surface antigen
- Cervical cytology
- Other laboratory tests

The following tests may be performed at the initial prenatal care visit, as indicated:

- Pregnancy test
- Gonorrhea test
- Urine culture
- Sickle cell test
- Tuberculosis (TB) test
- Chlamydia test

As stated in the Health and Safety Code §81.090, screening for Hepatitis B virus infection, HIV, and Syphilis must be performed at the initial prenatal care visit. In addition, HIV testing must be performed in the third trimester. HBV and Syphilis must be performed at labor and delivery.

Multiple marker screens for neural tube defects must be offered if the client initiates care between 16 and 20 weeks.

### **7.2.1.4 Assessment**

Assessment includes pregnancy, general health, medical, and psychosocial.

### **7.2.1.5 Plan**

Plan includes pregnancy, preventive health, medical, and referral as indicated.

### 7.2.1.6 Education and Counseling

Education and counseling includes pregnancy, delivery, nutrition, breast-feeding, family planning, and preventive health. The education and counseling should also include the need for a medical home and information about THSteps medical and dental checkups for the client.

The complete physical examination may be completed at the second visit if the MSC's routine involves a two-stage initial evaluation.

### 7.2.2 Subsequent Prenatal Care Visits

The following is a recommended guide for the frequency of subsequent prenatal visits for a regular pregnancy:

- One visit every 4 weeks for the first 28 weeks of pregnancy.
- One visit every 2 to 3 weeks from 28 to 36 weeks of pregnancy.
- One visit per week from 36 weeks to delivery.

More frequent visits may be medically necessary. Physicians, CNMs, and MSCs are limited to 20 prenatal care visits per pregnancy and 1 postpartum care visit per pregnancy after discharge from the hospital, without documentation of a complication of pregnancy.

Each subsequent visit must include the following:

- Interim History
- Problems
- Maternal status
- Fetal status

#### 7.2.2.1 Physical Examination

The physical examination must include the following:

- Weight and blood pressure
- Fundal height, fetal position and size, and fetal heart rate
- Extremities

#### 7.2.2.2 Laboratory Tests

Required laboratory tests include the following:

- Urinalysis for protein and glucose every visit

***Note:** The urinalysis for protein and glucose, hemoglobin, and hematocrit is included in the visit fee and is not separately reimbursable to MSCs.*
- Hematocrit or hemoglobin repeated once a trimester and at 32 to 36 weeks of pregnancy
- Multiple marker screen for fetal abnormalities offered at 16 to 20 weeks of pregnancy
- Repeated antibody screen for Rh negative women at 28 weeks (followed by Rho immune globulin administration if indicated)
- Gestational diabetes screen at 24 to 28 weeks of pregnancy, one hour post 50 gram glucose load
- Blood sample for HBsAg screening at the first examination and visit followed by a second blood sample for HBsAg screening on admission for delivery
- Other laboratory tests as indicated by the medical condition of the client

### 7.2.3 Postpartum Care Visit

Postpartum care provided by MSCs must be billed using procedure code 59430. A maximum of 1 postpartum visit is allowed per pregnancy.

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for billing requirements.

### 7.2.4 Prior Authorization

Prior authorization is not required for services rendered in MSCs.

## 7.3 Documentation Requirements

Each client must have a complete and accepted standard medical record with documentation for the initial visit with procedures, as well as each subsequent visit with procedures. Such records must be made available when requested by HHSC or TMHP for utilization and quality assurance reviews as required by federal regulations. The documentation record or a true copy or narrative abstract must be sent to the hospital of delivery by the client’s 35th week of pregnancy. The record must be made available to the client if the client transfers care to another institution. Records completed by licensed professional clinic staff under the direction of a physician must be signed by the supervising physician.

## 7.4 Claims Filing and Reimbursement

MSC services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

MSCs are reimbursed in accordance with 1 TAC §355.8085. Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Note:** *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

## 8 Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS)

For other APRNs, see Section 4, “Certified Registered Nurse Anesthetist (CRNA)” in this handbook for information regarding CRNAs, and Section 3, “Certified Nurse Midwife (CNM)” in this handbook for information about certified nurse midwives (CNMs).

## 8.1 Enrollment

To enroll in Texas Medicaid, an NP or CNS must be licensed as a registered nurse and as an APRN by the Texas BON. A registered nurse under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as documentation of appropriate licensure and certification for enrollment.

Providers cannot be enrolled if their license is due to expire within 30 days.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

All APRNs (including CNMs, CRNAs, CNSs, and NPs) are enrolled within the categories of practice as determined by the Texas BON. CNSs and NPs must enroll as an APRN; CNMs and CRNAs may enroll using their specific titles.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Section 3, “Certified Nurse Midwife (CNM)” in this handbook for more information on CNM enrollment.

Section 4, “Certified Registered Nurse Anesthetist (CRNA)” in this handbook for more information on CRNA enrollment.

APRNs may be included as primary care providers in the provider network for Medicaid and CHIP programs (both fee-for-service and managed care), regardless of whether the physician supervising the APRN is enrolled in Medicaid or in the provider network.

### 8.1.1 Enrollment in Texas Health Steps (THSteps)

APRNs, including NPs, and CNSs, who are recognized by the Texas BON can enroll as THSteps providers and provide checkup services within their scope of practice. Specific information is found in the *Children’s Services Handbook*.

**Referto:** Subsection 4.2.1, “THSteps Medical Provider Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on enrollment procedures.

## 8.2 Services, Benefits, Limitations, and Prior Authorization

Services performed by NPs and CNSs are benefits if the services meet the following criteria:

- Are within the scope of practice for NPs and CNSs, as defined by Texas state law.
- Are consistent with rules and regulations promulgated by the Texas BON or other appropriate state licensing authority.
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO).
- Are reasonable and medically necessary as determined by HHSC or its designee.

NPs and CNSs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Physicians who submit a claim using the physician’s own NPI for services provided by an NP or CNS must submit modifier SA on each claim detail if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit.

Benefit limitation information for services can be found in Section 9, “Physician” in this handbook, the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*, and the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Payment for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.

**Referto:** Section 2, “Medicaid Title XIX Family Planning Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Section 9, “Physician” in this handbook.

Section 4, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on THSteps services.

Subsection 9.3, “Collaborative Care Model (CoCM)” in this handbook for information about CoCM services.

### 8.2.1 Prior Authorization

Services performed by an NP or CNS are subject to the same prior authorization guidelines as services performed by other provider types.

## 8.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including NP and CNS services. NP and CNS services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 8.4 Claims Filing and Reimbursement

### 8.4.1 Claims Information

APRN services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 8.4.2 Reimbursement

According to 1 TAC §355.8281, the Medicaid rate for NPs and CNSs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. When NPs or CNSs bill Medicaid directly for services they performed, they must use their individual NPI. If the services are performed by the NP or CNS but billed by a physician or physician group, the billing provider is the physician or physician group. Physicians may be reimbursed 92 percent of the established reimbursement rate for services

provided by an NP or CNS if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, and injections provided by an NP or CNS.

**Note:** NP and CNS providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps NPI as the billing provider.

Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (Vol. 1, General Information) for more information about reimbursement.

## 9 Physician

### 9.1 Enrollment

#### 9.1.1 Physicians and Doctors

To enroll in Texas Medicaid to provide medical services, physicians (MD or DO), doctors of dental surgery [DDS], and doctors of podiatric medicine (DPM) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided.

Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days. A current Texas license must be submitted.

**Important:** The Centers for Medicare & Medicaid Services (CMS) guidelines mandate that physicians who provide durable medical equipment (DME) products such as spacers or nebulizers are required to enroll as Texas Medicaid DME providers.

All physicians except gynecologists, pediatricians, pediatric subspecialists, pediatric psychiatrists, and providers performing only Texas Health Steps (THSteps) medical or dental checkups must be enrolled in Medicare before enrolling in Medicaid. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

### 9.2 Services, Benefits, Limitations, and Prior Authorization

The Administrative Simplification provisions of the *Health Insurance Portability and Accountability Act* (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association's (AMA) Current Procedural Terminology (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific code that matches the services provided, based on the code's description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management (E/M) services. The medical record must document the specific elements necessary to satisfy the criteria for the level of services as described in CPT. Reimbursement may be recouped when the medical record documents a different level of service from what is submitted on the claim. The level of service provided and documented must be medically necessary, based on the clinical situation and needs of the client.

To receive reimbursement, providers must document the following information in the client's medical record:

- The service
- The date rendered
- Pertinent information about the client's condition supporting the need for the service
- The care given

Physician services include those reasonable and medically necessary services ordered and performed by physicians or under physician supervision that are within the scope of practice of their profession as defined by state law.

### 9.2.1 Electronic Signatures in Prior Authorizations

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

### 9.2.2 Teaching Physician and Resident Physician

The roles of the teaching physician and resident physician occur in the context of an accredited graduate medical education (GME) training program.

The teaching physician is the Medicaid-enrolled physician who is professionally responsible for the particular services that were provided and are being submitted for reimbursement; the physician must be affiliated and in good standing with an accredited GME program and must possess all appropriate licensure.

Physician services must be performed personally by the teaching physician or by the person to whom the physician has delegated the responsibility. The level of supervision required may be direct or personal.

In all cases, the client's medical record must clearly document that the teaching physician provided identifiable supervision of the resident. As defined below, the supervision must be direct or personal depending on the setting and the clinical circumstances:

- Direct supervision means that the teaching physician must be in the same office, building, or facility when and where the service is provided and must be immediately available to furnish assistance and direction.
- *Personal supervision* means that the teaching physician must be physically present in the room when and where the service is being provided.

Personal supervision by the teaching physician is required during the key portions of all major surgeries and the key portions of all other physician services billed to Texas Medicaid if the immediate supervision, participation, or intervention of the supervising physician is medically prudent in order to assure the health and safety of the client. Physician services that require personal supervision may include invasive procedures and evaluation and management services that require complex medical decision making. Situations that require personal supervision include those in which:

- The clinical condition of the client is unstable or will likely become unstable during, or as a result of, the planned medical intervention.

- The planned medical intervention, even under optimal conditions will result in a medically reasonable risk for significant morbidity or death following the procedure.
- Deviation from the expected technique at the time the procedure or service is performed presents a medically reasonable, causally-related, foreseeable risk to the patient's life or health.

This criterion applies regardless of the place of service.

The teaching physician must provide medically appropriate, identifiable direct supervision for all other services that do not require personal supervision.

The following prerequisites apply when the teaching physician submits claims for services performed, in whole or in part, by the resident physician in the inpatient hospital setting, the outpatient hospital setting, and surgical services and procedures.

**Note:** *When requesting services for prior authorization at patient discharge, the signature of the resident on the actual prescription is permitted as long as the Medicaid enrolled attending/supervising physician's signature appears on the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form and on any letters or documentation provided to support medical necessity. The resident's order and the Title XIX Form signed by the attending/supervising physician must be for the same service.*

### 9.2.2.1 Teaching Physician Prerequisites

#### Services provided in an outpatient setting.

All requirements for personal or direct supervision in the outpatient setting must be met for the services to qualify for reimbursement. The following tasks must be performed by the teaching physician and their completion must be documented in the patient's medical record before the claims are submitted for consideration of reimbursement:

- Review the patient's history and physical examination.
- Confirm or revise the patient's diagnosis.
- Determine the course of treatment to be followed.
- Assure that any necessary supervision of interns or residents was provided.
- Confirm that documentation in the medical record supports the level of service provided.

**Exception:** *Exception for E/M services furnished in certain primary care centers. Teaching physicians that meet the primary care exception under Medicare are allowed to bill for low-level and mid-level E/M services furnished by residents in the absence of a teaching physician. Facilities that meet the primary care exception under Medicare may bill Texas Medicaid, Family Planning, or the Children with Special Health Care Needs (CSHCN) Services Program for new patient services (procedure codes 99202 and 99203) and established patient services (procedure codes 99211, 99212, and 99213).*

**Note:** *All services provided in an outpatient setting that do not qualify for the exception above require that the teaching physician examine the patient.*

#### Services provided in an inpatient setting.

For services provided in an inpatient setting, the teaching physician must demonstrate that medically appropriate supervision was provided. The following tasks must be performed and their completion must be documented in the patient's medical record before the claims are submitted for consideration of reimbursement. The documentation must be made in the same manner as required by federal regulations under Medicare:

- Review the patient's history, review the resident's physical examination, and examine the patient no later than 36 hours after the patient's admission and before the patient's discharge.

- Confirm or revise the patient's diagnosis.
- Determine the course of treatment to be followed.
- Document the teaching physician's presence and participation in the major surgical or other complex and dangerous procedure or situation.
- Confirm that documentation in the medical record supports the level of service provided.
- A face-to-face encounter with the client on the same day as any services provided by the resident physician.

### **Surgical services and procedures.**

The teaching surgeon is responsible for the patient's preoperative, operative, and postoperative care. The teaching physician must demonstrate that medically appropriate supervision was provided. The following tasks must be performed and their completion must be documented in the patient's medical record before the claims are submitted for consideration of reimbursement. The documentation must be made in the same manner as required by federal regulations under Medicare:

- Review the patient's history, review the resident's physical examination, and examine the patient within a reasonable period of time after the patient's admission and before the patient's discharge.
- Confirm or revise the client's diagnosis.
- Determine the course of treatment to be followed.
- Document the teaching physician's presence and participation in the major surgical or other complex and dangerous procedure or situation.

**Important:** *Reimbursement may be reduced, denied, or recouped if the prerequisites are not documented in the medical record. The documentation must be made in the same manner as required by federal regulations under Medicare.*

## **9.2.3 Substitute Physician**

Physicians may bill for the service of a substitute physician who sees clients in the billing physician's practice under either a reciprocal or locum tenens arrangement.

A reciprocal arrangement is one in which a substitute physician covers for the billing physician on an occasional basis when the billing physician is unavailable to provide services. Reciprocal arrangements are limited to a continuous period no longer than 14 days and do not have to be in writing.

A locum tenens arrangement is one in which a substitute physician assumes the practice of a billing physician for a temporary period no longer than 90 days when the billing physician is absent for reasons such as illness, pregnancy, vacation, continuing medical education, or active duty in the armed forces. The locum tenens arrangement may be extended for a continuous period of longer than 90 days if the billing physician's absence is due to being called or ordered to active duty as a member of a reserve component of the armed forces. Locum tenens arrangements must be in writing.

The substitute physician must be enrolled in Texas Medicaid and must not be on the Texas Medicaid or HHSC Family Planning Program provider exclusion list. The billing provider's name, address, and NPI must appear in Block 33 of the claim form. The name and office or mailing address of the substitute physician must be documented on the claim in Block 19, *not* Block 33.

When a physician bills for a substitute physician, modifier Q5 or Q6 must follow the procedure code in Block 24D for services provided by the substitute physician. The Q5 modifier is used to indicate a reciprocal arrangement and the Q6 modifier is used to indicate a locum tenens arrangement.

When physicians in a group practice bill substitute physician services, the performing NPI of the physician for whom the substitute provided services must be in Block 24J.

Physicians must familiarize themselves with these requirements and document accordingly. Those services not supported by the required documentation as detailed above will be subject to recoupment.

#### **9.2.4 Aerosol Treatment**

Nebulized aerosol treatments (procedure codes 94640, 94644, and 94645) with short-acting beta-agonists are a benefit of Texas Medicaid and considered medically necessary when breathing is compromised by certain acute medical conditions. Documentation to support an aerosol treatment for the worsening of an acute or chronic condition must be maintained in the client's medical record and is subject to retrospective review.

Procedure code 94645 is only a benefit in the outpatient setting, specifically in a hospital emergency department or an urgent care clinic.

Pulse oximetry and evaluation of the client's use of an aerosol generator, nebulizer, or metered-dose inhaler are considered part of an evaluation and management (E/M) visit and will not be reimbursed separately.

Hypertonic saline used in aerosol therapy will be denied if billed separately.

**Referto:** Subsection 4.2.20.1, "Aerosol Treatment" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

##### **9.2.4.1 Diagnostic Testing**

Nitric oxide expired gas determination (FeNO) measurement (procedure code 95012) is a benefit for Texas Medicaid.

FeNO measurement provided in the physician's office is considered medically necessary as an adjunct to the established clinical and laboratory assessments for diagnosing and assessing asthma, predicting exacerbations, and evaluating the response of a client who has asthma to anti-inflammatory therapy. FeNO measurement may be reimbursed by Texas Medicaid when the test is used as follows:

- To assist in assessing the etiology of respiratory symptoms.
- To help identify the eosinophilic asthma phenotype.
- To assess potential response or failure to respond to anti-inflammatory agents, particularly inhaled corticosteroids (ICS).
- To establish a baseline FeNO during non-exacerbations for subsequent monitoring of chronic persistent asthma.
- To guide changes in dosing of anti-inflammatory medications, i.e., step-down dosing, step-up dosing, or discontinuation of anti-inflammatory medications.
- To assist in the evaluation of adherence to anti-inflammatory medications.
- To assess whether airway inflammation is contributing to respiratory symptoms.

The technical and interpretation components of procedure code 95012 will not be reimbursed separately, as the instrument produces an exhaled nitric oxide (NO) measurement that requires little interpretation. Procedure code 95012 will be limited to once per day and must be submitted with procedure code 94010 or 94060.

If FeNO is measured during an office visit where additional E/M components are fulfilled, a separate E/M procedure code may be reimbursed if it is submitted with modifier 25.

#### **9.2.5 Allergy Services**

Texas Medicaid uses the following guidelines for reimbursement of allergy services.

### 9.2.5.1 Allergy Immunotherapy

Allergen immunotherapy consists of the parenteral administration of allergenic extracts as antigens at periodic intervals, usually on an increasing dosage scale to a dosage which is maintained as maintenance therapy.

Preparation of the allergy vial or extracts is a benefit of Texas Medicaid when preparations are made in accordance with the American Academy of Allergy, Asthma, and Immunology. Claims for preparations should be submitted using the following procedure codes:

| Procedure Codes for Preparation of Allergy Vial or Extract |       |       |       |       |       |       |  |  |  |
|------------------------------------------------------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 95145                                                      | 95146 | 95147 | 95148 | 95149 | 95165 | 95170 |  |  |  |

Administration of the allergy extract may be reimbursed using procedure codes 95115 and 95117.

Rapid desensitization may be reimbursed using procedure code 95180 when submitted with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| Z516            | Z880   | Z881   | Z882   | Z883   | Z884   | Z885   | Z886   |
| Z887            | Z888   | Z889   | Z91010 | Z91011 | Z91012 | Z91013 | Z91018 |
| Z9102           | Z91030 | Z91038 | Z91040 | Z91041 | Z91048 | Z9109  |        |

Allergen immunotherapy is a benefit for clients who have allergy conditions when the following criteria are met:

- A diagnosed hypersensitivity to an allergen can be indicated by one of the valid diagnosis codes listed below.
- Hypersensitivity cannot be managed by avoidance or pharmacologic therapy to control allergic symptoms, or the client has unacceptable side effects with pharmacologic therapy.
- The pharmacologic treatment is refused by the client or leads to significant side effects.
- The allergen content is based on appropriate skin testing, and the allergens are prepared for the client individually.

The preparation of the allergy vial or extract and the administration of an injection may be reimbursed for the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |

#### 9.2.5.1.1 Prior Authorization for Allergy Immunotherapy

Authorization is not required for immunotherapy services; however, requests for services beyond the established limits of 160 doses per one-year period for procedure code 95165 may be considered for prior authorization with documentation of medical necessity. Documentation must be submitted to the Special Medical Prior Authorization Department and include the following information:

- Copy of the allergen testing results
- Severity and periodicity of symptoms
- Physical limitations created by the symptoms
- Concurrent drug treatment
- Explanation of how efficacy has not been achieved with prior treatment and the objectives of the new anticipated treatment program

#### 9.2.5.1.2 Limitations of Allergy Immunotherapy

The quantity billed for the allergy extract preparation procedure must represent the total number of doses to be administered from the vial. If the number of doses is not stated on the claim, a quantity of one is allowed.

**Note:** A “dose” is defined as the amount of antigen(s) administered in a single injection from a multidose vial.

Procedure code 95165 is limited to a total of 160 doses per one-year period, which begins the date the immunotherapy is initiated. Additional doses may be considered for reimbursement through prior authorization with documentation of medical necessity. Procedure code 95165 is limited to no more than ten doses per vial.

When an injection is given from a vial, providers should use an administration-only procedure code (95115 or 95117). Reimbursement for the administration is limited to one per day.

An office visit, clinic visit, or treatment visit is not considered for reimbursement in addition to the fee for the preparation or the administration of the allergy vial or extract unless the additional visit results in a non-allergy-related diagnosis or a re-evaluation of the client’s condition. The following E/M procedure codes may be submitted with modifier 25:

| Procedure Codes |       |       |       |       |       |       |       |       |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|--|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |  |

Allergen immunotherapy that is considered experimental, investigational, or unproven is not a benefit of Texas Medicaid.

Single dose vials (procedure code 95144) are not a benefit of Texas Medicaid.

**Referto:** Subsection 4.5.5, “Outpatient Hospital Revenue Codes” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about outpatient hospital revenue codes for clinic visits, treatment rooms, and observation services.

### 9.2.5.2 Allergy Testing

Texas Medicaid benefits include allergy testing for clients with clinically significant allergic symptoms. Allergy testing is focused on determining the allergens that cause a particular reaction and the degree of the reaction. Allergy testing also provides justification for recommendations of particular medicines, of immunotherapy, or of specific avoidance measures in the environment.

Evaluation and management E/M services will not be reimbursed on the same date of service as allergy testing. Allergy testing will be paid and the E/M service will be denied as part of another procedure on the same date of service.

The following allergy tests are benefits of Texas Medicaid:

- Percutaneous and intracutaneous skin test. The skin test for IgE-mediated disease with allergenic extracts is used in the assessment of allergy-prone clients. The test involves the introduction of small quantities of test allergens below the epidermis. Procedure codes 95004, 95017, 95018, 95024, 95027, and/or 95028 should be used to submit skin tests for consideration of reimbursement.
- *Patch or application tests.* Patch testing (procedure code 95044) is used for diagnosing contact allergic dermatitis.
- *Photo or photo patch skin test.* Procedure codes 95052 and 95056 may be used for diagnosing contact allergic dermatitis.
- *Ophthalmic mucous membrane or direct nasal mucous membrane tests.* Nasal or ophthalmic mucous membrane tests (procedure codes 95060 and 95065) are used for the diagnosis of either food or inhalant allergies and involve the direct administration of the allergen to the mucosa.
- *Inhalation bronchial challenge testing (not including necessary pulmonary function tests).* Bronchial challenge testing with methacholine, histamine, or allergens (procedure code 95070) is used for defining asthma or airway hyperactivity when skin testing results are not consistent with the client’s medical history. Results of these tests are evaluated by objective measures of pulmonary function.

Procedure code 95199 may be used for an unlisted allergy or clinical immunologic service or procedure if there is not a specific procedure code that describes the service performed. Prior authorization is required for unlisted procedure codes. Every effort must be used to bill with the appropriate CPT code that describes the procedure being performed. If a code does not exist to describe the service performed, prior authorization may be requested using unlisted procedure code 95199 and must be submitted with documentation to assist in determining coverage. The documentation submitted must include all of the following:

- The client’s diagnosis
- Medical records indicating prior treatment for this diagnosis and the medical necessity of the requested procedure
- A clear, concise description of the procedure to be performed
- Reason for recommending this particular procedure
- A CPT or HCPCS procedure code that is comparable to the procedure being requested

- Documentation that this procedure is not investigational or experimental
- Place of service (POS) the procedure is to be performed
- The physician's intended fee for this procedure

Prior authorization requests for Texas Medicaid fee-for-service clients must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department.

The number of allergy tests performed must be indicated on the claim. When the number of tests is not specified, a quantity of one is allowed.

#### 9.2.5.2.1 Allergy Blood Tests

Allergy blood testing procedure codes 86001, 86003, 86005, and 86008 are a benefit when the test is performed for a reason that includes, but is not limited to, the following:

- The client is unable to discontinue medications
- An allergy skin test is inappropriate for the client for the following reasons:
  - The client is pediatric
  - The client is disabled
  - The client suffers from a skin condition such as dermatitis

Radioallergosorbent tests (RAST) and multiple antigen simultaneous tests (MAST) are benefits of Texas Medicaid. RAST testing is used to detect specific allergens. RAST testing is usually performed by an independent lab; however, there are physicians who have the capability of performing these tests in their offices. Physicians who submit RAST/MAST tests performed in the office setting must use modifier SU to be considered for reimbursement. Without the use of the SU modifier, RAST/MAST testing submitted with POS 1 (office) is denied with the message, "Lab performed outside of office must be billed by the performing facility."

RAST/MAST tests must be submitted using procedure codes 86003, 86005, and 86008.

Procedure code 86001 is limited to 20 allergens per rolling year, any provider.

Procedure code 86003 and 86008 are limited to 30 allergens per rolling year, any provider.

Procedure code 86005 is limited to 4 multiallergen tests per rolling year, same provider.

#### 9.2.5.2.2 Collagen Skin Test

Collagen skin tests are a benefit of Texas Medicaid using procedure code Q3031. Collagen skin tests are administered to detect a hypersensitivity to bovine collagen. This skin test is given four weeks prior to any type of surgical procedure that utilizes collagen.

Collagen injections that are used for cosmetic surgery are not considered medically necessary and are not a benefit of Texas Medicaid.

#### 9.2.5.2.3 Prior Authorization

Prior authorization is required for collagen skin test procedure code Q3031.

Prior authorization requests for Texas Medicaid fee-for-service clients must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department.

Prior authorization is required for procedure codes 86001, 86003, and 86005 only if the limits are exceeded. The following medical documentation must be submitted to the SMPA Department with the prior authorization request for additional procedures:

- Results of any previous treatment

- Documentation that explains why the client's treatment could not be completed within the policy limits for the requested procedures
- Client diagnosis and conditions that support the medical necessity for the additional procedures requested
- Client outcomes that the requested procedures will achieve

#### 9.2.5.2.4 Ingestion Challenge Test

Ingestion challenge tests are a benefit of Texas Medicaid using procedure codes 95076 and 95079.

Procedure code 95076 is limited to one service per day, any provider.

Procedure code 95079 is limited to twice per day, any provider.

Add-on procedure code 95079 must be billed with primary procedure code 95076.

### 9.2.6 Ambulance Transport Services - Nonemergency

Nonemergency ambulance services require prior authorization in circumstances not involving an emergency. Facilities and other providers must request and obtain prior authorization before contacting the ambulance provider for nonemergency ambulance services.

**Referto:** [Non-emergency Ambulance Prior Authorization Request](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

Subsection 2.2.3, "Nonemergency Ambulance Transport Services" in the *Ambulance Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about ambulance services.

Subsection 5.1.8, "Prior Authorization for Nonemergency Ambulance Transport" in "Section 5: Fee-for-Service Prior Authorizations" (Vol. 1, *General Information*) for more information about nonemergency ambulance transport prior authorization.

### 9.2.7 Anesthesia

Anesthesia services are a benefit of Texas Medicaid with specific benefits and limitations to reimbursement.

Medicaid may reimburse anesthesiologists, certified registered nurse anesthetists (CRNAs), and anesthesiologist assistants (AAs) for administering anesthesia as defined within their individual scope of practice.

#### 9.2.7.1 Medical Direction by an Anesthesiologist

Medical direction by an anesthesiologist of an anesthesia practitioner (CRNA, AA, or other qualified professional) is a benefit of Texas Medicaid if the following criteria are met:

- No more than four anesthesia procedures are being performed concurrently.
- The anesthesiologist is physically present in the operating suite.

**Exception:** *Anesthesiologists may be considered for reimbursement when they medically direct more than four anesthesia services or simultaneously supervise a combination of more than four CRNAs, AAs, or other qualified professionals under emergency circumstances only.*

Medical direction provided by an anesthesiologist is a benefit of Texas Medicaid if the following criteria are met:

- The anesthesiologist performs a preanesthetic examination and evaluation.
- The anesthesiologist prescribes the anesthesia plan.

- The anesthesiologist personally participates in the critical portions of the anesthesia plan, including induction and emergence.
- The anesthesiologist ensures that a qualified professional can perform the procedures in the anesthesia plan that the anesthesiologist does not perform personally.
- The anesthesiologist monitors the course of anesthesia administration at intervals.
- The anesthesiologist provides direct supervision when medically directing an anesthesia procedure. Direct supervision means the anesthesiologist must be immediately available to furnish assistance and direction.
- The anesthesiologist provides postanesthesia care.

The anesthesiologist does not perform any other services (except as noted below) during the same time period. The anesthesiologist who directs the administration of no more than four anesthesia procedures may provide the following without affecting the eligibility of the medical direction services:

- Address an emergency of short duration in the immediate area
- Administer an epidural or caudal anesthetic to ease labor pain
- Provide periodic, rather than continuous, monitoring of an obstetrical patient
- Receive clients entering the operating suite for the next surgery
- Check or discharge clients in the recovery room
- Handle scheduling matters

As noted above, an anesthesiologist may concurrently medically direct up to four anesthesia procedures. Concurrency is defined as the maximum number of procedures that the anesthesiologist is medically directing within the context of a single procedure and whether those other procedures overlap each other. Concurrency is not dependent on each of the cases involving a Medicaid client. For example, if three procedures are medically directed but only two involve Medicaid clients, the Medicaid claims must be billed as concurrent medical direction of three procedures.

For medical direction, the anesthesiologist must document in the client's medical record that he or she did the following:

- Performed the pre-anesthetic exam and evaluation.
- Provided indicated post-anesthesia care.
- Was present during the critical and key portions of the anesthesia procedure, including, if applicable, induction and emergence.
- Was present during the anesthesia procedure to monitor the client's status.

The following information must be available to state agencies upon request and is subject to retrospective review:

- The name of each CRNA, AA, or other qualified professional that was concurrently medically directed or supervised and a description of the procedure that was performed must be documented and maintained.
- Signatures of the anesthesiologist, CRNA, AA, or other qualified professional involved in administering anesthesia services must be documented in the client's medical record.

9.2.7.2      **Anesthesia for Sterilization**

**Referto:** Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for the complete list of family planning diagnosis codes.

Subsection 2.2.8, “Sterilization and Sterilization-Related Procedures” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for more information about FQHCs and billing the annual family planning examination for Title XIX clients.

9.2.7.3      **Anesthesia for Labor and Delivery**

Providers must bill the most appropriate procedure code for the service provided. Other time-based procedure codes cannot be submitted if either 01960 or 01967 is the most appropriate procedure code.

The following procedure codes must be used for obstetrical anesthesia:

| Procedure Codes |       |       |       |       |       |  |  |  |  |
|-----------------|-------|-------|-------|-------|-------|--|--|--|--|
| 01960           | 01961 | 01963 | 01967 | 01968 | 01969 |  |  |  |  |

Procedure codes 01960 and 01967 are limited to once every 210 days when billed by any provider and are reimbursed a flat fee. The time reported must be in minutes. Providers should refer to the definition of time in the CPT manual in the “Anesthesia Guidelines—Time Reporting” section.

Procedure code 01968 or 01969 may be considered for reimbursement when submitted with procedure code 01967. For a Cesarean delivery following a planned vaginal delivery, the anesthesia administered during labor must be billed with procedure code 01967 and must indicate the time in minutes that represents the time between the start and stop times for the procedure. The additional anesthesia services administered during the operative session for a Cesarean delivery must be submitted using procedure code 01968 or 01969 and must indicate the time spent administering the epidural and the actual face-to-face time spent with the client. The insertion and injection of the epidural are not considered separately for reimbursement.

All time must be documented in block 24D of the claim form or the appropriate field of the chosen electronic format.

For continuous epidural analgesia procedure codes, Texas Medicaid reimburses providers for the time when the physician is physically present and monitors the continuous epidural. Reimbursable time refers to the period between the catheter insertion and when the delivery commences.

9.2.7.4      **Anesthesia Provided by the Surgeon (Other Than Labor and Delivery)**

Local, regional, or general anesthesia provided by the operating surgeon is not reimbursed separately from the surgery. A surgeon billing for a surgery will not be reimbursed for the anesthesia when billing for the surgery, even when using the CPT modifier 47. The anesthesia service is included in the global surgical fee.

9.2.7.5      **Complicated Anesthesia**

The following procedure codes may be reimbursed in addition to an anesthesia procedure or service: 99100, 99116, 99135, and 99140. Documentation supporting the medical necessity for use of the procedure codes may be subject to retrospective review.

Procedure code 99140 is not reimbursed for diagnosis code O80 or O82 when one of these diagnoses is documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the complicating condition. An emergency is defined as existing when delay in treatment of the client would lead to a significant increase in the threat to life or body part.

### **9.2.7.6 Multiple Procedures**

When billing for anesthesia and other services on the same claim, the anesthesia charge must appear in the first detail line for correct reimbursement. Any other services billed on the same day must be billed as subsequent line items.

When billing for multiple anesthesia services performed on the same day or during the same operative session, use the procedure code with the higher RVU. For accurate reimbursement, apply the total minutes and dollars for all anesthesia services rendered on the higher RVU code. Multiple services reimbursement guidelines apply.

### **9.2.7.7 Monitored Anesthesia Care**

Monitored anesthesia care may include any of the following:

- Intraoperative monitoring by an anesthesiologist or qualified professional under the medical direction of an anesthesiologist
- Monitoring of the client's vital physiological signs in anticipation of the need for general anesthesia
- Monitoring of the client's development of an adverse physiological reaction to a surgical procedure

Anesthesiologists, CRNAs, AAs, or other qualified professionals may use modifier QS to report monitored anesthesia care.

The QS modifier is an informational modifier.

### **9.2.7.8 Reimbursement Methodology**

There are two types of reimbursement for anesthesia procedure codes.

- Flat fee
- Time-based fees, which require documentation of the exact amount of face-to-face time with the client

Anesthesiologists directing one or multiple CRNAs and/or AAs during medical procedures will be reimbursed at 50 percent of the established reimbursement rate.

An AA under the supervision of an anesthesiologist is reimbursed the lesser of the billed charges or 50 percent of the calculated payment for a supervised anesthesia service.

If multiple CRNAs, anesthesiologists, or anesthesiologist assistants under anesthesiologist supervision are providing anesthesia services for a client, only one CRNA or AA and one anesthesiologist may be reimbursed.

Both the flat-fee and time-based-fee procedure codes must be submitted with modifiers and are subject to medical direction/supervision reimbursement adjustments.

#### **Flat Fees**

Both OB related anesthesia procedure codes 01960 and 01967 are considered for reimbursement with a flat-fee rate.

- Flat fees are subject to medically-directed modifier combination adjustments based on the modifier submitted with the anesthesia procedure code.
- The time-based add-on procedure code 01968 must be billed in addition to the flat fee when anesthesia for Cesarean delivery following neuraxial labor analgesia/anesthesia has occurred.

For flat-fee anesthesiology codes, anesthesia time begins when the anesthesia practitioner begins to prepare the client for the induction of anesthesia in the operating room or the equivalent area and ends when the anesthesia practitioner is no longer in personal attendance, that is, when the client may be safely placed under postoperative supervision.

**Time-Based Fees**

For time-based anesthesiology procedure codes, anesthesia time is the time during which an anesthesia practitioner is present with the client. Anesthesia time begins when the anesthesia practitioner begins to prepare the client for the induction of anesthesia in the operating room or the equivalent area and ends when the anesthesia practitioner is no longer in personal attendance (e.g., when the client may be safely placed under postoperative supervision).

For time-based anesthesiology codes, anesthesia practitioners must document interruptions in anesthesia time in the client’s medical record.

The documented time must be the same in the records or claims of the anesthesiologist and other anesthesia practitioners who were medically directed by the anesthesiologist.

One time unit is equal to 15 minutes of anesthesia. Providers must submit the total anesthesia time in minutes on the claim. The claims administrator will convert total minutes to time units.

Reimbursement of time-based anesthesia services is derived by adding the RVUs (e.g., base units) for the procedures performed (when multiple procedures are performed use the procedure with the highest RVUs) to the total face-to-face anesthesia time in minutes divided by 15 minutes, multiplied by the appropriate conversion factor:

$$[RVUs + (Minutes / 15)] \times \text{Conversion Factor} = \text{Anesthesia Reimbursement}$$

| Provider Type Description - Physician Pricing Example |   |                   |   |                                    |
|-------------------------------------------------------|---|-------------------|---|------------------------------------|
| Time: 120 minutes                                     | = | 120/15            | = | 8 (quantity billed)                |
| Procedure code: 00851                                 | = | (6 RVUs) 6.00 + 8 | = | 14.00                              |
| Conversion factor: \$19.58                            | = | 14.00 x 19.58     | = | \$274.12 (physician reimbursement) |

**Conversion Factor**

A conversion factor is the multiplier that transforms relative values into payment amounts. There is a standard conversion factor for anesthesia services.

**9.2.7.9 Anesthesia Modifiers**

Each anesthesia procedure code must be submitted with the appropriate anesthesia modifier combination whether billing as the sole provider or for the medical direction of CRNAs, AAs, or other qualified professionals.

When an anesthesia procedure is billed without the appropriate reimbursement modifiers or is billed with modifier combinations other than those listed below in the Modifier Combinations section, the claim will be denied.

A procedure billed with a modifier indicating that the anesthesia was personally performed by an anesthesiologist (modifier AA) will be denied if another claim has been paid indicating the service was personally performed by, and reimbursed to, a CRNA (modifier QZ) for the same client, date of service, and procedure code. The opposite is also true—a CRNA-administered procedure will be denied if a previous claim was paid to an anesthesiologist for the same client, date of service, and procedure code. Denied claims may be appealed with supporting documentation of any unusual circumstances.

**9.2.7.9.1 State-Defined Modifiers**

Modifiers U1 (indicating one Medicaid claim billed by an anesthesia practitioner) and U2 (indicating two Medicaid claims) are state-defined modifiers that must be billed by an anesthesiologist, CRNA, AA, or other qualified professional.

Modifier U1, indicating that only one Medicaid claim will be submitted, cannot be billed by two providers for the same procedure, client, and date of service. Modifier U2, indicating that two Medicaid claims will be submitted, can only be billed by two providers for the same procedure, client, and date of service if one of the providers was medically directed by the other. Denied claims may be appealed with supporting documentation of any unusual circumstances.

Anesthesia providers must submit modifier U1 or U2 in combination with an appropriate pricing modifier (AA, GC, QY, QK, AD, QZ, QX) when billing for any payable anesthesia procedure codes.

#### 9.2.7.9.2 Modifier Combinations

When a single claim per client is billed by the anesthesiologist for personally performing the anesthesia service, the AA and U1 modifier combination must be billed together.

Anesthesiologists may be reimbursed for medical direction of CRNAs, AAs, or other qualified professional by using one of the following modifier combinations:

| Modifier Combination Submitted by Anesthesiologist When is it used? |                                                                                                                                                                                                                                                                                                                                                                                     | Who will submit claims?   |
|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| Anesthesiologist Directing Other Qualified Professionals            |                                                                                                                                                                                                                                                                                                                                                                                     |                           |
| QY and U1                                                           | When a single claim per client is billed by the anesthesiologist for medically directing anesthesia services of an anesthesia procedure provided by one CRNA, AA, or other qualified professional, the QY + U1 modifier combination must be billed together when the CRNA, AA, or qualified professional are a part of a clinic/group.                                              | Only the anesthesiologist |
| AA, U1, and GC                                                      | When a single claim per client is billed by the anesthesiologist for medically directing anesthesia services of an anesthesia procedure provided by one resident physician.<br><br><i><b>Note:</b> For procedure code 01967 medical supervision of resident physicians rather than medical direction is required, however, modifiers AA-U1-GC must still be noted on the claim.</i> | Only the anesthesiologist |
| QK and U1                                                           | When a single claim per client is billed by the anesthesiologist for medically directing anesthesia services of two, three, or four concurrent anesthesia procedures provided by CRNAs, AAs, or other qualified professionals.                                                                                                                                                      | Only the anesthesiologist |
| AD and U1 (Emergency circumstances only)                            | When a single claim per client is billed by the anesthesiologist for medical supervision of anesthesia services for more than four concurrent anesthesia procedures provided by CRNAs, AAs, or other qualified professionals. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.   | Only the anesthesiologist |

| Modifier Combination Submitted by Anesthesiologist |  | When is it used?                                                                                                                                                                                                                                                                                                                   | Who will submit claims?                                                 |
|----------------------------------------------------|--|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|
| Anesthesiologist Directing CRNAs or AAs            |  |                                                                                                                                                                                                                                                                                                                                    |                                                                         |
| QY and U2                                          |  | When two claims per client are billed, one by the medically directing anesthesiologist and one by the CRNA, AA, or other qualified professional.                                                                                                                                                                                   | Both the anesthesiologist and CRNA, AA, or other qualified professional |
| QK and U2                                          |  | When two claims per client are billed for medically directed anesthesia services of two, three, or four concurrent anesthesia procedures provided by CRNAs, AAs, or other qualified professionals.                                                                                                                                 | Both the anesthesiologist and CRNA, AA, or other qualified professional |
| AD and U2 (Emergency circumstances only)           |  | When two claims per client are billed for the medical supervision of more than four concurrent anesthesia procedures provided by CRNAs, AAs, or other qualified professionals. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures. | Both the anesthesiologist and CRNA, AA, or other qualified professional |

#### 9.2.7.9.3 CRNA, AA, and Other Qualified Professional Services

Modifiers QZ and U1 must be submitted when a CRNA has personally performed the anesthesia services, is not medically directed by the anesthesiologist, and is directed by the physician.

Modifiers QX and U2 must be submitted by a CRNA, AA, or other qualified professional who provided services under the medical direction of an anesthesiologist.

### 9.2.7.10 Prior Authorization for Anesthesia

#### 9.2.7.10.1 Anesthesia for Medical Services

Anesthesia services provided in combination with most medical surgical procedures do not require prior authorization. However, some medical surgical procedures may require prior authorization. Anesthesia may be reimbursed if prior authorization for the surgical procedure was not obtained, but services provided by the facility, surgeon, and assistant surgeon will be denied.

### 9.2.7.11 Claims Filing

Texas Medicaid reimburses anesthesiologists based on the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982. Anesthesiologists must identify the following information on their claims:

- Procedure performed (CPT anesthesia code in Block 24 of the CMS-1500 paper claim form).
- Person (physician, CRNA, or AA) administering anesthesia (modifiers must be used to designate this provider type).
- Time in minutes.
- Any other appropriate modifier (refer to subsection 6.3.5, “Modifiers” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for a list of the most common modifiers).

### 9.2.7.12 Anesthesia (General) for THSteps Dental

**Referto:** Section 3, “Texas Health Steps (THSteps) Dental” in the *Children’s Services Handbook* (*Vol. 2, Provider Handbooks*) for additional information.

### 9.2.8 Bariatric Surgery

Bariatric surgery is considered medically necessary when used as a means to treat covered medical conditions that are caused or significantly worsened by the client's obesity in cases where those comorbid conditions cannot be adequately treated by standard measures unless significant weight reduction takes place. The pathophysiology of the covered comorbid conditions must be sufficiently severe that the expected benefits of weight loss subsequent to this surgery significantly outweigh the risks associated with bariatric surgery.

The following procedure codes may be reimbursed for medically necessary bariatric surgery services with prior authorization: 43644, 43645, 43659, 43770, 43771, 43772, 43773, 43774, 43775, 43842, 43843, 43845, 43846, 43847, 43848, 43886, 43887, and 43888.

Bariatric surgery is not a benefit when the primary purpose of the surgery is any of the following:

- For weight loss for its own sake
- For cosmetic purposes
- For reasons of psychological dissatisfaction with personal body image
- For the client's or provider's convenience or preference

#### 9.2.8.1 Prior Authorization for Bariatric Surgery

All clients must meet the criteria outlined below.

The same contraindications exist for bariatric surgery as for any other elective abdominal surgery. Documentation provided for prior authorization must attest that none of the following additional contraindications exist:

- Endocrine cause for obesity, inflammatory bowel disease, chronic pancreatitis, cirrhosis, portal hypertension, or abnormalities of the gastrointestinal tract
- Chronic, long-term steroid treatment
- Pregnant, or plans to become pregnant within 18 months
- Noncompliance with medical treatment
- Significant psychological disorders that would be exacerbated or interfere with the long-term management of the client after the operation
- Active malignancy

All clients must undergo preoperative psychological evaluation by a behavioral health provider and have clearance for surgery if any of the following conditions exist:

- They have a history of psychiatric or psychological disorders.
- They are currently under the care of a psychologist or psychiatrist.
- They are on psychotropic medications.

The client's medical record must include documentation of the evaluation.

Clients without a history of psychiatric or psychological disorder must also undergo a preoperative psychological evaluation by a behavioral health provider and have clearance for surgery. The client's medical record must include documentation that the client is psychologically mature and able to cope with the postsurgical changes of the surgery.

Documentation must be submitted with the prior authorization request that is signed by the surgeon and attests that the services are provided by a facility in Texas that is one of the following:

- Accredited by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP).

- A children's hospital that has a bariatric surgery program and provides access to an experienced surgeon who employs a team that is capable of long-term follow-up of the metabolic and psychosocial needs of the client and family.

Bariatric surgery for clients who are 20 years of age and younger may be prior authorized when the client meets all of the following criteria:

- The client has reached a Tanner Scale stage IV or V plus 95 percent of adult height based on bone age.
- The client has a body mass index (BMI) of greater than or equal to 40 kg/m<sup>2</sup>.
- The client has one or more comorbid conditions that are exacerbated by or attributable to obesity.
- Female clients must be at least 13 years of age and menstruating.
- Male clients must be at least 15 years of age.

Bariatric surgery for clients who are 21 years of age and older may be prior authorized when the client meets all of the following criteria:

- The client has a BMI of greater than or equal to 35 kg/m<sup>2</sup>.
- The client has one or more of the following comorbid conditions that are exacerbated by or attributable to obesity:
  - Obesity-associated hypoventilation
  - Moderate to severe sleep apnea (defined as apnea/hypoapnea index of 16 or more events per hour)
  - Congestive heart failure
  - Obesity-induced cardiomyopathy
  - Refractory hypertension resistant to pharmacotherapy (defined as blood pressure greater than 140mmHg systolic or greater than 90mmHg diastolic, despite maximally tolerated doses of at least three different classes of antihypertensive medications)
  - Pseudotumor cerebri (documented idiopathic intracerebral hypertension)
  - Adult onset (Type II) diabetes (with or without complications) with Hgb A1c greater than 9 percent, regardless of therapy, or 7 to 9 percent on maximal medical therapy (defined as taking insulin or maximally tolerated doses of at least two different classes of oral hypoglycemic medications)
  - Cardiovascular or peripheral vascular disease
  - Refractory hyperlipidemia (defined as triglycerides greater than 250 mg/dl, cholesterol greater than 220/mg/dl, HDL less than 35 mg/dl, or LDL greater than 200 mg/dl, despite maximally tolerated doses of at least two different classes of lipid-lowering medications)
  - Recurrent or chronic skin ulcerations with infection
  - Pulmonary hypertension
  - Chronic joint disease, deterioration of the joint cartilage, and the formation of new bone (bone spurs) at the margins of the joints, with symptoms that severely affect work or leisure activities, on maximal medical therapy (defined as maximally tolerated dose of a non-steroidal anti-inflammatory drug (NSAID) or COX-II inhibitor or acetaminophen and the completion of at least one physical-therapist-supervised exercise program)
  - Hepatic steatosis without evidence of active inflammation

Documentation must include a summary of the treatment provided for the client's comorbid conditions, including descriptions of how the client's response to standard treatment measures are unsatisfactory and why the bariatric surgery is medically necessary in the context of current treatment and medically-reasonable alternatives that are available.

Referral for bariatric surgery to the bariatric surgeon is required from the practitioner who is treating the comorbid condition(s). The bariatric surgeon will determine the client's eligibility for bariatric surgery. Documentation of the referral must be submitted with the prior authorization request.

The client must have had previous unsuccessful medical treatment for obesity, as documented in the medical record. All of the following minimal requirements must be met:

- The client has made a diligent effort to achieve healthy body weight with such efforts described in the medical record and certified by the operating surgeon.
- The client has failed to maintain a healthy weight despite a minimum of 6 months documented regular participation in a structured dietary program overseen by a physician (M.D. or D.O.) within 12 months of the request date.

Documentation that is submitted for prior authorization must also include all of the following:

- The process by which the client will receive postoperative surgical, nutritional, and psychological services.
- Affirmation that the client and the parent/guardian (if applicable) understand and will support the changes in eating habits that must accompany the surgery and the extensive postoperative follow-up.

Repeat bariatric surgery may be considered medically necessary in either of the following circumstances:

- To correct complications from bariatric surgery such as band malfunction, obstruction, or stricture
- To convert to a Roux-en-Y gastroenterostomy or to correct pouch failure in an otherwise compliant client when the initial bariatric surgery met medical necessity criteria

**Note:** *Conversion to a Roux-en-Y gastroenterostomy may be considered medically necessary for clients who have not had adequate success (defined as a loss of more than 50 percent of excess body weight) two years following the primary bariatric surgery procedure, and the client has been compliant with a prescribed nutrition and exercise program following the procedure.*

All documentation required for prior authorization is to be maintained in the client's medical record and is subject to retrospective review. This includes medical records from both the practitioner treating the comorbid condition(s) and the bariatric surgeon.

Providers may fax or mail prior authorization requests for bariatric surgery services for clients who are 20 years of age and younger to the TMHP Comprehensive Care Program (CCP) Prior Authorization Department. Prior authorization requests for clients who are 21 years of age and older may be faxed or mailed to the TMHP Special Medical Prior Authorization Department.

Clients may be eligible under Texas Medicaid or CCP for separate reimbursement for nutritional and psychological assessment and counseling associated with bariatric surgery.

Behavioral health services provided as part of the preoperative or postoperative phase of bariatric surgery are subject to behavioral health guidelines, and are not considered part of the bariatric surgery.

**Referto:** Subsection 8, "Inpatient Psychiatric Services" in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*) for information about behavioral health services.

**9.2.9 Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer**

Live BCG for intravesical (procedure code 90586) or transvesical (procedure code J9030) are benefits of Texas Medicaid for the following diagnosis codes:

| Diagnosis Codes |      |       |      |      |      |      |      |
|-----------------|------|-------|------|------|------|------|------|
| C670            | C671 | C672  | C673 | C674 | C675 | C676 | C677 |
| C678            | C679 | C7911 | D090 |      |      |      |      |

Procedure code 90585 is a benefit of Texas Medicaid and restricted to diagnosis code Z201. Procedure code 90585 is limited to one service per day, same procedure, any provider. Authorization is not required for the BCG vaccine.

Bladder instillation of anticarcinogenic agent (procedure code 51720) may be reimbursed separately when billed with BCG instillation (procedure code 90586 or J9030).

**9.2.10 Behavioral Health Services**

*Referto:* The Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks).

**9.2.11 Biopsy**

A biopsy refers to the surgical excision of tissue for pathological examination.

If a surgeon bills separate charges for a surgical procedure and a biopsy on the same organ or structure on the same day, the charges are reviewed and reimbursed only for the service with the higher of the allowed amounts.

**9.2.12 Biofeedback Services**

Biofeedback services are a benefit of Texas Medicaid for clients who are 4 years of age and older with the following conditions:

- Urinary incontinence
- Fecal incontinence
- Migraine and tension headache

Biofeedback services may be reimbursed using procedure codes 90901, 90912, and 90913.

Biofeedback services are limited to a maximum of 18 sessions rendered by any provider for the lifetime of each client for each condition.

Biofeedback services that are not a benefit of Texas Medicaid are the following:

- Biofeedback performed in the home setting
- Neurofeedback (such as, but not limited to, electroencephalography [EEG])
- Treatment for muscle tension, except tension headache
- Psychological, psychophysiological, and behavioral health therapy and psychosomatic conditions
- Investigational or experimental biofeedback services and procedures

Procedure codes 90901, 90912, and 90913 are limited to one service per day. The reimbursement for procedure codes 90901, 90912, and 90913 include all modalities of the biofeedback training performed on the same day, regardless of the time increments or the number of modalities performed.

Any device used during a biofeedback session is considered part of the procedure and will not be reimbursed separately.

### 9.2.12.1 Biofeedback Certification

A staff member who is certified by Biofeedback Certification International Alliance (BCIA) must perform biofeedback services.

The certification types accepted by Texas Medicaid are the following:

- General biofeedback certification (BCB)
- Pelvic muscle dysfunction biofeedback certification (BCB-PMD)

Providers must maintain documentation in the client's medical record to support the medical necessity of the biofeedback service provided. Documentation must include the name of the staff person who provided the biofeedback and the prescribing physician must maintain in the office a record of the current certification of the staff member(s) who perform biofeedback. Documentation is subject to retrospective review.

### 9.2.12.2 Prior Authorization for Biofeedback Services

Prior authorization is required for biofeedback services.

- Any combination of procedure codes 90901, 90912, and 90913 are a benefit for biofeedback sessions for urinary or fecal incontinence conditions in clients who are 4 years of age and older.
- Procedure code 90901 is a benefit for biofeedback sessions for migraine or tension headache conditions.

The initial request may include up to 12 visits and not exceed a total duration of 12 weeks. Documentation of the following must be submitted for consideration of prior authorization:

- Conventional treatments that were given but were not successful, including, but not limited to, pharmacotherapy, exercise, rest, and heating and cooling modalities.
- Statements from the prescribing physician that the client is capable of understanding the requirements and agrees actively to participate in the biofeedback sessions.
- Name and certification information for the person performing the training.

In addition, documentation must be submitted to support the specific type of biofeedback requested.

#### Urinary and Fecal Incontinence

- Diagnosis of fecal or urinary stress, urge, overflow, or a mix of stress and urge incontinence in a client who is 4 years of age or older.
- Exclusion by the physician of any underlying medical conditions that could be causing the problem.
- Failed pelvic floor muscle exercise (PME) training for clients who are 21 years of age and older.

**Note:** Failed trial of PME training is defined as no clinically significant improvement in urinary incontinence after completing four weeks of an ordered plan of PME exercises.

#### Migraine and tension headache

- A diagnosis of migraine, tension headache, or mixed migraine and tension headache.
- Symptoms that occur with a duration of at least 4 hours for at least 15 days a month over at least 3 months.
- Failure of first-line approaches, including avoidance of precipitating stimuli and pharmacological prophylaxis.

Prior authorization requests must be submitted by the physician to the Special Medical Prior Authorization (SMPA) Department. The request must be submitted with documentation that supports medical necessity. Providers may submit prior authorization requests online through the TMHP website at [www.tmhp.com](http://www.tmhp.com), by fax to 1-512-514-4213, or by mail to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418

After the client completes the initial biofeedback treatment course, prior authorization may be considered for a total of six follow-up sessions not to exceed three sessions per week and total duration not to exceed eight weeks. Providers must submit prior authorization documentation for the same condition as the original request, and must include each original symptom and how it has objectively improved. Documentation may include, but is not limited to, the following:

- For treatment of urinary incontinence, improvement in continence scores, vitality, health, a decrease in high-grade stress incontinence, nocturnal enuresis, and urine loss with activity. In clients who are 21 years of age and older, evidence of increased pelvic floor contraction strength and the ability to hold the contractions longer and to perform more repetitions.
- For treatment of fecal incontinence, improvement in continence scores, squeeze and anal pressures, squeeze duration, vitality, and health. In clients who are 21 years of age and older, evidence of increased pelvic floor contraction strength and the ability to hold the contractions longer and to perform more repetitions.
- For migraine and tension headaches, diminished intensity, frequency, and duration of the headache activity.

**9.2.13     Blepharoplasty Procedures**

Procedure codes 15820, 15821, 67911, 67961, 67966, 67971, 67973, 67974, and 67975 are not diagnosis-restricted.

Procedure codes 67901, 67902, 67903, 67904, 67906, 67908, and 67909 may be reimbursed for clients who are 20 years of age and younger without prior authorization when performed for one of the following diagnosis codes:

| Diagnosis Codes |      |      |      |  |  |  |  |
|-----------------|------|------|------|--|--|--|--|
| Q100            | Q101 | Q102 | Q103 |  |  |  |  |

Procedure codes 67901, 67902, 67903, 67904, 67906, and 67908 do not require prior authorization for clients who are 21 years of age and older when billed for the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| H0231           | H0232  | H0234  | H0235  | H02411 | H02412 | H02413 | H02421 |
| H02422          | H02423 | H02431 | H02432 | H02433 |        |        |        |

Blepharoplasty for clients who are 21 years of age and older requires mandatory prior authorization. The following information from the physician is required at the time of the request for blepharoplasty for procedure codes 15820, 15821, 67901, 67902, 67903, 67904, 67906, 67908, 67909, 67911:

- A brief history and physical evaluation
- Photographs of the eyelid problem
- Visual field measurements
- Diagnosis code

The following blepharoplasty and eyelid repair procedures do not require prior authorization:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 67916           | 67917 | 67923 | 67924 | 67961 | 67966 | 67971 | 67973 | 67974 | 67975 |

All supporting documentation must be included with the request for authorization. Send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax: 1-512-514-4213

Retroactive authorization may be granted on an appeal basis when submitted with the appropriate documentation.

**9.2.14 Bone Growth Stimulation**

Professional services for bone growth stimulation (procedure codes 20974, 20975, and 20979) are a benefit of Texas Medicaid.

Prior authorization is required for a bone growth stimulator device (procedure codes E0747, E0748, E0749, and E0760).

**Referto:** Subsection 2.2.8, “Bone Growth Stimulators” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for prior authorization criteria.

**9.2.14.1 Invasive Bone Growth Stimulation**

Invasive bone growth stimulation (procedure code 20975) is indicated for the following conditions:

- Nonunion of long bone fractures (i.e., clavicle, humerus, radius, ulna, femur, tibia, fibula, and metacarpal, metatarsal, carpal, and tarsal bones). Nonunion of long bone fractures is considered to exist only when serial radiographs have confirmed that fracture healing has ceased for three or more months prior to starting treatment with the bone growth stimulator. Serial radiographs must include a minimum of 2 sets of radiographs separated by a minimum of 90 days. Each set of radiographs must include multiple views of the fracture site.
- Failed fusion of a joint other than the spine when a minimum of three months has elapsed since the joint fusion was performed.
- Congenital pseudoarthrosis.
- An adjunct to spinal fusion surgery for patients at high-risk for pseudoarthrosis due to previously failed spinal fusion at the same site.
- An adjunct to multiple-level fusion, which involves three or more vertebrae (e.g., L3-L5, L4-S1, etc.).

**9.2.14.2 Non-invasive Bone Growth Stimulation**

Non-invasive bone growth stimulation (procedure code 20974) is indicated for the following conditions:

- Nonunions, failed fusions, and congenital pseudarthrosis where there is no evidence of progression of healing for three or more months despite appropriate fracture care.
- Delayed unions of fractures of failed arthrodesis at high-risk sites (e.g., open or segmental tibial fractures, carpal navicular fractures).

Documentation must also indicate all of the following:

- Serial radiographs have confirmed that no progressive signs of healing have occurred.

- The fractured gap is 1 cm or less.
- The individual can be adequately immobilized and is likely to comply with non-weight-bearing restrictions.

Non-invasive bone growth stimulation for spinal application is indicated for the following conditions:

- One or more failed fusions.
- Grade II or worse spondylolisthesis.
- A multiple-level fusion with extensive bone grafting is required.
- Other risk factors for fusion failure are present, including gross obesity, degenerative osteoarthritis, severe spondylolisthesis, current smoking, previous fusion surgery, previous disc surgery, or gross instability.

#### **9.2.14.3      Ultrasound Bone Growth Stimulation**

Ultrasound bone growth stimulation (procedure code 20979) is indicated for nonunion of a fracture, other than the skull or vertebrae, in a skeletally mature person, which is documented by a minimum of two sets of radiographs that were:

- Obtained prior to starting treatment with the osteogenesis stimulator.
- Separated by a minimum of 90 days.
- Taken with multiple views of the fracture site.
- Accompanied by a written interpretation by a physician who states that there has been no clinically significant evidence of fracture healing between the two set of radiographs.

Documentation must also indicate evidence of all of the following:

- The fracture is not tumor related.
- The fracture is not fresh (less than 7 days), closed or grade I open, tibial diaphyseal fractures, or closed fractures of the distal radius (Colles fracture).

#### **9.2.14.4      Reimbursement**

Professional claims that are submitted for bone growth stimulation (procedure codes 20974, 20975, and 20979) may be reimbursed if the claim includes documentation of one of the following:

- Documentation of medical necessity as outlined for each type of bone growth stimulation.
- The corresponding bone growth stimulator device was submitted within 95 days of the date the bone growth stimulation procedure was performed.

The appropriate evaluation and management (E/M) procedure code must be billed for monitoring the effectiveness of bone growth stimulation treatment.

Procedure codes 20974, 20975, and 20979 are limited to one per six months. During the six-month limitation period, a subsequent fracture that meets the criteria for a bone growth stimulator may be reimbursed after the submission of an appeal with documentation of medical necessity that demonstrates the criteria have been met.

### **9.2.15      Cancer Screening and Testing**

#### **9.2.15.1      BRCA Testing**

**Referto:** Subsection 3.3 \*, “Breast Cancer Gene 1 and 2 (BRCA) Testing” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### 9.2.15.1.1 Colorectal Cancer Screening

Colorectal cancer screening is a benefit of Texas Medicaid. Fecal occult blood tests, multi-targeted stool DNA (mt-sDNA) tests, screening colonoscopies, and sigmoidoscopies are evidenced based methods of colorectal cancer screening. Screening refers to the testing of asymptomatic persons to assess their risk for the development of colorectal cancer. Screening has been shown to decrease mortality due to this cancer by detecting cancers at earlier stages and allowing the removal of adenomas, thus preventing the subsequent development of cancer.

The American Cancer Society (ACS) recommends screening people at average risk for colorectal cancer beginning at 45 years of age by any of the following methods:

- A fecal occult blood test (FOBT)\* or fecal immunochemical test (FIT) every year, or
- A multi-targeted stool DNA test (mt-sDNA) every three years, or
- Flexible sigmoidoscopy every five years, or
- A Flexible sigmoidoscopy every ten years, in addition to annual FIT screening, or
- Colonoscopy every ten years

**Note:** For FOBT, the take-home multiple sample method with three samples should be used.

The U.S. Preventative Services Task Force (USPSTF) guidelines indicate that the net benefit of colorectal cancer screening in adults who are 76 years of age and older who have been previously screened is small. The risks should be considered on an individual basis, as screening in this age group is most appropriate for those healthy enough to undergo treatment.

The ACS and USPSTF recommends screening for people at high-risk for colorectal cancer once every two years.

Indications/characteristics of a high-risk individual may include one or more of the following:

- A close relative (sibling, parent or child) has had colorectal cancer or an adenomatous polyp.
- There is a family history of familial adenomatous polyposis.
- There is a family history of hereditary nonpolyposis colorectal cancer.
- There is a personal history of adenomatous polyps.
- There is a personal history of colorectal cancer.
- There is a personal history of colonic polyps.
- There is a personal history of inflammatory bowel disease, including Crohn's disease and ulcerative colitis.

**Note:** "Relative" means close blood relatives including first degree male or female relatives (parents, siblings, or children), second-degree relatives (aunts, uncles, grandparents, nieces, nephews), and third-degree relatives (first cousins, great-grandparents) who are on the same side of the family as the clients.

Colorectal screening services are considered for reimbursement when submitted using procedure codes G0328 (with modifier QW), G0104, G0105, and G0121, by associated risk category based on the ACS and USPSTF frequency recommendations. Reimbursement for these procedure codes is considered when medical necessity is documented in the client's record.

#### Fecal Occult Blood Tests

Procedure code G0328 (with modifier QW) and 82270 may be reimbursed once per rolling year for clients who are 45 years of age and older.

#### MT-sDNA Test

Procedure code 81528 is considered for reimbursement once every three years for clients who are 45 years of age and older.

### Sigmoidoscopies

Procedure code G0104 is considered for reimbursement once every five years for clients who are 45 years of age or older when submitted with one of the following diagnosis codes, as recommended by the ACS and USPSTF:

| Diagnosis Codes |        |        |         |         |         |        |        |
|-----------------|--------|--------|---------|---------|---------|--------|--------|
| Z0000           | Z0001  | Z1210  | Z1211   | Z1213   | Z859    | Z86002 | Z86003 |
| Z86004          | Z86006 | Z86007 | Z860100 | Z860102 | Z860109 |        |        |

Diagnosis code Z0000 or Z0001 may be used for screening if no other diagnosis is appropriate for the service rendered, but not more frequently than recommended by the USPSTF.

If a lesion or growth is detected that results in a biopsy or removal of the growth during a screening flexible sigmoidoscopy, the appropriate diagnostic procedure classified as a flexible sigmoidoscopy with biopsy or removal must be reported.

### Colonoscopies: Average Risk

Procedure code G0121 is considered for reimbursement once every ten rolling years for clients who are 45 years of age and older when submitted with diagnosis code Z0000, Z0001, Z1210, Z1211, or Z1213. Diagnosis code Z0000 or Z0001 may be used for screening if no other diagnosis is appropriate for the service rendered, but not more frequently than recommended by the USPSTF.

### Colonoscopies: High-Risk

Procedure code G0105 is considered for reimbursement once every two years for clients who meet the definition of high-risk. Procedure code G0105 must be submitted with one of the following diagnosis codes:

| Diagnosis Codes |         |        |        |        |        |        |        |
|-----------------|---------|--------|--------|--------|--------|--------|--------|
| K5000           | K50011  | K50012 | K50013 | K50014 | K50018 | K5010  | K50111 |
| K50112          | K50113  | K50114 | K50118 | K5080  | K50811 | K50812 | K50813 |
| K50814          | K50818  | K5090  | K50911 | K50912 | K50913 | K50914 | K50918 |
| K50919          | K5120   | K51211 | K51212 | K51213 | K51214 | K51218 | K5130  |
| K51311          | K51312  | K51313 | K51314 | K51318 | K5180  | K51811 | K51812 |
| K51813          | K51814  | K51818 | K5190  | K51911 | K51912 | K51913 | K51914 |
| K51918          | K51919  | K523   | K5281  | K5282  | K52831 | K52832 | K52838 |
| K52839          | K5289   | K529   | Z800   | Z83710 | Z83711 | Z83718 | Z83719 |
| Z8372           | Z85038  | Z85048 | Z859   | Z86002 | Z86003 | Z86004 | Z86006 |
| Z86007          | Z860101 |        |        |        |        |        |        |

#### 9.2.15.1.2 Prior Authorization for Colorectal Cancer Screening

Prior authorization is not required for colorectal screening.

#### 9.2.15.1.3 Exclusions

Barium enemas for colorectal cancer screening are not a benefit of Texas Medicaid.

9.2.15.2 Genetic Testing for Colorectal Cancer

Genetic testing for colorectal cancer may be considered for reimbursement to independent laboratories with prior authorization.

Genetic testing may be provided to clients who have a known predisposition (i.e., having a first- or second-degree relative) for colorectal cancer. Results of the testing may indicate whether the client has an increased risk of developing colorectal cancer. A first-degree relative is defined as a sibling, parent, or offspring. A second-degree relative is defined as an uncle, aunt, grandparent, nephew, niece, or half-sibling.

Genetic test results, when informative, may influence clinical management decisions. Documentation in the medical record must reflect that the client or family members have been given information on the nature, inheritance, and implications of genetic disorders to help them make informed medical and personal decisions before the genetic testing.

Genetic testing for colorectal cancer may be considered for reimbursement with the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 81201           | 81202 | 81203 | 81210 | 81233 | 81237 | 81275 | 81288 | 81292 | 81293 |
| 81294           | 81295 | 81296 | 81297 | 81298 | 81299 | 81300 | 81301 | 81317 | 81318 |
| 81319           | 81327 |       |       |       |       |       |       |       |       |

Diagnosis code Z800 is acceptable as a diagnosis for the procedure codes in the table above. Prior authorization is still required and must be obtained for these services. Interpretation of gene mutation analysis results is not reimbursed separately. Interpretation is part of the physician E/M service.

The genetic testing for colorectal testing procedure codes in the table above are limited to once per lifetime for any procedure code by any provider. Testing is limited to once per lifetime for any procedure code by any provider, regardless of whether additional services are authorized.

Providers must maintain the following documentation in the client’s medical record for genetic testing for colorectal cancer:

- Documentation of formal pre-test counseling, including assessment of the client’s ability to understand the risks and limitations of the test.
- The client’s informed choice to proceed with the genetic testing for colorectal cancer.

The provider must order the most appropriate test based on familial medical history and the availability of previous family testing results.

The medical record is subject to retrospective review.

9.2.15.2.1 Testing for Familial Adenomatous Polyposis

Testing for familial adenomatous polyposis (procedure codes 81201, 81202, and 81203) may be offered to clients who have well-defined hereditary cancer syndromes and for whom a positive or negative result will change medical care. Testing for familial adenomatous polyposis may be considered for reimbursement with documentation of at least one of the following:

- The client has more than 20 polyps.
- The client has a first-degree relative with familial adenomatous polyposis and a documented mutation.
- For clients who are 7 years of age and younger, testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client’s medical record.

#### 9.2.15.2.2 Hereditary Nonpolyposis Colorectal Cancer (HNPCC)

Testing for HNPCC (procedure codes 81288, 81292, 81293, 81294, 81295, 81296, 81297, 81298, 81299, 81300, 81301, 81317, 81318, and 81319) is used to determine whether a client has an increased risk of colorectal cancer or other HNPCC-associated cancers, including Lynch Syndrome. Results of the test may influence clinical management decisions. Testing for HNPCC may be considered for reimbursement with documentation of at least one of the following:

- The client has three or more family members, one of whom is a first-degree relative, with colorectal cancer; two successive generations are affected; one or more of the colorectal cancers was diagnosed before the family member was 50 years of age; and familial adenomatous polyposis has been ruled out for the client.
- The client has had two previous HNPCCs.
- The client has colorectal cancer and a first-degree relative who has one of the following:
  - Colorectal cancer or HNPCC extracolonic cancer at 50 years of age and younger
  - Colorectal adenoma at 40 years of age and younger
- The client has had colorectal cancer or endometrial cancer at 50 years of age and younger.
- The client has had right-sided colorectal cancer with an undifferentiated pattern of histology at 50 years of age and younger.
- The client has had signet-cell type colorectal cancer at 50 years of age and younger.
- The client has had a colorectal adenoma at 40 years of age and younger.
- The client is asymptomatic and has a first- or second-degree relative who has a documented HNPCC mutation.
- The client has a family history of malignant neoplasm in the gastrointestinal tract.
- For clients who are 20 years of age and younger, testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client's medical record.

#### 9.2.15.2.3 Prior Authorization for Genetic Testing for Colorectal Cancer

Prior authorization is required for genetic testing for colorectal cancer. A completed Special Medical Authorization Request Form must be signed, dated, and submitted by the ordering provider rendering direct care. Requests from laboratories will not be processed. The provider should then share the authorization number with the laboratory submitting the claim.

A provider's signature, including the prescribing provider's, on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

Medical documentation that is submitted by the physician must verify the client's diagnosis or family history. Requisition forms from the laboratory are not sufficient for verification of the personal and family history.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity. The form may be faxed to 1-512-514-4213 or mailed to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization Department  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418

A request for retroactive authorization must be submitted no later than 7 calendar days after the lab draw is performed. To facilitate a determination of medical necessity and avoid unnecessary denials, the ordering physician rendering care must provide correct and complete information, including the accurate medical necessity of the services requested.

### **9.2.15.3 Mammography (Screening and Diagnostic Studies of the Breast)**

The following breast imaging studies are benefits of Texas Medicaid:

- Screening mammogram
- Diagnostic mammogram
- Diagnostic breast ultrasound

The American Cancer Society recommends that women discuss when to start breast cancer screening mammography with their provider beginning at 40 years of age.

By the age of 45 all women should begin annual breast cancer mammography screening.

By the age of 55 women may transition to screening with mammography every other year, or in some cases may continue annual screenings in consultation with their healthcare provider.

Digital breast tomosynthesis (DBT), also known as three-dimensional (3D) mammography, provides 3D images and is a modification of conventional mammography. Screening DBT is used, along with conventional screening mammography, to detect breast changes in women who have no signs or symptoms of breast cancer.

Diagnostic DBT is used, along with conventional diagnostic mammography, to diagnose breast disease in women or men who have breast symptoms or findings on physical examination or screening mammogram.

A screening mammogram may be billed using procedure code 77067.

Procedure code 77063 must be billed with primary procedure code 77067. Reimbursement may be considered for procedure code 77063 when performed on the same date of service, by any provider, as procedure code 77067.

Procedure codes 77063 and 77067 are limited to one per rolling year, any provider.

A diagnostic mammogram may be billed using procedure code 77065 or 77066.

Procedure code 77065 will be denied if it is submitted for the same date of service as procedure code 77066 by any provider.

Procedure code G0279 must be billed with primary procedure code 77065 or 77066. Reimbursement may be considered for procedure code G0279 when performed on the same date of service, by any provider, as procedure code 77065 or 77066.

Reimbursement may be considered for a screening mammogram (procedure code 77063 or 77067) performed on the same patient on the same date of service as a diagnostic mammogram (procedure code 77065, 77066, or G0279), by submitting the diagnostic mammography with the modifier GG.

A mammogram may be indicated for a male client based on medical necessity due to existing signs and symptoms. In such rare circumstances, procedure codes 77065, 77066, and G0279 may be considered for reimbursement.

Other breast diagnostic radiology procedures may be medically necessary based on existing signs and symptoms. When indicated, such procedures may be considered for reimbursement using procedure code 76098, 77053, or 77054. Procedure code 77053 will be denied if it is submitted for the same date of service as procedure code 77054 by any provider. Procedure code 76098 may be reimbursed for both male and female clients.

Breast ultrasound may be considered for reimbursement using procedure code 76641 or 76642.

Authorization is not required for these services.

The prescribing physician must maintain documentation of medical necessity in the client’s medical record.

The radiologist or interpreting physician at the testing facility may determine and document that, because of the abnormal result of the diagnostic test performed, additional studies are medically necessary. The radiologist or interpreting physician ordering the additional studies must provide documentation to the prescribing physician.

**9.2.15.4 Prognostic Breast and Gynecological Cancer Studies**

Prognostic breast and gynecological cancer studies are benefits of Texas Medicaid when ordered by a physician for the purpose of determining the best course of treatment for a patient with breast/gynecological cancers.

Prognostic breast and gynecological cancer studies are divided into three categories: Receptor assays, Her-2/neu, and gene expression profiling.

- Receptor Assays (procedure codes 84233 and 84234) - The estrogen receptor assay (ERA) and the progesterone receptor assay (PRA) are tests in which a tissue sample is exposed to radioactively tagged estrogen or progesterone. The presence of these receptors can have prognostic significance in breast and endometrial cancer.
- Her-2/neu (procedure codes 83950, 88237, 88239, 88271, 88274, 88291, 88341, 88342, 88344, 88360, 88361, 88364, 88365, 88366, 88367, 88368, 88369, 88373, 88374, and 88377) - Human epidermal growth factor receptor 2 (Her-2/neu) is responsible for the production of a protein that signals cell growth. The overexpression of Her-2/neu in breast cancer is associated with decreased overall survival and response to some therapies. Each procedure used in the analysis should be coded separately.
- Gene expression profiling (procedure code 81519 and 81520) - Gene expression profiling analyzes the expression of a panel of genes to predict the likelihood of breast cancer recurrence in clients with newly diagnosed early stage invasive breast cancer.

Reimbursement for procedure codes 88360 and 88361 is limited to claims with a diagnosis of breast or uterine cancer as listed in the following table:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| C50011          | C50012 | C50021 | C50022 | C50111 | C50112 | C50121 | C50122 |
| C50211          | C50212 | C50221 | C50222 | C50311 | C50312 | C50321 | C50322 |
| C50411          | C50412 | C50421 | C50422 | C50511 | C50512 | C50521 | C50522 |
| C50611          | C50612 | C50621 | C50622 | C50811 | C50812 | C50821 | C50822 |
| C50921          | C50922 | C540   | C541   | C542   | C543   | C548   | C792   |
| C7981           | D0501  | D0502  | D0511  | D0512  | D0581  | D0582  |        |

Testing for other diagnoses will be denied.

Interpretation of receptor assays, and Her-2/neu results is not considered separately for reimbursement. Interpretation is part of the physician’s E/M service.

Gene expression profiling (procedure code 81519 and 81520) is a benefit when all of the following criteria are met:

- The test is ordered by an oncologist.

- The client has newly diagnosed breast cancer. (“Newly diagnosed” means that not more than six months have elapsed since the initial diagnosis.)
- There is no evidence of metastatic breast cancer.

Procedure code 81519 is a benefit when all the following additional criteria are met:

- The clinical stage of the breast cancer is I, II, or IIIa, and the cancer has not spread to more than three lymph nodes.
- The primary tumor is estrogen receptor positive and Her-2/neu receptor negative, or the primary tumor is Her-2/neu receptor positive and less than 1 cm in diameter.
- The client is a candidate for adjuvant chemotherapy.
- The outcome of the test will guide decision-making regarding adjuvant chemotherapy.

Procedure code 81520 is a benefit when all the following additional criteria are met:

- The clinical stage of the breast cancer is I or II, and the cancer has not spread to more than three lymph nodes.
- The primary tumor is hormone receptor positive.
- The client is female and post-menopausal.

Procedure code 81519 may be reimbursed once per lifetime, any procedure, any provider, when submitted with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| C50011          | C50012 | C50021 | C50022 | C50111 | C50112 | C50121 | C50122 |
| C50211          | C50212 | C50221 | C50222 | C50311 | C50312 | C50321 | C50322 |
| C50411          | C50412 | C50421 | C50422 | C50511 | C50512 | C50521 | C50522 |
| C50611          | C50612 | C50621 | C50622 | C50811 | C50812 | C50821 | C50822 |
| C50911          | C50912 | C50921 | C50922 | D0501  | D0502  | D0511  | D0512  |
| D0581           | D0582  | Z170   | Z1721  | Z1731  | Z1732  | Z17410 | Z17411 |

Procedure code 81520 may be reimbursed once per lifetime, any procedure, any provider, when submitted with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| C50011          | C50012 | C50111 | C50112 | C50211 | C50212 | C50311 | C50312 |
| C50411          | C50412 | C50511 | C50512 | C50611 | C50612 | C50811 | C50812 |
| C50911          | C50912 | D0501  | D0502  | D0511  | D0512  | D0581  | D0582  |
| Z170            |        |        |        |        |        |        |        |

Gene expression profiling is limited to once per lifetime, but may be considered for reimbursement more than once per lifetime for the same client on appeal. The provider must submit documentation that demonstrates that the client has a new, second, primary breast cancer diagnosis that meets the criteria described above.

The provider must maintain documentation of medical necessity in the client’s medical record. Retro-spective review may be performed to ensure that the documentation supports the medical necessity of the service.

Gene expression profiling is not covered for repeat testing or testing of multiple tumor sites in the same client.

### 9.2.16 Capsulotomy

A capsulotomy is a benefit when not performed with a joint surgery.

### 9.2.17 Cardiac Rehabilitation

Cardiac rehabilitation is a physician-supervised program that furnishes physician-prescribed exercise, cardiac risk factor modification, psychosocial assessment, and outcomes assessment. Cardiac rehabilitation programs must include all of the following:

- Physician-prescribed exercise for each day on which cardiac rehabilitation items and services are furnished
- Cardiac risk factor modification, including education, counseling, and behavioral intervention, tailored to a client's individual needs
- Psychosocial assessment
- Outcomes assessment
- An individual treatment plan that specifies how components are used for a client and that is reviewed and signed by the prescribing physician every 30 days

Cardiac rehabilitation procedure codes 93797 and 93798 are benefits of Texas Medicaid.

The appropriate procedure code must be billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |       |       |       |        |
|-----------------|--------|--------|--------|-------|-------|-------|--------|
| I110            | I160   | I161   | I169   | I201  | I202  | I2081 | I2089  |
| I209            | I2101  | I2102  | I2109  | I2111 | I2119 | I2121 | I2129  |
| I213            | I214   | I219   | I21A1  | I21A9 | I21B  | I220  | I221   |
| I222            | I228   | I229   | I2720  | I2721 | I2722 | I2723 | I2724  |
| I2729           | I2783  | I501   | I5020  | I5021 | I5022 | I5023 | I5030  |
| I5031           | I5032  | I5033  | I5040  | I5041 | I5042 | I5043 | I50810 |
| I50811          | I50812 | I50813 | I50814 | I5082 | I5083 | I5084 | I5089  |
| I509            | I5A    | Z941   | Z943   | Z951  | Z952  | Z953  | Z954   |
| Z955            | Z9861  | Z98890 |        |       |       |       |        |

Coverage of cardiac rehabilitation programs is considered reasonable and necessary only for clients for whom there is documentation of any of the following conditions within the 12 months immediately preceding the beginning of the program:

- Acute myocardial infarction
- Coronary artery bypass surgery (CABG)
- Percutaneous transluminal coronary angioplasty or coronary stenting
- Heart valve repair or replacement
- Major pulmonary surgery
- Sustained ventricular tachycardia or fibrillation
- Class III or class IV congestive heart failure
- Chronic stable angina

**Note:** A cardiac rehabilitation program in which the cardiac monitoring is done using telephonically transmitted electrocardiograms (ECGs) to a remote site is not a benefit of Texas Medicaid.

Cardiac rehabilitation must be provided in a facility that has the necessary cardiopulmonary, emergency, diagnostic, and therapeutic life-saving equipment (e.g., oxygen, cardiopulmonary resuscitation equipment, or defibrillator) available for immediate use.

Cardiac rehabilitation is limited to 2 one-hour sessions per day for 18 weeks per rolling year and can not exceed 36 sessions.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions if the client has another documented cardiac event or if the prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. To confirm that a continuation of cardiac rehabilitation is at the request of or is coordinated with the prescribing physician, the medical record must include evidence of communication between the cardiac rehabilitation staff and the prescribing physician. If the physician responsible for such follow-up is the medical director, then the physician's notes must be evident in each client's chart.

Additional cardiac rehabilitation sessions must be prior authorized and must not exceed a total of 36 sessions for 52 weeks from the date of authorization of additional sessions.

If no clinically-significant arrhythmia is documented during the first three weeks of the program, the physician may give the order for the client to complete the remaining portion of the cardiac rehabilitation without telemetry monitoring.

Although cardiac rehabilitation may be considered a form of physical therapy, it is a specialized program that is conducted by personnel who are not physicians but are trained in both basic and advanced cardiac life support techniques and exercise therapy for coronary disease and who provide the services under the direct supervision of a physician.

Direct supervision of a physician means that a physician must be immediately available and accessible for medical consultations and emergencies at all times when items and services are being furnished under cardiac rehabilitation programs.

#### **9.2.17.1 Prior Authorization for Cardiac Rehabilitation**

Prior authorization is not required for the initial 36 sessions of cardiac rehabilitation.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions in the following circumstances:

- The medical record must support the client has had another cardiac event; or
- The prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. Documentation must include the following:
  - Progress made from the beginning of cardiac rehabilitation period to the current service request date, including progress towards previous goals.
  - Information that supports the client's capability of continued measurable progress.
  - A proposed treatment plan for the requested extension dates with specific goals related to the client's individual needs.

Requests for prior authorization for additional sessions that exceed a total of 36 sessions in 52 weeks will not be granted. Prior authorization must be obtained through the TMHP Special Medical Prior Authorization (SMPA) Department.

#### **9.2.17.2 Reimbursement**

The evaluation provided by the cardiac rehabilitation team at the beginning of each cardiac rehabilitation session is not considered a separate service and will be included in the reimbursement for the cardiac rehabilitation session. Evaluation and management (E/M) services unrelated to cardiac rehabilitation may be billed with modifier 25 appended to the E/M code when a separately identifiable E/M

service was provided on the same day by the provider that rendered cardiac rehabilitation. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Physical and occupational therapy will not be reimbursed when furnished in addition to cardiac rehabilitation exercise program services unless there is also a diagnosis of a non-cardiac condition that requires such therapy, e.g., a client who is recuperating from an acute phase of heart disease and may have had a stroke that requires physical and/or occupational therapy.

Client education services, such as formal lectures and counseling on diet, nutrition, and sexual activity, that help a client adjust living habits because of the cardiac condition; will not be separately reimbursed when the services are provided as part of the cardiac rehabilitation program.

### 9.2.18 Casting, Splinting, and Strapping

Casting, splinting, and strapping are subject to global surgery fee guidelines. The following procedure codes for casting, splinting, and strapping are a benefit of Texas Medicaid:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 29000           | 29010 | 29015 | 29035 | 29040 | 29044 | 29046 | 29049 | 29055 | 29058 |
| 29065           | 29075 | 29085 | 29086 | 29105 | 29125 | 29126 | 29130 | 29131 | 29200 |
| 29240           | 29260 | 29280 | 29305 | 29325 | 29345 | 29355 | 29358 | 29365 | 29405 |
| 29425           | 29435 | 29440 | 29445 | 29450 | 29505 | 29515 | 29520 | 29530 | 29540 |
| 29550           | 29580 | 29799 |       |       |       |       |       |       |       |

The following procedure codes for cast removal, windowing, wedging, or repair may be reimbursed to a provider other than the provider who applied the initial cast, splint, or strap:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 29700           | 29705 | 29710 | 29720 | 29730 | 29740 | 29750 | 29799 |  |  |

Authorization is not required for casting, splinting, or strapping services.

### 9.2.19 Cardiopulmonary Resuscitation (CPR)

CPR (procedure code 92950) is a benefit of Texas Medicaid and may be reimbursed when medical necessity is documented in the client's medical record. Only the primary provider performing CPR may be reimbursed for procedure code 92950. CPR billed as an ambulance service by an ambulance provider will be denied.

CPR may be billed with the same date of service as critical care when reported as a separately identifiable procedure. The time spent performing CPR must not be included in the time reported as critical care.

### 9.2.20 Circumcisions

Texas Medicaid may provide reimbursement for circumcisions billed with procedure code 54150 or procedure code 54161. Circumcisions performed on clients who are 1 year of age and older must be documented with medical necessity.

**Referto:** Subsection 9.2.47.1, "Circumcisions for Newborns" in this handbook for additional benefit information.

### 9.2.21 Closure of Wounds

The repair of wounds is defined as simple, intermediate, or complex. Simple repair involves the dermis and subcutaneous tissue and requires a one-layer closure. Intermediate repair requires some layered closure of deeper layers of subcutaneous tissue and superficial fascia. Complex repair involves more layered closure, debridement, extensive undermining, stints, or retention sutures.

Wound closures may use sutures, staples, or tissue adhesives. Wounds closed with adhesive strips must not be reported using wound closure procedure codes. When adhesive strips are the only wound closure material used, providers must report the most appropriate E/M visit procedure code on their claim.

Simple exploration of nerves, blood vessels, or tendons exposed in an open wound is considered inclusive to the wound closure and will not be reimbursed separately.

The lengths of multiple closures of wounds must be added together and billed as one procedure code if they meet at least one of the following criteria:

- The closures have the same CPT classification (see “Repair [Closure]” in the CPT manual).
- The closures are in anatomic sites that are grouped together in the same procedure code descriptor.

Providers must submit the procedure code that represents the total length of the repairs. Lengths of repairs from different CPT classifications or groupings of anatomic sites must be billed as separate procedure codes.

Wound closures must be billed using the following procedure codes:

| Procedure Codes     |       |       |       |       |       |       |       |       |       |
|---------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Repair Simple       |       |       |       |       |       |       |       |       |       |
| 12001               | 12002 | 12004 | 12005 | 12006 | 12007 | 12011 | 12013 | 12014 | 12015 |
| 12016               | 12017 | 12018 | 12020 | 12021 |       |       |       |       |       |
| Repair Intermediate |       |       |       |       |       |       |       |       |       |
| 12031               | 12032 | 12034 | 12035 | 12036 | 12037 | 12041 | 12042 | 12044 | 12045 |
| 12046               | 12047 | 12051 | 12052 | 12053 | 12054 | 12055 | 12056 | 12057 |       |
| Repair Complex      |       |       |       |       |       |       |       |       |       |
| 13100               | 13101 | 13102 | 13120 | 13121 | 13122 | 13131 | 13132 | 13133 | 13151 |
| 13152               | 13153 | 13160 |       |       |       |       |       |       |       |

Multiple wounds on the same day will be paid the full allowed amount for the major (largest total length of the repair at the same anatomic site) wound and one-half the allowed amount for each additional laceration (total length of the repair at the same anatomic site).

No separate payment will be made for incision closures billed in addition to a surgical procedure when the closure is part of that surgical procedure.

No separate payment will be made for supplies in the office.

When the debridement is carried out separately without immediate primary closure, when gross contamination requires prolonged cleansing, or when large amounts of devitalized or contaminated tissue are removed, debridement may be reimbursed separately. Debridement rendered during the same surgical session as wound closure is considered inclusive to the closure and is not reimbursed separately.

**Referto:** Subsection 9.2.74.11, “Supplies, Trays, and Drugs” in this handbook for the hospital-based emergency department.

Wound suture and wound closure are considered part of any surgical procedure performed on the same area, except for excision of benign or malignant lesion procedure codes that require more than simple closure. Providers may be reimbursed for the appropriate intermediate or complex closure procedure code. Multiple surgery guidelines apply.

The exceptions listed above apply to the following excision and closure procedure codes:

| Excision of Benign Lesion Procedure Code |       |       |       |       |       |       |       |       |       |
|------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 11400                                    | 11401 | 11402 | 11403 | 11404 | 11406 | 11420 | 11421 | 11422 | 11423 |
| 11424                                    | 11426 | 11440 | 11441 | 11442 | 11443 | 11444 | 11446 |       |       |

| Excision of Malignant Lesion Procedure Codes |       |       |       |       |       |       |       |       |       |
|----------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 11600                                        | 11601 | 11602 | 11603 | 11604 | 11606 | 11620 | 11621 | 11622 | 11623 |
| 11624                                        | 11626 | 11640 | 11641 | 11642 | 11643 | 11644 | 11646 |       |       |

| Intermediate Closure Procedure Codes |       |       |       |       |       |       |       |       |       |
|--------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 12031                                | 12032 | 12034 | 12035 | 12036 | 12037 | 12041 | 12042 | 12044 | 12045 |
| 12046                                | 12047 | 12051 | 12052 | 12053 | 12054 | 12055 | 12056 | 12057 |       |

| Complex Closure Procedure Codes |       |       |       |       |       |       |       |       |       |
|---------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 13100                           | 13101 | 13102 | 13120 | 13121 | 13122 | 13131 | 13132 | 13133 | 13151 |
| 13152                           | 13153 | 13160 |       |       |       |       |       |       |       |

### 9.2.22 Cochlear Implants

Cochlear implants, when medically indicated, are benefits of Texas Medicaid with prior authorization. A cochlear implant device (procedure code 69930) is an electronic instrument, part of which is implanted surgically to stimulate auditory nerve fibers, and part of which is worn externally to capture and amplify sound. These devices are available in single and multichannel models. Cochlear implants are used to provide awareness and identification of sound and to facilitate communication for persons who are profoundly hearing impaired.

**Referto:** Subsection 3.2.1, “Cochlear Implants” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* for additional information on benefit and authorization requirements for cochlear implants.

### 9.2.23 Colon Capsule Endoscopy

Colon capsule endoscopy (procedure code 91113) is a benefit of Texas Medicaid and limited to the following diagnosis codes:

| Diagnosis Codes |      |      |      |       |      |
|-----------------|------|------|------|-------|------|
| K635            | K921 | K922 | R195 | Z5309 | Z538 |

### 9.2.24 Continuous Glucose Monitoring (CGM)

CGM (procedure codes 95250 and 95251) is a benefit of Texas Medicaid with prior authorization.

Procedure codes 95250 and 95251 are limited to once per 12 calendar months by any provider.

The rental or purchase of a continuous glucose monitoring system (CGMS) is considered part of the CGM and is not reimbursed separately.

### **9.2.24.1 Prior Authorization for Continuous Glucose Monitoring**

CGM requires prior authorization and must be prescribed by the client's treating practitioner performing the glucose monitoring.

Prior authorization will be considered for clients who have diabetes mellitus. The client must be compliant with his or her current medical regimen, use daily insulin administrations, or be on an insulin pump, and have documented daily self-blood glucose monitoring. For all diabetic clients who are not using insulin, at least one or more of the following conditions must be present:

- Frequent unexplained hypoglycemic episodes
- Unexplained large fluctuations in daily, preprandial blood glucose
- Episodes of ketoacidosis or hospitalization for uncontrolled glucose

Additional CGM services may be considered with documentation of medical necessity that indicates the client meets the criteria above and has a change in condition that would warrant a second procedure within 12 calendar months.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the requested services. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the use of CGM.

### **9.2.25 Developmental Screening and Testing and Aphasia Assessment**

The following types of developmental screening and testing and aphasia assessment are benefits of Texas Medicaid when medically necessary:

- Developmental screening when performed outside of a Texas Health Steps (THSteps) medical checkup (procedure code 96110)
- Developmental testing (procedure codes 96112 and 96113 [add-on procedure code must be submitted with primary procedure code 96112])
- Assessment of aphasia (procedure code 96105)

Re-evaluations are a benefit of Texas Medicaid only to address a clinical need, to provide the documentation needed to measure a client's status over time, and to direct the plan of care.

Procedure codes 96105, 96110, 96112, and 96113 are used to report medically necessary aphasia assessment, developmental screening, and testing.

Prior authorization is not required for developmental screening, developmental testing, and aphasia assessment.

#### **9.2.25.1 Developmental Screening**

Developmental screening requiring the use of a standardized, validated screening tool (procedure code 96110) is a benefit of Texas Medicaid for clients who are birth through 6 years of age.

Developmental screening is limited to once per rolling year, any provider, outside of a THSteps medical checkup when medically necessary. This screening should only be completed for a diagnosis of suspected developmental delay or to evaluate a change in the client's developmental status outside of a THSteps medical checkup.

Developmental screening should be used to identify clients who are birth through 6 years of age and who may need a more comprehensive evaluation. Results of developmental screening may guide or identify the need for further testing. Clients with abnormal screening results must be referred to an appropriate provider for further testing. Clients who are birth through 35 months of age who have suspected developmental delay must be referred to Texas Early Childhood Intervention (ECI) within 7 days after the child has been identified.

**Referto:** Subsection 2.9, “Early Childhood Intervention (ECI) Services” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information on the Texas ECI program.

Subsection 4.3.12.1.2, “Developmental Surveillance or Screening” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information on developmental screening for THSteps checkups.

**9.2.25.2      Developmental Testing**

Developmental testing (procedure codes 96112 and 96113) is a benefit of Texas Medicaid for clients who are birth through 20 years of age.

Developmental testing consists of an extended evaluation and requires the use of a standardized norm-referenced tool. Developmental testing is medically necessary when there is suspected developmental delay supported by clinical evidence. Developmental testing is only medically indicated when clinical evidence suggests the following:

- Suspected developmental delay or atypical development when the diagnosis cannot be clearly identified through clinical interview or standardized screening tool alone.
- Retesting of a client to evaluate a change in developmental status that results in a change of treatment plan.

Procedure codes 96112 and 96113 are limited to two services per rolling year, any provider.

Developmental testing performed when a development delay or a change in the client’s developmental status is not suspected is not a benefit of Texas Medicaid.

Developmental testing is not a benefit when completed for the purposes of entering day care, Head Start, or a school setting.

Providers cannot bill the client for developmental testing that better fits the description of developmental screening.

The physician must maintain documentation of medical necessity in the client’s medical record. Retro-spective review may be performed to ensure that the documentation supports the medical necessity of the service. The following information is required at least every six months to establish medical necessity:

- The physician’s prescription that includes a description of the specific service being prescribed
- The treatment plan that includes a copy of the current evaluation and documented age of the child at the time of the evaluation

**9.2.25.3      Assessment of Aphasia**

Aphasia assessment (procedure code 96105) is a benefit of Texas Medicaid when medically necessary and is limited to the following diagnosis codes:

| Diagnosis codes |       |      |       |       |
|-----------------|-------|------|-------|-------|
| R4701           | R4702 | R471 | R4781 | R4789 |

Procedure code 96105 is limited to two services per rolling year, any provider.

**9.2.25.4      12-Hour Limitation for Procedure Codes 96110, 96112, and 96113**

APRNs, PAs, and psychologists are limited to a maximum, combined total of 12 hours per day for developmental screening and testing, and inpatient and outpatient mental health services.

Because physicians (M.D. and D.O.) can delegate and may submit claims for services in excess of 12 hours per day, they are not subject to the 12-hour system limitation.

Developmental screening and testing are included in the 12-hour per day, per provider, system limitation. The following table lists the procedure codes that are included in the 12-hour per day system limitation, along with the time increments the system will apply based on the billed procedure code. The time increments applied will be used to calculate the 12-hour per day system limitation.

| Procedure Code | Time Applied by System |
|----------------|------------------------|
| 96110          | 30 Minutes             |
| 96112          | 60 Minutes             |
| 96113          | 30 minutes             |

**Referto:** Subsection 4.5, “Twelve Hour System Limitation” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for more information about procedure codes included in the 12-hour system limitation.

All providers, including physicians and all providers to whom they delegate services, are subject to retrospective review. HHSC and TMHP routinely perform retrospective reviews of all providers. All providers are subject to retrospective review for the total hours of services performed and billed in excess of 12 hours per day. Retrospective review may include:

- All E/M procedure codes, including those listed in the Evaluation and Management Section of the *CPT Manual*, billed with a diagnosis listed in the diagnosis table above under Neurobehavioral Testing
- All developmental screening and testing procedure codes included in the 12-hour system limitation

**Note:** *Developmental screening and testing procedure codes and mental health procedure codes are included in the review. If a provider provides developmental and neurological assessment and testing at more than one location, any of these services may be retrospectively reviewed.*

## 9.2.26 Diagnostic Tests

### 9.2.26.1 Blood Pressure Monitoring

Blood pressure monitoring by either self-measured blood pressure monitoring or ambulatory blood pressure monitoring is a benefit of Texas Medicaid when used as a diagnostic tool to assist a physician in diagnosing hypertension in individuals whose blood pressure is either elevated, or inconclusive when evaluated in the office alone.

Self-measured blood pressure monitoring and ambulatory blood pressure monitoring may also be used for the following:

- Clients who are under treatment for established hypertension
- Evaluating refractory or treatment-resistant blood pressure
- Evaluating symptoms such as light-headedness corresponding with blood pressure changes
- Evaluating nighttime blood pressure
- Examining diurnal patterns of blood pressure

Self-measured blood pressure monitoring and ambulatory blood pressure monitoring are indicated for the evaluation of one of the following conditions:

- White coat hypertension, which is defined as the following:
  - Blood pressure measurements taken in the clinic or office are greater than 140/90 mm Hg on at least three separate visits, with two separate measurements made at each visit.
  - At least two separately documented blood pressure measurements taken outside of the clinic or office that are less than 140/90 mm Hg.

- There is no evidence of end-organ damage.
- Resistant hypertension
- Hypotensive symptoms as a response to hypertension medications
- Nocturnal angina
- Episodic hypertension
- Syncope

Self-measured blood pressure monitoring and ambulatory blood pressure monitoring are indicated for initial diagnosis of hypertension and should not be used for maintenance monitoring.

Self-measured blood pressure monitoring may also be indicated for re-evaluation of clients previously diagnosed with hypertension.

Providers must document that the self-measured blood pressure monitoring was performed for at least 24 hours.

Procedure code 99473 is limited to one service per year, any provider. Procedure code 99473 may be considered for reimbursement more than once per year when the following documentation of medical necessity is submitted with the claim:

- Documentation of erroneous blood pressure readings-excessively high or low blood pressure, blood pressure readings excessively inconsistent with those measured professionally
- Documentation of erroneous blood pressure logs-day of the week, time of day, setting or location, or timing of medication administration inconsistent with prior professional instruction
- Documentation of poor health literacy, developmental, or intellectual challenges that may require repeated client education
- Client purchase or receipt of new blood pressure device

Procedure code 99474 is limited to four services per year, any provider, and may be reimbursed only if a claim for procedure code 99473 has been submitted within 12 rolling months.

Only one method of blood pressure monitoring (self-measured or ambulatory) may be reimbursed within a rolling 12-month period. Self-measured blood pressure monitoring submitted within the same rolling 12-month period as ambulatory blood pressure monitoring will be denied.

Use procedure codes 93784, 93786, 93788, and/or 93790 to bill in 24-hour increments for ambulatory blood pressure monitoring. Ambulatory blood pressure monitoring is limited to two services per lifetime, any provider. Ambulatory blood pressure monitoring performed more than twice per lifetime may be considered when documentation of medical necessity is submitted with the claim.

**9.2.26.2      Ambulatory and Long-Term Electroencephalogram (Ambulatory EEG)**

Ambulatory EEG monitoring is a covered benefit for clients in whom a seizure diathesis is suspected but not defined by history, physical, and resting EEG.

The EEG technical component procedure codes are limited to 3 studies for each physician for the same client per 6 months when medically necessary.

The following procedure codes should be submitted when billing for the EEG technical component:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 95705           | 95706 | 95707 | 95708 | 95709 | 95710 | 95711 | 95712 | 95713 | 95714 |
| 95715           | 95716 |       |       |       |       |       |       |       |       |

Procedure code 95700 will be limited to three units per six months for each physician for the same client.

Professional component procedure codes are limited to three studies per six months for each physician for the same client, when medically necessary.

Technical component procedure codes are limited to three studies per six months for each physician for the same client, when medically necessary.

Note: A study includes one unit of procedure code 95700 (set-up, education, and takedown) and any appropriate combination of the corresponding technical and professional procedure codes.

The following procedure codes should be submitted when billing for the EEG professional component:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 95717           | 95718 | 95719 | 95720 | 95721 | 95722 | 95723 | 95724 | 95725 | 95726 |

The procedure codes in the tables above may be reimbursed when they are submitted with the following diagnosis codes:

| Diagnosis Codes |         |         |        |        |         |         |         |
|-----------------|---------|---------|--------|--------|---------|---------|---------|

| S060XAA         | S060XAD | S060XAS | Z052   |        |         |         |         |

Other diagnosis codes may be considered on appeal with supporting medical documentation to the TMHP Medical Director.

### 9.2.26.3 Bone Marrow Aspiration, Biopsy

Physicians may bill procedure code 85097 if interpretation is for smear interpretation, or procedure code 88305 if interpretation is for preparation and interpretation of cell block. If both procedure codes 85097 and 88305 are billed, procedure code 88305 is paid and procedure code 85097 is denied.

Physicians may bill procedure code 85097 or 88305 for preparation and interpretation of the specimen.

### 9.2.26.4 Cytopathology Studies—Other Than Gynecological

Procurement and handling of the specimen for cytopathology of sites other than vaginal, cervical, or uterine is considered part of the client's E/M and will not be reimbursed separately.

Procedure codes 88160, 88161, and 88162 are reimbursed according to the POS where the cytopathology smear is interpreted.

Procedure code 88177 is limited to three services per day by the same provider.

**9.2.26.5 Echoencephalography**

Echoencephalography (procedure code 76506) is medically indicated for the following conditions or diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|

### 9.2.26.6 Electrocardiogram (ECG)

Electrocardiograms (ECG) are a benefit of Texas Medicaid when used for the evaluation and management (E/M) of a confirmed or suspected primary disease of the heart, pericardium, and coronary arteries or when necessary for management of diseases that are not primarily cardiac, but can affect the heart directly or indirectly.

ECGs are limited to six treatments for each client, by any provider per benefit period.

For ECGs, a benefit period is defined as 12 consecutive months, beginning with the month the client receives the first ECG.

The following procedure codes may be reimbursed for ECGs: 93000, 93005, 93010, 93040, 93041, and 93042.

Claims that are denied for exceeding the six-ECG limitation may be appealed with documentation supporting medical necessity. The documentation must include the following:

- Diagnosis
- Treatment history
- Documentation of why additional ECGs are needed

The report of the professional component (the interpretation) for the ECG must be a complete written report that includes relevant findings and appropriate comparisons.

The interpretation may appear on the actual tracing.

When the ECG is performed in conjunction with the performance of an evaluation and management (E/M) service, the interpretation may appear with a progress note or other report of the E/M service; however, if the ECG is billed as a separate service from the E/M service, the interpretation should contain the same information as a report made upon the tracing itself.

A simple notation of “ECG/EKG normal” without an accompanying tracing will not suffice as documentation of a separately payable interpretation.

Appropriate documentation, which includes a copy of the ECG tracing, must be kept in the client’s medical record. Documentation must support the medical necessity of the ECG. Documentation may appear on the actual tracing or with a progress note or report. Documentation is subject to retrospective review.

Only an ECG interpretation that directly contributes to the diagnosis and treatment of a client may be considered for reimbursement. Services, such as routine admission ECGs performed without medical indications, that do not directly contribute to the diagnosis and treatment of an individual client are not considered medically necessary.

#### 9.2.26.6.1 Prior Authorization for ECG

Prior authorization is not required for ECGs performed in the emergency room or inpatient hospital setting.

Prior authorization is required for more than six ECGs in a rolling 12-month period.

Requests for additional ECGs must be submitted on the Special Medical Prior Authorization (SMPA) Request Form along with documentation of medical necessity.

Providers may request a prior authorization up to 12 months in advance. When requesting retroactive authorization, a provider must submit the request no later than 14 calendar days after the ECG is completed.

Before submitting a prior authorization request for an ECG, a provider must have a completed SMPA Request Form that has been signed and dated by a physician who is familiar with the client. The completed SMPA Request Form must include the procedure codes and numerical quantities for the services requested. The completed SMPA Request Form with the original dated signature must be maintained by the prescribing physician in the client’s medical record.

The SMPA Request Form must include all of the following information, which is related to medical necessity:

- Procedure requested (CPT)
- Diagnosis
- Treatment history

- Treatment plan

Prior authorization requests submitted by paper, must be faxed or mailed with the completed SMPA Request Form to the SMPA department and a copy of the signed and dated form must be retained in the client's medical record at the provider's place of business. Requests may be faxed or mailed to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### **9.2.26.7 Esophageal pH Probe Monitoring**

Esophageal pH monitoring uses an indwelling pH microelectrode positioned just above the esophageal sphincter. The pH electrode and skin reference electrode are connected to a battery-powered pH meter and transmitter worn as a shoulder harness. The esophageal pH is monitored continuously and a strip chart is used to record the pH determinations. The patient is usually monitored for a 24-hour period. Esophageal pH monitoring is a medically appropriate adjunct procedure to help establish the presence or absence of gastroesophageal reflux.

Esophageal pH probe monitoring should be coded with procedure codes 91034, 91035, and 78262.

Esophageal pH probe testing (procedure codes 78262, 91034, and 91035) are limited to two services per rolling year, same procedure, any provider.

Claims that are denied for exceeding two services per rolling year may be considered on appeal with documentation of one of the following:

- The client is new and the provider has been unsuccessful in obtaining the client's previous records from a different provider.
- The provider is not aware that the client received previous esophageal testing.

Only one appeal will be considered per client, for the same provider. Providers must request prior authorization for any additional esophageal testing performed after the appealed service.

#### **9.2.26.7.1 Prior Authorization**

Esophageal pH probe testing (procedure codes 78262, 91034, and 91035) require prior authorization for services that exceed two per rolling year.

Requests for additional testing may be considered when submitted with documentation of medical necessity that supports, but is not limited to, the following:

- Adult's unintentional weight loss is more than 5 percent of their normal body weight in a span of 12 months or less
- Child's weight loss is 3 to 5 percent of their body mass in less than 30 days
- Symptoms of gastroesophageal reflux disease (GERD) that include heartburn and regurgitation that do not respond to treatment with medication
- Atypical symptoms of GERD, such as chest pain, coughing, wheezing, hoarseness, and sore throat

Prior authorization requests must be submitted to the Special Medical Prior Authorization Department using the Special Medical Prior Authorization (SMPA) Request Form. The completed prior authorization request form must be maintained by the requesting provider and the prescribing physician. The original, signed copy must be kept by the physician in the client's medical record.

**9.2.26.8 Helicobacter Pylori (H. pylori)**

Initial testing for H. pylori may be performed using the following tests:

- Serology testing (procedure codes 83009 and 86677)
- Stool testing (procedure code 87338 with modifier QW)
- Breath testing (procedure codes 78267, 78268, 83013, and 83014)
- Amplified probe technique (procedure code 87513)

Serology testing for H. pylori is a noninvasive diagnostic procedure that is preferred for initial diagnosis but is not indicated after a diagnosis has been made. Serology testing is not indicated or covered for monitoring a response to therapy.

Procedure codes 83009 and 86677 are allowed once per lifetime when submitted by any provider. A second test may be considered on appeal with documentation that indicates the original test result was negative for H. pylori.

Procedure code 87513 is limited to two services per 28 days, any provider.

Urea breath tests (UBTs) and fecal antigen tests provide reliable means of identifying active H. pylori infection before antibiotic therapy. UBTs are the most reliable non-endoscopic test to document eradication of H. pylori infection.

H. pylori is accepted as an etiologic factor in duodenal ulcers, peptic ulcer disease, gastric carcinoma, and primary B cell gastric lymphoma. H. pylori testing may be indicated for symptomatic clients who have a documented history of chronic/recurrent duodenal ulcer, gastric ulcer, or chronic gastritis. The history must delineate the failed conservative treatment for the condition.

H. pylori testing is not indicated or covered for any of the following:

- New onset uncomplicated dyspepsia.
- New onset dyspepsia responsive to conservative treatment (e.g., withdrawal of nonsteroidal anti-inflammatory drugs [NSAID] and/or use of antisecretory agents). If the treatment does not prove successful in eliminating the symptoms, further testing may be indicated to determine the presence of H. pylori.
- Screening for H. pylori in asymptomatic clients.
- Dyspeptic clients requiring endoscopy and biopsy.

H. pylori testing is not indicated under the following circumstances:

- There has been a negative endoscopy in the previous 90 days.
- An endoscopy is planned.
- H. pylori is of new onset and still being treated.

H. pylori testing will be denied if it is performed within 90 days of an upper gastrointestinal endoscopy. Procedure codes 87338 (with modifier QW), 78267, 78268, 83013, and 83014 may be reimbursed within the 90 days if the provider submits documentation that indicates the client was tested for eradication after treatment.

If a follow-up breath or stool test is used to document eradication of H. pylori, the medical record documentation must verify the history of the following previous complication(s):

- The client remains symptomatic after a treatment regimen for H. pylori.
- The client is asymptomatic after H. pylori eradication therapy but has a history of hemorrhage, perforation, or outlet obstruction from peptic ulcer disease.
- The client has a history of ulcer on chronic NSAID or anticoagulant therapy.

Testing for *H. pylori* eradication after the completion of antibiotic therapy (procedure codes 87338 [with modifier QW], 78267, 78268, 83013, and 83014) will be denied if billed less than 35 days after the initial test.

Procedure code 87339 is not a benefit of Texas Medicaid.

### 9.2.26.9 Myocardial Perfusion Imaging

**Referto:** Subsection 4.2.1, “Cardiac Nuclear Imaging” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### 9.2.26.10 Pediatric Pneumogram

A pediatric pneumogram (procedure code 94772) is a 12-hour to 24-hour recording of breathing effort, heart rate, oxygen level, and airflow to the lungs during sleep. The study is useful in identifying abnormal breathing patterns, with or without bradycardia, especially in premature infants.

The following diagnosis codes may be reimbursed for a pediatric pneumogram in infants from birth through 11 months of age:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| K200            | K2080 | K2081 | K2090 | K2091 | K2100 | K2101 | K219  |
| K220            | P0082 | P220  | P228  | P270  | P271  | P278  | P282  |
| P2830           | P2831 | P2832 | P2833 | P2839 | P2840 | P2841 | P2842 |
| P2843           | P2849 | P285  | P2881 | P2889 | P84   | R0600 | R0609 |
| R0681           | R0682 | R0683 | R0689 | R6813 |       |       |       |

A pediatric pneumogram is limited to two services per lifetime without prior authorization when submitted with one of the diagnosis codes listed above. Additional studies may be considered under CCP with documentation of medical necessity, and will require prior authorization.

**Referto:** Section 2, “Medicaid Children’s Services Comprehensive Care Program (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

EMGs, polysomnography, EEGs, and ECGs are denied when billed on the same day as a pediatric pneumogram.

Pediatric pneumograms are reimbursed on the same day as an apnea monitor (rented monthly) if documentation supports the medical necessity.

Pneumogram supplies are considered part of the technical component and are denied if billed separately.

### 9.2.27 Diagnostic Doppler Sonography

Diagnostic Doppler sonography is a benefit of Texas Medicaid when treatment decisions depend on the results. Authorization is not required for diagnostic Doppler services.

Doppler sonography uses a transducer that transmits and receives the returned sound waves as vibrations. The transducer turns the vibrations into electrical pulses that travel to the ultrasonic scanner where they are processed and transformed into a digital image. It is used to study blood flow throughout the body.

A vascular diagnostic study may be personally performed by a physician or by a technologist. The accuracy of noninvasive vascular diagnostic studies depends on the knowledge, skill, and experience of the technologist and physician performing and interpreting the study. Consequently, the physician who performs and/or interprets the study must be able to document training through recent residency training or post-graduate continuing medical education and experience and must maintain that documentation for post-payment review.

If noninvasive vascular diagnostic studies are performed by a technologist, the technologist must have demonstrated competency in ultrasound by receiving one of the following credentials in vascular ultrasound technology:

- Registered Vascular Specialist (RVS) provided by Cardiovascular Credentialing International (CCI)
- Registered Vascular Technologist (RVT) provided by the American Registry of Diagnostic Medical Sonographers (ARDMS)
- Vascular Sonographer (VS) provided by the American Registry of Radiologic Technologists (ARRT), Sonography

Alternately, such studies must be performed in a facility or vascular laboratory accredited by one of the following nationally recognized accreditation organizations. If a vascular laboratory or facility is accredited, the technologists performing noninvasive cerebrovascular arterial studies in that laboratory are considered to have demonstrated competency in cerebrovascular ultrasound:

- American College of Radiology (ACR) Vascular Ultrasound Accreditation Program
- Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL)

### 9.2.27.1 Cerebrovascular Doppler Studies

Cerebrovascular Doppler sonography includes both extracranial and transcranial (intracranial) studies. This group of Doppler studies is used to investigate cerebral hemodynamics (e.g., blood flow, vasculitis, cerebral fluid collection/hydrocephalus, cerebral vascular disorders,). Cerebrovascular Doppler sonography should not be used when treatment decisions will not be affected by the findings.

Cerebrovascular Doppler studies for the diagnosis of migraine are considered experimental and are not a benefit of Texas Medicaid.

Extracranial arterial Doppler (procedure codes 93880 and 93882) are limited to the following diagnosis codes:

| Diagnosis Codes                                                                                      |        |        |        |        |        |        |        |
|------------------------------------------------------------------------------------------------------|--------|--------|--------|--------|--------|--------|--------|
| D446                                                                                                 | D447   | D7821  | D7822  | G450   | G451   | G452   | G453   |
| G454                                                                                                 | G458   | G459   | G460   | G461   | G462   | G463   | G464   |
| G465                                                                                                 | G466   | G467   | G468   | G8101  | G8102  | G8103  | G8104  |
| G8111                                                                                                | G8112  | G8113  | G8114  | G8191  | G8192  | G8193  | G8194  |
| G830                                                                                                 | G8311  | G8312  | G8313  | G8314  | G8321  | G8322  | G8323  |
| G8324                                                                                                | G8331  | G8332  | G8333  | G8334  | G9751  | G9752  | G9761  |
| G9762                                                                                                | H3401  | H3402  | H3403  | H3411  | H3412  | H3413  | H34211 |
| H34212                                                                                               | H34213 | H34231 | H34232 | H34233 | H3582  | H5311  | H53121 |
| H53122                                                                                               | H53123 | H53131 | H53132 | H53133 | H59311 | H59312 | H59313 |

### 9.2.27.2 Peripheral Doppler Studies

Peripheral Doppler sonography is used to determine vascular impedance and evaluate peripheral masses and peripheral nerve continuity.

### 9.2.27.3 Peripheral Arterial Doppler Studies

Noninvasive peripheral arterial examinations that are performed to establish the level and degree of arterial occlusive disease are reasonable and necessary if significant signs or symptoms of possible limb ischemia are present, and the client is a candidate for invasive therapeutic procedures.

Peripheral arterial Doppler (procedure codes 93922, 93923, 93924, 93925, 93926, 93930, and 93931) are limited to the following diagnosis codes (unless otherwise indicated):

#### 9.2.27.4 Peripheral Venous Doppler Studies

Non-invasive vascular diagnostic studies utilize ultrasonic Doppler and physiologic principles to assess irregularities in blood flow in the venous system.

Peripheral venous Doppler (procedure codes 93970 and 93971) are limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| I2601           | I2602  | I2603  | I2604  | I2609  | I2690  | I2692  | I2693  |
| I2694           | I2695  | I2696  | I2699  | I749   | I8001  | I8002  | I8003  |
| I8011           | I8012  | I8013  | I80211 | I80212 | I80213 | I80221 | I80222 |

In addition to the diagnosis codes listed in the table above, procedure code 93971 is also a benefit when submitted with diagnosis code Z01810, Z01818, or Z09.

Doppler echocardiography color flow velocity mapping (procedure code 93325) must be billed with one of the corresponding procedure codes in column B to be considered for reimbursement:

| Column A Procedure Code | Column B Procedure Codes                                                                     |
|-------------------------|----------------------------------------------------------------------------------------------|
| 93325                   | 76825, 76826, 76827, 76828, 93303, 93304, 93308, 93312, 93314, 93315, 93317, 93350, or 93351 |

### **9.2.27.5 Limitations for Diagnostic Doppler Sonography**

Documentation of medical necessity for the diagnostic Doppler study must be maintained by the ordering provider in the client's medical record.

Procedure codes described as complete bilateral studies are inclusive codes, and right and left studies billed on the same day will be reimbursed at a quantity of one.

Diagnostic Doppler procedure codes are limited to one study per day, same provider.

When medically necessary, multiple Doppler procedures (e.g., studies of extracranial arteries and intracranial arteries) billed on the same day by the same provider will be reimbursed at full fee for the first study and one-half fee for each additional study, regardless of the number of services billed.

The use of transcranial Doppler studies performed for the assessment of stroke risk in clients who are 2 through 16 years of age who have sickle cell anemia should be limited to once every 6 months.

The use of a simple hand-held or other Doppler device that does not produce hard copy output or that does not permit analysis of bidirectional vascular flow is considered part of the physical examination of the vascular system and is not separately reported.

### **9.2.28 Evoked Response Tests and Neuromuscular Procedures**

The following services are a benefit of Texas Medicaid:

- Autonomic function test (AFT)
- Electromyography (EMG)
- Nerve conduction studies (NCS)
- Evoked potential (EP) testing
- Motion analysis studies

#### **9.2.28.1 Autonomic Function Tests**

AFTs are a benefit of Texas Medicaid when submitted with procedure codes 95921, 95922, 95923, and 95924.

Prior authorization is not required for AFTs.

Procedure codes 95921, 95922, 95923, and 95924 are limited to once per date of service, by the same provider.

Autonomic disorders may be congenital or acquired (primary or secondary). Some of the conditions under which autonomic function testing may be appropriate include, but are not limited to, the following:

- Amyloid neuropathy
- Diabetic autonomic neuropathy
- Distal small fiber neuropathy
- Excessive sweating
- Gastrointestinal dysfunction
- Idiopathic neuropathy
- Irregular heart rate
- Multiple system atrophy
- Orthostatic symptoms
- Pure autonomic failure

- Reflex sympathetic dystrophy or causalgia (sympathetically maintained pain)
- Sjögren's syndrome

#### 9.2.28.1.1 Documentation Requirements for Autonomic Function Testing

The reason for the referral, the specific autonomic function being tested, and a clear diagnostic impression must be documented in the client's medical record for each AFT performed.

The client's medical records must clearly document the medical necessity for the AFT. The medical record documentation must reflect the actual results of specific tests.

Medical necessity for reevaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client's medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis.
- Evidence that the client's condition is changing rapidly, supported by the following:
  - Diagnosis
  - Current clinical signs and symptoms
  - Prior clinical condition
  - Expected clinical disease course
- Clinical benefit of additional studies.

The client's medical records are subject to retrospective review. Wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

**9.2.28.2 Electromyography and Nerve Conduction Studies**

Electromyography (EMG) and nerve conduction studies (NCS), collectively known as electrodiagnostic (EDX) testing, must be medically indicated and may be reimbursed with the diagnosis codes listed below. Testing must be performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|

Any EDX testing procedures may be reimbursed up to four different dates of service per calendar year, same provider. Any E/M service will be denied as part of another service when billed for the same date of service as EMG or NCS service by the same provider.

Claims for nerve conduction studies that are denied for exceeding the maximum number of studies allowed per day, may be appealed with supporting medical record documentation.

#### 9.2.28.2.1 Documentation Requirements for EMG and NCS

The reason for the referral, the specific site(s) tested, and a clear diagnostic impression must be documented in the client's medical record for each NCS or EMG study performed.

The client's medical records must clearly document the medical necessity for the NCS and EMG testing. The medical record documentation must reflect the actual results of specific tests (such as latency and amplitude).

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client's medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis. Examples may include suspected:
  - Peripheral nerve entrapment syndromes
  - Other neuropathies (traumatic, metabolic, or demyelinating)
  - Neuromuscular junction disorders (myasthenia gravis, botulism)
  - Myopathies (dermatomyositis, congenital myopathies)
  - Unexplained symptoms suggestive of peripheral nerve, muscle or neuromuscular junction pathology, manifested by:
    - Muscle weakness
    - Muscle atrophy
    - Loss of dexterity
    - Spasticity
    - Sensory deficits
    - Swallowing dysfunction
    - Diplopia
    - Dysarthria

- The client's diagnosis could not be confirmed on previous studies, although suspected.
- Evidence exists that the client's condition is changing rapidly, supported by the following:
  - Diagnosis
  - Current clinical signs and symptoms
  - Prior clinical condition
  - Expected clinical disease course
- There is clinical benefit of additional electrodiagnostic studies.

The client's medical records are subject to retrospective review. NCS hard copies of the wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

#### 9.2.28.2.2 EMG

The following EMG procedure codes may be reimbursed for one service per day, each procedure, by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 51784           | 51785 | 95860 | 95861 | 95863 | 95864 | 95865 | 95866 | 95867 | 95868 |
| 95869           | 95999 |       |       |       |       |       |       |       |       |

Procedure codes 95872 and 95875 may be reimbursed up to two services per day, same provider. Procedure code 95870 may be reimbursed in multiple quantities if specific muscles are documented.

The needle EMG examination must be performed by a physician specially trained in electrodiagnostic medicine, as these tests are simultaneously performed and interpreted.

Prior authorization is not required for EMG.

#### 9.2.28.2.3 NCS

NCS are reimbursed by Texas Medicaid with documentation of medical necessity using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 95885           | 95886 | 95887 | 95905 | 95907 | 95908 | 95909 | 95910 | 95911 | 95912 |
| 95913           | 95933 | 95937 |       |       |       |       |       |       |       |

NCS must be performed by either one of the following:

- A physician
- A trained individual under the direct supervision of a physician. (Direct supervision means that the physician is in close physical proximity to the electrodiagnostic laboratory while testing is underway, immediately available to provide the trained individual with assistance and direction, and responsible for selecting the appropriate NCS to be performed.)

When the same studies are performed on unique sites by the same provider for the same date of service, studies for the first site must be billed without a modifier and studies for each additional site must be billed with modifier 59, indicating a distinct procedural service. Modifier 59 should be used when modifier XE, XP, XS, or XU is not appropriate.

Procedure codes 95907, 95908, 95909, 95910, 95911, 95912, and 95913 may be reimbursed only once when multiple sites on the same nerve are stimulated or recorded.

Prior authorization is required when the anticipated number of nerve conduction studies planned for an evaluation exceeds the following maximum number of studies:

| Procedure Code      | Limitation                                                                                                    |
|---------------------|---------------------------------------------------------------------------------------------------------------|
| 95885, 95886        | Reimbursed once per extremity up to 2 units, using any combination of procedure codes, per day, any provider. |
| 95885, 95886, 95887 | Must be billed with one of the primary procedure codes 95907, 95908, 95909, 95910, 95911, 95912, or 95913.    |
| 95937               | Up to 3 studies per day, per procedure, same provider without prior authorization.                            |

#### 9.2.28.2.4 Prior Authorization for NCS

Requests for prior authorization with documentation supporting the medical necessity for the number of studies requested must be received on or within 90 days before the requested date(s) of service.

The Special Medical Prior Authorization (SMPA) Request Form must be signed by the requesting provider on or within 90 days prior to the requested start of service. All dates of service prior to the prescribing providers signature date will be denied.

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of evoked response tests and neuromuscular procedures on behalf of the client's physician when the physician delegates this authority to the APRN or PA. The APRN or PA provider's signature and license number must appear on the forms where the physician signature and license number blocks are required.*

Medical record documentation must establish medical necessity for the additional studies, including one or more of the following:

- Other diagnosis in the differential that require consideration should include provider notes about both of the following:
  - The additional diagnoses considered.
  - The clinical signs, symptoms, or electrodiagnostic findings that necessitated the inclusion.
- If multiple diagnoses have been established by nerve conduction studies and the recommendations in the table above for a single diagnostic category do not apply, then the provider should document all diagnoses established as a result of EDX testing.
- Testing of an asymptomatic contralateral limb to establish normative values for an individual client (particularly the elderly, diabetic, and clients with a history of ethyl alcohol [ETOH] usage).
- Comorbid clinical conditions are identified. The clinical condition must be one that may cause sensory or motor symptoms, for example:
  - Underlying metabolic disease (such as thyroid condition or diabetes mellitus)
  - Nutritional deficiency (alcoholism)
  - Malignant disease
  - Inflammatory disorder (including but not limited to lupus, sarcoidosis or Sjögren's syndrome)

#### 9.2.28.3 Evoked Potential Testing

Evoked potential (EP) testing is a benefit of Texas Medicaid when medically necessary. Prior authorization is not required for EP testing. The most common EP tests are:

- Brainstem auditory evoked potentials (BAEPs)
- Intraoperative neurophysiology monitoring (IONM)

- Motor evoked potentials (MEPs)
- Somatosensory evoked potentials (SEPs)
- Vestibular evoked myogenic potentials (VEMP)
- Visual evoked potentials (VEPs)

Each EP test (procedure codes 92650, 92651, 92652, 92653, 95925, 95926, 95927, 95928, 95929, 95930, 95938, or 95939) is considered a bilateral procedure and is limited to once per date of service any provider regardless of modifiers that indicate multiple sites were tested.

EP tests may be reimbursed up to four services per rolling year, any combination of services by any provider. Claims that exceed the limitation of four services per rolling year may be considered for reimbursement on appeal with documentation that supports the medical necessity.

Intraoperative neurophysiology monitoring (procedure codes 95940 and 95941) is a benefit when performed in addition to each evoked potential test on the same day.

Procedure codes 95940 and 95941 are limited to a maximum of two hours per date of service, per client, same procedure, any provider.

Procedure codes 95940 and 95941 must be billed in conjunction with one of the following procedure codes or the service will be denied:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92653           | 95822 | 95860 | 95861 | 95863 | 95864 | 95865 | 95866 | 95867 | 95868 |
| 95869           | 95870 | 95907 | 95908 | 95909 | 95910 | 95911 | 95912 | 95913 | 95925 |
| 95926           | 95927 | 95928 | 95929 | 95930 | 95933 | 95937 | 95938 | 95939 |       |

Procedure codes 95940 and 95941 cannot be reported by the surgeon or anesthesiologist.

9.2.28.3.1 Documentation Requirements for Evoked Potential Testing

The reason for the referral, the specific nerve evoked potential being tested, and a clear diagnostic impression must be documented in the client’s medical record for each EP study performed.

The client’s medical records must clearly document the medical necessity for the EP testing. The medical record documentation must reflect the actual results of specific tests (such as latency and amplitude).

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis.
- Evidence exists that the client’s condition is changing rapidly, supported by the following:
  - Diagnosis
  - Current clinical signs and symptoms
  - Prior clinical condition
  - Expected clinical disease course
- There is clinical benefit of additional studies.

The client’s medical records are subject to retrospective review. Wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

The documentation for the IONM (procedure codes 95940 and 95941) must include the time during which each test is performed.

**9.2.28.3.2 Intraoperative Neurophysiology Monitoring (IONM)**

IONM is a benefit of Texas Medicaid when performed in addition to each evoked potential test on the same day.

Prior authorization is not required for IONM.

**9.2.28.3.3 Visual Evoked Potentials**

Some of the conditions under which VEP testing (procedure code 95930) may be appropriate include, but are not limited to, the following:

- Identification of persons at increased risk for developing clinically definite multiple sclerosis.
- Diagnosing, monitoring, and assessing treatment response in multiple sclerosis.
- Localizing the cause of a visual field defect not explained by lesions seen on CT or MRI, or by metabolic disorders or infectious disease.
- Evaluating the signs and symptoms of visual loss in persons who are unable to communicate (e.g., unresponsive persons, non-verbal persons).
- Evaluating clients who experience double vision, blurred vision, loss of vision, eye injuries, head injuries, or weakness of the eyes, arms, or legs.

**9.2.28.4 Vestibular Evoked Myogenic Potentials (VEMP)**

Vestibular Evoked Myogenic Potential (VEMP) is a benefit of Texas Medicaid when submitted with procedure codes 92517, 92518, and 92519.

VEMP testing must be medically indicated and may be reimbursed when submitted with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| H81311          | H81312 | H81313 | H81319 | H81391 | H81392 | H81393 | H81399 |
| H814            | H818X1 | H818X2 | H818X3 | H818X9 | H8190  | H8191  | H8192  |
| H8193           | H821   | H822   | H823   | H829   | H8301  | H8302  | H8303  |
| H8309           | H8311  | H8312  | H8313  | H8319  | H832X1 | H832X2 | H832X3 |
| H832X9          | H833X1 | H833X2 | H833X3 | H833X9 | H838X1 | H838X2 | H838X3 |
| H838X9          | H8390  | H8391  | H8392  | H8393  | H9311  | H9312  | H9313  |
| H9319           | R110   | R1110  | R1111  | R112   | R42    |        |        |

VEMP testing is not medically necessary for any other indications and will not be covered.

Some conditions under which VEMP testing (procedure codes 92517, 92518, and 92519) may be appropriate include:

- Evaluation of chronic symptoms of pressure, tinnitus, disorientation, or chronic vertigo after all other recommended vestibular tests are completed and is lacking a definitive diagnosis.
- Evaluation after a positive CT scan for Superior Semicircular Canal Dehiscence Syndrome (SCDS)

Documentation must include other differential diagnoses under consideration, and must include the following:

- The additional diagnoses considered.
- The clinical signs, symptoms, or electrodiagnostic findings that necessitated the inclusion.

All of the following criteria are documentation requirements for VEMP testing:

- For each VEMP test performed, the referral reason includes a clear diagnostic impression documented in the client’s medical record
- Medical necessity for the VEMP test must be clearly documented in the medical record and reflect the actual results of specific tests (which could include latency and amplitude).
- Medical necessity for client reevaluation after the initial consultation and testing must be clearly documented in the medical record. Supporting documentation must include the following:
  - New symptoms unrelated to previously evaluated symptoms which may result in a new diagnosis.
  - Rapidly changing client condition documentation, supported by the following:
    - Diagnosis
    - Current clinical signs and symptoms
    - Prior clinical condition
    - Expected clinical disease course
    - Clinical benefit of additional studies

The client’s medical records are subject to retrospective review.

**9.2.28.5 Motion Analysis Studies**

Motion analysis studies (procedure codes 96000, 96001, and 96002) are a benefit of Texas Medicaid for clients who are 3 through 20 years of age.

The neuromuscular disorders evaluated include, but are not limited to, cerebral palsy, traumatic brain injury, myelomeningocele, or stroke.

Prior authorization is not required for motion analysis studies.

Procedure codes 96000, 96001, and 96002 are limited to one per date of service by the same provider and two per rolling year, any provider.

In the following table, the procedure codes in Column A will be denied when they are submitted on the same date of service by the same provider as the procedure codes in Column B:

| Column A (Denied)                                             | Column B |
|---------------------------------------------------------------|----------|
| 96000                                                         | 96001    |
| 95860, 95861, 95863, 95864, 95865, 95866, 95869, 95870, 95872 | 96002    |

**9.2.28.5.1 Documentation Requirements for Motion Analysis Studies**

Documentation must include the following information that indicates the client meets all the requirements for motion analysis studies. The client must be:

- Ambulatory for a minimum of ten consecutive steps, with or without assistive devices.
- At least 3 through 20 years of age.
- Physically able to tolerate up to three hours of testing.

The reason for the referral and a clear diagnostic impression must be documented in the client’s medical record for each motion analysis study performed.

The client’s medical records must clearly document the medical necessity for the motion analysis study. The medical record documentation must reflect the actual results of specific tests.

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis.
- Evidence exists that the client’s condition is changing rapidly, supported by the following:
  - Diagnosis
  - Current clinical signs and symptoms
  - Prior clinical condition
  - Expected clinical disease course
- There is clinical benefit of additional studies.

The client’s medical records are subject to retrospective review.

**9.2.29 Extracorporeal Membrane Oxygenation (ECMO)**

ECMO may be effective on a short-term basis for clients with life-threatening respiratory and/or cardiac insufficiency.

ECMO may be reimbursed for clients who have the following clinical indications (this is not an all-inclusive list):

- Persistent pulmonary hypertension
- Meconium aspiration syndrome
- Respiratory distress syndrome
- Adult respiratory distress syndrome
- Congenital diaphragmatic hernia
- Sepsis
- Pneumonia
- Preoperative and postoperative congenital heart disease or heart transplantation
- Reversible causes of cardiac failure
- Cardiomyopathy
- Myocarditis
- Aspiration pneumonia
- Pulmonary contusion
- Pulmonary embolism

The following procedure codes may be used when billing ECMO:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 33946           | 33947 | 33948 | 33949 | 33951 | 33952 | 33953 | 33954 | 33955 | 33956 |
| 33957           | 33958 | 33959 | 33962 | 33963 | 33964 | 33965 | 33966 | 33969 | 33984 |
| 33985           | 33986 | 33987 | 33988 | 33989 |       |       |       |       |       |

Terminal disease with expectation of short survival, advanced multiple organ failure syndrome, irreversible central nervous system injury and severe immunosuppression are contraindications to ECMO. Claims for ECMO services may be recouped if the services are provided in the presence of these conditions.

The initial 24 hours of veno-venous (VV) ECMO should be submitted using procedure code 33946. Procedure code 33948 should be used for each additional 24 hours. Procedure code 33946 is denied as part of procedure code 33948 if submitted with the same date of service. Procedure codes 33946 and 33948 are limited to one per day when billed by any provider.

The initial 24 hours of veno-arterial (VA) ECMO should be submitted using procedure code 33947. Procedure code 33949 should be used for each additional 24 hours. Procedure codes 33947 and 33949 are limited to one per day when billed by any provider.

If insertion of VV cannula (procedure codes 33951, 33952, 33953, 33954, 33955, and 33956) for prolonged extracorporeal circulation for cardiopulmonary insufficiency is submitted by the same provider with the same date of service as procedure code 33946 or 33948, the insertion of the cannula is denied, and the ECMO (procedure code 33946 or 33948) is considered for reimbursement.

If insertion of VA cannula (procedure codes 33951, 33952, 33953, 33954, 33955, and 33956) for prolonged extracorporeal circulation for cardiopulmonary insufficiency is submitted by the same provider with the same date of service as procedure code 33947 or 33949, the insertion of the cannula is denied, and the ECMO (procedure code 33947 and 33949) is considered for reimbursement.

### 9.2.30 Family Planning

Physicians, PAs, NPs, CNSs, and CNMs are encouraged to provide family planning services to Texas Medicaid clients, especially pregnant and postpartum clients. No separate enrollment is required. Providers are reimbursed for family planning services through Texas Medicaid (Title XIX) or through the DSHS Family Planning Program.

**Referto:** Section 2, “Medicaid Title XIX Family Planning Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Section 2, “Healthy Texas Women (HTW) Program Overview” in the *Healthy Texas Women Program Handbook (Vol. 2, Provider Handbooks)*.

The *Health and Human Services Commission Family Planning Program Services Handbook (Vol. 2, Provider Handbooks)*.

### 9.2.31 Gynecological Health Services

Gynecological examinations, surgical procedures, and treatments are benefits of Texas Medicaid.

**Referto:** Section 6, “Gynecological Health Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information about contraception, sterilizations, and family planning annual examinations.

### 9.2.32 Hospital Visits

**Referto:** Subsection 9.2.60, “Physician Evaluation and Management (E/M) Services” in this handbook.

### 9.2.33 Hyperbaric Oxygen Therapy (HBOT)

Physicians who bill for the professional component of HBOT must use procedure code 99183. Hospital providers who bill for the chamber time must use procedure code G0277 with revenue code 413.

**Note:** Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, the use of oxygen by mask, or other device, or applied topically is not considered hyperbaric treatment in itself.

Texas Medicaid recognizes the following indications for HBOT, as approved by the Undersea and Hyperbaric Medical Society (UHMS):

- Air or gas embolism
- Carbon monoxide poisoning
- Central retinal artery occlusion
- Compromised skin grafts and flaps
- Crush injuries, compartment syndrome, and other acute traumatic ischemias
- Decompression sickness
- Delayed radiation injury (soft tissue and bony necrosis)
- Diabetic foot ulcer
- Severe anemia
- Clostridial myositis and myonecrosis (gas gangrene)
- Intracranial abscess
- Necrotizing soft tissue infections
- Refractory osteomyelitis
- Acute thermal burn injuries

HBOT is not a replacement for other standard successful therapeutic measures.

Texas Medicaid considers HBOT experimental and investigational for any indications other than the ones approved by UHMS and outlined in this section. Non-covered indications include, but are not limited to, autism and traumatic brain injury.

Oxygen administered outside of a hyperbaric chamber, by any means, is not considered hyperbaric treatment.

The physician must be in constant attendance of hyperbaric oxygen therapy during compression and decompression of the chamber and may not delegate the rendering of the service. Both the facility's medical record and the client's medical record must contain documentation to support that there was a physician in attendance who provided direct supervision of the compression and decompression phases of the HBOT treatment. All documentation pertaining to HBOT is subject to retrospective review.

#### **9.2.33.1 Prior Authorization for HBOT**

HBOT procedure codes 99183 and G0277 require prior authorization. Prior authorization requests submitted for procedure code G0277 must also include revenue code 413. When requesting prior authorization, providers should use the [Special Medical Prior Authorization \(SMPA\) Request Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for detailed information about prior authorization requirements.

The prior authorization request must include documentation that supports medical necessity and is specific to each appropriate covered indication as listed in the following table:

| <b>Covered Indication</b>                                                                                                                                                                                                                                                                                                                                                                                      | <b>Total 30-Minute Intervals Allowed for Procedure Code G0277</b> | <b>Total Professional Sessions Allowed for Procedure Code 99183</b> | <b>Medical Necessity Documentation of the Following is Required</b>                                                                                                           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|---------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Air or gas embolism                                                                                                                                                                                                                                                                                                                                                                                            | 6                                                                 | 2                                                                   | Evidence that gas bubbles are detectable by ultrasound, Doppler or other diagnostics                                                                                          |
| Carbon monoxide poisoning - initial authorization                                                                                                                                                                                                                                                                                                                                                              | 15                                                                | 5                                                                   | Persistent neurological dysfunction secondary to carbon monoxide inhalation                                                                                                   |
| Carbon monoxide poisoning - one subsequent authorization                                                                                                                                                                                                                                                                                                                                                       | 9                                                                 | 3                                                                   | Evidence of continuing improvement in cognitive functioning                                                                                                                   |
| Central retinal artery occlusion                                                                                                                                                                                                                                                                                                                                                                               | 36                                                                | 6                                                                   | Evidence of central retinal artery occlusion with treatment initiated within 24 hours of the occlusion                                                                        |

| <b>Note: The following Wagner wound classification grades apply only to the diabetic foot ulcer indications:</b><br>Grade 1: Superficial diabetic ulcer<br>Grade 2: Ulcer extension - involves ligament, tendon, joint capsule or fascia (No abscess or osteomyelitis)<br>Grade 3: Deep ulcer with abscess or osteomyelitis<br>Grade 4: Gangrene to portion of forefoot<br>Grade 5: Extensive gangrene of foot |                                                            |                                                              |                                                                                                                                                                                                                                                               |

Procedure code 99183 is authorized according to the number of professional sessions (total HBOT treatments), and procedure code G0277 is authorized according to the number of 30-minute intervals of chamber time. The units in the columns for procedure codes 99183 and G0277 represent the maximum number of sessions and intervals that are allowed for that procedure code per authorization.

Limitations beyond those listed in the table above are considered experimental and investigational.

In emergency situations, the prior authorization request must be submitted no later than three business days after the date the service is rendered. Providers must not submit a claim until the prior authorization request has been approved. If the request has not been approved, the claim will be denied.

9.2.34 Ilizarov Device and Procedure

Providers must use procedure codes 20692, 20693, 20694, and 20999 when submitting claims for the Ilizarov procedure. A global fee payment methodology is applied to the Ilizarov device procedure codes. Procedure codes 20692, 20693, 20694, and 20999 include the preconstruction, surgical application, adjustments to the device for up to 6 months, and the removal of the device.

Providers who bill for other external fixator devices, such as the Monticelli device, should continue to use procedure codes 20690 or 20692, where applicable, when billing for the surgical applications.

9.2.35 Immunization Guidelines and Administration

Texas Medicaid reimburses immunizations (vaccines and toxoids) that the Advisory Committee on Immunization Practices (ACIP) recommends as routine.

Providers must follow the most current ACIP recommendations unless they conflict with guidelines from the Texas Vaccines for Children (TVFC) Program, in which case providers must follow TVFC guidelines. Providers must also provide the appropriate vaccine information statements (VISs) produced by the Centers for Disease Control and Prevention (CDC). VISs explain the benefits and risks of the vaccines and toxoids administered.

***Note:** Administered vaccines and toxoids must be reported to DSHS. After obtaining consent, DSHS submits all reported vaccines and toxoids to a centralized repository of immunization histories. This lifespan registry is known in Texas as ImmTrac2.*

9.2.35.1 Administration Fee

An administration fee may be reimbursed for all covered vaccines and toxoids that are administered according to the ACIP. The following procedure codes may be reimbursed when billed for vaccine and toxoid administration:

| Procedure Code |       |       |       |       |       |  |  |  |  |
|----------------|-------|-------|-------|-------|-------|--|--|--|--|
| 90460          | 90461 | 90471 | 90472 | 90473 | 90474 |  |  |  |  |

Procedure code 90461 may not be billed by TVFC providers when administering TVFC-eligible vaccines under the TVFC program.

Procedure codes 90460 and 90461 are benefits for services rendered to clients who are birth through 18 years of age when counseling is provided for the immunization administered.

Procedure codes 90471, 90472, 90473, and 90474 are benefits when counseling is not provided for the immunization administered. Procedure codes 90471, 90472, 90473, and 90474 may be reimbursed for services rendered to clients of any age.

The administration fee may be reimbursed when the procedure code for the vaccine or toxoid administered (regardless of the source of the vaccine or toxoid) and the administration fee procedure code are billed on the same claim with the same date of service. Only one administration fee may be reimbursed to any provider for each vaccine or toxoid administered per day.

The following vaccine procedure codes are a benefit of Texas Medicaid and distributed by TVFC (Does not include COVID-19 and influenza vaccines):

| Procedure Codes | Age Range                               | Number of Recognized Components |
|-----------------|-----------------------------------------|---------------------------------|
| 90619           | 2 years of age or older                 | 1                               |
| 90620           | 10 years of age or older                | 1                               |
| 90621           | 10 years of age or older                | 1                               |
| 90623           | 10 years through 23 years of age        | 1                               |
| 90632           | 18 years of age or older                | 1                               |
| 90633           | Birth through 18 years of age           | 2                               |
| 90636           | 19 years of age or older                | 2                               |
| 90647           | 6 weeks through 18 years of age         | 1                               |
| 90648           | 6 weeks of age or older                 | 1                               |
| 90651           | 9 years through 45 years of age         | 1                               |
| 90670           | 2 months of age or older                | 1                               |
| 90671           | 6 weeks of age or older                 | 1                               |
| 90677           | 2 months of age or older                | 1                               |
| 90678           | 10 years of age or older                | 1                               |
| 90680           | Birth through 8 months of age           | 1                               |
| 90681           | Birth through 8 months of age           | 1                               |
| 90696           | 4 years through 6 years of age          | 4                               |
| 90697           | Birth through 4 years of age            | 6                               |
| 90698           | Birth through 5 years of age            | 5                               |
| 90700           | Birth through 6 years of age            | 3                               |
| 90702           | Birth through 6 years of age            | 2                               |
| 90707           | 1 year of age or older                  | 3                               |
| 90710           | 1 year through 12 years of age          | 4                               |
| 90713           | 2 months of age or older                | 1                               |
| 90714           | 7 years of age or older                 | 2                               |
| 90715           | 7 years of age or older                 | 3                               |
| 90716           | 1 year of age or older                  | 1                               |
| 90723           | 6 weeks through 6 years of age          | 5                               |
| 90732           | 2 years of age or older                 | 1                               |
| 90734           | 2 months of age through 55 years of age | 1                               |
| 90743           | 11 years through 17 years of age        | 1                               |
| 90744           | Birth through 17 years of age           | 1                               |
| 90746           | 18 years of age or older                | 1                               |
| 90750           | 50 years of age or older                | 1                               |

**Note:** A component refers to all antigens in a vaccine that prevent disease(s) caused by one organism. Combination vaccines are those that contain multiple vaccine components.

### COVID-19 Vaccines

The following vaccine procedure codes are a benefit of Texas Medicaid for influenza:

| Procedure Codes | Age Range                |
|-----------------|--------------------------|
| 91320           | 12 years of age or older |
| 91322           | 12 years of age or older |

Because the ACIP frequently reviews the composition of COVID-19 vaccines and makes updates to their recommendations, providers should refer to the CDC website for current recommendations.

Providers should refer to the TVFC website for the most up-to-date list of COVID-19 vaccines that TVFC is distributing for clients who are birth through 18 years of age.

Procedure code 90480 must be used in conjunction with one of the vaccine procedure codes listed above for reimbursement of COVID-19 vaccine administration.

COVID-19 vaccine counseling (procedure code G0315) may be reimbursed for clients who are birth through 20 years of age.

Procedure code G0315 will be denied if billed on the same day by the same provider as procedure code 90480.

Procedure code G0315 is limited to once per day, by the same provider, and three per rolling year by any provider.

### Influenza Vaccines

The following vaccine procedure codes are a benefit of Texas Medicaid for influenza:

| Procedure Codes | Age Range                         |
|-----------------|-----------------------------------|
| 90653           | 65 years of age or older          |
| 90655           | 6 months through 35 months of age |
| 90656           | 6 months of age or older          |
| 90657           | 6 months through 35 months of age |
| 90658           | 6 months of age or older          |
| 90660           | 2 years through 49 years of age   |
| 90661           | 6 months of age or older          |
| 90662           | 65 years of age or older          |
| 90672           | 2 years through 49 years of age   |
| 90673           | 18 years of age or older          |
| 90674           | 6 months of age or older          |
| 90682           | 18 years of age or older          |
| 90685           | 6 months through 35 months of age |
| 90686           | 6 months of age or older          |
| 90687           | 6 months through 35 months of age |
| 90688           | 6 months of age or older          |
| 90694           | 65 years of age or older          |
| 90756           | 6 months of age or older          |

Because the ACIP reviews the composition of influenza vaccines annually and frequently makes updates to their recommendations, providers should refer to the CDC website for current recommendations.

Providers should refer to the TVFC website for the most up-to-date list of the influenza vaccines that TVFC is distributing for clients who are birth through 18 years of age for the current flu season.

Peak influenza activity generally occurs from October of one year through February of the next year, although activity can last through May. This time period is commonly referred to as “flu season.”

The first time a client who is 6 months through 8 years of age receives the influenza vaccine, he/she should receive a second dose of the vaccine during the same flu season at least 4 weeks after the first dose. If the client turns 9 years old between the first and second doses, he/she should still receive the second dose.

Excepting the scenario described in the previous line, clients who are 9 years of age or older should only receive one dose of the influenza vaccine per flu season, even if it is their first time receiving the influenza vaccine.

The following vaccine procedure codes are a benefit of Texas Medicaid and are not distributed by TVFC:

| Procedure Codes | Age Range                        | Number of Recognized Components |
|-----------------|----------------------------------|---------------------------------|
| 90476           | 19 years through 50 years of age | 1                               |
| 90477           | 19 years through 50 years of age | 1                               |
| 90581           | 19 years through 65 years of age | 1                               |
| 90585           | All ages                         | 1                               |
| 90586           | All ages                         | 1                               |
| 90589           | 19 years of age or older         | 1                               |
| 90611           | 18 years of age or older         | 1                               |
| 90625           | 19 years through 64 years of age | 1                               |
| 90626           | 19 years of age or older         | 1                               |
| 90627           | 19 years of age or older         | 1                               |
| 90675           | All ages                         | 1                               |
| 90679           | 60 years of age or older         | 1                               |
| 90683           | 60 years of age or older         | 1                               |
| 90684           | 19 years of age or older         | 1                               |
| 90690           | 19 years of age or older         | 1                               |
| 90691           | 19 years of age or older         | 1                               |
| 90717           | 19 years of age or older         | 1                               |
| 90736           | 60 years of age or older         | 1                               |
| 90738           | 19 years of age or older         | 1                               |
| 90739           | 18 years of age or older         | 1                               |
| 90740           | 20 years of age or older         | 1                               |
| 90747           | 20 years of age or older         | 1                               |
| 90758           | 18 years of age or older         | 2                               |
| 90759           | 18 years of age or older         | 1                               |
| J9030           | All ages                         | 1                               |

Each vaccine and its administration must be submitted on the claim in the following sequence: the vaccine procedure code immediately followed by the applicable vaccine administration procedure code(s). All of the vaccine administration procedure codes that correspond to a single vaccine procedure code must be submitted on the same claim as the vaccine procedure code.

Each vaccine procedure code must be submitted with the appropriate “administration with counseling” procedure code(s) (procedure codes 90460 and 90461) or the most appropriate “administration without counseling” procedure code (procedure code 90471, 90472, 90473, or 90474). If an “administration with counseling” procedure code is submitted with an “administration without counseling” procedure code for the same vaccine, the second administration of the vaccine will be denied.

Procedure code 90480 is a benefit for clients who are 6 months of age or older. Procedure code 90480 includes counseling and may only be reported with a COVID-19 vaccine procedure code.

Procedure code M0201 is a benefit for clients of any age. Procedure code M0201 may be reported, in addition to the vaccine and vaccine administration procedure codes when a pneumococcal, influenza, hepatitis B, and/or COVID-19 vaccine is administered inside a client’s home.

**Administration with Counseling**

Providers must submit claims for immunization administration procedure codes 90460 or 90461 based on the number of components per vaccine. Providers must specify the number of components per vaccine by billing 90460 and 90461 as defined by the procedure code descriptions:

- Procedure code 90460 is submitted for the administration of the first component.
- Procedure code 90461 is submitted for the administration of each additional component identified in the vaccine.

The necessary counseling that is conducted by a physician or other qualified health-care professional must be documented in the client’s medical record.

The following is an example of how to submit claims for immunization administration procedure codes when counseling is provided:

| Procedure Code                                     | Quantity Billed |
|----------------------------------------------------|-----------------|
| Vaccine or toxoid procedure code with 1 component  | 1               |
| 90460 (1st component)                              | 1               |
| Vaccine or toxoid procedure code with 3 components | 1               |
| 90460 (1st component)                              | 1               |
| 90461 (2nd and 3rd components)                     | 2               |

***Note:** The term “components” refers to the number of antigens that prevent disease(s) caused by one organism. Combination vaccines are those that contain multiple vaccine components.*

**Administration without Counseling**

Procedure codes 90471, 90472, 90473, and 90474 may be reimbursed per vaccine based on the route of administration.

The following is an example of how to submit claims for injection administration procedure codes when counseling is not provided:

| Procedure Code                   | Quantity Billed |
|----------------------------------|-----------------|
| Vaccine or toxoid procedure code | 1               |
| 90471 (Injection administration) | 1               |
| Vaccine or toxoid procedure code | 1               |

| Procedure Code                   | Quantity Billed |
|----------------------------------|-----------------|
| 90472 (Injection administration) | 1               |
| Vaccine or toxoid procedure code | 1               |
| 90472 (Injection administration) | 1               |

### 9.2.35.2 Documentation

Providers must document the following information in the client's medical record, which is subject to retrospective review to determine appropriate utilization and reimbursement of this service:

- The vaccine or toxoid given
- The date of the vaccine or toxoid administration (day, month, year)
- The name of the vaccine or toxoid manufacturer and the vaccine or toxoid lot number
- The signature and title of the person administering the vaccine or toxoid
- The organization's name and address
- The publication date of the VIS issued to the client, parent, or guardian
- The site at which the vaccine was given (recommended)

### 9.2.35.3 Vaccine Adverse Event Reporting System (VAERS)

VAERS encourages providers to report any adverse event that occurs after the administration of any vaccine in the United States, even if it's unclear whether a vaccine caused it. The *National Childhood Vaccine Injury Act* (NCVIA) requires health-care providers to report:

- Any adverse event listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the VAERS Reportable Events Table that occurs within the specified time period after vaccination.

Clinically significant adverse events should be reported even if it is unclear whether a vaccine caused the event.

Documentation of the injection site is recommended but not required.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from [vaers.hhs.gov/docs/VAERS Table of Reportable Events Following Vaccination.pdf](https://vaers.hhs.gov/docs/VAERS_Table_of_Reportable_Events_Following_Vaccination.pdf).

### 9.2.36 Immunizations for Clients Birth through 20 Years of Age

Administration of vaccines and toxoids to clients who are birth through 20 years of age may be a benefit of THSteps when provided as part of a THSteps medical checkup. A THSteps provider who bills vaccines and toxoids with diagnosis or age restrictions is subject to those restrictions. In addition to the age appropriate diagnosis for the THSteps preventive care medical checkup, providers must bill the claim with the diagnosis code that indicates the condition that necessitates the vaccine or toxoid.

If an immunization is administered as part of the preventive care medical checkup, diagnosis code Z23 may also be included on the claim, in addition to the age-appropriate diagnosis.

If an immunization is the only service provided during an office visit, providers may submit only diagnosis code Z23 on the claim.

Administration of vaccines and toxoids to clients who are birth through 20 years of age may be a benefit of CCP when the vaccine or toxoid is provided as part of an acute medical visit outside of a THSteps medical checkup.

**Referto:** Section 4, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on THSteps age related diagnosis codes.

### 9.2.36.1 Vaccine Coverage Through the TVFC Program

Providers may refer to the TVFC web site at [www.dshs.texas.gov/immunizations/health-departments/overview](http://www.dshs.texas.gov/immunizations/health-departments/overview) for information about the program and for a list of vaccines available through the program.

**Note:** All vaccines and toxoids recommended by Advisory Committee on Immunization Practices (ACIP) are available from the TVFC Program to enrolled clinic sites. Clinics participating in the TVFC Program have agreed to administer all ACIP-recommended vaccines to the eligible populations that are served.

When a single antigen vaccine or toxoid or a comparable antigen vaccine or toxoid is available through TVFC, but the provider chooses to use a different ACIP-recommended product, the administration fee will be reimbursed but the vaccine or toxoid will not be reimbursed.

Although Texas Medicaid does not mandate that providers enroll in TVFC, Texas Medicaid will not reimburse providers when the vaccine is available through TVFC. Only the administration fee will be reimbursed through Texas Medicaid when the vaccine or toxoid procedure code is identified on the claim. Clients may not be billed for vaccines and toxoids that are available through TVFC.

If a vaccine or toxoid meets the definition of “not available” through TVFC, it may be separately reimbursed through CCP when billed with modifier U1. Modifier U1 may be used in the following situations:

- The TVFC, based on their federal resolution (distribution/guidelines), does not distribute an HHSC-approved vaccine or toxoid following the ACIP recommendation, and the provider purchases vaccine to administer to all ACIP-recommended ages or risk groups.
- A new vaccine or toxoid approved by the ACIP with established guidelines, but has not been negotiated or added to a TVFC contract
- Funding for new vaccine or toxoid has not been established by TVFC
- Insufficient vaccine and toxoid supply due to national supply or distribution issues, as reported to HHSC by TVFC

HHSC will notify providers if a vaccine or toxoid meets the definition of “not available” from TVFC and when the provider’s privately purchased vaccine or toxoid may be billed with modifier U1. Modifier U1 must not be used due to a provider’s failure to enroll in TVFC or to maintain sufficient TVFC vaccine or toxoid inventory.

**Referto:** Subsection 4.5.1, “Texas Vaccines for Children (TVFC) Program” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information about TVFC and immunizations for infants and children.

### 9.2.36.2 Vaccine and Toxoid Procedure Codes

The following vaccine and toxoid procedure codes may be reimbursed for Texas Medicaid clients who are birth through 20 years of age:

| Procedure Codes                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Bacillus Calmette-Guérin (BCG)</b>                                                                                                                                                                                                                                        |
| <b>Refer to:</b> Subsection 9.2.9, “Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer” in this handbook.                                                                                                                                           |
| <b>Adenovirus</b>                                                                                                                                                                                                                                                            |
| <b>* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.</b> |

| Procedure Codes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |        |        |        |        |       |        |       |       |       |

| <p>The pneumococcal polysaccharide vaccine (procedure code 90732) is a benefit for Texas Medicaid clients who are not covered by the THSteps or TVFC programs.</p> <p>The initial pneumococcal polysaccharide vaccine is limited to one per client per lifetime. For high-risk clients, revaccination is recommended once in a lifetime five years after the initial dose. Revaccination after a second dose is not a benefit of Texas Medicaid.</p> <p>Pneumococcal polysaccharide vaccine is not recommended for children who are birth through 23 months of age.</p> <p>Providers are expected to follow the ACIP recommendations for administrations.</p> |        |        |        |        |        |        |        |        |  |

| <p>* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.</p>                                                                                                                                                                                                                                                                                                                                                                                  |        |        |        |        |        |        |        |        |  |

### 9.2.37 Immunizations for Clients Who Are 21 Years of Age or Older

Vaccines and toxoids may be reimbursed through Texas Medicaid at a fee determined by HHSC when the vaccine is medically necessary. Providers are expected to follow the ACIP recommendations for administration.

The following immunizations are identified and recommended by the ACIP for clients who are 21 years of age or older (this list is not all-inclusive):

| Immunization Procedure Codes |  |  |  |  |  |  |  |  |  |
|------------------------------|--|--|--|--|--|--|--|--|--|
| BCG                          |  |  |  |  |  |  |  |  |  |

| Immunization Procedure Codes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |       |       |       |       |       |       |       |       |       |

| Influenza vaccine is a benefit of Texas Medicaid for all clients.<br>Texas Medicaid considers the influenza season in the United States to be October through the end of May. The optimal time to receive influenza vaccine is as early in the season as it is available. However, clients should continue to receive influenza vaccine through March. The vaccine may be administered one time per influenza season. |       |       |       |       |       |       |       |       |       |

| 90626                                                                                                                                                                                                                                                                                                                                                                                                                 | 90627 |       |       |       |       |       |       |       |       |
| <b>Typhoid Vaccine</b>                                                                                                                                                                                                                                                                                                                                                                                                |       |       |       |       |       |       |       |       |       |
| 90690                                                                                                                                                                                                                                                                                                                                                                                                                 | 90691 |       |       |       |       |       |       |       |       |
| <b>Varicella Virus</b>                                                                                                                                                                                                                                                                                                                                                                                                |       |       |       |       |       |       |       |       |       |
| 90716                                                                                                                                                                                                                                                                                                                                                                                                                 |       |       |       |       |       |       |       |       |       |
| <b>Yellow Fever</b>                                                                                                                                                                                                                                                                                                                                                                                                   |       |       |       |       |       |       |       |       |       |
| 90717                                                                                                                                                                                                                                                                                                                                                                                                                 |       |       |       |       |       |       |       |       |       |

The specific diagnosis necessitating the vaccine or toxoid is required when billing the administration fee procedure code in combination with the appropriate vaccine procedure code. Diagnosis code Z23 may also be included. The type of immunization given will be identified by the procedure code.

### 9.2.38 Rabies Prophylaxis

The rabies vaccine (procedure code 90675) and rabies immune globulin (procedure codes 90375, 90376, and 90377) are benefits of Texas Medicaid as part of rabies prophylaxis.

Rabies immune globulin is limited to clients with diagnosis code Z203.

**9.2.38.1 Rabies Vaccine Availability and Animal Bite Reporting**

Providers that determine a client requires the rabies vaccination series may obtain the biologicals directly from the manufacturer or through one of the Texas Department of State Health Services (DSHS) depots around the state.

Animal bites to people must be reported as soon as possible to the designated Local Rabies Control Authority (LRCA).

**9.2.38.2 Prior Authorization for Postexposure Rabies Vaccine**

Prior authorization is not required for postexposure rabies vaccine. The physician must maintain documentation of the exposure in the client's medical record.

**9.2.38.3 Limitations for Postexposure Rabies Vaccine**

Reimbursement for postexposure rabies vaccine is limited to one per client per day, by any provider.

Reimbursement for postexposure rabies vaccine is limited to 5 occurrences per 90 rolling days. Claims billed for any vaccine given beyond 90 rolling days will be denied.

**9.2.38.3.1 Obtaining Rabies Vaccine and HRIG from DSHS for PEP Use**

Providers may obtain the vaccine and HRIG directly from the manufacturer. If a provider is not able to obtain the vaccine and/or HRIG directly, providers may contact DSHS local or state public health professionals.

For each potential rabies exposure, providers must consult with their local health department or the DSHS regional ZC program office that serves their area. Requests for consultations made to DSHS after-hours or on holidays should be directed to the DSHS On-Call Physician at 1-888-963-7111.

Local public health professionals or regional ZC staff will help providers determine whether or not the exposure situation warrants PEP. If the exposure situation is determined to be valid, providers will be given detailed information about how to obtain rabies vaccine and HRIG for the patient.

Providers can refer to the following DSHS web pages for the contact information of local public health professionals:

- Full Service Local Health Departments and Districts of Texas at [www.dshs.texas.gov/regions/lhds.shtm](http://www.dshs.texas.gov/regions/lhds.shtm)

- CDC rabies website at [www.cdc.gov/rabies/](http://www.cdc.gov/rabies/)

**9.2.38.4 Smallpox and Mpox (Monkeypox) Vaccine**

Procedure code 90611 may be reimbursed for clients who are 18 years of age or older.

Procedure code 90622 is informational only.

**9.2.39 Respiratory Syncytial Virus (RSV)**

RSV vaccine (procedure code 90678) may be reimbursed for clients who are:

- Pregnant and are 32 through 36 weeks gestation.
- 60 years of age or older.

RSV vaccine (procedure code 90679 and 90683) may be reimbursed for clients who are 60 years of age or older.

RSV monoclonal antibodies (nirsevimab, procedure codes 90380 and 90381) may be administered to clients who are birth through 19 months of age.

Administration of nirsevimab (procedure codes 96380 and 96381) are limited to two per lifetime.

The administration of palivizumab may be denied if billed after the administration of nirsevimab.

### **9.2.40 Implantable Infusion Pumps**

Implantable infusion pump (IIPs) are intended to provide long-term, continuous, or intermittent drug infusion. They may be medically necessary in the following circumstances:

- Administration of intrathecal or epidural antispasmodic drugs to treat refractory intractable spasticity
- Administration of Intrathecal, epidural, or central venous analgesic (opioid or non-opioid) drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy for primary liver cancer or metastatic cancer with metastases limited to the liver
- Administration of intra-arterial chemotherapy in head and neck cancers

An implantable infusion pump is not a benefit for the following uses:

- Continuous insulin infusion for diabetes
- Continuous heparin infusion for recurrent thromboembolic disease
- Continuous intralesional infusion for severe chronic intractable pain
- Continuous intra-arterial infusion
- Continuous intra-articular infusion for severe chronic intractable pain
- Administration of antibiotics for osteomyelitis

All supplies associated with an IIP are included with the reimbursement for the surgery to implant the infusion pump and are not reimbursed separately.

Providers may be reimbursed for implantable infusion pumps using procedure codes E0782, E0783, and E0786. If procedure codes E0782 and E0783 are billed with the same date of service, only one may be reimbursed.

#### **9.2.40.0.1 Prior Authorization for Implantable Infusion Pumps**

Implantable infusion pumps (procedure codes E0782, E0783, and E0786) require prior authorization.

Prior authorization is not required for the physician services associated with the insertion, revision, removal, refilling, or maintenance of the IIP.

Providers must request prior authorization through the Special Medical Prior Authorization (SMPA) department. The ASC or DME provider may submit a request for prior authorization using the Special Medical Prior Authorization (SMPA) Form, which must be completed and signed by a physician.

The completed, signed and dated SMPA form must be maintained by the provider and the prescribing physician in the client's medical record.

The completed SMPA Form must include the procedure code and quantity for the services that are requested. Documentation that is submitted with the prior authorization request must indicate whether the IIP will be provided by the ASC or the DME provider.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the requested IIP. The requesting provider may be asked for additional information to clarify or complete a request for the IIP.

Documentation submitted with the prior authorization request must indicate the client or caregiver has:

- The ability to provide a return demonstration performance.
- The attention, desire, interest, flexibility, and independence.
- An understanding of cause and effect and object permanence.

As indicated in the following sections, supporting documentation that is based on the type of IIP requested must be included with the request for prior authorization. All of the documentation listed under the specific type of IIP must be included with the request for prior authorization.

#### 9.2.40.0.2 IIP for Administration of Anti-spasmodic Drug to Treat Severe Refractory Spasticity

The following documentation is required for prior authorization:

- Initial evaluation
- Type of surgical implantation and description of IIP requested
- Symptoms:
- Degree of spasticity
- Affected muscle groups
- Functional impact
- Duration of symptoms
- Any recent hospitalizations (within past 12 months)
- Comorbid conditions
- All pertinent laboratory and radiology results
- Treatment history of self-administration with evidence of:
- A minimum of six weeks of non-invasive methods of spasticity control, including, but not limited to, oral antispasmodics, that either:
- Failed to adequately control the spasticity, or
- Produced intolerable side effects
- The role, participation, and compliance of the family or client that demonstrate the following:
- The ability to provide a return demonstration performance
- Attentiveness, desire, interest, flexibility, and independence
- An understanding of cause and effect and object permanence
- Favorable response to a trial intrathecal dose of the antispasmodic
- No contraindications to implantation exist, including, but not limited to, the following:
- Coagulopathy
- Infection

- Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
- Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
  - Antispasmodic to be infused
  - Follow-up, including pump refilling, maintenance, and monitoring of changes in infusion rate
  - Expected outcome
  - Treatment goals

#### **9.2.40.1 IIP for Administration of Analgesic (Opioid or Nonopioid) Drug for Treatment of Severe Intractable Pain**

The following documentation is required for prior authorization:

- The initial evaluation
- Type of surgical implantation and description of IIP requested
- Symptoms:
- Severity of pain
- Functional impact
- Source of pain or location, including whether pain is malignant or non-malignant
- Duration of symptoms
- Any recent hospitalizations (within the past 12 months)
- Comorbid conditions
- All pertinent laboratory and radiology results
- A life expectancy of at least three months

**Note:** *The standard of care for treatment of severe intractable pain for a client with a life expectancy of less than three months is to use less invasive techniques such as an external infusion pump.*

For malignant pain, the following documentation is required for prior authorization:

- Treatment history with evidence of a favorable response to a trial intrathecal dose of the analgesic drug, defined as a minimum of 50 percent reduction in pain
- Failure of more conservative methods of pain control, including, but not limited to, oral analgesics, surgery, or therapy, that were ineffective due to one of the following:
- Failed to adequately control the pain, or
- Produced intolerable side effects

**Note:** *The standard of care for treatment of severe intractable pain for a client with a life expectancy of less than three months is to use less invasive techniques such as an external infusion pump.*

For nonmalignant pain, the following documentation is required for prior authorization:

- A minimum of six months of more conservative methods of pain control, including but not limited to oral analgesics, surgery, attempts to eliminate physical and behavioral abnormalities that may cause an exaggerated pain reaction, that were ineffective due to one of the following:
  - Failed to adequately control the pain, or
  - Produced intolerable side effects

Examples of non-malignant severe intractable pain include, but are not limited to, the following:

- Complex regional pain syndrome I & II (causalgia/RSD) refractory to other treatments.
- Post herpetic neuralgia
- Failed back syndrome
- Phantom limb pain
- Arachnoiditis (proven with MRI/increased CSF protein levels)
- Spinal cord myelopathy (refractory to conservative measurements)
- The role, participation, and compliance of the family or client that demonstrate the following:
- The ability to provide a return demonstration performance
- Attentiveness, desire, interest, flexibility, and independence
- An understanding of cause and effect and object permanence
- No contraindications to implantation exist, including, but not limited to, the following:
- Coagulopathy
- Infection
- Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
- Tumor encroachment on the thecal sac
- Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
- Analgesic to be infused
- Follow-up including pump refilling, maintenance, and monitoring of changes in infusion rate
- Expected outcome
- Treatment goals

#### **9.2.40.2 IIP for Administration of Intrahepatic Chemotherapy in Primary Liver Cancer or Colorectal Cancer with Liver Metastases**

The following documentation is required for prior authorization:

- The initial evaluation
- Type of surgical implantation and description of IIP requested
- Diagnosis of one of the following:
- Primary liver cancer
- Metastatic cancer with metastases limited to the liver
- Any recent hospitalizations (within the past 12 months)
- Comorbid conditions
- All pertinent laboratory and radiology results
- The role, participation, and compliance of the family and/or client demonstrating:
  - The ability to provide a return demonstration performance
  - Attentiveness, desire, interest, flexibility, and independence

- An understanding of cause and effect and object permanence
- No contraindications to implantation exist, including, but not limited to, the following:
  - Coagulopathy
  - Infection
  - Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
  - Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
  - Chemotherapeutic agent to be infused. The prescribed drug must be approved by the U.S. Food and Drug Administration (FDA) for the intended use and must be compatible with the implantable device (such as floxuridine or methotrexate)
  - Follow-up, including pump refilling, maintenance, and monitoring of changes in infusion rate
  - Expected outcome
  - Treatment goals

### **9.2.40.3 IIP for Administration of Intra-Arterial Chemotherapy in Head and Neck Cancers**

The following documentation is required for prior authorization:

- Initial evaluation
- Type of surgical implantation and description of IIP requested
- Diagnosis and site(s) of any metastases
- Any hospitalizations (within the past 12 months) and all other diagnoses
- All pertinent laboratory and radiology results
- The role, participation, and compliance of the family or client that demonstrates the following:
  - The ability to provide a return demonstrate performance
  - Attentiveness, desire, interest, flexibility, and independence
  - An understanding of cause and effect and object permanence
- No contraindications to implantation exist, including, but not limited to, the following:
  - Coagulopathy
  - Infection
  - Other implanted devices where the “crosstalk” between devices may inadvertently change the prescription
  - Allergy or hypersensitivity to the drug being administered
- Treatment plan, including the following:
  - Chemotherapeutic agent to be infused
  - Follow-up, including pump refilling, maintenance, and monitoring of changes in infusion rate
  - Expected outcome
  - Treatment goals

9.2.40.4 Replacement of an IIP

An IIP is expected to last a minimum of five years. Prior authorization for replacement of an IIP is considered within five years when one of the following occurs:

- There has been a significant change in the client’s condition and the current equipment no longer meets the client’s needs.
- The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.
- Loss or irreparable damage to the IIP has occurred. The following must be submitted with the prior authorization request:
- A copy of the police or fire report, when appropriate
- A statement about the measures to be taken in order to prevent reoccurrence

Replacement of an IIP for a client who is birth through 20 years of age that does not meet the criteria above may be considered for prior authorization through CCP.

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver.

The DME provider must maintain the signed and dated form in the client’s medical record.

**Referto:** Subsection 2.8.3.5, “DME Certification and Receipt Form” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about this form.

9.2.40.5 Implantation of Catheters, Reservoirs, and Pumps

The following procedure codes may be used to bill the implantation of catheters and infusion pumps or devices for long term medication administration:

| Procedure Codes |       |       |       |       |
|-----------------|-------|-------|-------|-------|
| 62350           | 62351 | 62360 | 62361 | 62362 |

Procedure code 62350 or 62351 may be reimbursed when billed for the same date of service as procedure code 62360, 62361, or 62362.

Procedure codes 62355 and 62365 do not require prior authorization.

The following procedure codes are denied as included in the total anesthesia time when billed with the same date of service as an anesthesia procedure by the same physician:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 62350           | 62351 | 62355 | 62360 | 62361 | 62362 | 62365 |

These procedure codes are considered for reimbursement according to multiple surgery guidelines when billed with the same date of service as another surgical procedure performed by the same physician.

Procedure codes 95990, 96521, and 96522 are considered for reimbursement when used for refilling an implantable pump.

Procedure codes 62367, 62368, 62369, and 62370 may be used to bill for electronic analysis of an implantable infusion pump.

Procedure codes 62369 and 62370 will be denied when billed for the same date of service by the same provider as procedure code 62362.

The following procedure codes may be used to bill the insertion, revision, removal, or repair associated with implantable infusion pumps:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 36260           | 36261 | 36262 | 36563 | 36576 | 62355 | 62365 |

**9.2.40.6 Drug Monitoring Services**

Providers must use the most appropriate procedure codes when submitting claims for drug monitoring services that monitor prescribed medications that can be abused when used for the treatment of chronic pain. These claims are subject to retrospective review. Claims may be reprocessed and recouped if they are submitted for these drug monitoring services in the office setting using a procedure code for a quantitative test rather than a qualitative or semiquantitative test.

An enzyme immunoassay (EIA) device can be used to provide preliminary qualitative or semiquantitative test results for point-of-care monitoring purposes. EIA devices and the reagents used to perform in-office drug testing are cleared by the FDA only to obtain qualitative or semiquantitative initial screen or preliminary results.

Immunoassay and enzyme assay are tests that produce qualitative and semiquantitative results, so these tests must not be reported with procedure codes for quantitative tests. A qualitative or semiquantitative test is not a quantitative test and must not be billed as such.

The initial drug screen or preliminary result testing yields qualitative and semiquantitative results, which must be reported with an appropriate drug testing procedure code, as categorized in the CPT manual as “Drug Testing.” Only those procedure codes that are a benefit of Texas Medicaid may be reimbursed.

CPT-categorized “Chemistry” and “Therapeutic Drug Assay” procedure codes are for quantitative tests and must not be reported for an initial screen or preliminary result that was performed in the point-of-care setting.

**Referto:** The CPT manual for drug testing, chemistry, and therapeutic drug assay procedure codes, and to the Texas Medicaid fee schedule for procedure codes that may be reimbursed by Texas Medicaid.

Using procedure codes for quantitative tests to report preliminary qualitative or semiquantitative test results is considered systematic upcoding and may lead to administrative sanctions, civil monetary penalties, and criminal prosecution.

Providers may refer to the CMS website for more information about laboratory tests that may be rendered in the office setting. For tests that require a CLIA certificate of waiver, CMS publishes a list of all waived tests. The list is updated quarterly and includes the procedure code to use when billing a test.

**9.2.41 Joint Injections and Trigger Point Injections**

The following procedure codes must be used to submit claims for injections into joints:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 20600           | 20604 | 20605 | 20606 | 20610 | 20611 | 20612 |

The following procedure codes must be used to submit claims for trigger point injections:

| Procedure Codes |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|
| 20526           | 20527 | 20550 | 20551 | 20552 | 20553 |

These procedures are valid only in the treatment of acute problems or the exacerbation of a chronic condition. The provider must use the AT modifier to indicate an acute condition.

| Modifier | Use                  |
|----------|----------------------|
| AT       | For acute conditions |

The cost of the injection does not include the drugs used. The drug can be reimbursed separately. Multiple joint injections may be reimbursed when billed with the same date of service if the claim indicates the specific site of each injection. The first injection or aspiration is reimbursed at the full profile allowance and any subsequent injections are reimbursed at half allowance.

9.2.42      **Laboratory Services**

Texas Medicaid benefits are provided for professional and technical services ordered by a physician and provided under the supervision of a physician in a setting other than a hospital (inpatient or outpatient). All laboratory services must be documented in the client’s medical record as medically necessary and referenced to an appropriate diagnosis. Texas Medicaid does not reimburse baseline or screening laboratory studies.

Providers may bill only for laboratory tests that are actually provided in their office. Any test sent to an outside laboratory must not be billed on the provider’s claim. Laboratories bill Texas Medicaid directly for the tests they perform.

Unless otherwise noted, interpretation of laboratory tests is considered part of the provider’s professional services (hospital, office, or emergency room visits) and must not be billed separately. Modifier Q4 is required for laboratory, radiology, and ultrasound interpretations by any provider other than the attending physician.

Laboratory tests that are generally considered part of a laboratory panel (e.g., chemistries, CBCs, urinalyses [UAs]) and that are performed on the same day must be billed as a panel regardless of the method used to perform the tests (automated or manual).

Physician interpretations that are requested of a consulting pathologist and require professional reading and reporting of results may be billed to Texas Medicaid separately as a professional charge.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA cannot be reimbursed for laboratory services.

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

**Referto:** The CMS website at [www.cms.gov/CLIA/10\\_Categorization\\_of\\_Tests.asp](http://www.cms.gov/CLIA/10_Categorization_of_Tests.asp) for information about procedure code and modifier QW requirements.

Subsection 2.2.5, “Automated Laboratory Tests and Laboratory Paneling” in the *Radiology and Laboratory Services Handbook* (Vol. 2, *Provider Handbooks*) for claims processing instructions.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook* (Vol. 2, *Provider Handbooks*).

Subsection 4.4.2, “Reimbursement” in the *Radiology and Laboratory Services Handbook* (Vol. 2, *Provider Handbooks*) for claims processing instructions.

Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, *General Information*) for more information about reimbursement.

9.2.42.1      **THSteps Laboratory Services**

**Referto:** Subsection 4.3.12.6, “Laboratory Test” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*).

### 9.2.42.2 Laboratory Handling Charge

The laboratory handling charge covers the expense of obtaining and packaging the specimen and sending it to a reference laboratory.

A laboratory handling charge (procedure code 99000) may be billed if the specimen is obtained by venipuncture or catheterization and sent to an outside lab. The reference laboratory name and address or NPI must be listed in Block 32 of the CMS-1500 claim form, and Block 20 must be completed.

The provider is required to forward the client's name, address, Medicaid ID number, and diagnosis, if appropriate, with the specimen to the reference laboratory so the laboratory may bill Texas Medicaid for its services.

A provider may bill only one laboratory handling charge per client visit unless the specimen is divided and sent to different laboratories or different specimens are collected and sent to different labs. The claim must indicate the name and/or address of each laboratory to which a specimen is sent for more than one laboratory handling fee to be paid. This laboratory handling benefit does not apply to THSteps medical checkup providers who must submit specimens to the DSHS Laboratory.

### 9.2.42.3 Blood Counts

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBCs should be individualized and based on client history, clinical indications, or proposed therapy and will not be reimbursed for screening purposes.

**Referto:** Subsection 2.2.6, "Complete Blood Count (CBC)" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about blood counts.

### 9.2.42.4 Clinical Lab Panel Implementation

**Referto:** Subsection 2.2.5, "Automated Laboratory Tests and Laboratory Paneling" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about laboratory panels.

### 9.2.42.5 Clinical Pathology Consultations

Clinical pathology consultations (procedure code 80503, 80504, 80505, or 80506) are a benefit of Texas Medicaid for services rendered by a consultant who is either a clinical pathologist or a geneticist. In a clinical pathology consultation, the consultant may also help the ordering physician determine whether further study is appropriate, based on test results.

Providers may be reimbursed for clinical pathology consultations when the claim indicates the following information:

- The name, address, and NPI of the physician who requested the consultation.
- A written narrative report describing the findings of the consultation, which will also be included in the client's medical record.

**Note:** *To submit claims for interpretation, the provider must document an interaction that clearly shows that the consultant interpreted the test results and made specific recommendations to the attending physicians.*

If the claim does not include all of this information, the clinical pathology consultation will be denied.

**Note:** *Geneticists who provide a pathology consultation must submit claims using their acute care NPI.*

Routine conversations held between a consultant and attending physicians about test orders or results are not consultations. Information that can be furnished by a non-physician laboratory specialist does not qualify as a consultation service.

**9.2.42.6 \* Cytogenetics Testing**

Cytogenetics testing is a group of laboratory tests involving the study of chromosomes.

Clinical evidence supports the significance of cytogenetics evaluation in the diagnosis, prognosis, and treatment of acute leukemias and lymphomas, especially in children. The detection of the well-defined recurring genetic abnormalities often enables a correct diagnosis with important prognostic information that affects the treatment protocol.

Reimbursement for cytogenetics testing is limited to the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| C8280           | C8281   | C8282   | C8283   | C8284   | C8285   | C8286   | C8287   |
| C8288           | C8289   | C828A   | C8291   | C8292   | C8293   | C8294   | C8295   |
| C8296           | C8297   | C8298   | C8299   | C829A   | C8310   | C8311   | C8312   |
| C8313           | C8314   | C8315   | C8316   | C8317   | C8318   | C8319   | C831A   |
| C8380           | C8381   | C8382   | C8383   | C8384   | C8385   | C8386   | C8387   |
| C8388           | C8389   | C838A   | C8440   | C8441   | C8442   | C8443   | C8444   |
| C8445           | C8446   | C8447   | C8448   | C8449   | C844A   | C8461   | C8462   |
| C8463           | C8464   | C8465   | C8466   | C8467   | C8468   | C8469   | C846A   |
| C8471           | C8472   | C8473   | C8474   | C8475   | C8476   | C8477   | C8478   |
| C8479           | C847A   | C847B   | C8581   | C8582   | C8584   | C8585   | C8586   |
| C8587           | C8588   | C8589   | C858A   | C8840   | C8841   | C8880   | C8881   |
| C9012           | C9100   | C9101   | C9102   | C9110   | C9111   | C9112   | C9190   |
| C9191           | C9192   | C91Z0   | C91Z1   | C91Z2   | C9200   | C9201   | C9202   |
| C9210           | C9211   | C9212   | C9220   | C9221   | C9222   | C9230   | C9231   |
| C9232           | C9240   | C9241   | C9242   | C9250   | C9251   | C9252   | C9260   |
| C9261           | C9262   | C9290   | C9291   | C9292   | C92A0   | C92A1   | C92A2   |
| C92Z0           | C92Z1   | C92Z2   | C9300   | C9301   | C9302   | C9310   | C9311   |
| C9312           | C9330   | C9331   | C9390   | C9391   | C9392   | C93Z0   | C93Z1   |

| 88289                                                         | 1 per day any provider  |
| <b>Molecular Cytogenetics Procedure Codes and Limitations</b> |                         |
| 88271                                                         | 16 per provider per day |
| 88272                                                         | 10 per provider per day |
| 88273                                                         | 3 per provider per day  |
| 88274                                                         | 5 per provider per day  |
| 88275                                                         | 10 per provider per day |
| <b>Interpretation and Report Procedure Code</b>               |                         |
| 88291                                                         | As medically necessary  |

### 9.2.42.7 Maternal Serum Alpha-Fetoprotein (MSAFP)

MSAFP may be reimbursed once per pregnancy per provider for all pregnant women eligible for Medicaid. For additional services, payment is allowed with documentation attached to the claim. Procedure code 82105 should be used for MSAFP.

### 9.2.43 Pharmacogenetics

Pharmacogenetic testing of cytochrome p450 (CYP450) metabolic pathway may be considered medically necessary only if the results of the testing are necessary to differentiate between treatment options.

The use of pharmacogenetics may be considered medically necessary once in a lifetime to determine effective response to drug therapy for the following:

| Procedure Code | Drug Treatment                                     | Diagnosis Restriction | Prior Authorization         |
|----------------|----------------------------------------------------|-----------------------|-----------------------------|
| 81225          | Clopidogrel                                        |                       | Required                    |
| 81226          | Eliglustat                                         | E7522                 | Required for repeat testing |
|                | Tetrabenzine in a dosage greater than 50mg per day | G10                   |                             |
| 81227          | Warfarin                                           |                       | Required                    |

#### 9.2.43.1 Testing of Polymorphic 2C19

Pharmacogenetics testing of polymorphic 2C9 (procedure code 81227) may be considered for clopidogrel treatment and requires prior authorization and may be considered medically necessary when all of the following conditions are met:

- The client has never received genetic testing of the 2C19 alleles.
- The client has never received clopidogrel treatment.
- The clopidogrel treatment will be used for one of the following diseases or conditions:
  - ST elevated and non-ST elevated myocardial infarction (STEMI and NSTEMI)

- Subsequent STEMI and NSTEMI
- Dressler's syndrome
- Unstable angina
- Cerebral infarction due to embolism of cerebral arteries
- Occlusion and stenosis of cerebral arteries, not resulting in cerebral infarction
- Peripheral vascular disease, including unspecified

**Note:** *The routine use of genetic testing to screen patients treated with clopidogrel who are undergoing percutaneous coronary intervention (PCI) is not a benefit of Texas Medicaid.*

### **9.2.43.2 Testing of Polymorphic 2D6**

Pharmacogenetics testing of polymorphic 2D6 (procedure code 81226) may be considered medically necessary when all of the following conditions are met:

- Group one:
  - The client has never received genetic testing of the 2D6 alleles
  - The client has a diagnosis of Gaucher disease type 1
  - Treatment with eliglustat (Cerdelga®) is being considered
- Group two:
  - The client has never received genetic testing of the 2D6 alleles
  - The client has a diagnosis of Huntington's disease
  - Treatment with tetrabenzine (Xenazine®) is being considered in a dosage greater than 50mg per day.

Prior authorization is not required for the initial pharmacogenetic testing of polymorphic 2D6 (procedure code 81226) that is performed on a client. Prior authorization is required for repeat testing.

### **9.2.43.3 Testing of Polymorphic 2C9**

Pharmacogenetics testing of polymorphic 2C9 (procedure code 81227) requires prior authorization and may be considered for warfarin treatment and may be considered medically necessary when all of the following conditions are met:

- The client has never received genetic testing of the 2C9 alleles
- The client has never received warfarin (vitamin K antagonists) treatment
- The warfarin treatment will be used for one of the following diseases or conditions:
  - Irregular heartbeat or rhythm
  - Prosthetic (replacement or mechanical) heart valves
  - Myocardial infarction
  - Risk of venous thrombosis (swelling and blood clot in a vein)
  - Risk of pulmonary embolism (a blood clot in the lung)

### **9.2.43.4 Prior Authorization Requirements**

Prior authorization is required for requests for pharmacogenetic testing for more than once in a lifetime. Prior authorization requests must be submitted on the Special Medical Prior Authorization (SMPA) Request Form. The form must be completed, signed, dated, and submitted by the prescribing or ordering provider.

Prior authorization requests from laboratories will not be processed. The requesting provider must share the prior authorization number with the laboratory submitting the claim.

The prior authorization request must include the following:

- Laboratory NPI in section D of the SMPA Request Form
- Proposed or current treatment plan, including the drug name, dosage, and frequency that support the medical necessity of the service requested
  - This information may be documented in the “Statement of medical necessity” field under Section C of the SMPA Request Form or submitted separately with the prior authorization request.
- For prior authorization of procedure code 81225, the ordering provider must include a statement on the SMPA Request Form attesting that the client has never received clopidogrel treatment.
- For prior authorization of procedure code 81227, the ordering provider must include a statement on the SMPA Request Form attesting that the client has never received warfarin treatment.

Prior authorization requests to repeat the same test (procedure code 81225, 81226, or 81227) will be reviewed by the medical director when one of the following criteria is met:

- The client has Huntington’s disease and a history of pharmacogenetic testing of 2D6 (procedure code 81226) for tetrabenzine treatment, and the new request is for the same testing of 2D6 but for eliglustat to treat Gaucher disease type 1.
- The client has Gaucher disease type 1 and a history of pharmacogenetic testing of 2D6 (procedure code 81226) for eliglustat treatment, and the new request is for the same testing of 2D6 but for tetrabenzine to treat Huntington’s disease.
- Previous test results are unavailable. Every reasonable effort must be made to obtain the test results from the client’s provider or laboratory who previously ordered or conducted testing. Documentation of these efforts must be submitted with the prior authorization request.

### **9.2.43.5 Exclusions**

The following services are not a benefit of Texas Medicaid:

- Pharmacogenetics tests of polymorphisms in a p450 superfamily other than 2D6, 2C19, or 2C9, which are performed for the purpose of aiding in the choice of drug or dose to increase efficacy or avoid toxicity, as they are considered experimental and investigational
- The routine clinical use of genetic testing to screen patients treated with clopidogrel who are undergoing percutaneous coronary intervention (PCI)
- The use of any of the 2D6, 2C19, or 2C9 tests for the following conditions, drugs, or treatments:
  - Opioid pain medicines (codeine, oxycodone, hydrocodone, tramadol, fentanyl, and methadone)
  - Selective serotonin reuptake inhibitors (SSRIs)
  - Selective norepinephrine reuptake inhibitors (SNRIs)
  - Beta blockers
  - Selective tricyclic antidepressants
  - Selective antipsychotic drugs
  - Efavirenz and other antiretroviral therapies for human immunodeficiency virus (HIV) infection
  - Immunosuppressants for organ transplantation
  - Aricept® (donepezil) for individuals with Alzheimer’s disease

- p450 polymorphisms test panels for any of the 3 alleles 2C19, 2D6, or 2C9

### 9.2.44 Lung Volume Reduction Surgery (LVRS)

LVRS is a benefit for clients who are not high risk but have a presence of severe, upper-lobe emphysema (as defined by radiologist assessment of upper-lobe predominance on CT scan) or who are not high risk but have a presence of severe, non-upper-lobe emphysema with low exercise capacity.

**Note:** *Clients who have low exercise capacity are those whose maximal exercise capacity is at or below 25 watts for women and 40 watts for men after completion of the pre-operative therapeutic program in preparation for LVRS. Exercise capacity is measured by incremental, maximal, symptom-limited exercise with a cycle ergometer utilizing a 5- or 10-watt-per-minute ramp on 30-percent oxygen after 3 minutes of unloaded pedaling.*

LVRS must be performed in a facility that meets at least one of the following requirements:

- Certified under the Disease Specific Care Certification Program for LVRS by the Joint Commission on Accreditation of Health Care Organization
- Approved by Medicare as a lung or heart-lung transplant facility

The surgery must be both preceded and followed by a program of diagnostic and therapeutic services that are consistent with those provided in the National Emphysema Treatment Trial (NETT) and designed to maximize the client's potential to successfully undergo and recover from surgery. The program must meet all of the following requirements:

- Include a 6- to 10-week series of at least 16, and no more than 20, pre-operative sessions, each lasting a minimum of 2 hours
- Include at least 6, and no more than 10, post-operative sessions, each lasting a minimum of 2 hours, within 8 to 9 weeks after the LVRS
- Be consistent with the care plan that was developed by the treating physician following the performance of a comprehensive evaluation of the client's medical, psychosocial, and nutritional needs
- Be arranged, monitored, and performed under the coordination of the facility where the surgery takes place

Clients must have surgical clearance by a licensed cardiologist for any of the following conditions:

- Unstable angina
- Left ventricular ejection fraction (LVEF) cannot be estimated from the echocardiogram
- LVEF less than 45 percent
- Dobutamine-radionuclide cardiac scan indicates coronary artery disease or ventricular dysfunction
- Arrhythmia (more than 5 premature ventricular contractions (PVC) per minute)
- Cardiac rhythm other than sinus
- PVCs on electrocardiogram (EKG) at rest

For clients with cardiac ejection fraction less than 45 percent, there must be no history of congestive heart failure or myocardial infarction within six months of consideration for surgery.

Clients must have surgical clearance by a licensed pulmonologist, thoracic surgeon, and anesthesiologist after completion of pre-operative rehabilitation.

Procedure codes 32491, G0302, G0303, G0304, and G0305 are limited to one per rolling year per client for any provider.

Pre-operative pulmonary rehabilitation services for preparation for LVRS (procedure codes G0302, G0303, and G0304) and post-discharge pulmonary surgery services LVRS (procedure code G0305) will be restricted to diagnosis codes J430, J431, J432, J438, and J983.

Procedure code G0305 may be reimbursed only if a claim for LVRS (procedure code 32491) has been submitted within the past 12 months.

#### **9.2.44.1 Prior Authorization for Lung Volume Reduction Surgery**

LVRS must be prior authorized and is limited to clients who have severe emphysema, disabling dyspnea, and evidence of severe air trapping. The following documentation must be submitted with the request for prior authorization:

- The client's history and physical examination is consistent with emphysema
- BMI less than 31.1 kg/m<sup>2</sup> (men) or less than 32.3 kg/m<sup>2</sup> (women)
- Pulmonary status that is stable with less than 20 mg prednisone (or equivalent) per day
- A radiographic high resolution computer tomography (HRCT) scan has been conducted that shows evidence of bilateral emphysema.
- The forced expiratory volume in one second (FEV1) (maximum of pre- and postbronchodilator values) is less than or equal to 45 percent of the predicted value. If the client is 70 years of age and older, FEV1 is 15 percent of the predicted value or more.
- The total lung capacity (TLC) greater than 100 percent predicted postbronchodilator
- Residual volume (RV) greater than 150 percent predicted postbronchodilator found on prerehabilitation pulmonary function study.
- Arterial blood gas level (pre-rehabilitation):
  - Partial pressure of carbon dioxide (PaCO<sub>2</sub>) less than or equal to 60 mm Hg (PaCO<sub>2</sub> less than or equal to 55 mm Hg if one mile above sea level)
  - Partial pressure of oxygen (PaO<sub>2</sub>) greater than or equal to 45 mm Hg on room air (PaO<sub>2</sub> greater than or equal to 30 mm Hg if one mile above sea level)
- The plasma cotinine is less than or equal to 13.7 ng/ml (if the client is not using nicotine products) or the carboxyhemoglobin is less than or equal to 2.5 percent (if the client is using nicotine products).
- Nonsmoking for four months prior to initial interview and throughout evaluation for surgery
- Successful 6-minute walk test equal to or greater than 140 meters following pre-operative rehabilitation
- Successful completion of three minute unloaded pedaling in an exercise tolerance test both before and after pre-operative rehabilitation

To complete the prior authorization process, a provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

- Requisition forms from the laboratory are not sufficient for verification of the personal and family history.
- Medical documentation that is submitted by the physician must verify the client's diagnosis or family history.

Prior authorization is not required for the associated preoperative pulmonary surgery services for preparation for LVRS (procedure codes G0302, G0303, and G0304) or the associated postdischarge pulmonary surgery services after LVRS (procedure code G0305).

### 9.2.44.1.1 Noncovered Conditions

LQRS is not a benefit in any of the following clinical circumstances:

- A client with characteristics that carry a high risk for perioperative morbidity and/or mortality
- A disease that is unsuitable for LQRS
- A medical condition or other circumstance that makes it likely that the client will be unable to complete the preoperative and postoperative pulmonary diagnostic and therapeutic program required for surgery
- The client presents with FEV1 less than or equal to 20 percent of predicted value, and either a homogeneous distribution of emphysema on the CT scan or a carbon monoxide diffusing capacity of less than or equal to 20 percent of predicted value (a high-risk group identified in October 2001 by the NETT)
- The client satisfies the criteria outlined above and has severe, non-upper-lobe emphysema with a high-exercise capacity. High-exercise capacity is defined as a maximal workload at the completion of the preoperative diagnostic and therapeutic program that is above 25 watts for women or 40 watts for men (under the measurement conditions for cycle ergometry).
- A previous LQRS (laser or excision) on the same lung
- A pleural or interstitial disease which precludes surgery
- A giant bulla (greater than 1/3 the volume of the lung in which the bulla is located)
- A clinically significant bronchiectasis
- A pulmonary nodule requiring surgery
- A previous lobectomy
- Uncontrolled hypertension (systolic greater than 200 mm Hg or diastolic greater than 110 mm Hg)
- Oxygen requirement greater than 6 liters per minute during resting to keep oxygen saturation greater than or equal to 90 percent
- A history of recurrent infections with clinically significant production of sputum
- Unplanned weight loss greater than 10 percent within 3 months before the consideration of surgery
- Pulmonary hypertension, defined as the mean pulmonary artery pressure of 35 mmHg or greater on the right heart catheterization or peak systolic pulmonary artery pressure of 45 mmHg or greater. Right heart catheterization is required to rule out pulmonary hypertension if the peak systolic pulmonary artery pressure is greater than 45 mmHg on an echocardiogram
- Resting bradycardia (less than 50 beats per minute)
- Frequent multifocal premature ventricular contractions (PVCs) of complex ventricular arrhythmia or sustained supraventricular tachycardia (SVT)
- Evidence of a systemic disease or neoplasia that is expected to compromise survival

### 9.2.45 Diagnostic and Therapeutic Breast Procedures

Diagnostic, mastectomy, and breast reconstruction procedures are benefits of Texas Medicaid.

These are physician-directed services including, but not limited to diagnostic and surgical breast procedures provided by physicians in the office, outpatient, or inpatient hospital settings, and external breast prostheses provided by durable medical equipment (DME) providers in the home setting.

Categories of service include:

- Diagnostic breast procedures

- Mastectomy
- Reconstructive breast procedures
- Treatment of complications of breast reconstruction
- External breast prostheses

**9.2.45.1 Diagnostic Procedures**

Diagnostic breast procedures for a condition or malignancy of the breast may include:

- Puncture aspiration
- Mastotomy
- Injection procedure for ductogram or galactogram
- Percutaneous biopsy, with or without imaging guidance
- Incisional biopsy
- Nipple exploration
- Excision of the following:
  - Lactiferous duct fistula
  - Benign or malignant breast lesion
  - Chest wall tumor

The following procedure codes may be reimbursed for diagnostic breast procedures:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 19000           | 19001 | 19020 | 19030 | 19081 | 19082 | 19083 | 19084 | 19085 | 19086 |
| 19100           | 19101 | 19110 | 19112 | 19120 | 19125 | 19126 | 19281 | 19282 | 19283 |
| 19284           | 19285 | 19286 | 19287 | 19288 |       |       |       |       |       |

The following services are not benefits of Texas Medicaid:

- Mastectomy for a diagnosis of fibrocystic disease in the absence of documented risk factors.
- Cosmetic services performed primarily to improve appearance.
- Commercial or “decorative” tattooing.
- Replacement of external breast prostheses when the damage is due to abuse or neglect by the client, client’s family, or the caregiver.

**9.2.45.2 Therapeutic Procedures**

**9.2.45.2.1 Mastectomy Procedures**

Mastectomy and partial mastectomy (e.g., lumpectomy, tylectomy, quadrantectomy, and segmentectomy) are benefits when it is medically necessary to remove a breast or portion of a breast for conditions including, but not limited to:

- Developmental abnormality
- Congenital defect
- Trauma or injury to chest wall
- Primary or secondary malignancy of the breast
- Carcinoma in situ of the breast

The following procedure codes for mastectomy are benefits of Texas Medicaid:

| Procedure Codes |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|
| 19301           | 19302 | 19303 | 19305 | 19306 | 19307 |

Procedure codes 19301, 19302, 19303, 19305, 19306, and 19307 may be reimbursed without prior authorization for services rendered to male or female clients who are 18 years of age and older.

Prior authorization is required for services rendered to clients who are 17 years of age and younger.

Procedure codes 19303, 19305, 19306, and 19307 are limited to 1 service per breast per lifetime.

9.2.45.2.2 Prophylactic Mastectomy

Prophylactic mastectomy is a benefit after a thorough assessment of a client’s unique risk factors, health, and the level of concern. Prophylactic mastectomy is limited to clients who are at moderate- to high-risk for the development of breast cancer.

Moderate- to high-risk clients are those who meet one or more of the following criteria for development of breast cancer:

- Current or previous diagnosis of breast cancer
- Family history of breast cancer in mother, sister, or daughter, especially before the age of 50
- Presence of any of the following genetic mutations:
  - Breast cancer gene 1 (BRCA1)
  - Breast cancer gene 2 (BRCA2)
  - Tumor protein 53 (TP 53)
  - Phosphatase and tensin homolog (PTEN)
- Lobular carcinoma in situ (LCIS)
- Radiation therapy to the chest before a client reaches 30 years of age

**Referto:** Subsection 3.3 \*, “Breast Cancer Gene 1 and 2 (BRCA) Testing” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Documentation that supports medical necessity for prophylactic mastectomy must include the information listed above.

Documentation that as a candidate for prophylactic mastectomy, the client has undergone counseling regarding cancer risks. Counseling must include assessment of all of the following:

- The client’s ability to understand the risks and long-term implications of the surgical procedure, and
- The client’s informed choice to proceed with the surgical procedure.

9.2.45.2.3 Mastectomy for Pubertal Gynecomastia

Mastectomy for pubertal gynecomastia is a benefit with prior authorization for males who are 20 years of age and younger. Procedure code 19300 may be reimbursed for mastectomy for pubertal gynecomastia.

The following documentation must be submitted with the prior authorization request for procedure code 19300:

- The gynecomastia classification (grade II, III, or IV) as defined by the American Society of Plastic Surgeons classification.
- Evidence that puberty is near completion, as indicated by the following:

- 95 percent of adult height based on bone age, and
- Tanner stage V has been achieved.
- Evidence that the client has been off gynecomastia inducing drugs or other substances for a minimum of one year when this is identified as the cause of the gynecomastia.
- Evidence of resolution as supported by appropriate test results and treatment for hormonal causes, including hyperthyroidism, estrogen excess, prolactinomas, and hypogonadism, for a minimum of one year when identified as the cause of the gynecomastia.
- Evidence of a psychiatric assessment performed by a psychiatrist or psychologist.
- Client's history and treatment plan including planned surgical procedure and timelines.
- Identification of which breast or breasts, require mastectomy.

Documentation that supports medical necessity for mastectomy for pubertal gynecomastia must be maintained in the client's medical record, and must include the following:

- A complete medical and family history, including:
  - Gynecomastia classification
  - Bone age
  - Tanner stage
  - Use of any gynecomastia inducing drugs or substances and date last ingested
  - Hormonal causes of gynecomastia, treatment, and length of treatment
  - Psychiatric assessment performed by a psychiatrist or psychologist and outcome
  - Affected breast or breasts
- A thorough physical examination
- Medically indicated laboratory testing and any other testing including results

### **9.2.45.3 Breast Reconstruction**

Breast reconstruction may be performed in a single stage or several stages. Breast reconstruction is a benefit when all of the following criteria are met:

- The client has a documented history of one or more of the following:
  - Mastectomy
  - Congenital defect
  - Developmental abnormality
  - Trauma or injury to the chest wall
- The client meets age and gender criteria for the requested procedure.
- The physician has documented a treatment plan in the client's medical record that addresses the recommended breast reconstruction.
- Reconstruction to attain symmetry is required and may include a surgical procedure to the contralateral breast and may be either a reduction or an augmentation.

Procedure options for breast reconstruction following a mastectomy include, but are not limited to the following:

- Superficial inferior epigastric artery (SIEA) flap
- Deep inferior epigastric artery (DIEP) flap

- Transverse rectus abdominis myocutaneous (TRAM) flap
- Breast implants (saline or silicone)
- Reduction mammoplasty
- Mastopexy
- Reconstruction of the nipple or areola (small flaps)
- Tattooing to correct color defects of the skin
- Treatment for complications of breast reconstruction

Documentation that supports medical necessity for breast reconstruction, including tattooing, must include the following:

- Diagnosis resulting in the need for breast reconstruction,
- Date of mastectomy, when appropriate,
- Date of any previous breast reconstruction procedures, when appropriate,
- Treatment plan to include planned surgical procedures and timeline for completion, and
- When appropriate, identification of the complication.

All Medicaid services, including breast reconstruction after breast cancer surgery, are covered for Medicaid Breast and Cervical Cancer (MBCC) clients who are receiving active cancer treatment. “Active treatment” is defined as medical treatment following a cancer diagnosis that is intended to cure or otherwise treat a diagnosed cancer.

Active treatment may include some or all of the following:

- Surgery
- Chemotherapy
- Radiotherapy
- Medication (e.g., ongoing hormonal treatments for estrogen and progesterone breast cancer)
- Active disease surveillance for triple negative receptor breast cancer

Reconstructive surgery (e.g., breast reconstruction) is considered “active treatment” if it is intended to permanently correct a physical condition resulting from either the diagnosed cancer or the treatment of the diagnosed cancer.

Ongoing treatment of a persistent condition resulting from a diagnosed cancer or treatment of a diagnosed cancer is not considered “active treatment” if cancer is no longer present or in need of treatment.

The following breast reconstruction procedure codes may be reimbursed without prior authorization for services rendered to clients who are 18 years of age and older:

| Procedure Codes                               |       |        |        |        |        |       |       |        |       |
|-----------------------------------------------|-------|--------|--------|--------|--------|-------|-------|--------|-------|
| 11970                                         | 11971 | 19316* | 19325* | 19340* | 19342* | 19350 | 19355 | 19357* | 19361 |
| 19364                                         | 19367 | 19368  | 19369  | 19396* | S2068  |       |       |        |       |
| *Procedure codes are limited to females only. |       |        |        |        |        |       |       |        |       |

Prior authorization is required for services rendered to clients who are 17 years of age and younger or when the client does not meet gender or age criteria.

Procedure codes 11920, 11921, and 11922 may be reimbursed when performed as part of breast reconstruction.

Breast reconstruction claims denied for no history of previous mastectomy may be appealed with supporting documentation indicating the date of mastectomy, or the identified trauma, injury, or congenital or developmental abnormality.

9.2.45.3.1      Tattooing to Correct Color Defects of the Skin

Tattooing to correct color defects of the skin (procedure codes 11920, 11921, and 11922) are limited to two services per lifetime.

Tattooing claims denied for no history of breast reconstruction may be appealed with supporting documentation indicating the date of breast reconstruction, or the identified trauma, injury, or congenital or developmental abnormality.

9.2.45.3.2      Treatment for Complications of Breast Reconstruction

The treatment of complications related to breast reconstruction may be reimbursed using procedure codes 19328, 19330, 19370, 19371, and 19380.

Procedure codes 19328, 19330, 19370, and 19371 may be reimbursed for services rendered to female clients only.

9.2.45.3.3      Chest Wall Procedures

Excision of chest wall tumors may be reimbursed using procedure codes 21601, 21602, and 21603.

Procedure code 21603 is limited to once per lifetime.

9.2.45.3.4      External Breast Prostheses

External breast prostheses are available through a durable medical equipment (DME) provider for a female client with a history of a medically necessary mastectomy procedure.

The following procedure codes may be reimbursed for external breast prostheses services rendered to female clients of any age:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| L8000           | L8001 | L8002 | L8015 | L8020 | L8030 | L8031 | L8032 | L8033 | L8035 |
| L8039           |       |       |       |       |       |       |       |       |       |

To be considered for reimbursement, an LT or RT modifier must be appropriately appended to the submitted diagnostic and therapeutic breast procedure codes or external breast prostheses procedure codes.

The external breast prosthesis procedure codes are limited as follows:

| Procedure Code | Limitation                       |
|----------------|----------------------------------|
| L8000          | 4 per rolling year               |
| L8001          | 4 per rolling year, per modifier |
| L8002          | 4 per rolling year               |
| L8015          | 2 per rolling year               |
| L8020          | 1 per 6 rolling months           |
| L8030          | per 2 rolling years              |
| L8031          | per 2 rolling years              |
| L8032          | 8 per rolling year               |

| Procedure Code | Limitation                   |
|----------------|------------------------------|
| L8033          | 8 per rolling year           |
| L8035          | Requires prior authorization |
| L8039          | Requires prior authorization |

Replacement of external breast prostheses may be considered at any time, through the prior authorization with documentation.

For a new or replacement external breast prosthesis procedure code outside the limitations, all of the following documentation must be submitted with the prior authorization request:

- The client's diagnosis
- Documentation of medical necessity for the requested prosthesis
- Documentation indicating the reason for recommending the requested prosthesis

When requesting a prior authorization for procedure code L8035 (custom prosthesis), all of the following documentation must be submitted with the prior authorization request:

- The client's diagnosis
- Documentation of medical necessity for the requested prosthesis
- Documentation indicating the reason for recommending the requested prosthesis

When requesting a prior authorization for procedure code L8039 (other prosthesis), all of the following documentation must be submitted with the prior authorization request:

- A clear, concise description of the breast prosthesis requested
- Reason for recommending the requested prosthesis
- A CPT or HCPCS procedure code, which is comparable to the procedure being requested
- Documentation that this breast prosthesis is not investigational or experimental
- The provider's intended fee for the requested prosthesis

#### **9.2.45.4 Prior Authorization Requirements for Diagnostic and Therapeutic Breast Procedures**

Prior authorization is not required for the following when all of the following criteria are met:

- The procedure is a mastectomy or breast reconstruction for clients who are 18 year of age or older.
- The request is for one of the following external breast prosthesis procedure codes: L8000, L8001, L8002, L8015, L8020, or L8030.
- The procedure is for partial mastectomy procedure codes 19301 and 19302 for clients of any age.

Prior authorization is required for the following:

- Mastectomy or breast reconstruction when the client is 17 years of age or younger, or does not meet gender criteria
- Mastectomy for pubertal gynecomastia
- Procedure code 19499 (unlisted procedure)
- External breast prosthesis procedure codes L8035 (custom prosthesis) and L8039 (other prosthesis)
- Any request for new or replacement external breast prosthesis outside of the limitations

#### 9.2.45.4.1 Unlisted Breast Procedure

All of the following documentation must be submitted for procedure code 19499 with the prior authorization request:

- A clear, concise description of the procedure to be performed
- Reason for recommending this particular procedure
- A Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code, which is comparable to the procedure being requested
- Documentation that this procedure is not investigational or experimental
- Place of service the procedure is to be performed
- The provider's intended fee for this procedure

#### 9.2.45.4.2 Documentation Requirements

In addition to documentation requirements outlined in the "Prior Authorization Requirements" section above, the following requirements apply:

- All services are subject to retrospective review. Documentation in the client's medical record must be maintained by the physician and must support the medical necessity for the services provided.
- Services not supported by documentation are subject to recoupment.

### 9.2.46 Neurostimulators

Neurostimulator and neuromuscular stimulator procedures and the rental or purchase of devices and associated supplies, such as leads and form fitting conductive garments are a benefit of Texas Medicaid when medically necessary.

Durable medical equipment (DME) is defined as medical equipment/appliances that are manufactured to withstand repeated use, ordered by a physician or allowed practitioner for use in the home, and required to correct or ameliorate the client's disability, condition, or illness. Since there is no single authority (such as a federal agency) that confers the official status of "durable medical equipment" on any device or product, the Health and Human Services Commission (HHSC) retains the right to make such determinations with regard to DME provided by Texas Medicaid. DME provided by Texas Medicaid must either have a well-established history of efficacy, or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment corrects or ameliorates a Medicaid-eligible medical condition or functional disability.

**Note:** *An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (CNP), or clinical nurse specialist (CNS).*

Neurostimulator devices are considered DME, so providers must complete both the Home Health (Title XIX) DME/Medical Supplies Physician Order Form (Title XIX Form) to prescribe the DME and the DME Certification and Receipt Form to show receipt of the DME by the client. Both forms must be maintained in the client's medical record.

**Referto:** Subsection 2.2.2, "Durable Medical Equipment (DME) and Supplies" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for more information about DME.

Rental of equipment includes all necessary accessories, supplies, adjustments, repairs, and replacement parts.

Items and/or services addressed in the sections below are either reimbursed at a maximum fee determined by HHSC or are manually priced. If an item is manually priced, the manufacturer’s suggested retail pricing (MSRP) must be submitted for consideration of rental or purchase with the appropriate procedure codes. Manually priced items are reimbursed at the MSRP minus a discount (18 percent) as determined by HHSC.

**9.2.46.1 Prior Authorization for Neurostimulators**

All devices and related procedures for the initial application or surgical implantation of the stimulator or neuromuscular stimulator device require prior authorization.

A completed Special Medical Prior Authorization (SMPA) Request Form prescribing the device and related procedures must be signed and dated by a physician familiar with the client before requesting prior authorization for the device and related procedures. The completed SMPA Request Form must include the procedure codes and quantities for services requested.

***Note:** It is not necessary to include the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form when submitting the SMPA Prior Authorization Request Form.*

The completed SMPA Request Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client’s medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client’s medical record.

To complete the prior authorization process by paper, the requesting provider must fax or mail the completed form to the SMPA Department. To complete the prior authorization process electronically, the requesting provider must submit the prior authorization requirements through any approved electronic methods.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the equipment, supplies and services requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the equipment and supplies.

A neurostimulator device that has been purchased is anticipated to last a maximum of five years and may be considered for replacement when five years have passed and/or the equipment is no longer repairable. At that time, replacement of the device will be considered. Replacement devices require prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

**9.2.46.2 Neuromuscular Electrical Stimulation (NMES)**

NMES application and the rental or purchase of devices and conductive garments are a benefit of Texas Medicaid when medically necessary and prior authorized. Prior authorization requests for NMES must include documentation of a spinal cord injury or disuse atrophy that is refractory to conventional therapy.

NMES may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|--|
| 64580           | E0731 | E0745 | E0762 | E0764 | A4556 | A4557 | A4560 | A4595 |  |

#### 9.2.46.2.1 NMES Rental

The rental of a NMES device may be considered before purchase and is limited to a one-month trial period with consideration for one additional month's trial with documentation of medical necessity. Supplies are considered to be part of the rental and will not be separately reimbursed. Garments may be considered for reimbursement during the rental period when medically necessary.

#### 9.2.46.2.2 NMES Purchase

The purchase of a NMES device is limited to once per five years, and may be reimbursed when there is documentation of successful test stimulation (during rental or other therapeutic period) that showed improvement as measured by the following:

- A demonstrated increase in range of motion.
- The client's improved ability to complete activities of daily living or perform activities outside the home.

Garments may be considered for reimbursement during the purchase period when medically necessary.

#### 9.2.46.2.3 NMES for Muscle Atrophy

NMES may be reimbursed when used to treat muscle disuse atrophy when brain, spinal cord, and peripheral nerve supply to the muscle is intact, as well as other non-neurological conditions. Examples of NMES treatment for non-neurological conditions include, but are not limited to, casting or splinting of a limb, contracture due to scarring of soft tissue as in burn lesions, and hip replacement surgery until orthotic training begins.

#### 9.2.46.2.4 NMES for Walking in Clients with Spinal Cord Injury (SCI)

The type of NMES that is used to enhance the ability to walk of SCI clients is commonly referred to as functional electrical stimulation (FES). These devices are surface units that use electrical impulses to activate paralyzed or weak muscles in precise sequence.

The use of NMES/FES is limited to SCI clients who have completed a training program which consists of at least 32 physical therapy sessions with the device over a period of three months.

The trial period of physical therapy will enable the treating physician or allowed practitioner to properly evaluate the client's ability to use NMES/FES devices frequently and for the long term.

Physical therapy necessary to perform this training must be directly performed by the physical therapist as part of a one-on-one training program. The goal of physical therapy must be to train SCI clients on the use of NMES/FES devices to achieve walking, not to reverse or retard muscle atrophy.

NMES/FES is a benefit for SCI clients who have all of the following characteristics:

- Clients with intact lower motor unit (L1 and below) (both muscle and peripheral nerve).
- Clients with muscle and joint stability for weight bearing at upper and lower extremities that can demonstrate balance and control to maintain an upright posture while standing independently for at least three minutes.
- Clients who demonstrate brisk muscle contraction to NMES and have sensory perception electrical stimulation sufficient for muscle contraction.
- Clients who possess high motivation, commitment, and cognitive ability to use such devices for ambulation, as established by provider interview and documentation.
- Clients who can transfer independently.
- Clients who can demonstrate hand and finger function to manipulate controls.
- Clients with at least six-month post recovery spinal cord injury and restorative surgery.

- Clients with hip and knee degenerative disease and no history of long bone fracture secondary to osteoporosis.

NMES and FES used for walking is not a benefit in SCI clients with any of the following:

- Cardiac pacemakers
- Severe scoliosis or severe osteoporosis
- Skin disease or cancer at area of stimulation
- Irreversible contracture
- Autonomic dysflexia

**9.2.46.3 Transcutaneous Electrical Nerve Stimulation (TENS)**

TENS involves the attachment of a transcutaneous nerve stimulator to the surface of the skin over the peripheral nerve to be stimulated.

TENS may be reimbursed for the treatment of acute postoperative pain or chronic pain that is refractory to conventional therapy.

TENS may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| E0720           | E0730 | E0731 | E0733 | E0736 | A4556 | A4557 | A4595 |  |  |

Procedure code E0733 requires prior authorization and is limited to diagnosis code G500.

Procedure code E0736 is limited to clients who are 18 years of age or older.

TENS is for the treatment of overactive bladder (OAB) and is limited to clients who have had the following:

- An evaluation that has been performed by an appropriate specialist, usually a urologist or urogynecologist, who has determined that the client is a candidate for posterior tibial nerve stimulation (PTNS)
- A medical record that includes the following documentation:
  - The client has been compliant with and has failed a trial of symptom-appropriate behavioral therapy of sufficient length to evaluate potential efficacy.
  - The client has been compliant with and has failed or been unable to tolerate a trial of at least two appropriate medications administered for four to eight weeks.
  - The client’s voiding diary shows continued findings of OAB.
  - The client has documented a willingness to attend in-office treatment sessions, to comply with behavioral therapies, and to continue to keep voiding diaries that include documentation of behavioral therapy compliance.

**9.2.46.3.1 TENS Rental**

Rental of a TENS device will be considered for prior authorization when there is documentation of a condition that indicates acute postoperative pain or chronic pain that is refractory to conventional therapy.

The rental of a TENS device is limited to one-month trial period with consideration for one additional month’s trial with documentation of medical necessity. Supplies, such as lead wires and electrodes, are considered to be part of the rental and will not be separately reimbursed. Garments may be considered during the rental period when medically necessary.

When the TENS device is rented for a trial period rather than supplied by the provider, the combined payment made for professional services and the rental of the stimulator must not exceed the amount which would be reimbursed for the total service, including the stimulator, if furnished by the provider alone.

#### **9.2.46.3.2 TENS Purchase**

The purchase of a TENS device is limited to once every five years and may be reimbursed with prior authorization when there is documentation of the following:

- A condition that indicates chronic pain that is refractory to conventional therapy.
- A successful test stimulation (during rental or other therapeutic period) that showed improvement as measured by demonstrated increase in range of motion.
- The client's improved ability to complete activities of daily living or perform activities outside the home.

#### **9.2.46.4 NMES and TENS Garments**

The rental of the NMES/TENS garment is not covered during the trial rental period unless the client has a documented skin problem prior to the start of the trial period, and HHSC or its designee determines that use of such an item is medically necessary for the client based on the documentation submitted.

The purchase of conductive garments for NMES/TENS devices may be considered when:

- The garment has been prescribed by a physician or allowed practitioner for use in providing covered NMES/TENS treatment.
- A NMES/TENS device has been purchased for the client's use.
- The conductive garment is necessary for one of the medical indications outlined below:
  - The client cannot manage without the conductive garment because there is such a large area or so many sites to be stimulated and the stimulation would have to be delivered so frequently that it is not feasible to use conventional electrodes, adhesive tapes, and lead wires.
  - The client cannot manage the treatment for chronic intractable pain without the conductive garment because the areas or sites to be stimulated are inaccessible with the use of conventional electrodes, adhesive tapes, and lead wires.
  - The client has a documented medical condition such as skin problems that preclude the application of conventional electrodes, adhesive tapes, and lead wires.

#### **9.2.46.5 NMES and TENS Supplies**

Supplies for purchased devices are limited as follows:

- Procedure code A4438 is limited to clients who are 18 years of age or older.
- Procedure codes A4541 and A4595 are limited to 1 per month.
- Procedure code A4541 is restricted to diagnosis code G500.
- If additional electrodes are required, procedure code A4556 may be considered for reimbursement at a maximum of 15 per month.
- If additional lead wires are required, procedure code A4557 may be considered for reimbursement at a maximum of 2 per month.
- Procedure code A4560 is limited to 1 unit every 12 weeks, or 4 units per year.

Supplies are included in the rental and will not be reimbursed separately.

Supply procedure codes A4438, A4541, A4556, A4557, A4560 or A4595 may be reimbursed for clients with a purchased device and a claims history of an NMES/TENS procedure within the last five years. Providers must maintain documentation in the client's medical record that a device has been purchased. Additional documentation such as the purchase date, serial number, and purchasing entity of the device may be required.

### 9.2.46.6 Diaphragm-Pacing Neuromuscular Stimulation

Diaphragm-pacing neuromuscular stimulation is a benefit of Texas Medicaid when medically necessary and prior authorized.

Diaphragm-pacing neuromuscular stimulation is the electrical stimulation to one or both of the phrenic nerves or to the phrenic motor point regions of the diaphragm muscles that cause contraction of one or both of the two hemidiaphragms rhythmically to produce inspiration.

Diaphragm-pacing neuromuscular stimulation implantation may be reimbursed when billed with the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 33276           | 33277 | 33278 | 33279 | 33280 | 33281 | 33287 | 33288 | 64575 | 64590 |
| 93150           | 93151 | 93153 |       |       |       |       |       |       |       |

#### 9.2.46.6.1 Prior Authorization for Diaphragm-Pacing Neuromuscular Stimulation

The surgical implantation of the diaphragm-pacing neuromuscular stimulator and purchase of a device are considered for prior authorization when medically necessary for individuals with severe, chronic respiratory failure that requires mechanical ventilation for any of the following reasons:

- Improvement of ventilatory function in stable, non-acute members with spinal cord injury (SCI) with high quadriplegia at or above C-3
- Alveolar hypoventilation, either primary or secondary to brainstem disorder
- Amyotrophic lateral sclerosis

Prior authorization for diaphragm-pacing neuromuscular stimulation may be considered with any of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| G1220           | G1222 | G1223 | G1224 | G1225 | G1229 | G128  | G129  |
| G4735           | G8250 | G8251 | G8252 | G8253 | G8254 | G8389 | J9610 |
| J9611           | J9612 | J9620 | J9621 | J9622 | R0681 | Z9911 |       |

All of the following criteria must be met:

- The phrenic nerves are viable
- Diaphragmatic function is sufficient to accommodate chronic stimulation
- Pulmonary function is known to be adequate
- The client has normal chest anatomy, a normal level of consciousness, and has the ability to participate in and complete the training and rehabilitation associated with the use of the device

### 9.2.46.7 Dorsal Column Neurostimulator (DCN)

DCN involves the surgical implantation of neurostimulator electrodes within the dura mater (endodural) or the percutaneous insertion of electrodes in the epidural space. The neurostimulator system stimulates pain-inhibiting nerve fibers, masking the sensation of pain with a tingling sensation (paresthesia).

DCN implantation may be reimbursed using procedure codes 63650, 63655, or 63685.

Conditions that may indicate chronic intractable pain include, but are not limited to, the following:

- Post-amputation “ghost” pain
- Cancer with bone metastasis
- Causalgia of upper/lower limb
- Herniated disc
- Radiculitis
- Spinal stenosis
- Spinal surgery
- Tic douloureux (trigeminal neuralgia)

#### 9.2.46.7.1 Prior Authorization for Dorsal Column Neurostimulators

DCN electrode implantation and the purchase of devices is a benefit of Texas Medicaid when medically necessary and prior authorized.

The surgical implantation of DCN device may be considered for prior authorization for clients who have chronic intractable pain with documentation that indicates the following:

- Other treatment modalities, including pharmacological, surgical, physical, and/or psychological therapies, have been tried and shown to be unsatisfactory, unsuitable, or contraindicated for the client.
- The client has undergone careful screening, evaluation, and diagnosis by a multidisciplinary team prior to implantation.
- There has been evidence of pain relief during a trial period for DCN with a temporarily implanted electrode or electrodes preceding the permanent implantation.

**Note:** *A trial period including device and supplies is considered part of DCN procedures and will not be separately reimbursed.*

- All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment, training, and the client’s follow-up are available.

#### 9.2.46.8 Gastric Electrical Stimulation (GES)

GES involves electrical stimulation of the lower stomach (antrum) with a fully implantable system that consists of two unipolar intramuscular leads (thin wires) and a neurostimulator device.

GES is a benefit of Texas Medicaid when medically necessary and prior authorized for the treatment of chronic intractable nausea and vomiting that is secondary to gastroparesis that has proven to be refractory to medical management.

GES may be reimbursed with procedure codes 43647, 43881, and 64590.

GES is a benefit for Texas Medicaid clients with the following conditions:

- Organic obstruction or pseudo-obstruction
- A primary eating or swallowing disorder
- Chemical dependency
- Pregnancy

9.2.46.8.1 Prior Authorization for GES

The surgical implantation of a GES and purchase of a device are considered for prior authorization for chronic intractable nausea and vomiting secondary to gastroparesis of diabetic or idiopathic etiology when all of the following criteria are met:

- Gastric emptying is significantly delayed as documented by standard scintigraphic imaging of solid food.
- Patient is refractory or intolerant of two out of three classes of prokinetic medications and two out of three antiemetic medications.
- The client’s nutritional status is sufficiently low that all of the following criteria for total parenteral nutrition are met:
  - Adequate trials of dietary adjustment, oral supplements, or tube enteral nutrition have demonstrated that the patient can receive no more than 30 percent of his/her caloric needs orally and/or by tube.
  - The patient must be in a stage of wasting as indicated by all of the following:
    - Weight is significantly less than normal body weight for a patient’s height and age in comparison with pre-illness weight.
    - Serum albumin is less than 3.4 grams.
    - BUN is less than 10 mg.
    - Phosphorus level is less than 2.5 mg.

9.2.46.9 Intracranial Neurostimulators

The surgical implantation, revision, and removal of intracranial deep brain stimulators (DBS) are a benefit for the relief of chronic intractable pain when more conservative methods, such as TENS, PENS, or pharmacological management have failed or were contraindicated.

Intracranial neurostimulation may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 61781           | 61850 | 61860 | 61863 | 61864 | 61867 | 61868 | 61885 | 61886 |

9.2.46.9.1 Prior Authorization for Intracranial Neurostimulators

Intracranial neurostimulation involves the stereotactic implantation of electrodes in the brain and is a benefit of Texas Medicaid when medically necessary and prior authorized.

The surgical implantation and purchase of an intracranial neurostimulation device may be considered for prior authorization for chronic intractable pain or treatment of intractable tremors.

Requests for prior authorization must include documentation of the following:

- Other treatment modalities, including pharmacological, surgical, physical, and psychological therapies, have been tried and shown to be unsatisfactory, unsuitable, or contraindicated for the client.
- The client has undergone careful screening, evaluation, and assessment by a multidisciplinary team prior to implantation.
- The client has reported pain relief with a temporarily implanted electrode preceding the permanent implantation.
- All the facilities, equipment, and support personnel required for the proper assessment, treatment, training, and client’s follow-up are available.

Prior authorization will not be given for the treatment of motor function disorders such as multiple sclerosis; however, the implantation, revision, and removal of deep brain stimulators may be reimbursed for the treatment of intractable tremors due to the following:

- Idiopathic Parkinson's disease
- Essential tremor

#### **9.2.46.10 Pelvic Floor Stimulation**

Purchase of a non-implantable pelvic floor stimulator (procedure code E0740) is a benefit of Texas Medicaid for the treatment of stress or urge incontinence in clients who have failed conservative treatment, such as Kegel exercises, behavior management, bladder training, or medication.

Purchase of the pelvic floor stimulator device is limited to once per five years. All accessories and supplies are considered part of the purchase price and are not reimbursed separately.

##### **9.2.46.10.1 Prior Authorization for Pelvic Floor Stimulation**

Prior authorization is required for the purchase of a pelvic floor stimulator device.

Documentation submitted with the prior authorization request must demonstrate that the client:

- Has a diagnosis of stress or urge incontinence.
- Has completed a six-month trial of pelvic muscles exercises with no significant clinical improvement.

#### **9.2.46.11 Percutaneous Electrical Nerve Stimulation (PENS)**

PENS is a benefit of Texas Medicaid when medically necessary and prior authorized. Devices and supplies are considered a part of the service and are not separately reimbursable.

PENS is a diagnostic procedure for the treatment of chronic pain involving the stimulation of peripheral nerves by a needle electrode inserted through the skin.

##### **9.2.46.11.1 Prior Authorization for PENS**

PENS services may be reimbursed with prior authorization for clients who meet the following criteria:

- The client has a diagnosis that indicates chronic pain, which is refractory to conventional therapy.
- Treatment with TENS has failed or is contraindicated for the client.

PENS may be reimbursed using the following procedure codes: 64553, 64555, 64590, 64596, 64597, or 64598. The revision or removal of a peripheral neurostimulator used in PENS therapy may be reimbursed without prior authorization using procedure code 64595.

#### **9.2.46.12 Sacral Nerve Stimulators (SNS)**

SNS are a benefit of Texas Medicaid when medically necessary and prior authorized. SNS implantation may be reimbursed using procedure code 64561, 64581, or 64590.

SNS involves the use of pulse generators that transmit electrical impulses to the sacral nerves through a surgically implanted wire for treatment of urinary retention, urinary frequency, and urinary/fecal incontinence.

##### **9.2.46.12.1 Prior Authorization for SNS**

The surgical implantation of SNS and purchase of a device may be considered for prior authorization with the following:

- Urinary incontinence secondary to urethral instability and/or detrusor muscle instability.
- Chronic voiding dysfunction.

- Non-obstructive urinary retention.
- Fecal incontinence.

Additionally, the medical record of the client must have documentation of the following:

- The urinary retention, urinary frequency, and urinary/fecal incontinence are refractory to conventional therapy (documented behavioral, pharmacological, and/or surgical corrective therapy).
- The client is an appropriate surgical candidate such that implantation with anesthesia can occur.

#### **9.2.46.13 Vagal Nerve Stimulators (VNS)**

VNS are a benefit of Texas Medicaid when medically necessary and prior authorized, for the treatment of intractable partial onset seizures.

VNS involves the use of devices that deliver electrical pulses to the cervical portion of the vagus nerve by an implanted generator.

##### **9.2.46.13.1 Prior Authorization for VNS**

The surgical implantation and purchase of VNS devices may be considered for prior authorization for clients with partial onset intractable seizures when there is failure, contraindication, or intolerance to all suitable medical and pharmacological management.

The surgical implantation of VNS may be reimbursed using procedure code 61885, 61886, 64553, or 64568.

VNS are not a benefit of Texas Medicaid in the following cases:

- For the treatment of clients with an absent left vagus nerve
- For the treatment of clients with depression
- For the treatment of clients with diseases or conditions with a poor prognosis or are progressively terminal in nature

Incapacities due to intellectual disabilities or cerebral palsy may confound the assessment of benefits resulting from VNS. When a diagnosis of intellectual disabilities or cerebral palsy exists, the treating physician must document in the client's medical record how VNS will measurably benefit the client in spite of intellectual disabilities or cerebral palsy.

#### **9.2.46.14 Hypoglossal Nerve Stimulators (HNS)**

Hypoglossal Nerve Stimulators (HNS) is a benefit of Texas Medicaid when medically necessary and prior authorized, for the treatment of obstructive sleep apnea (OSA) and seizures.

HNS involves the use of devices that deliver electrical pulses to the hypoglossal nerve by an implanted generator.

The surgical implantation of HNS may be reimbursed using procedure code 64582.

The revision or removal of an HNS may be reimbursed using procedure codes 64583 and 64584. Procedure codes 64583 and 64584 do not require prior authorization.

##### **9.2.46.14.1 Prior Authorization for HNS**

The surgical implantation of HNS (procedure code) and purchase of a device may be considered for prior authorization with documentation of the following criteria:

- Client has a documented diagnosis of OSA or seizures by a qualified health care provider.
- For an OSA diagnosis, documentation that continuous positive airway pressure (CPAP) compliance for a minimum of 1 month (5 nights per week for at least 4 hours per night) has not been successful or is unable to be tolerated.

- For an OSA diagnosis, absence of complete concentric collapse at the soft palate level as seen in a drug-induced sleep endoscopy (DISE) procedure.
- The client is an appropriate surgical candidate such that implantation with anesthesia can occur.

#### 9.2.46.15 Prior Authorization of Neurostimulator Devices Procedure Codes

The following device procedure codes may be reimbursed with prior authorization:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| L8681           | L8682 | L8683 | L8684 | L8685 | L8686 | L8687 | L8688 | L8689 | L8695 |

Neuromuscular devices and the implantation codes must be billed on the same day by any provider.

To identify the service as a VNS device, procedure code L8686 must be submitted with modifier TG. Only one similar device code may be reimbursed per date of service for any provider.

#### 9.2.46.16 Supplies for Neurostimulators

Supply procedure codes A4290, C1883, C1897, L8678, L8680, and L8696 may be reimbursed for clients with a purchased device and a claims history of a prior neurostimulator or neuromuscular stimulator implantation within the past five years. Providers must maintain documentation in the client's medical record that a device has been purchased. Additional documentation such as the purchase date, serial number and purchasing entity of the initial implantable device may be required. Supplies for implantable devices may be considered for reimbursement on appeal with documentation of a prior neurostimulator or a neuromuscular stimulator implantation procedure for clients with a history that is more than five years or for those who have a neurostimulator that was not received through Texas Medicaid.

To identify the service as a VNS implantable electrode, procedure code L8680 must be submitted with modifier TG.

#### 9.2.46.17 Electrocorticogram of Implanted Neurostimulator

Electrocorticogram (procedure code 95836) is a benefit of Texas Medicaid and may be reported only once per each 30 day period.

#### 9.2.46.18 Electronic Analysis for Neurostimulators

The following procedure codes may be reimbursed without prior authorization for the electronic analysis of the implanted neurostimulator and neuromuscular stimulation:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 95970           | 95971 | 95972 | 95976 | 95977 | 95980 | 95981 | 95982 | 95983 | 95984 |

#### 9.2.46.19 Revision or Removal of Neurostimulator Devices

The revision or removal of implantable neurostimulators may be reimbursed without prior authorization using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 43648           | 43882 | 61781 | 63661 | 63662 | 63663 | 63664 | 63688 | 61880 | 61888 |
| 64569           | 64570 | 64585 | 64595 |       |       |       |       |       |       |

#### 9.2.46.20 Noncovered Neurostimulator Services

The following services are not a benefit of Texas Medicaid:

- VNS is not a benefit when provided for the treatment of depression.

- Neurostimulation and neuromuscular stimulation services for indications other than those outlined above.

## 9.2.47 Newborn Services

The newborn period is defined as the time from birth through 28 days of life. This section addresses routine newborn care, attendance at delivery, newborn resuscitation, neonatal critical care, and intensive (noncritical) low birth weight services.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service and any modifier used when billing a claim.

All newborn E/M procedure codes must have a newborn outcome diagnosis code included on the claim. Modifier 25 may be used to identify a significant separately identifiable E/M provided on the same day by the same physician as a procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Physician standby (procedure code 99360) is not a benefit.

**Note:** Some of the services addressed in this section may also be used for care beyond 28 days of life.

**Referto:** Subsection 9.2.60, "Physician Evaluation and Management (E/M) Services" in this handbook.

**Referto:** Subsection 2.2.23.13, "Cardiorespiratory Monitor (CRM)" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (Vol. 2, *Provider Handbooks*) for authorization of cardiorespiratory monitors.

### 9.2.47.1 Circumcisions for Newborns

Texas Medicaid may provide reimbursement for circumcisions billed with procedure code 54150 or procedure code 54160.

### 9.2.47.2 Hospital Visits and Routine Care

The following procedure codes may be reimbursed for neonatal care and intensive care services:

| Service                                                                                                                                                                                                           | Procedure Code(s)                | Benefit(s) and Limitation(s)                                                                                                                                                                                                                           |

### 9.2.47.3 Newborn Hearing Screening

The newborn hearing screening procedure is a screening procedure, not diagnostic, and will not be reimbursed separately from the usual inpatient newborn delivery payment. Special investigations and examination codes are not appropriate for use with hearing screening of infants. For more information on newborn hearing screening, providers may contact:

Texas Early Hearing Detection and Intervention  
 PO Box 149347, MC-1918  
 Austin, TX. 78714-9347  
 1-512-458-7111, Ext. 2600  
[www.dshs.texas.gov/tehd](http://www.dshs.texas.gov/tehd)

**Referto:** Section 2, "Nonimplantable Hearing Aid Devices and Related Services" in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 4.3.12.2.3, "Hearing Screening" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for additional information about hearing screenings.

### 9.2.48 Occupational Therapy (OT) Services

Occupational therapy (OT) is a payable benefit to physicians.

**Referto:** Section 4, "Therapy Services Overview" in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about occupational therapy services provided by a physician.

### 9.2.49 Ophthalmology

When an ophthalmologist sees a client for a minor condition that does not require a complete eye exam, such as conjunctivitis, providers are to use the appropriate office E/M code.

Providers are to use the eye exam procedure codes with a diagnosis of ophthalmological disease or injury.

**Referto:** Subsection 4.3.5, “Vision Testing” in the *Vision and Hearing Services Handbook* (Vol. 2, *Provider Handbooks*).

**9.2.49.1 Corneal Transplants**

Corneal transplants are benefits of Texas Medicaid. Corneal transplants are subject to global surgery fee guidelines. Procedure codes 65710, 65730, 65750, 65755, 65756, and 65757 are used for this surgery.

Bioengineered cornea transplants remain investigational at this time and are not considered for reimbursement under Texas Medicaid.

Procurement of the cornea is not reimbursed separately.

**9.2.49.2 Eye Surgery by Laser**

Eye surgery by laser is a benefit of Texas Medicaid when medically necessary and meets the conditions and limitations stated in this section.

Authorization is not required for eye surgery by laser.

All procedure codes in this section are subject to multiple surgery guidelines. For bilateral procedures, the following modifiers must be added to the claim to indicate that the procedures were performed on the right and left eyes:

- Modifier RT to indicate the right eye
- Modifier LT to indicate the left eye

All procedures may be reimbursed only to physicians and are limited to reimbursement once every 90 days for the same eye with the exception of infants from birth through 23 months of age. Procedures performed on infants from birth through 23 months of age are not subject to any frequency restrictions.

**9.2.49.2.1 Other Eye Surgery Procedures**

**Anterior Segment of the Eye–The Cornea**

Laser surgery to the cornea by laser-assisted in situ keratomileusis (LASIK) or photorefractive keratectomy (PRK) for the purpose of correcting nearsightedness (myopia), farsightedness (hyperopia), or astigmatism is not a benefit of Texas Medicaid.

Reimbursement for laser surgery to the cornea, procedure codes 65450, 65855, and 65860 is limited to once every 90 days for the same eye.

**Anterior Segment of the Eye–The Iris, Ciliary Body**

Laser surgery to the anterior segment of the eye–the iris, ciliary body may be reimbursed only when billed with one of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 66600           | 66605 | 66710 | 66711 | 66761 | 66762 | 66770 |  |  |  |

Reimbursement for procedure codes 66600, 66605, 66710, 66711, 66761, 66762, and 66770 is limited to once every 90 days for the same eye.

Claims for iridectomy (66600, 66605, 66625, 66630, or 66635) or iridotomy (66500 or 66505) are not reimbursed when billed for the same date of service as a trabeculectomy (66170 or 66172). These claims are considered for review when filed on appeal with documentation of medical necessity. The iridectomy is considered part of a trabeculectomy. An iridectomy billed with any other eye surgery on the same day suspends for review.

An iridectomy is also considered part of certain types of cataract extractions. An iridectomy (66600 or 66605) is not reimbursed when billed for the same date of service as the cataract surgeries listed in the following table. The iridectomy is considered part of the cataract surgery. These claims are considered for review when filed on appeal with documentation of medical necessity.

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 65920           | 66840 | 66850 | 66852 | 66920 | 66930 | 66940 | 66983 | 66984 | 66985 |
| 66986           |       |       |       |       |       |       |       |       |       |

### Posterior Segment of the Eye–Retina or Choroid

Laser surgery to the retina or choroid may be reimbursed only when billed with one of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 67105           | 67107 | 67108 | 67110 | 67113 | 67145 | 67210 | 67220 | 67221 | 67225 |
| 67228           | 67229 | G0186 |       |       |       |       |       |       |       |

Procedure code 67229 is restricted to clients who are birth through 1 year of age.

When billed for the same date of service, same eye, any provider, procedure code 67031 will be denied as part of any of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 67036           | 67108 | 67110 | 67120 | 67121 | 67141 | 67145 | 67208 | 67210 | 67218 |
| 67227           | 67228 |       |       |       |       |       |       |       |       |

When billed for the same date of service, same eye, any provider, only one of the following procedure codes may be reimbursed: 67220, 67221, 67225, or G0186.

When billed for the same date of service, same eye, by any provider, procedure codes 67025, 67028, 67031, 67036, 67039, 67040, and 67105 will be denied as part of 67108.

### Posterior Segment of the Eye, Vitreous–Vitreotomy

Laser surgery to the vitreous may be reimbursed only when billed with one of the following procedure codes: 67031, 67039, 67040, and 67043.

Reimbursement for procedure codes 67031, 67039, 67040, and 67043 is limited to once every 90 days for the same eye.

When billed for the same date of service, same eye, any provider procedure code 67500 will be denied as part of 66821.

Procedure code 66821 is denied as part of 66830, 67031, and 67228.

Procedure codes 66820, 66984, 66985, and 67036 will pay according to multiple surgery guidelines when billed with procedure code 66821.

When billed for the same date of service, same eye, different provider procedure codes 66821, 67005, and 67010 will be denied as part of 67031.

When billed for the same date of service, same eye, any provider procedure code 67031 will be denied as part of any of the following procedure codes: 67036, 67108, 67110, 67120, 67121, 67208, 67218, 67227, and 67228.

9.2.49.3 Eye Surgery by Incision

The following restrictions apply to vitrectomy and cataract surgeries:

- Procedure codes 66500, 66505, 66605, 66625, 66630, and 66635 are denied as part of another procedure when billed with the following cataract surgeries: 65920, 66840, 66850, 66852, 66920, 66930, 66940, 66983, 66984, 66985, and 66986. Claims may be appealed with additional documentation to demonstrate the medical necessity.
- Procedure code 66020 is denied as part of another procedure when billed with any related eye surgery procedure code.
- Procedure code 67036 may be reimbursed when billed alone.
- Procedure code 67036 is denied as part of another procedure when billed with procedure codes 67039, 67040, 67041, 67042, 67043, or 67108.
- Procedure codes 67039 and 67040 are combined and reimbursed as procedure code 67108 when billed by the same provider for the same date of service.
- For clients who are 8 years of age and younger, the following cataract extraction and vitrectomy procedure codes, performed on the same eye, will be considered for payment per multiple surgery guidelines:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 66840           | 66850 | 66852 | 66920 | 66930 | 66940 | 66983 | 66984 | 67005 | 67010 |
| 67015           | 67025 | 67027 | 67028 | 67030 | 67031 | 67036 | 67039 | 67040 | 67041 |
| 67042           | 67043 |       |       |       |       |       |       |       |       |

- For clients who are nine years of age and older, the following procedure codes will be paid when performed on the same eye as a cataract extraction:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 67005           | 67010 | 67015 | 67025 | 67027 | 67028 | 67030 | 67031 | 67036 | 67039 |
| 67040           | 67041 | 67042 | 67043 |       |       |       |       |       |       |

- For clients who are nine years of age and older, the following procedure codes will be denied as part of the codes listed above, when performed on the same eye:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 66840           | 66850 | 66852 | 66920 | 66930 | 66940 | 66983 | 66984 |  |  |

Reimbursement for procedure codes 67041, 67042, and 67043 is limited to once every 90 days for the same eye.

9.2.49.4 Intraocular Lens (IOL)

An IOL (V2630, V2631, and V2632) may be reimbursed only to physicians in the office setting (POS 1). Providers must submit a copy of the manufacturer’s invoice for procedure code V2631 to TMHP with their claim. Reimbursement for the lens is limited to the actual acquisition cost for the lens (taking into account any discount) plus a handling fee not to exceed five percent of the acquisition cost.

Medicaid does not reimburse physicians who supply IOLs to ASCs/HASCs.

Reimbursement for the surgical procedure necessary to implant an IOL remains unchanged.

9.2.49.5 Intravitreal Drug Delivery System

Procedure codes 67027 and 67121 pertain to the procurement, implantation, and removal of an intravitreal drug delivery system (e.g., a ganciclovir implant). They are set to deny when billed concurrently.

9.2.49.6 Other Eye Surgery Limitations

The following procedure codes require modifier LT or RT to identify the eye for which the surgery is being performed:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 65205           | 67311 | 67312 | 67314 | 67316 | 67318 | 67320 | 67331 | 67332 | 67334 |
| 67345           | 67414 | 67800 | 67801 | 67805 | 67808 | V2790 |       |       |       |

In the following table, the procedure codes in Column A may be reimbursed only when at least one corresponding procedure code from Column B has been paid to the same provider for the same date of service:

| Column A Procedure Codes   | Column B Procedure Codes                                                              |
|----------------------------|---------------------------------------------------------------------------------------|
| 66990                      | 65820, 65875, 65920, 66985, 66986, 67036, 67039, 67040, 67041, 67042, 67043, or 67113 |
| 67320, 67331, 67332, 67334 | 67311, 67312, 67314, 67316, or 67318                                                  |
| 67335, 67340               | 67311, 67312, 67314, 67316, 67318, 67320, 67331, 67332, or 67334                      |
| V2790                      | 65780                                                                                 |

9.2.50 Extracapsular Cataract Removal

Extracapsular cataract removal (procedure codes 66989 and 66991) is a benefit of Texas Medicaid for clients who are 21 years of age or older.

Procedure codes 66989 and 66991 are limited to the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|
| H401111         | H401112 | H401121 | H401122 | H401131 | H401132 |

Procedure codes 66989 and 66991 are limited to two services per lifetime, and must be billed with modifier LT or RT to identify the eye on which the service was performed.

Procedure code 66989 is denied if billed on the same date of service by the same provider as procedure code 67015, 67025, 67027, 67030, or 67031.

9.2.51 Organ/Tissue Transplants

Organ/tissue transplants that include bone marrow, peripheral stem cell, heart, intestine, lung, liver, kidney, or pancreas are a benefit of Texas Medicaid.

Solid organ transplants are a benefit of Texas Medicaid when medically necessary based on safety and efficacy, as demonstrated by scientific evidence and by controlled clinical studies, in accordance with the Texas Administrative Code (TAC). Solid organ transplants are limited to clients with a critical medical condition who are expected to have a successful clinical outcome that will result in a return to improved functional independence. Benefits are not available for the following experimental or investigational services:

- Artificial and bioartificial livers
- Xenotransplantation of solid organs

- Thymus transplant

Solid organ transplants and post-transplant care will only be covered if the organ procurement is in alignment with the National Organ Transplant Act (NOTA). Only organs harvested voluntarily from within the United States under the oversight of the Health Resources and Services Administration (HRSA) and the United Network of Organ Sharing (UNOS) will be covered. Organs harvested for a fee or sponsorship or organs obtained from any country outside of the United States will not be covered for transplant or post-transplant care.

Coverage is limited to one transplant per organ system (or organ systems for combined transplants) per lifetime except for one subsequent transplant because of organ rejection.

Solid organ transplants require prior authorization and may be reimbursed only when performed in a Medicaid-enrolled facility that is a designated children's hospital with a transplant unit or program, or certified for the procedure by the United Network for Organ Sharing (UNOS).

The facility must be in Texas, unless there are no Texas facilities certified by UNOS or designated as a Children's Hospital with a transplant unit or program for the requested procedure.

All requests for out-of-state (OOS) services, whether for pre-transplant evaluation, transportation, or post-transplant monitoring, must be sent to the medical director for prior authorization review. Texas Medicaid will consider authorizing OOS services when the following criteria are met:

- The client does not leave Texas to receive care that can be received in Texas.
- An in-state facility approved for the procedure has declined to accept the client and documentation is submitted to explain why the in-state team cannot perform the procedure.
- There is no physician provider or facility with the level of expertise required to perform the necessary procedure available in Texas, or the client has received an initial transplant at the OOS facility and requires additional transplant services due to complications or graft loss.
- There is reasonable assurance that the client meets the clinical criteria required by Texas Medicaid for transplant approval.
- The service is necessary, reasonable, and federally allowable, and the facility and physicians agree to accept Medicaid reimbursement for these services.
- The OOS facility must be certified by UNOS or designated as a Children's Hospital with a transplant unit or program.

When requesting an OOS prior authorization for a pre-transplant evaluation, the provider must submit a copy of the transplant evaluation performed by a Texas facility to support the need for an OOS solid organ pre-transplant evaluation.

When requesting an OOS prior authorization for transplant of a solid organ, the provider must submit a copy of the transplant evaluation performed by a Texas facility and a copy of the transplant evaluation performed by the OOS facility to support the need for an OOS solid organ transplant.

When requesting an OOS prior authorization for post-transplant monitoring or other post-transplant services, the provider must submit documentation that the client received the initial transplant at the same OOS facility to include complications or graft loss if present, in order to support the need for OOS solid organ post-transplant monitoring or other post-transplant services.

Expenses incurred for the procurement of a living donor's organ are not a benefit of Texas Medicaid.

**Referto:** Subsection 3.2.5, “Organ and Tissue Transplant Services” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about the transplant facility approval criteria.

Subsection 3.2.5.2, “Transplant Benefits and Limitations” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about organ/tissue transplant program limitations.

### 9.2.51.1 General Prior Authorization Requirements

Solid organ transplant prior authorization requests must include all of the following:

- A complete history and physical
- A statement of the current medical conditions and status of the transplant recipient
- Documentation of how the client meets the prior authorization criteria specified for the transplant requested
- Documentation of the absence of co-morbidities or contraindications such as the following:
  - Severe pulmonary hypertension
  - End-stage cardiac, renal, hepatic, or other organ dysfunction unrelated to the primary disorder
  - Uncontrolled HIV infection or AIDS defining illness
  - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure
  - Ongoing or recurrent active infections that are not effectively treated
  - Psychiatric instability severe enough to jeopardize incentive for adherence to medical regimen
  - Active alcohol or chemical dependency that might interfere with compliance to a medical regimen
- History of compliance with other medical treatments, regimen, and plan of care

Backbench procedures do not require prior authorization but may only be reimbursed when a corresponding transplant procedure has been paid for the same date of service.

**Note:** Clients who are birth through 20 years of age and who do not meet the criteria for coverage may be considered through the Comprehensive Care Program (CCP).

Additional prior authorization criteria, if applicable, specific to each type of transplant are outlined in the following sections.

If prior authorization is not obtained for a solid organ transplant, services directly related to the transplant within the three-day preoperative and six-week postoperative period are also denied regardless of who provides the services (e.g., laboratory services, status post visits, radiology services). However, coverage for other services needed as a result of complication of the transplant or for services unrelated to the transplant may be considered when medically necessary, reasonable, and federally allowable.

Claims for transplant clients are placed on active review when the transplant was not prior authorized so that the services related to the transplant can be monitored.

### 9.2.51.2 Heart Transplants

#### 9.2.51.2.1 Prior Authorization for Heart Transplants

A heart transplant to a client for primary heart dysfunction must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage.

Procedure code 33945 may be considered for prior authorization with medical necessity documentation that indicates a New York Heart Association (NYHA) Class III or IV cardiac disease with one of the following medical conditions:

- Congenital heart disease
- Valvular heart disease
- Viral cardiomyopathy
- Familial and restrictive cardiomyopathy

### **9.2.51.3 Intestinal Transplants**

An intestinal transplant may be considered for clients who are dependent on parental nutrition and have compromised venous access, have had two or more episodes of central line sepsis, or who have begun to manifest progressive parental nutrition associated liver dysfunction. Procedure codes 44135 and 44136 must be prior authorized.

Small bowel transplantation is considered medically necessary in clients with irreversible intestinal failure including, but not limited to:

- Short bowel syndrome
- Pseudo-obstruction
- Microvillus inclusion
- Tumor

The prior authorization request must include documentation of irreversible intestinal failure with failed total parenteral nutrition (TPN) therapy. The client has experienced TPN failure if any one of the following criteria is met:

- Impending or overt liver failure due to TPN-induced liver injury. Clinical indicators include the following:
  - Increased serum bilirubin levels
  - Increased liver enzyme levels
  - Splenomegaly
  - Thrombocytopenia
  - Gastroesophageal varices
  - Coagulopathy
  - Stomal bleeding
  - Hepatic fibrosis
  - Cirrhosis
- Thrombosis of major central venous channels (subclavian, jugular, or femoral veins). Thrombosis of two or more of these vessels is considered a life-threatening complication and TPN failure.
- Frequent central line-related sepsis. Two or more episodes of central-line-induced systemic sepsis per year that require hospitalization are considered TPN failure. A single episode of central-line-related fungemia, septic shock, or acute respiratory distress syndrome is considered TPN failure.
- Frequent episodes of severe dehydration despite TPN and intravenous fluid supplement. Under certain medical conditions, such as secretory diarrhea and nonconstructable gastrointestinal tract, the loss of combined gastrointestinal and pancreatobiliary secretions exceed the maximum intravenous infusion rates that can be tolerated by the cardiopulmonary system.

Diagnoses that indicate intestinal failure include, but are not limited to, the following:

- Small bowel syndrome resulting from inadequate intestinal propulsion due to neuromuscular impairment
- Small bowel syndrome resulting from postsurgical conditions due to resections
- Intestinal cysts
- Mesenteric cysts
- Small bowel or other tumors involving small bowel
- Crohn's disease
- Mesenteric thrombosis
- Volvulus
- Short-gut syndrome in which there is liver function impairment (usually secondary to TPN)

#### **9.2.51.4 Kidney Transplants**

##### **9.2.51.4.1 Prior Authorization for Kidney Transplants**

Procedure codes 50360 and 50365 must be prior authorized. Medical necessity documentation of one of the following is required:

- Hemodialysis or continuous ambulatory peritoneal dialysis (CAPD).
- Chronic renal failure with anticipated deterioration to end-stage renal disease.
- End-stage renal disease, evidenced by a creatinine clearance below 20 ml/min or development of symptoms of uremia.
- End-stage renal disease that requires dialysis or is expected to require dialysis within the next 12- to 18-month period.

##### **9.2.51.4.2 Cytogam**

Procedure code J0850 is reimbursable by Texas Medicaid. Cytogam is indicated for the attenuation of primary cytomegalovirus disease in seronegative kidney transplant recipients who receive a kidney from a seropositive donor. Payment of cytogam is limited to diagnosis code Z940, Z941, Z942, Z943, Z944, or Z9483. Cytogam is payable only in the office or outpatient setting.

**Referto:** Subsection 3.2.5, "Organ and Tissue Transplant Services" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about the transplant facility approval criteria.

#### **9.2.51.5 Liver Transplants**

##### **9.2.51.5.1 Prior Authorization for Liver Transplants**

For a client to be considered for coverage of a liver transplant, the medical records for the client must include documentation showing the client is unresponsive to more conventional and/or standard therapies.

Authorization of procedure codes 47133 and 47135 requires medical necessity documentation of liver disease in one of the following categories:

- Primary cholestatic liver disease
- Other cirrhosis:
  - Alcoholic
  - Hepatitis C, non-A, non-B, and Hepatitis B

- Fulminant hepatic failure
- Metabolic diseases
- Malignant neoplasms
- Benign neoplasms
- Biliary atresia

### **9.2.51.6 Lung Transplants**

#### **9.2.51.6.1 Prior Authorization for Lung Transplants**

A lung transplant to a client must be documented as unresponsive to more conventional and/or standard therapies to be considered for coverage.

Prior authorization of procedure codes 32851, 32852, 32853, 32854, and S2060 may be considered with medical necessity documentation of the following:

- Symptoms at rest directly related to chronic pulmonary disease and resultant severe functional limitation
- End-stage pulmonary diseases in one of these categories:
  - Obstructive lung disease
  - Restrictive lung disease
  - Cystic Fibrosis
  - Pulmonary hypertension

### **9.2.51.7 Pancreas Transplant**

#### **9.2.51.7.1 Prior Authorization for Pancreas Transplant**

A pancreas/simultaneous kidney-pancreas transplant must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage.

For prior authorization of procedure codes 48160 and 48554, medical necessity documentation must be submitted that shows the following:

- Recurrent, acute, and severe metabolic and potentially life-threatening complications requiring medical attentions such as:
  - Hypoglycemia
  - Hyperglycemia
  - Ketoacidosis
  - Failure of exogenous insulin-based management to achieve sufficient glycemic control (HbA1c of greater than 8.0) despite aggressive conventional therapy
  - Insensibility to hypoglycemia; or
- Satisfactory kidney function (creatinine clearance greater than 40mL/min), except for kidney-pancreas transplants; and
- Type 1 diabetes with secondary diabetic complications that are progressive despite the best medical management; and
- At least two of the following secondary complications:
  - Diabetic neuropathy
  - Retinopathy

- Gastroparesis
- Autonomic neuropathy
- Extremely labile (brittle) insulin-dependent diabetes mellitus

### **9.2.51.8 Multi-Organ Transplants**

Procedure codes 33935, S2053, and S2054 may be considered for prior authorization if medical necessity documentation meets the requirements for each organ.

Procedure code S2065 may be considered for prior authorization if medical necessity documentation indicates the client meets criteria for a pancreas transplant and has end-stage renal disease that requires dialysis or is expected to require dialysis within the next 12 months.

### **9.2.51.9 Nonsolid Organ Transplants**

Nonsolid organ transplants covered by Texas Medicaid include allogeneic and autologous stem cell transplantation, allogeneic and autologous bone marrow transplantation, autologous islet cell transplantation, and hematopoietic progenitor cell (HPC) boost infusion.

#### **9.2.51.9.1 Allogeneic and Autologous Bone Marrow and Stem Cell Transplantation**

Stem cell transplantation is a process in which stem cells are obtained from either a client's or donor's bone marrow, peripheral blood, or umbilical cord blood for intravenous infusion. The transplant can be used to effect hematopoietic reconstitution following severely myelotoxic doses of chemotherapy and/or radiotherapy used to treat various malignancies, and also can be used to restore function in clients having an inherited or acquired deficiency or defect.

Benefits are not available for any experimental or investigational services, supplies, or procedures.

Coverage of bone marrow and stem cell transplantation is limited to the following procedure codes: 38206, 38230, 38232, 38240, 38241, 38242, and S2142.

Texas Medicaid recognizes the following covered indications for stem cell transplants:

- Allogeneic
  - Hematological malignancy
  - Lymphatic malignancy
  - Bone marrow disorders
  - Hemoglobinopathies
  - Platelet function disorders
  - Immunodeficiency disorders
  - Inherited metabolic disorders
  - Multiple myeloma/plasma cell disorders
- Autologous
  - Hematological malignancy
  - Lymphatic malignancy
  - Germ cell tumors
  - Brain tumors
  - Small round blue cell tumors of childhood
  - Multiple myeloma/plasma cell disorders

- Indications for additional infusions
  - Infusion of stem cells for failure to graft (autologous)
  - Donor leukocyte infusion for persistent or relapsed malignant disease (allogeneic)
- Indications for re-transplantation
  - Relapse of disease
  - Failure to engraft or poor graft function

#### 9.2.51.9.2 Autologous Islet Cell Transplantation

Autologous islet cell transplantation associated with the complete or partial removal of the pancreas (procedure code 48160) is a benefit of Texas Medicaid only for clients with a diagnosis of chronic pancreatitis.

Allogeneic islet cell transplantation is not a benefit.

#### 9.2.51.9.3 HPC Boost Infusion

Prior authorization is required for HPC boost infusion procedure code 38243. The prior authorization request must include documentation of a prior stem cell transplant.

Requests for more than two boost procedures per lifetime requires medical necessity review and approval by the medical director.

#### 9.2.51.9.4 Prior Authorization for Nonsolid Organ Transplants

All nonsolid organ transplants require mandatory prior authorization and must be performed in a Texas facility that is a designated children's hospital or a facility in compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN), the United Network for Organ Sharing (UNOS), or the National Marrow Donor Program (NMDP). Prior authorization is effective for the date span specified on the prior authorization approval letter. If the transplant has not been performed by the end of the authorization period, the physician must apply for an extension.

Documentation supplied with the prior authorization request must include the following:

- A complete history and physical.
- A statement of the client's current medical condition and the expected long-term prognosis for the client from the proposed procedure.

Each subsequent transplant must be prior authorized separately.

Peripheral or umbilical cord blood stem cell transplantation may be authorized in lieu of bone marrow transplantation (BMT), but will not be approved when performed simultaneously.

If a stem cell transplant has been prior authorized for a client who is 21 years of age or older, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness may be covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay.

Bone marrow harvesting (38230) or peripheral stem cell harvesting (38206) for autologous bone marrow or stem cell transplants are a benefit of Texas Medicaid and require prior authorization.

Autologous harvesting of stem cells (single or multiple sessions) may be reimbursed to the facility when prior authorized by HHSC or its designee and performed in the outpatient setting (POS 5). Harvesting of stem cells performed in the inpatient setting (POS 3) is included in the DRG and will not be reimbursed separately.

Physician services for the storage of stem cells are not a benefit of Texas Medicaid.

Donor expenses are included in the global fee for the transplant recipient and are not reimbursed separately. Therefore, allogeneic bone marrow or stem cell harvesting procedures are not a benefit of Texas Medicaid.

Stem cell transplants for other conditions may be considered on a case by case basis. Documentation for prior authorization must be submitted to determine whether the transplant is medically necessary and appropriate.

#### **9.2.51.10 Organ Procurement**

The appropriate DRG reimbursement coverage to the approved institution for a prior authorized solid organ transplant procedure includes procurement of the organ and services associated with the organ procurement as specified by HHSC or its designee. Documentation of organ procurement must be maintained in the hospital medical records.

### **9.2.52 Orthognathic Surgery**

Orthognathic surgery is a benefit of Texas Medicaid only when it is necessary for medical reasons, or when it is necessary as part of an approved plan of care in the Texas Medicaid Dental Program. Orthognathic surgery is administered and may be reimbursed as part of the medical/surgical benefit of Texas Medicaid and not as part of the Texas Medicaid Dental Program.

Treatment of malocclusion is a benefit of the Texas Medicaid Dental Program. Orthognathic surgery is a benefit when it is necessary as part of the approved dental benefit.

Maxillary and/or mandibular facial skeletal deformities are associated with clearly abnormal masticatory malocclusion.

Orthognathic surgery may be considered medically necessary for the following client conditions:

- Producing signs or symptoms of masticatory dysfunction
- Facial skeletal discrepancies associated with documented sleep apnea, airway defects, and soft tissue discrepancies
- Facial skeletal discrepancies associated with documented speech impairments
- Structural abnormalities of the jaws secondary to infection, trauma, neoplasia, or congenital anomalies

Orthognathic surgery may be considered for reimbursement when required for the client to access a dental service. Orthognathic surgery that is done primarily to improve appearance and not for reasons of medical necessity is considered cosmetic and is not a benefit of Texas Medicaid.

#### **9.2.52.1 Prior Authorization for Orthognathic Surgery**

The following orthognathic medical surgical services may be considered for reimbursement to oral and maxillofacial surgeons with prior authorization. A narrative explaining medical necessity must be provided with the authorization request.

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 21010           | 21031 | 21032 | 21050 | 21060 | 21073 | 21100 | 21110 | 21120 | 21121 |
| 21122           | 21123 | 21125 | 21127 | 21137 | 21138 | 21139 | 21141 | 21142 | 21143 |
| 21145           | 21146 | 21147 | 21150 | 21151 | 21154 | 21155 | 21159 | 21160 | 21172 |
| 21175           | 21179 | 21180 | 21181 | 21182 | 21183 | 21184 | 21188 | 21193 | 21194 |
| 21195           | 21196 | 21198 | 21199 | 21206 | 21208 | 21209 | 21210 | 21215 | 21230 |
| 21235           | 21240 | 21242 | 21243 | 21244 | 21247 | 21255 | 21256 | 21260 | 21261 |
| 21263           | 21267 | 21268 | 21270 | 21275 | 21295 | 21296 | 21299 | 29800 | 29804 |

| Procedure Codes |       |       |       |       |  |  |  |  |  |
|-----------------|-------|-------|-------|-------|--|--|--|--|--|
| 40840           | 40842 | 40843 | 40844 | 40845 |  |  |  |  |  |

### 9.2.53 Osteopathic Manipulative Treatment (OMT)

OMT, when performed by a physician (MD or DO), is a benefit of Texas Medicaid for the acute phase of the acute musculoskeletal injury or the acute phase of an acute exacerbation of a chronic musculoskeletal injury with a neurological component.

OMT is covered when it is performed with the expectation of restoring the patient's level of function, which has been lost or reduced by injury or illness. Manipulations should be provided in accordance with an ongoing, written treatment plan that supports medical necessity. A model of documentation that supports medical necessity for the treatment plan includes the following:

- Specific modalities/procedures to be used in treatment
- Diagnosis
- Region treated
- Degree of severity
- Impairment characteristics
- Physical examination findings (X-ray or other pertinent findings)
- Specific statements of long- and short-term goals
- Reasonable estimate of when the goals will be reached (estimated duration of treatment)
- Frequency of treatment (number of times per week)
- Equipment and techniques used

The treatment plan must be updated as the client's condition changes. Treatment plans must be maintained in the medical records and are subject to retrospective review.

Reimbursement is contingent on correct documentation of the condition. The acute modifier AT must be submitted with the claim for payment to be made. Paper claims submitted without modifier AT will be denied; electronic claims will be rejected. The AT modifier is described as representing treatment provided for an acute condition or an exacerbation of a chronic condition that persists less than 180 days from the start date of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client's condition has not become chronic and the client has not reached the point of plateauing. Plateauing is defined as the point at which maximal improvement has been documented and further improvement ceases.

The following procedure codes are payable when billing for OMT to the head, cervical, thoracic, lumbar, sacral, pelvic, lower extremities, upper extremities, rib cage, abdominal, and visceral regions: 98925, 98926, 98927, 98928, and 98929.

OMT will be denied when billed on the same date of service by the same provider as any of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 00640           | 51701 | 51702 | 51703 | 64400 | 64405 | 64408 | 64412 | 64415 | 64416 |
| 64417           | 64418 | 64420 | 64421 | 64425 | 64430 | 64435 | 64445 | 64446 | 64447 |
| 64448           | 64449 | 64450 | 64470 | 64472 | 64475 | 64476 | 64479 | 64480 | 64483 |
| 64484           | 64505 | 64510 | 64517 | 64520 | 64530 | 96360 | 96365 | 96372 | 96374 |

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 96375           | 99202 | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |
| 99221           | 99222 | 99223 | 99231 | 99232 | 99233 | 99234 | 99235 | 99236 | 99238 |
| 99239           | 99242 | 99243 | 99244 | 99245 | 99252 | 99253 | 99254 | 99255 | 99281 |
| 99282           | 99283 | 99284 | 99285 | 99291 | 99304 | 99305 | 99306 | 99307 | 99308 |
| 99309           | 99310 | 99315 | 99316 | 99341 | 99342 | 99344 | 99345 | 99347 | 99348 |
| 99349           | 99350 | 99460 | 99461 | 99462 | 99463 | 99464 | 99465 | 99468 | 99469 |
| 99471           | 99472 | 99478 | 99479 | 99480 |       |       |       |       |       |

When multiples of procedure codes 98925, 98926, 98927, 98928, and 98929 are billed on the same day by any provider, the most inclusive code is paid and the others are denied.

An E/M or initial or subsequent care visit or consultation may be paid in addition to OMT billed on the same day if the client's condition requires a visit for a significant and separately identifiable service above and beyond the usual pre- and post-care associated with the OMT procedure, even if the visit and OMT are related to the same symptom or condition. Modifier 25 must be submitted with the E/M procedure code to identify a separate and distinct service rendered on the same day as OMT.

Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Procedure code 97140 will be denied as part of another service if billed on the same date of service as procedure codes 98925, 98926, 98927, 98928, or 98929.

### 9.2.54 Pain Management

Pain management is a benefit of Texas Medicaid.

Procedure codes 62350, 62351, 62355, 62360, 62361, 62362, and 62365 billed on the same day as another surgical procedure performed by the same physician are paid according to multiple surgery guidelines.

Procedure codes 62350, 62351, 62355, 62360, 62361, 62362, and 62365 billed on the same day as an anesthesia procedure performed by the same physician are denied as included in the total anesthesia time.

Reimbursement to the physician for the surgical procedure is based on the assigned RVUs or maximum fee. Outpatient facilities are reimbursed at their reimbursement rate. Inpatient facilities are reimbursed under the assigned diagnosis-related group (DRG). No separate payment for the intrathecal pump is made.

Use the following procedure codes when billing for the implantation/revision/replacement of the pump/catheter:

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 62350           | 62351 | 62355 | 62360 | 62361 | 62362 | 62365 |  |  |  |

Procedure codes 62367 and 62368 do not require prior authorization and are payable as a medical service only.

**Referto:** Subsection 9.2.40, "Implantable Infusion Pumps" in this handbook for more information about implanted pumps.

#### 9.2.54.1 Ongoing Evaluation and Management of Chronic Pain and Chronic Pain Management (CPM)

Pain Management as part of Implantable infusion pumps (IIPs) services (procedure codes G3002 and G3003) is a benefit of Texas Medicaid.

Acute pain is defined as pain caused by occurrences such as trauma, a surgical procedure, or a medical disorder manifested by increased heart rate, increased blood pressure, increased respiratory rate, shallow respirations, agitation or restlessness, facial grimace, or splinting.

Chronic pain is defined as persistent or recurrent pain, lasting more than three months; symptoms are manifested similarly to that of acute pain.

Postoperative refers to the time frame immediately following a surgical procedure in which a catheter is maintained in the epidural or subarachnoid space for the duration of the infusion of pain medication.

The first time that procedure code G3002 is billed, the physician or qualified health practitioner must see the client in person. After the initial visit, any of the CPM in-person components included in procedure codes G3002 and G3003 may be provided through telehealth, as clinically appropriate, to increase access to care for Medicaid clients.

When using procedure code G3002, 30 minutes must be met or exceeded. List procedure code G3003 separately in addition to procedure code G3002. When using procedure code G3003, 15 minutes must be met or exceeded.

Additionally, both evaluation and management services and CPM may be billed on the same day if all requirements to report each service are met, and the time spent providing CPM services does not represent time spent for providing any other reported service.

#### **9.2.54.2 Epidural and Subarachnoid Infusion**

Epidural and subarachnoid infusion for pain management is payable for acute, chronic, and postoperative pain management.

Procedure code 01996 is limited to once per day and is denied when billed on the same day as a surgical/anesthesia procedure. Procedure code 01996 billed longer than 30 days requires medical necessity documentation. Cancer diagnoses are excluded from the 30-day limitation.

Procedure code 01996 is payable to CRNAs and physicians.

#### **9.2.55 Palivizumab Injections**

RSV immune globulin, intramuscular palivizumab (*Synagis*) must be obtained through the Texas VDP. Providers must obtain prior authorization through the VDP.

Providers may not bill Texas Medicaid for RSV prophylaxis that was obtained through VDP; however providers may be reimbursed for administering the drug. Providers may refer to the HHSC Texas Medicaid/CHIP Vendor Drug Program website at [www.txvendordrug.com/formulary/respiratory-syncytial-virus-treatment](http://www.txvendordrug.com/formulary/respiratory-syncytial-virus-treatment) for more information about obtaining palivizumab for Texas Medicaid clients.

#### **9.2.56 Panniculectomy and Abdominoplasty**

Procedure codes 15830 and 15847 are benefits of Texas Medicaid when prior authorized.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation establishing medical necessity of the service requested. This documentation must remain in the client's medical record and is subject to retrospective review.

##### **9.2.56.1 Panniculectomy**

A panniculectomy (procedure code 15830) may be reimbursed with prior authorization for one of the following conditions when the panniculus hangs to or below the level of the pubis:

- A panniculus has recurrent non-healing ulcers.
- Client is insulin dependent with recurring infection and causing the prolapse of a ventral hernia.
- Panniculus directly causes significant clinical functional impairment.

Panniculectomy is not a benefit when one of following is the primary purpose:

- To remove excess skin and fat from the middle and lower abdomen in order to contour and alter the appearance of the abdominal area to improve appearance.
- Dissatisfaction with personal body image.
- To minimize the risk of ventral hernia formation of recurrence.
- For the sole purpose of treating neck or back pain.

Panniculectomy may be prior authorized when the client meets one of the following:

- Panniculectomy is planned and there is no history of significant weight loss or gastric bypass surgery.
- Panniculectomy is planned without history of gastric bypass surgery but with significant weight loss and the panniculus hangs to or below the level of the pubis.
- Panniculectomy is planned with history of gastric bypass surgery or abdominoplasty and the client is 12 months post-surgery.

If a panniculectomy is planned and there is no history of significant weight loss or gastric bypass surgery, or a panniculectomy is planned without history of gastric bypass surgery but with significant weight loss and the panniculus hangs to or below the level of the pubis, one of the following must be met:

- Documentation of recurrent episodes of infection or recurrent non-healing ulcers over three months that are non-responsive to treatment or appropriate medical therapy, such as oral or topical prescription.
- The client is insulin-dependent and has a serious infection control problem and the panniculus is causing the prolapse of a ventral hernia.
- Documentation by the treating physician that the panniculus directly causes significant clinical functional impairment. Clinical functional impairment may be indicated by associated musculoskeletal dysfunction or interference with activities of daily living and there is reasonable evidence to support that this surgical intervention will correct the condition.

If a panniculectomy is planned with a history of gastric bypass surgery or abdominoplasty and the client is 12 months post-surgery, the following must be met:

- Documentation that the panniculus hangs to or below the level of the pubis and the client has maintained a significant (100 pounds or more), stable weight loss for at least six months. Documentation must include the weight loss history, prior and current height, prior and current weight, and the history and physical including all previous surgeries.
- Documentation of recurrent episodes of infection or recurrent non-healing ulcers over three months that are non-responsive to treatment or appropriate medical therapy, such as oral or topical prescription. The 12-month post-gastric bypass requirement may be waived.
- The client is insulin-dependent and has a serious infection control problem and the panniculus is causing the prolapse of a ventral hernia. The 12-month post-gastric bypass requirement may be waived.
- Documentation by the treating physician that the panniculus directly causes significant clinical functional impairment. The 12-month post-gastric bypass requirement may be waived. Clinical functional impairment may be indicated by associated musculoskeletal dysfunction or interference with activities of daily living and there is reasonable evidence to support that this surgical intervention will correct the condition.

All medical record documentation pertinent to the client's evaluation and treatment must support medical necessity of the panniculectomy. Documentation may include the following:

- Office records
- Consultation reports
- Operative reports
- Other hospital records (examples: pathology report, history and physical)

Documentation to support the panniculectomy must be submitted with the request for prior authorization. In addition to medical record documentation, the provider may also submit a letter of support or an explanation to substantiate medical necessity.

This service is typically expected to be limited to once per lifetime, by the same provider. Repeat panniculectomies may be considered for prior authorization upon submission of supporting documentation as outlined above.

A panniculectomy provided as a secondary surgery may be considered for prior authorization when the panniculus interferes with a medically necessary intra-abdominal surgery (e.g., abdominal hernia repair or hysterectomy) or to facilitate an improved anatomical field in order to provide radiation treatment to the abdomen. Documentation of medical necessity must include:

- The comorbidity for the diagnosis of the primary surgery or for the nature of the condition undergoing radiation treatment.
- Documentation supporting the need for the panniculectomy as the panniculus hangs below the level of the pubis and will significantly interfere with a planned surgical procedure, or the abdominal structures identified as requiring radiation therapy will not be adequately treated due to the size of the panniculus.

A panniculectomy provided as a secondary surgery may be considered when the primary surgery was performed for an urgent condition defined as a symptom or condition that is not an emergency, but requires further diagnostic workup or treatment within 24 hours to avoid a subsequent emergent situation.

The need for the panniculectomy as a secondary surgery in conjunction with a primary urgent surgery must be supported by retrospective review of submission of all of the following documentation:

- History and physical and the operative report.
- The panniculus hangs below the level of the pubis and would have significantly interfered with the urgent primary surgical procedure.

### **9.2.56.2 Abdominoplasty**

An abdominoplasty (procedure code 15847) is a benefit for clients who are birth through 20 years of age and may be reimbursed with prior authorization for one of the following conditions:

- Prune belly
- Diastasis recti in the presence of a true midline hernia (ventral or umbilical)

Abdominoplasty is not a benefit when one of the following is the primary purpose:

- To remove excess skin and fat and tighten abdominal wall from the middle and lower abdomen in order to contour and alter the appearance of the abdominal area to improve appearance.
- Dissatisfaction with personal body image.
- To repair diastases recti (unless prior authorization criteria has been met).

Abdominoplasty may be prior authorized when the client meets all of the following criteria:

- Documented diagnosis of prune belly (i.e., Eagle Barret syndrome) or repair of diastasis recti in the presence of a true midline hernia (ventral or umbilical).
- Documentation for reconstructive surgery that must include appropriate historical medical record documentation and may include any of the following:
  - Consultation reports
  - Operative reports or other applicable hospital records (examples: pathology report, history and physical)
  - Office records
  - Letters with pertinent information from provider (when medical records are requested, a letter of support or explanation may be helpful, but alone will not be considered sufficient documentation to make a medical necessity determination)
- For repair of diastasis recti with a true midline hernia, documentation must also include all of the following:
  - The size of the hernia
  - Whether it is reducible, painful, or other symptoms
  - Whether there is a defect rather than just thinning of the abdominal fascia

This service is typically expected to be limited to once per lifetime, by the same provider. Consideration of other abdominal diagnoses may be considered for prior authorization with the submission of additional supporting documentation that may include the following:

- Consultation reports
- Operative reports or other applicable hospital records (examples: pathology report, history and physical)
- Office records
- Letters with pertinent information from provider (when medical records are requested, a letter of support or explanation may be helpful, but alone will not be considered sufficient documentation to make a medical necessity determination)

### **9.2.57 Penile and Testicular Prostheses**

The following services are a benefit of Texas Medicaid for male clients:

- Removal of a penile prosthesis without replacement (procedure codes 54406 and 54415).
- Insertion of testicular prosthesis for the replacement of congenitally absent testes or testes lost due to disease, injury, or surgery (procedure code 54660)—prior authorization is required.

Procedure code 54660 is a benefit for clients who are birth through 20 years of age. Insertion of a testicular prosthesis may be prior authorized with the following criteria:

- The client has lost a testicle as a result of cancer or trauma or has congenital absence of a testicle.
- The loss of the testicle has resulted in detrimental psycho-social sequelae, as evidenced by a psychiatric evaluation.

Requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department using the Special Medical Prior Authorization (SMPA) Request Form. The request must be submitted with documentation that supports medical necessity.

### 9.2.58 Percutaneous Transluminal Coronary Interventions

Percutaneous transluminal coronary interventions are a therapeutic option for clients who have arteriosclerotic heart disease.

When any of the following procedure codes are performed on the same date of service and on the same vessel as intracoronary vessel stenting, any provider, only the stenting procedure code will be considered for reimbursement: 92973, 92982, 92984, 92995, and 92996.

Angioplasty, atherectomy, or thrombectomy performed on different coronary vessels may be reimbursed separately. When different coronary vessels are not indicated, only the stenting procedure will be paid.

### 9.2.59 Physical Therapy (PT) Services

Physical therapy (PT) is a payable benefit to physicians.

**Referto:** Section 4, “Therapy Services Overview” in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about physical therapy services provided by a physician.

### 9.2.60 Physician Evaluation and Management (E/M) Services

E/M is a benefit of Texas Medicaid. Providers must follow guidelines established in the Current Procedural Terminology (CPT) Manual for Evaluation and Management Services when selecting the level of service provided.

The following E/M services are benefits of Texas Medicaid:

- Domiciliary, rest home, or custodial care services
- Emergency department services
- Group clinical visits
- Home services
- Hospital services including inpatient, observation, critical care, discharge, and concurrent care services (includes consultation and prolonged services)
- Nursing facility services
- Office or other outpatient services for new and established patients (includes consultation and prolonged services)
- Preventive care visits
- Services outside of business hours
- Tobacco use cessation

Claims submitted to TMHP by physicians for services provided during an inpatient hospital stay must be received by TMHP within 95 days of each date of service, not 95 days of the discharge date.

Inpatient claims must indicate the facility’s NPI in Block 32 or in the appropriate field of electronic software.

## 9.2.60.1 Office or Other Outpatient Hospital Services

### 9.2.60.1.1 New and Established Patient Services

A new patient is one who has not received any professional services from a physician or from another physician of the same specialty who belongs to the same group practice, within the past three years. Providers must use procedure codes 99202, 99203, 99204, and 99205 when billing for new patient services provided in the office or an outpatient or other ambulatory facility. New patient visits are limited to one every three years, per client, per provider.

An established patient is one who has received professional services from a physician or from another physician of the same specialty within the same group practice, within the last three years. Providers must use procedure codes 99211, 99212, 99213, 99214, and 99215 when billing for established patient services provided in the office or an outpatient or other ambulatory facility.

Established E/M services are limited to one per day, same provider. When a new patient checkup is billed for the same date of service as a new patient acute care visit, both new patient services may be reimbursed when billed by the same provider or provider group if no other acute care visits or preventive care medical checkups have been billed in the past three years.

Modifier 25 must be submitted when the services rendered are performed for a significant separately identifiable service by the same physician or physician group on the same date of service. Modifier 25 is required when the provider submits a claim with the following:

- A second office or outpatient visit on the same day as another office or outpatient visit
- An office or outpatient visit beyond the usual preoperative care associated with the procedure that was performed

**Note:** *Office or outpatient visits provided on the same date of service as a planned procedure (minor or extensive) are included in the cost of the procedure and are not separately reimbursed.*

Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request. The documentation must clearly indicate what the significant problem/abnormality was, including the important, distinct correlation with signs and symptoms to demonstrate a distinctly different problem that required additional work and must support that the requirements for the level of service billed were met or exceeded.

The date and time of both services performed must be outlined in the medical record and the time of the second service must be different than the time of the first service, although a different diagnosis is not required.

Examples of additional visits to which Modifier 25 must be appended include, but are not limited to:

- A second E/M service for the same date of service as a group visit with the required E/M visit.
- An established patient E/M service for the same date of service as a THSteps medical checkup.
- An E/M service for the same date of service as a scheduled procedure.

Office visits (procedure codes 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, and 99215) provided on the same date of service as a planned procedure (minor or extensive) are included in the cost of the procedure and are not separately reimbursed.

Office visit procedure code 99211, 99212, 99213, 99214, or 99215 must be billed by the same provider with the same date of service as a group clinical visit.

**9.2.60.2 Office or Other Outpatient Services by Telemedicine**

Providers must defer to the needs of the client receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the client’s choice and not provider convenience.

Providers must provide the services to Medicaid eligible clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Synchronous Audiovisual Technology**

The following office and other outpatient services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the provider, and agreed to by the client receiving services. New and established patient services provided by synchronous audiovisual technology must be billed with modifier 95.

The following procedure codes may be reimbursed for telemedicine (physician-delivered) evaluation and management to new and established clients:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |

**Synchronous Telephone (Audio-Only) Technology**

For the diagnosis, evaluation and treatment of a mental health or substance use condition, as well as non-behavioral health conditions, the following office and other outpatient services may be provided by synchronous telephone (audio-only) technology if clinically appropriate and safe, as determined by the provider, and agreed to by the client receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology for telemedicine and telehealth services. Therefore, providers must document in the client’s medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. Established patient services for mental health or substance use conditions provided by synchronous telephone (audio-only) technology must be billed using modifier FQ. Established patient services for non-behavioral health conditions provided by synchronous telephone (audio-only) technology must be billed using modifier 93.

Procedure codes 99212, 99213, 99214, and 99215 may be billed for established patient services.

Procedure code 99211 may be delivered by synchronous telephone (audio-only) technology during certain public health emergencies only.

| Modifiers - Office and Other Outpatient Services - Psychiatric Care Only | Description                                                                                                     |
|--------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| 95                                                                       | Synchronous telemedicine service rendered via a real-time interactive audio and video telecommunications system |
| FQ                                                                       | The service was furnished using audio-only communication technology                                             |

| Modifiers – Office and Other Outpatient Services Non–Psychiatric Care | Description                                                                                                                 |
|-----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| 93                                                                    | Synchronous telemedicine service rendered via telephone or other real-time interactive audio-only telecommunications system |
| 95                                                                    | Synchronous telemedicine service rendered via a real-time interactive audio and video telecommunications system             |

Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. The documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements to include documentation, informed consent, privacy, and security requirements.

### 9.2.60.3 Group Clinical Visits

Texas Medicaid may reimburse physicians for group clinical visits (procedure code 99078) providing clinical services and educational counseling to a group of clients with the same condition.

To be considered for reimbursement, procedure code 99078 must be billed for the same date of service by the same provider as E/M procedure code 99211, 99212, 99213, 99214, or 99215.

Group clinical visits may be reimbursed for established patients only. The client's plan of care must be determined and documented in the medical record by the physician before attending group clinical visits.

Participation of established patients in a group clinical visit is optional. Informed consent must be obtained from the client and maintained in the medical record before rendering group clinical visit services.

The physician leading the group clinical visit is responsible for the effectiveness and content of the information provided during the group clinical visit.

Nationally approved curriculum on asthma and diabetes, such as that available through the American Association of Diabetic Educators and Asthma Education and Prevention Programs consistent with the National Asthma Management Guidelines and must be incorporated into the educational portion of group clinical visits.

Group clinical visits must last at least 1 hour, but no longer than 2 hours, with a minimum of 2 clients and a maximum of 20.

To promote self-management of the chronic disease, the group visit must include a presentation that instructs and informs the client about clinical issues, including how to prevent disease exacerbation or complications, properly use medications and other therapeutic techniques, or live with chronic illness topics. Group visit presentations must include:

- Diabetic education consisting of the following:
  - What diabetes is
  - Nutrition
  - Exercise and physical activity
  - Prevention of acute complications
  - Prevention of chronic complications

- Monitoring
- Medication
- Asthma education consisting of the following:
  - What is asthma?
  - What are symptoms of asthma?
  - What happens during an episode of asthma?
  - What exacerbates asthma?
  - How is asthma controlled?
  - What physical activities can people with asthma do?
  - A question and answer period
  - A short (approximately 5 to 15 minutes per client) one-on-one private direct (face-to-face) encounter with the physician consisting of:
    - A physical exam
    - The gathering, monitoring, and reviewing of laboratory and diagnostic tests
    - Medical decision making that includes an individual treatment plan

Documentation in the client's medical record must support level of E/M service as per the CMS and CPT manual approved guidelines.

The documentation of the individual treatment plan retained in the client's medical record must include data collected (physical exam and lab findings), educational services provided, patient participation, and the beginning and ending time of the visit.

Group visits for conditions of diabetes or asthma are limited to a maximum of four per year for any provider.

#### 9.2.60.3.1 Group Clinical Visits for Diabetes

Group clinical visits are benefits of Texas Medicaid for the management of the condition of diabetes when submitted with one of the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| E0800           | E0801   | E0810   | E0811   | E0821   | E0822   | E0829   | E08311  |
| E08319          | E083211 | E083212 | E083213 | E083219 | E083291 | E083292 | E083293 |
| E083299         | E083311 | E083312 | E083313 | E083319 | E083391 | E083392 | E083393 |
| E083399         | E083411 | E083412 | E083413 | E083419 | E083491 | E083492 | E083493 |
| E083499         | E083511 | E083512 | E083513 | E083519 | E083521 | E083522 | E083523 |
| E083529         | E083531 | E083532 | E083533 | E083539 | E083541 | E083542 | E083543 |

#### 9.2.60.4 Group Clinical Visits for Asthma

Group clinical visits are benefits of Texas Medicaid for the management of the condition of asthma when submitted with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |       |       |
|-----------------|--------|--------|--------|--------|--------|-------|-------|
| J440            | J441   | J4489  | J449   | J4520  | J4521  | J4522 | J4530 |
| J4531           | J4532  | J4540  | J4541  | J4542  | J4550  | J4551 | J4552 |
| J45901          | J45902 | J45909 | J45990 | J45991 | J45998 |       |       |

##### 9.2.60.4.1 Group Clinical Visits for Pregnancy

Group clinical visits are benefits of Texas Medicaid for the management of the condition of pregnancy when submitted with procedure code 99078 and modifier TH, along with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| O0900           | O0901  | O0902  | O0903  | O0910  | O0911  | O0912  | O0913  |
| O09211          | O09212 | O09213 | O09219 | O09291 | O09292 | O09293 | O09299 |
| O0930           | O0931  | O0932  | O0933  | O0940  | O0941  | O0942  | O0943  |
| O09511          | O09512 | O09513 | O09519 | O09521 | O09522 | O09523 | O09529 |
| O09611          | O09612 | O09613 | O09619 | O09621 | O09622 | O09623 | O09629 |
| O0970           | O0971  | O0972  | O0973  | O09811 | O09812 | O09813 | O09819 |
| O09821          | O09822 | O09823 | O09829 | O09891 | O09892 | O09893 | O09899 |
| O0990           | O0991  | O0992  | O0993  | O09A0  | O09A1  | O09A2  | O09A3  |
| Z331            | Z3400  | Z3401  | Z3402  | Z3403  | Z3480  | Z3481  | Z3482  |
| Z3483           | Z3490  | Z3491  | Z3492  | Z3493  |        |        |        |

Providers are encouraged to provide a comprehensive curriculum or use materials from the Centering Pregnancy Program that will be incorporated into the educational portion of the group clinical visit.

Comprehensive curriculums will allow clinical issues to be identified to promote a healthy pregnancy. The education material may include screenings and preparations, health maintenance, counseling, and birth plans:

- Screenings and preparations may consist of the following:
  - Expected course of the pregnancy
  - Anticipated outline of the scheduled visits
  - Signs and symptoms, which should be reported to the physician as soon as possible
  - Laboratory services
  - Appropriate use of medications
  - Proper weight monitoring
  - Immunizations (e.g., hepatitis, varicella, or RhoGAM)
  - Complications of pregnancy that may occur (e.g., preeclampsia, diabetes, or edema)

- Health maintenance may consist of the following:
  - Hygiene (e.g., hot tubs or baths)
  - Sexual activity
  - Exercise
  - Nutrition and dietary needs
- Counseling may consist of the following:
  - Use of seat belts
  - Job activity
  - Air travel
  - Dental care appointments
  - Domestic abuse or violence
  - Tobacco or drug use
- Birth planning may consist of the following:
  - What to expect during labor and delivery
  - Pain control during labor
  - Complications during delivery that may occur (e.g., Caesarean section or episiotomy)
  - Breast feeding
  - Newborn care
  - Postpartum adjustments

Group clinical visits for the management of pregnancy are restricted to female clients who are 10 through 55 years of age and are limited to a maximum of 10 visits per 270 days for any provider.

To be considered for reimbursement, procedure code 99078 with modifier TH must be billed for the same date of service by the same provider as E/M procedure code 99211, 99212, 99213, 99214, or 99215 with modifier TH.

#### 9.2.60.4.2 Preventive Care Visits

Adult preventive services must be provided in accordance with the U.S. Preventive Services Task Force (USPSTF) recommendations with grades A or B. USPSTF recommendations, with specific age and frequency guidelines, are listed on the USPSTF website. The following are recommended screens in addition to USPSTF and are covered separately:

- Tuberculosis screening
- Prostate cancer screening; prostate specific antigen (PSA) for men who are 50 through 64 years of age

Preventive care services are comprehensive visits that may include counseling, anticipatory guidance, and risk-factor-reduction interventions. Documentation must indicate the anticipatory guidance rendered.

Preventive health visits for clients who are birth through 20 years of age are available through THSteps medical checkups.

**Referto:** Section 4, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 4.3.12.2.3, “Hearing Screening” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information about hearing screenings.

Adult preventive services (procedure codes 99385, 99386, 99387, 99395, 99396, and 99397) are a benefit of Texas Medicaid for clients who are 21 years of age and older. Adult preventive services are limited to one service per rolling year, any provider, and must be billed with diagnosis code Z0000, Z0001, Z01411, or Z01419.

The following USPSTF recommendations are not reimbursed separately but must be provided, when applicable, as part of the routine preventive exam:

- Counseling to prevent tobacco use and tobacco-caused disease
- Behavioral counseling in primary care to promote a healthy diet
- Behavioral interventions to promote breast feeding
- Screening for obesity in adults (with intensive counseling and interventions)
- Screening and behavioral counseling interventions in primary care to reduce alcohol misuse
- Screening for depression

The USPSTF recommendation of chemoprevention of breast cancer is not a benefit of Texas Medicaid.

Laboratory, immunization, and diagnostic procedures recommended by USPSTF are covered benefits and may be billed separately, as clinically indicated, using the most appropriate diagnosis code that represents the client’s condition. Diagnosis code Z0000 or Z0001 may each be used once per rolling year for each screen if no other diagnosis is appropriate for the service rendered, but no more frequently than recommended by the USPSTF.

Services that exceed USPSTF recommendations are not considered part of a screening and require medical documentation to justify medical necessity of the services performed.

For clients who are 21 years of age and older, breast exams and Pap smears are available through programs related to women’s health, including Texas Medicaid family planning services and the Healthy Texas Women (HTW) program.

**Referto:** Section 2, “Medicaid Title XIX Family Planning Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Section 2, “Healthy Texas Women (HTW) Program Overview” in the *Healthy Texas Women Program Handbook (Vol. 2, Provider Handbooks)*.

9.2.60.4.3      Smoking and Tobacco Use Cessation Counseling

Smoking and tobacco use cessation counseling is a benefit for male and female clients who are 10 years of age and older and must be submitted with procedure codes 99406 and 99407. Smoking and tobacco use cessation counseling services delivered in a group setting will be limited to a maximum of 8 participants per group and must be submitted with modifier HQ.

| Modifier | Description      |
|----------|------------------|
| HQ       | Group Counseling |

Procedure codes 99406 and 99407 may be reimbursed when submitted with the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| F17200          | F17201 | F17203 | F17208 | F17209 | F17210 | F17211 | F17213 |
| F17218          | F17219 | F17220 | F17221 | F17223 | F17228 | F17229 | F17290 |
| F17291          | F17293 | F17298 | F17299 |        |        |        |        |

Procedure codes 99406 and 99407 may be billed in any combination by the same or a different provider, whether individual or group counseling, and are limited to eight services per rolling year.

Additional services require documentation of medical necessity to exceed the established limit.

Procedure codes 99406 and 99407 are limited to once per day, same or different procedure code, any provider.

**Referto:** Subsection 4.1.16, “Smoking and Tobacco Use Cessation Counseling” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for additional information related to the smoking and tobacco use cessation counseling and additional covered diagnoses related to pregnancy.

#### 9.2.60.4.4 Office and Outpatient Consultation Services

A consultation is an E/M service provided at the request of another provider for the evaluation of a specific condition or illness. The consultation must meet the following requirement:

- There must be a request from the referring provider for the evaluation of a particular condition or illness.
- There must be correspondence from the consulting provider back to the referring provider indicating the consulting provider’s medical findings.

During a consultation, the consulting provider may initiate diagnostic and therapeutic services if necessary.

The visit is not considered a consultation if any of the following applies:

- If diagnostic or therapeutic treatment is initiated during a consultation and the patient returns for follow-up care, the follow-up visit is considered an established patient visit, and must be billed as an established patient visit.
- If the purpose of the referral is to transfer care.

The medical records maintained by both the referring and consulting providers must identify the other provider and the reason for consultation.

Providers must use procedure code 99242, 99243, 99244, or 99245 when billing new or established patient consultations in the office, or in an outpatient or other ambulatory facility.

Office or outpatient consultations are limited to one consultation every six months by the same provider for the same diagnosis. Subsequent office or outpatient consultation visits during this six-month period will be denied.

#### 9.2.60.4.5 Physician Services Provided in the Emergency Department

Providers must use procedure codes 99281, 99282, 99283, 99284, and 99285 when billing emergency department services. If an emergency department visit is billed by the same provider with the same date of service as an office visit, outpatient consultation, inpatient consultation, or subsequent nursing facility service, the emergency department visit may be reimbursed and the other services will be denied.

If an emergency department visit is billed by the same provider with the same date of service as an initial nursing facility service, the initial nursing facility service may be reimbursed and the emergency department visit will be denied.

Multiple emergency department visits provided by the same provider for the same client on the same day must have the times for each visit documented on the claim form. Also, more than one visit billed with the same date of service can be indicated by adding the appropriate modifier to the claim form. Medical documentation is required to support this service.

Reimbursement for physicians in the emergency department is based on Section 104 of TEFRA. TEFRA requires that Medicaid limit reimbursement for nonemergent and nonurgent physicians' services furnished in hospital outpatient settings that also are ordinarily furnished in physician offices. The emergency department procedure code that is submitted on the claim is used to determine the appropriate reimbursement for these services. The procedure code billed may include, but is not limited to, E/M, surgical or other procedure, or any other service rendered to the client in the emergency room. The procedure code must accurately reflect the services rendered by the physician in the hospital's emergency department. The reimbursement for each service is determined by multiplying the base allowable fee by 60 percent.

**Referto:** Section 4, "Outpatient Hospital (Medical and Surgical Acute Care Outpatient Facility)" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for information on emergency department services by facilities (room and ancillary).

Subsection 2.2.1.1, "Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information.

#### 9.2.60.4.6 After-Hours Services

Texas Medicaid limits reimbursement for after-hours charges to office-based providers rendering services after routine office hours.

An office-based provider must bill an after-hours charge in addition to a visit charge for providing services after routine office hours. This after-hours charge must be billed when a provider judges it medically necessary to provide after-hours care for a patient with an emergent condition. A provider's routine office hours are the hours posted at the physician's office as the usual office hours. Medicaid reimburses office-based physicians an inconvenience or after-hours charge when any of the following situations exist:

- The physician leaves the office or home to see a client in the emergency room.
- The physician leaves the home and returns to the office to see a client after the physician's routine office hours.
- The physician is interrupted from routine office hours to attend to another client's emergency outside of the office.

Charges for inconvenience or after-hours services by emergency department-based physicians or emergency department-based groups are not allowed.

After-hours procedure codes are limited to one per day, same provider.

Providers must use procedure codes 99050, 99056, or 99060 to report after-hours services.

#### 9.2.60.5 Other Inpatient and Outpatient Hospital Services

A hospital care visit submitted by the same provider for the same client within three days of a new patient office, home, nursing facility, or skilled nursing facility (SNF) visit, for the same or for a similar diagnosis must be submitted as a subsequent care visit.

**Referto:** Subsection 9.2.74.6, “Global Fees” in this handbook for more information about global services.

**9.2.60.6 Prolonged Physician Services**

Prolonged services (procedure code 99417 or 99418) involve face-to-face patient contact and may be utilized in the office, outpatient hospital, or inpatient hospital settings. The face-to-face patient contact must exceed the time threshold of the following E/M procedure codes submitted for the date of service and be beyond the usual service.

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 | 99221 |
| 99222           | 99223 | 99231 | 99232 | 99233 | 99242 | 99243 | 99244 | 99245 | 99252 |
| 99253           | 99254 | 99255 | 99341 | 99342 | 99344 | 99345 | 99347 | 99348 | 99349 |
| 99350           |       |       |       |       |       |       |       |       |       |

Prolonged services that are less than 30 minutes in duration cannot be reported separately.

Procedure code 99417 should only be used when an office or other outpatient services, office consultation, or other outpatient evaluation and management service has been selected using time alone as the basis, and the time required to report the highest level (procedure code 99205, 99215, 99245, 99345, or 99350) service has been exceeded by 15 minutes.

Procedure code 99418 is only used when an inpatient or observation evaluation and management service has been selected using time alone as the basis, and only after the time required to report the highest level service (procedure code 99223, 99233, 99236, 99255, 99306, or 99310) has been exceeded by 15 minutes.

Procedure code 99417 and 99418 are limited to 4 units (1 hour) per day and should not be used to report an additional time increment of less than 15 minutes.

Prolonged services in the inpatient setting involving face-to-face client contact that is beyond the usual service may be reimbursed when provided on the same day as an initial hospital visit (procedure codes 99221, 99222, 99223, 99252, 99253, 99254, and 99255) or a subsequent hospital visit (99231, 99232, 99233).

Prolonged physician services are denied when billed with critical care or emergency room visits billed with the same date of service, same provider.

Prolonged physician services without a face-to-face contact (procedure codes 99358 and 99359) are not a benefit of Texas Medicaid.

**Note:** For non-face-to-face prolonged physician services, and for use of the unlisted evaluation and management procedure code for clients who are birth through 20 years of age, refer to subsection 2.6.1.1.5, “Non-Face-to-Face Prolonged Services” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*).

**Referto:** Subsection 4.2.2, “Psychotherapy Services” in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about prolonged psychotherapy services.

Physician standby services are not a benefit of Texas Medicaid.

**9.2.60.6.1 Inpatient or Observation Services**

Inpatient hospital visits must be submitted using procedure codes 99221, 99222, 99223, 99231, 99232, and 99233.

If a subsequent hospital visit (procedure code 99231, 99232, or 99233) following admission is billed by the same provider with the same date of service as any of the following emergency department visits, office visits, or outpatient consultations, the subsequent hospital visit may be reimbursed and the other visits will be denied:

| Procedure Code |       |       |       |       |       |       |       |       |       |
|----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99281          | 99282 | 99283 | 99284 | 99285 | 99202 | 99203 | 99204 | 99205 | 99211 |
| 99212          | 99213 | 99214 | 99215 | 99242 | 99243 | 99244 | 99245 |       |       |

Only one initial hospital care visit may be reimbursed to the same provider within a 30-day period for the same diagnosis. Additional initial hospital visits with the same diagnosis within a 30-day period will be denied.

A subsequent hospital visit (procedure code 99231, 99232, or 99233) will be denied when billed on the same day to the same provider as critical care services (procedure codes 99291 and 99292).

E/M services provided in a hospital setting following a major procedure and provided by the same provider or in direct follow-up for postsurgical care are included in the surgeon's global surgical fee and are denied as included in another procedure.

**Referto:** Subsection 9.2.47, "Newborn Services" in this handbook for information about newborn services.

Hospital observation is for professional services for a period of more than 6 hours but fewer than 24 hours regardless of the hour of the initial contact, even if the client remains under physician care past midnight.

If dialysis treatment and physician observation visits are billed on the same day by the same provider, and same specialty other than an internist or nephrologist, the dialysis treatment will be paid and the physician observation visit will be denied.

#### 9.2.60.6.2 Concurrent Care

Concurrent care exists when services are provided to a patient by more than one physician on the same day during a period of hospitalization in the inpatient hospital setting. Concurrent care is appropriate when the level of care and the documented clinical circumstances require the skills of different specialties to successfully manage the patient in accordance with accepted standards of good medical practice. Concurrent care may be reimbursed to providers of different specialties when the services are for unrelated diagnoses involving different organ systems.

Concurrent care will be denied when billed for providers of the same specialty for the same or related diagnoses. Denied concurrent care may be appealed when accompanied by documentation of medical necessity.

Each appeal submitted for concurrent care must contain the following information:

- Documentation of the medical necessity for the physician's services (care and treatment)
- Diagnosis and indication of the severity of the client's condition (acute or critical)
- Role of the physician in the care of the client, including the name of the admitting physician
- Specialty and subspecialty of each physician and any limitations of practice

Claims appealed without clear documentation of medical necessity as described above will be denied.

**Important:** *If the attending physician requests only a consultation, the request must be clearly stated in the orders.*

All concurrent care is subject to retrospective review. Documentation of medical necessity for concurrent care must be retained by the physician as required by federal law and must include, but is not limited to, documentation of:

- The orders for concurrent care or valid reasons for the request by the attending physician.
- The name of the requesting physician by the physician rendering concurrent care.

#### 9.2.60.6.3 Consultations

Consultations provided to hospital inpatients, observation patients, residents of nursing facilities, or patients in a partial hospital setting must be billed using procedure codes 99252, 99253, 99254, and 99255.

One initial inpatient or observation consultation (procedure code 99252, 99253, 99254, or 99255) is allowed for each hospitalization within a 30-day period for the same diagnosis. Subsequent consultations billed as initial consultations during this time period will be denied.

**Referto:** Subsection 9.2.60.4.4, “Office and Outpatient Consultation Services” in this handbook for additional criteria information.

#### 9.2.60.6.4 Critical Care

Critical care includes the care of critically ill clients that require the constant attention of the physician. The physician must either be at bedside or immediately available to the client. The physician’s full attention must be devoted to the client so that the physician cannot render E/M to any other client during the same period of time. Critical care is usually given in a critical care area, such as the coronary care unit, intensive care unit, respiratory care unit, neonatal intensive care unit, or the emergency department care facility. The following procedure codes are used to bill critical care services:

| Procedure Code                                                                     | Limitations                                                                                                                                |
|------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 99291                                                                              | A per day charge for the first 30 to 74 minutes of critical care (time spent by the physician does not have to be continuous on that day). |
| 99292                                                                              | A per day charge for each additional 30 minutes beyond the first 74 minutes of critical care for up to 6 units or 3 hours per day.*        |
| 99471                                                                              | A per day charge for initial inpatient pediatric critical care of the critically ill client who is 29 days through 24 months of age.       |
| 99472                                                                              | A per day charge for subsequent inpatient pediatric critical care of the critically ill client who is 29 days through 24 months of age.    |
| 99475                                                                              | A per day charge for initial inpatient pediatric critical care of the critically ill client who is 2 years through 5 years of age.         |
| 99476                                                                              | A per day charge for subsequent inpatient pediatric critical care of the critically ill client who is 2 years through 5 years of age.      |
| * If the number of units is not stated on the claim, a quantity of one is allowed. |                                                                                                                                            |

Services for a client who is not critically ill and unstable but who was treated in a critical care unit must be reported using subsequent hospital visit codes or hospital consultation codes.

If the same provider who performed a major surgery must also perform critical care on the same day for the same client, the provider must bill the critical care with documentation that the critical care was unrelated to the specific anatomic injury or general surgical procedure.

Critical care (procedure codes 99291, 99292, 99471, 99472, 99475, and 99476) may be reimbursed only to the provider rendering the critical care service at the time of crisis. Critical care involves high-complexity decision-making to access, manipulate, and support vital system functions. While providers

from various specialties may be consulted to render an opinion and assist in the management of a particular portion of the care, only the provider managing the care of the critically ill patient during a life threatening crisis may bill the critical care procedure codes.

Critical care procedure codes 99291 and 99292 are used to report the total duration of time spent by a physician providing critical care services to a critically ill or critically injured client, even if the time spent by the physician on that date is not continuous.

Actual time spent with the individual client must be recorded in the client's record and reflect the time billed on the claim. The time that can be reported as critical care is the time spent engaged in work directly related to the individual client's care whether that time was spent at the immediate bedside or elsewhere on the floor or unit.

Time spent under the following circumstances may not be reported as critical care:

- Activities that occur outside of the unit or off the floor
- Activities that do not directly contribute to the treatment of the client
- While performing separately reportable procedures or services

Critical care of less than 30 minutes total duration per day must be reported with the appropriate E/M procedure code.

If critical care that meets the initial 30-minute time requirement is provided to the same client by different physicians, the initial provider's claim may be reimbursed. The second provider's claim will be denied but may be appealed. The time spent by each physician cannot overlap; two physicians cannot bill critical care for care delivered at the same time. Supporting medical record documentation that includes the time in which the critical care was rendered must be provided by the second physician. In addition, a statement must be submitted indicating the physician was the only provider managing the care of the critically ill patient during the life threatening crisis.

If the provider's time exceeds the 74-minute threshold for procedure code 99291, procedure code 99292 may be billed for each additional 30 minutes. Procedure code 99292 must be billed by the same performing provider or by a member of the same performing provider's group practice and is limited to 6 units per day for any provider.

Inpatient critical care services provided to infants 29 days through 24 months of age are reported with pediatric critical care procedure codes 99471 and 99472. The pediatric critical care procedure codes are reported as long as the infant or young child qualifies for critical care services during the hospital stay through 24 months of age.

Pediatric critical care (procedure codes 99471, 99472, 99475, and 99476) is a per-day charge. Only one physician can bill pediatric critical care per day. If an inpatient or outpatient E/M service is billed by the same provider with the same date of service as pediatric critical care, the E/M service is denied.

Critical care provided to a neonatal, pediatric, or adult client in an outpatient setting (e.g., emergency room), which does not result in admission must be billed using procedure codes 99291 and 99292.

Critical care provided to a neonatal or pediatric client in both the outpatient and inpatient settings on the same day must be billed using the appropriate neonatal or pediatric critical care procedure code.

If critical care (procedure code 99291 or 99292) is provided to a patient at a distinctly separate time from another outpatient E/M service by the same provider, both services may be reimbursed with supporting medical record documentation.

Claims may be subject to retrospective review to ensure documentation supports the medical necessity of the service when billing the claim.

Critical care procedure codes 99291 and 99292 will be denied when submitted with the same date of service by the same provider as neonatal intensive care procedure code 99468, 99469, 99478, 99479, or 99480.

9.2.60.6.5      Hospital Inpatient or Observation Discharge

Hospital inpatient or observation discharge must be submitted using procedure code 99238 or 99239.

Hospital inpatient or observation discharge management billed by the same provider with the same date of service as the admission will be denied.

Discharge management billed by the same provider with the same date of service as an emergency room visit will be considered for reimbursement and the emergency visit will be denied.

Subsequent hospital inpatient or observation visits billed by the same provider with the same date of service as discharge management will be denied.

9.2.60.6.6      Nursing Facility Services

Providers must use the following procedure codes when billing initial nursing facility assessments, subsequent nursing facility care, and annual nursing facility assessments in a nursing facility:

| Procedure Codes |        |        |       |       |       |       |       |       |  |
|-----------------|--------|--------|-------|-------|-------|-------|-------|-------|--|
| 99304*          | 99305* | 99306* | 99307 | 99308 | 99309 | 99310 | 99315 | 99316 |  |

Initial nursing facility assessments (marked with an asterisk in the table above) include all services related to an admission to the nursing facility.

Comprehensive initial nursing facility assessments performed by the same provider for the same diagnosis are limited to one every six months. The second initial nursing facility assessment within the six-month period will be denied.

Prolonged services in the nursing facility involving direct (face-to-face) patient contact that is beyond the usual service may be reimbursed on the same day as a nursing facility visit (procedure code 99304, 99305, 99306, 99307, 99308, 99309, or 99310).

All E/M services, regardless of setting, are considered part of the initial nursing facility care when performed by the same provider on the same day as the admission.

Subsequent nursing facility care E/M procedure codes 99307, 99308, 99309, and 99310 are limited to one per day regardless of diagnosis.

9.2.60.6.7      Observation

When a patient is admitted to the hospital as an inpatient and is discharged in less than 48 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This is an acceptable billing practice under Texas Medicaid when the physician makes the changes to the admitting order from inpatient status to outpatient observation status before the hospital submits the claim for reimbursement.

9.2.60.7      Home or Residence Services

Home or residence services are provided in a private residence, temporary lodging, or short-term accommodation (e.g, hotel, campground, hostel, or cruise ship), assisted living facility, group home (that is not licensed as an intermediate care facility for individuals with intellectual disabilities), custodial care facility, or residential substance abuse treatment facility. New patient visits are limited to once every three years. Providers may use procedure codes 99341, 99342, 99344, and 99345 when billing for new patient services provided in the home/residence setting.

Providers must use procedure codes 99347, 99348, 99349, and 99350 when billing established patient services provided in the home setting.

A subsequent home or residence visit (procedure codes 99347, 99348, 99349, and 99350) billed with the same date of service as a new patient home or residence visit (procedure codes 99344 and 99345) by the same provider will be denied as part of another procedure, regardless of the diagnosis.

Established E/M services are limited to one per day, same provider.

**9.2.60.8 Referrals**

A *referral* is defined as the transfer of the total or specific care of a patient from one physician to another; a referral does not constitute a consultation. These services must be billed using the appropriate E/M visit code.

When a Texas Medicaid provider refers a Texas Medicaid client to another provider for additional treatment or services, the referring provider must forward notification of the client’s eligibility and his NPI. The client must be made aware that the provider he/she is referred to does or does not participate in Texas Medicaid. Some clients not eligible for Medicaid are eligible for family planning through the HHSC Family Planning Program. These clients should be referred to contracted agency providers for family planning services.

**9.2.60.8.1 Referral Requirements for Children with Disabilities**

All health-care professionals are required by state and federal legislation to refer children who are 35 months of age or younger with developmental delays to early childhood intervention services provided under the authority of the Texas Health and Human Services Commission (HHSC).

*Referto:* Subsection 2.9, “Early Childhood Intervention (ECI) Services” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

**9.2.61 Physician Services in a Long Term Care (LTC) Nursing Facility**

HHSC requires initial certification and recertification of Medicaid clients in nursing facilities by physicians in accordance with guidelines set forth in federal regulations. Physician visits for certification and recertification are considered medically necessary, and are reimbursable by Medicaid whether performed in the physician’s office or the nursing facility.

Additional information is available on the HHSC website at <https://hhs.texas.gov>.

**9.2.62 Podiatry and Related Services**

Podiatry and related services are a benefit of Texas Medicaid.

**9.2.62.1 Clubfoot Casting**

Procedure code 29450 is limited to clients who are birth through 3 years of age and is payable to a physician in the management of clubfoot when a previous surgery has been performed. The physician may bill the appropriate E/M code with a casting code and be reimbursed for both. Procedure code 29750 is limited to clients who are birth through 3 years of age and is payable to a physician in addition to the initial casting or strapping procedure.

Use modifiers LT (left) and RT (right) with all procedures, as appropriate.

Casting and wedging are benefits if the client has one of the following conditions:

| Diagnosis Codes |        |        |        |        |        |        |       |
|-----------------|--------|--------|--------|--------|--------|--------|-------|
| M21541          | M21542 | M21549 | Q6600  | Q6601  | Q6602  | Q6610  | Q6611 |
| Q6612           | Q66211 | Q66212 | Q66219 | Q66221 | Q66222 | Q66229 | Q6630 |
| Q6631           | Q6632  | Q6640  | Q6641  | Q6642  | Q6651  | Q6652  | Q666  |
| Q6670           | Q6671  | Q6672  | Q6681  | Q6682  | Q6689  | Q6690  | Q6691 |
| Q6692           |        |        |        |        |        |        |       |

### **9.2.62.2 Flat Foot Treatment**

Reimbursement for treatment of deformities of the foot and lower extremity that includes flat foot as a component of the deformity may be considered when the client presents with significant pain in the foot, leg, or knee, resulting in a loss of or decrease in function, along with a secondary condition such as valgus deformity or plantar fasciitis.

Treatment of flat foot (flexible pes planus) that is solely cosmetic in nature is not a benefit of Texas Medicaid.

### **9.2.62.3 Routine Foot Care**

Routine foot care must be medically necessary and billed with the following procedure codes. No specific diagnosis restrictions exist. The following procedures are limited to one service every six months per client, regardless of provider specialty: 11055, 11056, 11057, 11719, and G0127.

### **9.2.63 Prostate Procedures for Benign Prostatic Hyperplasia (BPH)**

Prostate procedures are a benefit of Texas Medicaid and include surgical, minimally invasive, and laser procedures. Prostate procedures treat lower urinary tract symptoms (LUTS) attributed to benign prostatic hyperplasia (BPH).

BPH is an overgrowth of cells in the prostate gland and is increasingly common as men age. BPH does not require treatment and is not the target of interventions; however, BPH can lead to an enlargement of the prostate (benign prostatic enlargement [BPE]).

BPE can result in lower urinary tract symptoms (LUTS) which includes urinary frequency, urinary retention, inability to completely empty the bladder, blood in the urine, and kidney disease. Symptoms can be mild, moderate or severe.

LUTS attributable to BPH may significantly worsen the quality of life of male patients.

Treatment of LUTS attributable to BPH include a continuum of interventions ranging from lifestyle modifications, pharmacological management, minimally invasive therapy (MIST), laser therapy, to surgery.

Various prostate procedure services may be provided in the inpatient hospital, outpatient hospital, ambulatory surgical center or office settings.

In some cases, surgical or minimally invasive therapies might be appropriate as a first line of therapy without a trial of pharmacological management for reasons of patient preference or for reasons including inability to empty the bladder, urinary reflux, kidney disease, repeated urinary infections, kidney stones, or hematuria resulting from BPH.

Pharmacological management may be the first line treatment of BPH. Medication therapy may not be tolerated due to adverse effects including low blood pressure, dizziness, fatigue, and impaired sexual function.

Surgical therapies may have longer durability, but often require an inpatient setting using general anesthesia and result in a longer recovery time.

TURP (Transurethral Resection of the Prostate) has been a preferred surgical treatment of BPH for many years and is the standard by which other treatments are compared. TURP may have a high rate of durability which may be contrasted with an increased rate of complications.

Minimally invasive therapies (MISTs) have developed as an alternative to the surgical approach of TURP, however they may have less durability than TURP.

MIST may be performed in an office setting, ambulatory surgical center or outpatient hospital under local anesthesia.

MIST may offer a short recovery time and patients are able to return to normal activity faster. MIST often preserves sexual functioning. After lifestyle modifications and medication, the next line of treatment may include minimally invasive therapy.

### **9.2.63.1 Minimally Invasive Therapies (MIST) for BPH**

Minimally invasive therapy is an option for patients who wish a less invasive technique that may be performed in a lower acuity setting, as well as higher surgical risk patients.

#### **9.2.63.1.1 Types of Minimally Invasive Therapy**

Prostatic Urethral Lift (PUL) involves placement of one or more implants in the lateral lobes of the prostate using a transurethral delivery device, with minimal side effects. Procedure codes 52441, 52442, C9739, and C9740, are a covered benefit when the following restrictions are met:

- Client is 45 years of age and older
- Prostate gland volume is  $\leq 80$  gm and verified absence of an obstructive middle lobe
- International Prostate Symptom Score (IPSS)  $\geq 12$
- Pharmacological management has been unsuccessful or side effects intolerable
- No current urinary tract infection
- No allergy to nickel
- Surgical intervention is required

Transurethral water vapor therapy, also known as water vapor energy ablation (procedure code 53854) causes transurethral destruction of prostate tissue by radiofrequency and is indicated in prostate volumes  $<80$  gm.

Transurethral Microwave Thermotherapy (TUMT) (procedure code 53850) is indicated for BPH when patients have a prostate length of 30-55 mm and have failed pharmacological management. The procedure is contraindicated for patients with:

- Prostate cancer
- Penile or metallic implants
- Lack of bladder control due to nerve problems
- Nerve problems caused by diabetes
- Narrowing of the urethra due to scarring
- Prior prostate surgery or pelvic radiation therapy

Transurethral Needle Ablation (TUNA) (procedure code 53852) destroys prostate tissue by radiofrequency thermotherapy and is suitable for prostates  $\leq 60$  gm with predominantly lateral lobes. The procedure is an option when invasive surgery is not possible due to comorbidities.

Laser Therapy as an option for treating BPH, is indicated when there is an increased bleeding risk.

#### **9.2.63.1.2 Types of Laser Procedures**

Interstitial Laser Coagulation (ILC) laser coagulation of prostate, procedure code 52647, is a minimally invasive laser procedure producing coagulation lesions in the prostate for small to medium prostates (30-40 g).

Photoselective Vaporization of the Prostate (PVP), procedure code 52648, is a laser vaporization of prostate suitable for all patients, including those taking anticoagulation or antiplatelet medication.

Contact Laser ablation of the Prostate (CLAP) (procedure code 52648) may be reimbursed when the following is present:

- High risk of bleeding
- Prostates >100 gm
- Urinary retention

Holmium Laser Procedures of the Prostate (HoLAP), Holmium Laser Enucleation of the Prostate (HoLEP), and Holmium Laser Resection of the Prostate (HoLRP), (procedure code 52649) may be used for all patients, but particularly if anticoagulant or antiplatelet therapy is used.

Surgical Therapy is a first-line treatment if the patient is unable to completely empty the bladder, has urinary reflux possibly resulting in backflow of urine into the kidney causing swelling of the kidney, or kidney disease caused by BPH, frequent urinary infections, kidney stones, bladder stones, or continuing blood in the urine caused by BPH. Surgical therapy may be necessary after failing medications or other treatments.

#### 9.2.63.1.3 Types of Surgical Therapy

Transurethral resection of the prostate (TURP) (procedure codes 52601, 52630, and 52640) are the gold standard for treating moderate to severe BPH after failing medication and when minimally invasive procedures are contraindicated.

Transurethral incision of the prostate (TUIP) (procedure code 52450) is utilized when minimally invasive procedures are contraindicated, and patient is not a good candidate for TURP. Usually used to treat small prostates  $\leq 30$  grams and it has a lower risk of blood transfusion than TURP. Services are limited to once per day.

Prostatectomy Perineal (procedure code 55801), Suprapubic (procedure code 55821), and Retropubic, (procedure code 55831) are suitable treatments for larger prostates > 50 grams and for men who are also good surgical candidates.

Prostatectomy, Laparoscopy (procedure code 55867) is a procedure suitable for prostates > 100 grams and for men who are also good surgical candidates.

Urethral Stent Temporary (procedure code 53855) is designed for short term use (6 months to 3 years) and is suitable for high-risk patients especially those with urinary retention.

Urethral Stent Permanent (procedure code 52282) is utilized in men  $\geq 60$  years or < 60 years who are poor surgical candidates' w/ prostate  $\geq 2.5$  cm long. The procedure is considered for high-risk patients especially with urinary retention.

#### 9.2.63.2 Prior Authorization and Documentation Requirements

Prior authorization is required for:

- Prostatic Urethral Lift (PUL) add on procedure code 52442 utilizing more than 6 implants.
- Assistant surgeons for holmium laser procedures of the prostate, procedure code 52649, including holmium laser ablation of the prostate (HoLAP), holmium laser enucleation of the prostate (HoLEP), and holmium laser resection of the prostate (HoLRP).

**Note:** All other services addressed in this section do not require prior authorization.

Requests for prior authorization must be received and approvals must be obtained before services are rendered. Requests received after the service date will be denied.

The SMPA form must be submitted, signed, and dated within 60 days before the date of service. Services will not be authorized prior to the ordering provider's signature date.

To facilitate determination of medical necessity and avoid unnecessary denials, the provider must maintain correct and complete information, including documentation for medical necessity for the test requested. The provider must maintain documentation of medical necessity in the client’s medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies, and to confirm eligibility criteria are met for the benefit.

Prior authorization requests must be submitted on a SMPA Request Form and must include the following documentation: the client’s diagnosis, medical necessity for choosing the procedure, the expected total number of implants required for the procedure, and a brief statement addressing the medical necessity for the number of implants requested.

Medical necessity must be documented for assistant surgeons for holmium laser procedures of the prostate, procedure code 52649, including holmium laser ablation of the prostate (HoLAP), holmium laser enucleation of the prostate (HoLEP), and holmium laser resection of the prostate, (HoLRP).

In addition to documentation requirements outlined in this section, if any, of the following requirements apply: all services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

Documentation in the medical record should include a diagnosis of BPH and LUTS that in the opinion of the provider requires a procedure as an intervention for treatment.

Reimbursement is restricted for holmium laser procedure of the prostate, procedure code 52649, including holmium laser ablation of the prostate (HoLAP), holmium laser enucleation of the prostate (HoLEP), and holmium laser resection of the prostate (HOLRP), unless there is an approved prior authorization for an assistant surgeon obtained before the procedure.

**Referto:** “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for detailed information about prior authorization requirements.

**9.2.63.3 Reimbursement Billing Guidelines**

The following procedure codes may be reimbursed for prostate procedures:

| BPH Procedures Reimbursement Information                           |                            |                                                                                                                                                                                                      |
|--------------------------------------------------------------------|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Service Category                                                   | Procedure Codes            | Additional Information                                                                                                                                                                               |
| Minimally Invasive Therapy (MIST)<br>Prostatic Urethral Lift (PUL) | 52441, 52442, C9739, C9740 | Only Prostatic Urethral Lift (PUL) procedure code 52442 requires prior authorization if more than 6 total implants.<br>Procedure codes 52441, C9739, and C9740 may only be billed once per lifetime. |
| Minimally Invasive Therapy (MIST)-Other                            | 53850, 53852, 53854        | Procedure codes 53850, 53852, and 53854 utilize heat or energy transfer techniques to reduce prostate size by tissue necrosis.                                                                       |
| Laser Therapy                                                      | 52647, 52648, 52649        | Procedure codes 52647, 52648, and 52649 are not covered in an office setting.                                                                                                                        |

| BPH Procedures Reimbursement Information |                            |                                                                                                                                                                                                                                                                                            |
|------------------------------------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Service Category                         | Procedure Codes            | Additional Information                                                                                                                                                                                                                                                                     |
| Surgical Therapy                         | 52601, 52630, 52640, 52450 | Procedure code 52601 may be billed for the first TURP and may be billed again if the first TURP is staged with modifier 58. Procedure codes 52630 and 52640 may not be billed on the same day of service. Procedure codes 52601, 52630, 52640, and 52450, are all limited to once per day. |
| Prostatectomy                            | 55801, 55821, 55831        | Suitable for larger prostates and requires hospital admission and services are limited to one service per day.                                                                                                                                                                             |
| Urethral Stent                           | 52282, 53855               | May be temporary or permanent procedure code 52282, and is limited to men who are 60 years of age or older.                                                                                                                                                                                |

| Modifier | Use For                                                            |
|----------|--------------------------------------------------------------------|
| 58       | Procedure code 52601 if billed a second time in a staged procedure |

The Prostatic Urethral Lift (PUL) procedure in an office setting or a hospital outpatient department is billed as procedure code 52441 for the first implant and each subsequent implant is billed separately as procedure code 52442.

If the PUL procedure is billed with procedure code 52442, then procedure code 52441 must also be billed for the same date of service.

The PUL procedure in an ambulatory surgical center setting is billed as procedure code C9739 for the first through third implants and four or more subsequent implants are billed separately as procedure code C9740.

The PUL procedure is limited to one procedure per lifetime. The PUL procedure is billed with only one set of codes, either procedure codes 52441 and 52442 in an office setting or outpatient hospital setting OR procedure codes C9739 and C9740 in an ambulatory surgical center setting. More than 7 implants will require prior authorization. Procedure code 52442 (2 or more implants) will require prior authorization if procedure code 52442 is billed for more than 6 implants.

A TURP may be billed with procedure code 52601, 52630, or 52640 and may be reimbursed to the physician performed in a hospital, an outpatient hospital setting, and an ambulatory surgical center with only one service per day.

If a provider submits separate charges for any of the TURP procedure codes listed above and procedure code 52351 or 52354, the charges for procedure codes 52351 and 52354 will be denied as part of the TURP procedure billed as procedure code 52601.

If the first TURP is performed as a staged procedure, the first procedure may be billed as procedure code 52601. The next part of the staged TURP procedure may also be billed as procedure code 52601 but must also include Modifier 58.

A subsequent TURP (not including the staged TURP for procedure code 52601 with modifier 58) may be billed as either procedure code 52630 or procedure code 52640.

A TUMT, procedure code 53850, may be performed in an office as well as hospital setting, and reimbursed to the physician in the outpatient hospital setting as well in an ambulatory surgical center and may be performed only once per day.

A TUNA, procedure code 53852, reimbursed to the physician in the outpatient hospital setting as well in an ambulatory surgical center setting or an office setting and may be performed only once per day.

Transurethral water vapor therapy, procedure, code 53854, may be performed in an office, and reimbursed to the physician in the outpatient hospital setting as well in an ambulatory surgical center.

A TUIP, procedure code 52450, is reimbursed to the physician in the inpatient hospital setting as well in an ambulatory surgical center and may be performed only once per day.

An ILC, procedure code 52647, may be reimbursed to the physician in the inpatient hospital setting as well as in an ambulatory surgical center; and may be performed only once per day.

A PVP, procedure code 52648, may be reimbursed to the physician in the inpatient hospital setting as well as in an ambulatory surgical center; and may be performed only once per day.

Holmium Laser Procedures of the Prostate (HoLAP), Holmium Laser Enucleation of the Prostate (HoLEP), and Holmium Laser Resection of the Prostate (HoLRP), procedure code 52649, may be reimbursed to the physician in the inpatient and outpatient hospital setting as well as in an ambulatory surgical center; and may be performed only once per day and may allow for an assistant surgeon.

A permanent urethral stent, procedure code 52282, may be performed in an office and may be reimbursed to the physician in the inpatient or outpatient hospital setting as well as in an ambulatory surgical center; and may be performed only once per day.

A temporary urethral stent, procedure code 53855, may be performed in an office and may be reimbursed to the physician in the inpatient or outpatient hospital setting as well as in an ambulatory surgical center; and may be performed only once per day.

## **9.2.64 Radiation Therapy**

Radiation treatment management may be reimbursed by Texas Medicaid as defined in the *Current Procedure Terminology* (CPT) manual under the “Radiation Treatment Management” section.

The following radiation therapy services are limited to once per day unless documentation submitted with an appeal supports the need for the service to be provided more frequently:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment
- Intracavitary radiation source application
- Interstitial radiation source application
- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization
- Radioisotope therapy

Laboratory and diagnostic radiological services provided in the office setting may be reimbursed to physicians as a total component. Radiation treatment centers may also be reimbursed for the total component for these services in the outpatient hospital setting. Injectable medications given during the course of therapy in any setting may be reimbursed separately.

Routine follow-up care by the same physician on the day of any therapeutic radiology service will be denied. Medical services within program limitations may be reimbursed on appeal when documentation supports the medical necessity of the visit due to services unrelated to the radiation treatment or radiation treatment complication.

The professional component and the technical component will be denied when billed with the total component. The total component includes the professional and the technical components.

The professional component may be reimbursed for services rendered in the inpatient hospital setting, radiation treatment center setting, or outpatient hospital setting. Physicians billing client services rendered in the office setting or in a facility recognized by Medicaid as a radiation treatment center may be reimbursed for total components.

**9.2.64.1      Brachytherapy**

**9.2.64.1.1      Prior Authorization for Brachytherapy**

Prior authorization is not required for brachytherapy.

**9.2.64.1.2      Other Limitations on Brachytherapy**

Clinical brachytherapy services include admission to the hospital and daily care. Initial and subsequent hospital care will be denied as part of another service when billed with the same date of service as clinical brachytherapy services.

An office visit will be denied as part of another service when billed with the same date of service by the same provider as clinical treatment planning and clinical brachytherapy.

Normal follow-up care by the same physician will be denied as part of another service when billed with the same dates of service as any therapeutic radiology service. Any other E/M office visit will be denied as part of another service when billed with the same date of service by the same provider as the radiation treatment or radiation treatment complication.

Providers may use modifier 25 to indicate that the additional visit was for a separate, distinct service unrelated to the radiation treatment or radiation treatment complication. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available upon request.

Each service provided using procedure codes 77321 and 77470 are limited to once per two calendar months.

Documentation that supports the provision of special procedures must be maintained in the client’s medical record and made available upon request.

**9.2.64.2      Stereotactic Radiosurgery**

**9.2.64.2.1      Prior Authorization for Stereotactic Radiosurgery**

The following procedure codes are a benefit of Texas Medicaid with prior authorization and documentation of medical necessity:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 32701           | 61781 | 61782 | 61783 | 61796 | 61797 | 61798 | 61799 | 61800 | 63620 |
| 63621           | 76145 | 77336 | 77370 | 77371 | 77372 | 77373 | 77399 | 77423 | 77520 |
| 77522           | 77523 | 77525 | G0339 | G0340 | G0563 | G6002 | S8030 |       |       |

Prior authorization requests received after the requested start date of service will be denied for dates of service prior to the date the request was received.

Prior authorization requirements for stereotactic radiosurgery and stereotactic body radiation therapy may include, but are not limited to, diagnoses indicating one of the following medical conditions:

- Benign and malignant tumors of the central nervous system
- Vascular malformations
- Soft tissue tumors in chest, abdomen, or pelvis
- Trigeminal neuralgia refractory to medical management

Stereotactic radiosurgery and stereotactic body radiation therapy are considered investigational and not a benefit of Texas Medicaid for all other indications including, but not limited to, epilepsy, chronic pain, and pancreatic adenocarcinoma.

Prior authorization requirements for proton beam (procedure codes 77520, 77522, 77523, 77525, and S8030) and helium ion radiosurgery (procedure code 77423) may include, but are not limited to, diagnoses indicating one of the following medical conditions:

- Melanoma of the uveal tract (iris, choroid, ciliary body)
- Postoperative treatment for chordomas or low-grade chondrosarcomas of the skull or cervical spine
- Prostate cancer
- Pituitary neoplasms
- Other central nervous system tumors located near vital structures

Prior authorization for neutron beam radiosurgery may be considered for malignant neoplasms of the salivary gland.

Prior authorization requirements for procedure code 77399 include, but are not limited to, diagnosis, documentation of medical necessity, a specific description of the procedure to be performed, and an indication that the procedure would not be covered by a more specific procedure code.

Stereotactic radiosurgery and stereotactic body radiation therapy will not be prior authorized for clients with metastatic disease and a projected life span of less than six months or for clients with widespread cerebral or extracranial metastasis that is not responsive to systemic therapy.

9.2.64.2.2 Other Limitations on Stereotactic Radiosurgery

In the following table, the procedure codes in Column A may be reimbursed when at least one corresponding procedure code from Column B has been paid to the same provider for the same date of service:

| Column A Procedure Code | Column B Procedure Code |
|-------------------------|-------------------------|
| 61797                   | 61796, 61798            |
| 61799                   | 61798                   |
| 61800                   | 61796, 61798            |
| 63621                   | 63620                   |

Procedure codes 61796 and 63620 must not be billed more than once per course of treatment.

Procedure codes 61797 and 61799 must not be billed more than once per lesion, and may only be billed up to four times for the entire course of treatment, regardless of the number of lesions treated.

Procedure code 63621 may only be billed up to two times for the entire course of treatment, regardless of the number of lesions treated.

Procedure codes 77336 and 77370 may be reimbursed to the ordering physician if consultation is performed with a qualified medical physicist for stereotactic radiosurgery, brachytherapy, or any other method of radiation therapy for which medical necessity is determined.

Procedure code 77336 will be limited to once per week of treatment.

Procedure code 77370 will be limited to once per course of treatment. A special medical physics consultation may be reimbursed when the input and complex analysis of a qualified medical physicist are beyond that of a continuing medical physics consultation and are necessary to address a patient-specific reason or scenario.

## **9.2.65 Radiology Services**

In compliance with HHS regulations, physicians (MDs and DOs), group practices, and clinics may not bill for radiology services provided outside their offices. These services must be billed directly by the facility/provider that performs the service.

This restriction does not affect radiology services performed by physicians or under their supervision in their offices. The radiology equipment must be owned by physicians and be located in their office to allow for billing of TOS 4 (complete procedure) or TOS T with modifier TC to Texas Medicaid. If physicians are members of a clinic that owns and operates radiology facilities, they may bill for these services. However, if physicians practice independently and share space in a medical complex where radiology facilities are located, they may not bill for these services even if they own or share ownership of the facility, unless they supervise and are responsible for the operation of the facilities on a daily basis.

Providers billing for three or more of the same radiology procedures on the same day must indicate the time the procedure was performed to indicate that it is not a duplicate service. The use of modifiers 76 and 77 does not remove the requirement of indicating the times services were rendered. The original claim will be denied but can be appealed with the documentation of procedure times.

When billing for services in an inpatient or outpatient hospital setting, the radiologist may only bill the professional interpretation of procedures (modifier 26). This also applies when providing services to a client who is in an inpatient status even if the client is brought to the radiologist's office for the service. The hospital is responsible for all facility services (the technical component) even if the service is supplied by another facility/provider.

A separate charge for an X-ray interpretation billed by the attending or consulting physician is not allowed concurrently with that of the radiologist. Interpretations are considered part of the attending or consulting physician's overall work-up and treatment of the patient.

Providers other than radiologists are sometimes under agreement with facilities to provide interpretations in specific instances. Those specialties may be paid if a radiologist does not bill for the professional component of X-ray procedures.

If duplicate billings are found between radiologists and the other specialties, the radiologist may be paid, and the other provider is denied.

Oral preparations for X-rays are included in the charge for the X-ray procedure when billed by a physician. Separate charges for the oral preparation are denied as part of another procedure on the same day.

Separate charges for injectable radiopharmaceuticals used in the performance of specialized X-ray procedures may be paid. If a procedure code is not indicated, an unlisted code must have a drug name, route of administration, and dosage written on the claim.

### **9.2.65.1 Diagnosis Requirements**

Physicians enrolled and practicing as radiologists are not routinely required to send a diagnosis with their request for payment except when providing the following services:

- Arteriograms

- Venography
- Chest X-rays
- Cardiac blood pool imaging
- Echography

Radiologists are required to identify the referring provider by full name and credentials in Block 17 of the CMS-1500 claim form. Radiology procedures submitted by all other physician specialties must reference a diagnosis with every procedure billed. As with all procedures billed to Texas Medicaid, baseline screening and/or comparison studies are not a benefit.

### **9.2.65.2 Cardiac Blood Pool Imaging**

Cardiac blood pool imaging may be reimbursed with procedure codes 78472, 78473, 78481, 78483, 78494, and 78496. Prior authorization is required for outpatient diagnostic services.

**Referto:** Subsection 9.2.26.9, “Myocardial Perfusion Imaging” in this handbook for more information about myocardial perfusion imaging.

Section 4, “Radiological and physiological laboratory services” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information and authorization requirements.

### **9.2.65.3 Chest X-Rays**

All providers including radiologists billing for chest X-rays must supply a diagnosis code.

Screening, baseline, or rule-out studies do not qualify for reimbursement.

### **9.2.65.4 Magnetic Resonance Angiography (MRA)**

MRA is an effective diagnostic tool used to detect, diagnose, and aid the treatment of heart disorders, stroke, and blood vessel diseases.

**Referto:** Section 4, “Radiological and physiological laboratory services” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information and authorization requirements.

### **9.2.65.5 Magnetic Resonance Imaging (MRI)**

MRIs may be an effective diagnostic tool for detecting defects, diseases, and trauma.

**Referto:** Section 4, “Radiological and physiological laboratory services” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for additional information and authorization requirements.

### **9.2.65.6 Technetium TC 99M**

Procedure codes A9500 (Sestamibi) and A9502 (Tetrofosmin) are limited to three per day when billed by the same provider.

### **9.2.66 Magnetoencephalography (MEG)**

Magnetoencephalography is a benefit of Texas Medicaid when medically necessary for the presurgical evaluation of clients with intractable epilepsy (i.e., refractory or drug-resistant epilepsy), brain tumors, vascular malformations of the brain, or when one or more conventional measures of localizing the seizure focus have failed to provide sufficient information.

MEG is a noninvasive method of measuring magnetic fields in the brain and is used to precisely localize both the essential functional cortex (i.e., eloquent cortex) and abnormal epileptogenic brain activity as part of a presurgical evaluation. The origin of abnormal MEG brain activity can be precisely localized (source localization) and displayed as a map or image.

The term magnetic source imaging (MSI) refers to an imaging technique that combines a MEG scan with an anatomic magnetic resonance imaging (MRI) image of the brain to map or visualize brain activity.

MEG may assist in guiding the placement of intracranial Electroencephalography (EEG) and, in some patients, avoid an unnecessary intracranial EEG. In the case of pre-surgical mapping of patients with operable lesions, MEG provides non-invasive localization of eloquent cortices (e.g., motor, sensory, language, auditory, or visual).

Physicians must provide MEG services in a comprehensive level IV epilepsy center or a physiological laboratory. A neurologist, epileptologist, or neurosurgeon must order the MEG test.

MEG is not a stand-alone test. Pre-surgical evaluation with MEG testing must include a comprehensive evaluation by the medical team.

Procedure codes 95965, 95966, and 95967 may be reimbursed for MEG services. Procedure code 95967 is an add-on code and must be submitted with procedure code 95966.

Physicians may be reimbursed for the professional component of MEG services.

### **9.2.66.1 Prior Authorization for MEG**

Prior authorization is required for MEG. Prior authorization requests must be submitted using the [Special Medical Prior Authorization \(SMPA\) Request Form](#). The ordering physician must sign and date the form and submit it to the SMPA department. Requests must include documentation supporting the medical necessity of the study. The ordering physician must maintain all documentation.

Providers must include information about the MEG test facility. This information must be documented on the SMPA form.

Prior authorization requests must include a completed SMPA request form and all of the following documentation:

- Documentation of one of the following conditions: intractable epilepsy, brain tumors, or vascular malformations of the brain
- The statement of medical necessity from the ordering physician, which must support the need for MEG with identified medical conditions as applicable, including:
  - History of treatment methods used
  - Length of treatment and treatment outcomes
  - Date of onset of supporting diagnoses
  - Types of previous diagnostic testing used or considered and documentation that indicates how these tests have failed to provide the necessary information to address the client's medical needs or when one or more conventional measures of localizing the seizure focus have failed to provide sufficient information

Documentation from the ordering physician outlining how the MEG test will assist in identifying the area to be resected in instances when an MEG test is needed due to a tumor and surgery is the first option.

Documentation that includes the name and number of medications, tried and failed, to control the client's seizure activity when the MEG request is related to intractable epilepsy.

The date of prior MEG, the results of the previous MEG tests, and supporting medical documentation outlining the medical reasons for the repeat MEG requested if the request is for a repeat MEG.

Providers may submit prior authorization requests electronically, through the provider website, fax, or by standard mail.

The provider may complete and submit the required prior authorization documentation through any approved electronic method. The provider must maintain a copy of the prior authorization request as well as all submitted documentation in the client's medical record at the performing provider's place of business, in order to complete the prior authorization process electronically.

The provider may complete and submit the required prior authorization documentation through fax or standard mail and must maintain a copy of the prior authorization request as well as all submitted documentation in the client's medical record at the performing provider's place of business, to complete the prior authorization process by paper.

Providers must include correct and complete information, such as documentation of medical necessity for the service(s) requested, in order to avoid unnecessary denials. Providers must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request.

Requests for prior authorization with documentation supporting the medical necessity for the number of studies requested must be received on, or before, the requested date(s) of service.

**Note:** *Requests received after the services are performed will be denied for dates of service that occurred before the date the request was received.*

### **9.2.66.2 Documentation Requirements**

In addition to documentation requirements outlined in the "Prior Authorization for MEG" section, the following requirements apply:

- All MEG services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.
- Magnetic Source Imaging procedure code S8035 is not a benefit of Texas Medicaid, but it may be used for informational purposes.

### **9.2.66.3 Noncovered Services**

The following MEG services are not benefits of Texas Medicaid:

- MEG when used as a stand-alone test for epilepsy
- MEG used as a first-line diagnostic screening
- MEG when used for evaluation of:
  - Alzheimer's disease
  - Autism
  - Cognitive and mental disorders
  - Developmental dyslexia
  - Learning disorders
  - Migraines
  - Multiple sclerosis
  - Parkinson's disease
  - Schizophrenia
  - Stroke rehabilitation
  - Traumatic brain injury

**Note:** *This list is not all inclusive.*

9.2.67      **Reduction Mammoplasties**

9.2.67.1      **Prior Authorization for Reduction Mammoplasty**

Procedure code 19318 is the removal of breast tissue and is a benefit of Texas Medicaid when prior authorized.

For prior authorization of reduction mammoplasty, a completed “Medicaid Certificate of Medical Necessity for Reduction Mammoplasty” form signed and dated by the physician, must be submitted and include at least one of the following criteria:

- Evidence of severe neck and/or back pain with incapacitation from the pain.
- Evidence of ulnar pain or paresthesia from thoracic nerve root compression.
- Submammary dermatological conditions such as intertrigo and acne that are refractory to conventional medication.
- Shoulder grooving with ulceration due to breast size.

In addition to the above criteria, documentation must indicate:

- The minimum weight of tissue expected to be removed from each breast with consideration to height and weight is as follows:

| Height and Weight Chart |               |                      |
|-------------------------|---------------|----------------------|
| Under 5’                | <140 lb       | 300 grams per breast |
| 5’-5’4”                 | up to 180 lb  | 350 grams per breast |
| 5’4”-5’7”               | up to 220 lb  | 400 grams per breast |
| 5’7”- and up            | 211 lb and up | 500 grams per breast |

- The client, if 40 years of age or older, has had a mammogram within the past year that was negative for cancer.

The following services are *not* a benefit of Texas Medicaid:

- Reduction mammoplasty for cosmetic purposes (such as the equalization of breast size)
- Augmentation mammoplasty to increase breast size

The physician is required to maintain the following documentation in the client’s clinical records:

- A complete history and physical
- Pulmonary function studies results
- Past treatments, therapies, and outcomes for pain control and weight reduction

The physician is required to maintain preoperative photographs (frontal and lateral views) in the client’s clinical records and must be made available to Texas Medicaid upon request.

For reimbursement purposes on a bilateral procedure, the full allowed amount will be paid to the surgeon and assistant surgeon for the first breast reduction and one half the allowed amount will be paid for the second reduction. Facilities are paid for one surgical procedure.

When submitting for prior authorization, requests *must* be sent to TMHP Special Medical Prior Authorization. Sending requests directly to the TMHP Medical Director delays the processing of the request. Providers are to mail prior authorization requests for reduction mammoplasty to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax 1-512-514-4213

**9.2.68 Renal Disease**

**9.2.68.1 Dialysis Patients**

Physician reimbursement for supervision of patients on dialysis is based on a monthly capitation payment (MCP) calculated by Medicare. The MCP is a comprehensive payment that covers all physician services associated with the continuing medical management of a maintenance dialysis patient for treatments received in the facility. An original onset date of dialysis treatment must be included on claims for all renal dialysis procedures in all POSs except inpatient hospital. The original onset date must be the same date entered on the 2728 form sent to the Social Security office.

**9.2.68.1.1 Physician Supervision of Dialysis Patients**

Physician supervision of outpatient ESRD services includes services provided in the course of office visits where any of the following occur:

- The routine monitoring of dialysis.
- The treatment or follow-up of complications of dialysis, including:
  - The evaluation of related diagnostic tests and procedures.
  - Services involved in prescribing therapy for illnesses unrelated to renal disease, if the treatment occurs without increasing the number of physician-client contacts.

Use the following procedure codes when billing for physician supervision of outpatient ESRD dialysis services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90951           | 90952 | 90953 | 90954 | 90955 | 90956 | 90957 | 90958 | 90959 | 90960 |
| 90961           | 90962 | 90963 | 90964 | 90965 | 90966 | 90967 | 90968 | 90969 | 90970 |

The procedure codes must be billed as described below:

- In the circumstances where the client is not on home dialysis and has had a complete assessment visit during the calendar month and ESRD-related services are provided for a full month, procedure codes 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, or 90962 must be used, determined by the number of face-to-face visits the physician has had with the client during the month, and the client’s age.
- When a full calendar month of ESRD-related services are reported for clients on home dialysis, procedure codes 90963, 90964, 90965, or 90966 must be used, determined by the client’s age.
- Report procedure codes 90967, 90968, 90969, and 90970 when ESRD related services are provided for less than a full month, per day, under the following conditions:
  - The client is seen for a partial month and is not on home dialysis and received one or more face-to-face visits but did not receive a complete assessment.
  - The client is on home dialysis and received less than a full month of services.

- The client is a transient client.
- The client was hospitalized during a month of services before a complete assessment could be performed.
- Dialysis was stopped due to recovery or death of client.
- The client received a kidney transplant.
- Procedure codes 90967, 90968, 90969, and 90970 are limited to one per day by any provider. When billing procedure code 90967, 90968, 90969, or 90970, the date of service must indicate each day that supervision was provided.
- Procedure codes 90967, 90968, 90969, and 90970 will be denied when billed within the same calendar month by any provider as procedure code 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, 90962, 90963, 90964, 90965, or 90966.
- Procedure codes 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, 90962, 90963, 90964, 90965, or 90966 are limited to once per calendar month by any provider, and only one service may be reimbursed per calendar month by any provider.

The following services may be provided in conjunction with physician supervision of ESRD dialysis but are considered non-routine and may be billed separately:

- Declotting of shunts when performed by the physician.
- Physician services to inpatient clients. If a client is hospitalized during a calendar month of ESRD related services before a complete assessment is performed, or the client receives one or more face-to-face assessments, but the timing of inpatient admission prevents the client from receiving a complete assessment, the physician must bill procedure code 90967, 90968, 90969, or 90970 for each date of outpatient supervision and bill the appropriate hospital evaluation and management code for individual services provided on the hospitalized days. If a client has a complete assessment during a month in which the client is hospitalized, procedure code 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, or 90962 must be reported for the month of supervision, determined by the number of face-to-face physician visits with the client during the month, and the client's age. The appropriate inpatient evaluation and management codes must be reported for procedures provided during the hospitalization.
- Dialysis at an outpatient facility other than the usual dialysis setting for a patient of a physician who bills the MCP. The physician must bill procedure code 90967, 90968, 90969, or 90970 for each date supervision is provided. The physician may not bill for days that the client dialyzed elsewhere.
- Physician services beyond those that are related to the treatment of the patient's renal condition that cause the number of physician-patient contacts to increase. Physicians may bill on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Use procedure codes 90935, 90937, 90945, and 90947 for inpatient dialysis services for ESRD or non-ESRD clients when the physician is present during dialysis treatment. The physician must be physically present and involved during the course of the dialysis. These codes are not payable for a cursory visit by the physician; hospital visit codes must be used for a cursory visit.

The hospital procedure codes 90935, 90937, 90945, and 90947 are for complete care of the patient; hospital visits cannot be billed on the same day as these codes. However, if the physician only sees the patient when they are not dialyzing, the physician must bill the appropriate hospital visit code. The inpatient dialysis code must not be submitted for payment.

Only one of procedure code 90935, 90937, 90945, or 90947 may be reimbursed per day, any provider.

Procedure codes 90935, 90937, 90945, and 90947 may also be used for outpatient dialysis services for non-ESRD clients.

Inpatient services provided to hospitalized clients for whom the physician has agreed to bill monthly, may be reimbursed in one of the following three ways:

- The physician may elect to continue monthly billing, in which case she or he may not bill for individual services provided to the hospitalized clients.
- The physician may reduce the monthly bill by 1/30th for each day of hospitalization and charge fees for individual services provided on the hospitalized days.
- The physician may bill for inpatient dialysis services using the inpatient dialysis procedure codes. The physician must be present and involved with the clients during the course of the dialysis.

Clients may receive dialysis at an outpatient facility other than his or her usual dialysis setting, even if their physician bills for monthly dialysis coordination. The physician must reduce the monthly billed amount by 1/30th for each day the client is dialyzed elsewhere.

Physician services beyond those related to the treatment of the client's renal condition may be reimbursed on a fee-for-service basis. The physician should provide documentation stating the illness is not related to the renal condition and added visits are required.

Payment is made for physician training services in addition to the monthly capitation payment for physician supervision rendered to maintenance facility clients.

### **9.2.68.2 Laboratory Services for Dialysis Patients**

Texas Medicaid may reimburse for laboratory services performed for dialysis patients.

Charges for routine laboratory services performed according to established frequencies are included in the facility's composite rate billed to Texas Medicaid regardless of where the tests were performed. Routine laboratory testing processed by an outside laboratory are billed to the facility and billed by a renal dialysis facility, unless they are inclusive tests.

Nonroutine laboratory services for people dialyzing in a facility and all laboratory work for people on CAPD may be billed separately from the dialysis charge.

**Referto:** Subsection 7.2.7, "Laboratory and Radiology Services" in the *Clinics and Other Outpatient Facility Services Handbook* (Vol. 2, *Provider Handbooks*) for more information on laboratory services.

### **9.2.68.3 Self-Dialysis Patients**

Physician reimbursement for supervision of patients on self-dialysis is made after completion of the patient's training. If the training is not completed, payment is proportionate to the amount of time spent in training. Payment for training may be made in addition to payment under the MCP for physician supervision of an in-facility maintenance dialysis patient. Use procedure codes 90989 and 90993 for dialysis training regardless of the type of training performed. These procedure codes must be billed as specified:

- When complete dialysis training is provided, bill procedure code 90989. The date of service indicates the date training was completed, and the quantity is 1.
- When dialysis training is not completed, bill procedure code 90993. The date of service must list each day that a session of training was provided and the quantity must indicate the number of training sessions provided.

The amount of reimbursement of subsequent training is determined by prorating the physician's payment for initial training sessions. The amount of payment for each additional training session does not exceed \$20.

#### 9.2.68.3.1 Physician Supervision

All physician services required to create the capacity for self-dialysis must include:

- Direction of and participation in training of dialysis patients.
- Review of family and home status and environment, and counseling and training of family members.
- Review of training progress.

#### 9.2.68.3.2 Dialysis Supervision

The following services are included in the physician charge for supervision of a client on self-dialysis:

- Physician services rendered during a dialysis session including those backup dialyses that occur in outpatient facility settings.
- Office visits for the routine evaluation of patient progress, including the interpretation of diagnostic tests and procedures.
- Physician services rendered by the attending physician in the course of an office visit, the primary purpose of which is routine monitoring or the follow-up of complications of dialysis, including services involved in prescribing therapy for illnesses unrelated to renal disease, which may be appropriately treated without increasing the number of contacts beyond those occurring at regular monitoring sessions or visits for treatment of renal complications.
- General support services (for example, arranging for supplies).

#### 9.2.68.3.3 Subsequent Training

No additional payment is made after the initial self-dialysis training course unless subsequent training is required for one of the following reasons:

- A change from the client's treatment machine to one the client had not been trained to use in the initial training course
- A change in setting
- A change in dialysis partner

The physician must document the reason for additional training sessions on the CMS-1500 paper claim form.

Dialysis equipment and supplies used by the client who dialyzes in the home are not benefits of Texas Medicaid, including the lease or purchase of dialysis machines and disposable supply kits.

### 9.2.69 Sacroiliac Joint Fusion

Sacroiliac (SI) joint fusion (procedure code 27278) is a benefit for clients who are 18 years of age or older and requires prior authorization. Requests must be submitted on the Special Medical Prior Authorization (SMPA) Request Form and be signed within 30 days of the start of care date.

**Note:** *Prior authorization requests must be submitted before the requested start date of service. Any request for dates of service that occur before the date on which the request was received will be denied.*

#### 9.2.69.1 Prior Authorization Criteria

The prior authorization request must be submitted with a provider statement or attestation that the client needs an SI joint fusion and the indications for that determination, including attestation that the following diagnoses have been ruled out:

- Lumbar disc herniation (diagnosis code M5126)
- Lumbar spondylolisthesis (diagnosis code M4316)

- Lumbar spinal stenosis (diagnosis codes M48061 and M48062)
- Lumbar facet degeneration (diagnosis code M4696)
- Lumbar vertebral body fracture (diagnosis code S32009A or S32009D)

The submitted documentation must also include observed evidence of at least three out of five positive test results from SI joint pain provocative tests, such as the following:

- SI joint compression test
- Posterior pelvic pain provocation test—P4 (thigh thrust)
- Patrick’s test (Fabere test)
- Sacroiliac distraction test
- Gaenslen’s test

Documentation of the following must be included with the prior authorization request:

- Six months of conservative efforts have failed to improve the client’s pain by 50–70%.
- The client successfully achieved 50–75% temporary pain reduction with SI joint injections.

### **9.2.70 Sign Language Interpreting Services**

Sign language interpreting services are benefits of Texas Medicaid. Providers must use procedure code T1013 with modifier U1 for the first hour of service, and T1013 with modifier UA for each additional 15 minutes of service. Procedure code T1013 billed with modifier U1 is limited to once per day, same provider, and procedure code T1013 billed with modifier UA is limited to a quantity of 28 per day, same provider.

Sign language interpreting services are available to Medicaid clients who are deaf or hard of hearing or to a parent or guardian of a Medicaid client if the parent or guardian is deaf or hard of hearing.

Physicians in private or group practices with fewer than 15 employees may be reimbursed for this service. The physician will be responsible for arranging and paying for the sign language interpreting services to facilitate the medical services being provided. The physician will then seek reimbursement from Texas Medicaid for providing this service.

Sign language interpreting services must be provided by an interpreter who possesses one of the following certification levels (i.e., levels A through H) issued by either the Office of Deaf and Hard of Hearing Services, Board for Evaluation of Interpreters (BEI) or the National Registry of Interpreters for the Deaf (RID).

Certification Levels:

- BEI Level I/Ii and BEI OC: B (Oral Certificate: Basic)
- BEI Basic and RID NIC (National Interpreter Certificate) Certified
- BEI Level II/IIi, RID CI (Certificate of Interpretation), RID CT (Certificate of Transliteration), RID IC (Interpretation Certificate), and RID TC (Transliteration Certificate)
- BEI Level III/IIIi, BEI OC: C (Oral Certificate: Comprehensive), BEI OC: V (Oral Certificate: Visible), RID CSC (Comprehensive Skills Certificate), RID IC/TC, RID CI/CT, RID RSC (Reverse Skills Certificate), and RID CDI (Certified Deaf Interpreter)
- BEI Advanced and RID NIC Advanced
- BEI IV/IVi, RID MCSC (Master Comprehensive Skills Certificate), and RID SC: L (Specialist Certificate: Legal)
- BEI V/VI

- BEI Master; and RID NIC Master

Interpreting services include the provision of voice-to-sign, sign-to-voice, gestural-to-sign, sign-to-gestural, voice-to-visual, visual-to-voice, sign-to-visual, or visual-to-sign services for communication access provided by a certified interpreter.

The physician requesting interpreting services must maintain documentation verifying the provision of interpreting services. Documentation of the service must be included in the client's medical record and must include the name of the sign language interpreter and the interpreter's certification level. Documentation must be made available if requested by HHSC or its designee.

### 9.2.71 Skin Therapy

Skin therapy is a benefit of Texas Medicaid and may be reimbursed with the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 15782           | 15783 | 15792 | 15793 | 17000 | 17003 | 17004 | 17106 | 17107 | 17108 |
| 17110           | 17111 | 17250 | 17260 | 17261 | 17262 | 17263 | 17264 | 17266 | 17270 |
| 17271           | 17272 | 17273 | 17274 | 17276 | 17280 | 17281 | 17282 | 17283 | 17284 |
| 17286           | 17311 | 17312 | 17313 | 17314 | 17315 | 17340 | 17999 | 11900 | 11901 |
| 96900           | 96910 | 96912 | 96913 | 96920 | 96921 | 96922 | 96999 |       |       |

Claims for incision and drainage of acne when the diagnosis states there is infection or pustules may be paid.

Procedure codes 96900, 96910, 96912, 96913, 96920, 96921, and 96922 are covered benefits for the following diagnosis codes:

| Diagnosis Codes |        |        |        |       |       |       |       |
|-----------------|--------|--------|--------|-------|-------|-------|-------|
| A672            | B070   | B081   | B550   | B551  | B552  | B559  | C8401 |
| C8402           | C8403  | C8404  | C8405  | C8406 | C8407 | C8408 | C8409 |

| T3264           | T3265   | T3266   | T3270   | T3271   | T3272   | T3273   | T3274   |
| T3275           | T3276   | T3277   | T3280   | T3281   | T3282   | T3283   | T3284   |

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| T3285           | T3286 | T3287 | T3288 | T3290 | T3291 | T3292 | T3293 |
| T3294           | T3295 | T3296 | T3297 | T3298 | T3299 |       |       |

Procedure codes 15782, 15783, 15792, 15793, and 17999 require prior authorization. Requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department with documentation supporting the medical necessity of the anticipated procedure. This documentation must remain in the client's medical record and is subject to retrospective review. To avoid unnecessary denials, the physician must provide correct and complete information.

Dermabrasion procedures (procedure codes 15782 and 15783) and chemical peel procedures (procedure codes 15792 and 15793) may be prior authorized with documentation that the client meets all of the following criteria:

- A diagnosis of actinic keratosis with more than three lesions.
- Failed conservative treatment or documentation that conservative treatment is contraindicated.

Prior authorization requests for procedure code 17999 must include the following documentation:

- A clear, concise description of the procedure to be performed.
- Reason for recommending the particular procedure.
- Documentation that a specific procedure code is not available for the procedure requested.
- The client's diagnosis.
- Medical records indicating prior treatment for the diagnosis and the medical necessity of the requested procedure.
- Place of service the procedure is to be performed.
- Documentation that the procedure is not investigational or experimental.
- The physician's intended fee for the procedure including a comparable procedure code.

## 9.2.72 Sleep Studies

Sleep study procedure code 95806 is not a benefit of Texas Medicaid.

### 9.2.72.1 Actigraphy

Actigraphy (procedure code 95803) may be reimbursed in the office or outpatient hospital setting with a limit of one per day, and two per rolling year by any provider. Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Actigraphy can be performed as a stand-alone procedure or as an adjunct to polysomnography or multiple sleep latency test (MSLT).

Actigraphy (procedure code 95803) must be billed with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| F5104           | F5105 | F5113 | G2581 | G4700 | G4701 | G4709 | G4710 |
| G4711           | G4712 | G4713 | G4714 | G4719 | G4720 | G4721 | G4722 |
| G4723           | G4724 | G4725 | G4726 | G4727 | G4729 | G4761 |       |

If the primary care physician performs the actigraphy, the technical component must be billed (procedure code 95803 with modifier TC).

Documentation of actigraphy must include a hard-copy printout or electronic file. Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s professional interpretation and report must include inspection of the entire recording and integration of the information gathered from other professionals’ analysis and observations. Documentation of the interpretation must be maintained by the interpreting physician.

Under the following conditions, actigraphy may be a useful adjunct to a detailed history, examination, and subjective sleep diary for the diagnosis and treatment of insomnia, circadian-rhythm disorders, and excessive sleepiness:

- When demonstration of multiday rest-activity patterns is necessary to diagnose, document severity, and guide the proper treatment.
- When more objective information regarding the day-to-day timing or the amount or patterns of a client’s sleep is necessary for optimal clinical decision-making.
- When the severity of a sleep disturbance reported by the client or caretaker seems inconsistent with clinical impressions or laboratory findings.
- To clarify the effects of, and under some instances, compliance with pharmacologic, behavioral, phototherapeutic, or chronotherapeutic treatment.
- In symptomatic clients for whom an accurate history cannot be obtained and at least one of the following is true:
  - A polysomnographic study has already been conducted.
  - A polysomnographic study is considered unlikely to be of much diagnostic benefit.
  - A polysomnographic study is not yet clearly indicated (because of the absence of accurate historical data).
  - A polysomnographic study is not immediately available.

Actigraphy may be useful in the assessment of specific aspects of the following disorders:

- Insomnia. Assessment of sleep variability, measurement of treatment effects, and detection of sleep phase alterations in insomnia secondary to circadian rhythm disturbance.
- Restless legs syndrome or periodic limb movement disorder. Assessment of treatment effects.

**9.2.72.2      Pneumocardiograms**

Pneumocardiograms (procedure code 95807) are limited to clients who are birth through 12 months of age.

Pneumocardiograms are limited to one per day, and two per rolling year by any provider. Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Procedure code 95807 must be billed with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| G4731           | G4733 | G4734 | G4735 | G4736 | G4737 | P282  | P2830 |
| P2831           | P2832 | P2833 | P2839 | P2840 | P2841 | P2842 | P2843 |
| P2849           | P285  | P2911 | P2912 | R063  | R0681 | R0902 | R230  |
| R6813           |       |       |       |       |       |       |       |

Documentation of the complete readings associated with the pneumocardiogram and the physician’s interpretation must be maintained in the client’s medical record in a hard-copy printout or electronic file at the facility where the procedure is performed.

The physician's interpretation and report must include inspection and integration of the information gathered from all physiological systems and other professionals' analysis and observations.

### 9.2.72.3 Polysomnography

Polysomnography (procedure codes 95782, 95783, 95808, 95810, and 95811) is a benefit of Texas Medicaid.

Polysomnography is distinguished from sleep studies by the inclusion of sleep staging that includes a 1-to 4- lead electroencephalogram (EEG), electro-oculogram (EOG), and a limb or submental electro-myogram (EMG).

Additional parameters of sleep that are evaluated in polysomnography include, but are not limited to, the following:

- ECG
- Airflow (by thermistor or intra-nasal pressure monitoring)
- Respiratory effort
- Adequacy of oxygenation by oximetry or transcutaneous monitoring
- Extremity movement or motor activity
- EEG monitoring for sleep staging
- Nocturnal penile tumescence
- Esophageal pH or intraluminal pressure monitoring
- Continuous blood pressure monitoring
- Snoring
- Body positions
- Adequacy of ventilation by end-tidal or transcutaneous CO2 monitoring

For a sleep study to be reported as a polysomnography, sleep must be recorded and staged. Use the following procedure codes to bill for polysomnography studies: 95782, 95783, 95808, 95810, and 95811.

Polysomnography (procedure codes 95782, 95783, 95808, 95810, and 95811) is limited to one per day and two per rolling year by any provider and is allowed for the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| E6601           | E662   | F10182 | F10282 | F10982 | F11182 | F11282 | F11982 |
| F13182          | F13282 | F13982 | F14182 | F14282 | F14982 | F15182 | F15282 |
| F15982          | F19182 | F19282 | F19982 | F5101  | F5102  | F5103  | F5104  |
| F5105           | F5109  | F5111  | F5112  | F5113  | F5119  | F513   | F514   |
| F515            | F518   | F519   | G120   | G121   | G1221  | G128   | G2581  |
| G373            | G4700  | G4701  | G4710  | G4711  | G4712  | G4713  | G4719  |
| G4720           | G4721  | G4722  | G4723  | G4724  | G4725  | G4726  | G4727  |
| G4729           | G4730  | G4731  | G4732  | G4733  | G4734  | G4735  | G4736  |
| G4737           | G4739  | G47411 | G47419 | G47421 | G47429 | G4750  | G4751  |
| G4752           | G4753  | G4754  | G4759  | G4761  | G4762  | G4763  | G4769  |
| G478            | G479   | G7100  | G7101  | G7102  | G7109  | G7120  | G7121  |

| J9610           | J9611  | J9612  | N5201  | N5202  | N5203  | N521   | N5235  |

| Diagnosis Codes |        |        |       |        |        |        |        |
|-----------------|--------|--------|-------|--------|--------|--------|--------|
| N5236           | N5237  | Q040   | Q041  | Q042   | Q078   | Q308   | Q311   |
| Q312            | Q313   | Q315   | Q318  | Q320   | Q321   | Q322   | Q323   |
| Q324            | Q672   | Q673   | Q674  | Q75001 | Q75002 | Q75009 | Q7501  |
| Q75021          | Q75022 | Q75029 | Q7503 | Q75041 | Q75042 | Q75049 | Q75051 |
| Q75052          | Q75058 | Q7508  | Q751  | Q752   | Q753   | Q754   | Q755   |
| Q758            | Q759   | Q770   | Q771  | Q773   | Q774   | Q775   | Q777   |
| Q778            | Q779   | Q781   | Q789  | Q870   | R0681  | R0902  |        |

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of the polysomnography testing must be maintained in the client's medical record at the sleep facility and include approximately 1,000 pages or the electronically-stored equivalent of data during a single nighttime recording. Each record must be for sleep-wake states and stages, cardiac arrhythmias, respiratory events, motor activity, oxygen desaturations, and behavioral observations.

Documentation must also include the technologist's analysis and report, the patient's subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician's professional interpretation and report must include inspection of the entire recording, examination of the technologist's analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

#### 9.2.72.4 Multiple Sleep Latency Test (MSLT)

Multiple sleep latency test (procedure code 95805) is limited to one per day and two per rolling year by any provider, and is restricted to the following diagnosis codes:

| Diagnosis Codes |        |        |        |       |       |       |       |
|-----------------|--------|--------|--------|-------|-------|-------|-------|
| E662            | F5104  | F5105  | G2581  | G4700 | G4701 | G4709 | G4730 |
| G47411          | G47419 | G47421 | G47429 | G4753 | G4761 |       |       |

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client's medical record at the sleep facility and include a hard copy or electronic copy of four to five 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG
- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist's analysis and report, the client's subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician's interpretation and report must include inspection of the entire recording, examination of the technologist's analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95782, 95783, 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

#### **9.2.72.5 Home Sleep Study Test**

Home sleep study tests are unattended studies that are performed in the client's home using a portable monitoring device. The portable monitoring device must meet American Academy of Sleep Medicine (AASM) practice parameters and clinical guidelines.

Home sleep study testing is a benefit of Texas Medicaid only when performed in conjunction with a comprehensive sleep evaluation that has been performed by a physician who is board-certified or board-eligible, as outlined in the AASM guidelines. Documentation of the comprehensive sleep evaluation must be kept in the client's medical record. The evaluation must indicate probability of moderate to severe obstructive sleep apnea to support medical necessity for home sleep study testing.

Procedure code 95800 applies to a device that measures three or more channels, including pulse oximetry, actigraphy, and peripheral arterial tone (PAT).

Procedure codes 95800, G0398, G0399, and G0400 are a benefit for Texas Medicaid clients who are 18 years of age or older with suspected or proven simple, uncomplicated obstructive sleep apnea. Procedure codes G0398, G0399, and G0400 are restricted to diagnosis code G4733.

Home sleep study tests are payable to physicians in the office setting. Procedure codes 95800, G0398, G0399, and G0400 are limited to one per day and a combined total of two tests per rolling year, with any provider. If a client needs more than two tests in a rolling year, subsequent tests must be performed in a sleep facility.

#### **9.2.72.6 Sleep Facility Restrictions for Polysomnography and Multiple Sleep Latency Testing**

Sleep facilities that perform services for Medicaid clients must be accredited with the AASM or the Joint Commission of Accreditation of Healthcare Organizations (JCAHO). Sleep facilities must maintain documentation with proof that the facility is accredited. Documentation is subject to retrospective review. Sleep facilities that perform services for Texas Medicaid clients must also follow current AASM practice parameters and clinical guidelines.

Physicians who provide supervision in sleep facilities must be board-certified or board-eligible, as outlined in the AASM guidelines.

Sleep facility technicians, technologists, and trainees must demonstrate that they have the skills, competencies, education, and experience that are set forth by their certifying agencies and AASM as necessary for advancement in the profession.

Polysomnographic technologists, technicians, and trainees must meet the following supervision requirements:

- A polysomnographic trainee provides basic polysomnographic testing and associated interventions under the direct supervision of a polysomnographic technician, polysomnographic technologist, or a physician.

**Note:** *Direct supervision means that the supervising licensed/certified professional must be present in the office suite or building and immediately available to furnish assistance and direction throughout the performance of the service. It does not mean that the supervising professional must be present in the room while the service is provided.*

- A polysomnographic technologist provides comprehensive evaluation and treatment of sleep disorders under the general supervision of the clinical director (MD or DO).
- A polysomnographic technician provides comprehensive polysomnographic testing and analysis and associated interventions under the general supervision of a polysomnographic technologist or clinical director (MD or DO).
- The supervising physician must be readily available to the performing technologist throughout the duration of the study, but is not required to be in the building.

The sleep facility must have one or more supervising physicians who are responsible for the direct and ongoing oversight of the quality of the testing performed, the proper operation and calibration of equipment used to perform tests, and the qualifications of the nonphysician staff who use the equipment.

Services provided without the required level of supervision are not considered medically appropriate and will be recouped upon retrospective record review.

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client's medical record at the sleep facility and include a hard copy or electronic copy of four to five, 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG
- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist's analysis and report, the client's subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician's interpretation and report must include inspection of the entire recording, examination of the technologist's analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

### 9.2.73 Speech Therapy (ST) Services

Speech therapy (ST) is a payable benefit to physicians.

**Referto:** Section 4, “Therapy Services Overview” in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about speech therapy services provided by a physician.

### 9.2.74 Surgery Billing Guidelines

#### 9.2.74.1 Primary Surgeon

A primary surgeon may be reimbursed for services provided in the inpatient hospital, outpatient hospital setting, and ASC/HASC Center.

A surgeon billing for a surgery and an assistant surgery fee on the same day may be reimbursed if two separate procedures are performed.

**Referto:** Subsection 9.2.74.7, “Multiple Surgeries” in this handbook.

#### 9.2.74.2 Anesthesia Administered by Surgeon

If the physician bills for a surgical procedure and anesthesia for the same procedure, the surgery is paid and the anesthesia is denied as part of the surgical procedure. The exception to this policy is an epidural during labor and delivery.

**Referto:** Subsection 9.2.7, “Anesthesia” in this handbook.

#### 9.2.74.3 Assistant Surgeon

Assistant surgeons may be reimbursed 16 percent of the TMRM fee for the surgical procedures performed.

Medicaid follows the TEFRA regulations for assistant surgeons in teaching hospitals. TEFRA states that an assistant surgeon will not be paid in a hospital classified by Medicare as a teaching facility with an approved graduate training program in the performing physician’s specialty. Medicaid may consider reimbursement for an assistant surgeon at a teaching hospital classified by Medicare as a teaching facility with approved graduate training program if one of the following situations is present and documented on the claim:

- No qualified resident was available. (Modifier 82 may be used to document this exception.)
- There were exceptional medical circumstances such as an emergency or life-threatening situation requiring immediate attention (modifiers 80 and KX).
- The primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of a patient (modifiers 80 and KX).
- The surgical procedure was complex and required a team of physicians (modifiers 80 and KX).

Use of these modifiers is not required but expedites claims processing. Therefore, it is *recommended* that these modifiers be used in conjunction with the procedure code rather than a narrative statement when these specific circumstances exist.

All claims for assistant surgeon services must include in Block 32 of the CMS-1500 paper claim form the name, address, and NPI of the hospital in which the surgery was performed. If the physician seeks an exception to this TEFRA regulation based on unavailability of a qualified resident, the following certification statement must appear on or attached to the claim form:

“I understand that section 1842(b)(6)(D) of the Social Security Act generally prohibits reasonable charge payment for the services of assistants at surgery in teaching hospitals when qualified residents are available to furnish such services. I certify that the services for which payment is claimed were medically necessary, and that no qualified residents were available to

perform the services. I further understand that these services are subject to postpayment review by TMHP.”

Surgical procedures that do not ordinarily require the services of an assistant, as identified by Medicare, are denied when billed as an assistant surgery. One assistant surgeon is reimbursed for surgical procedures when appropriate.

Use modifier AS when the physician assistant is not enrolled as an individual provider and provides assistance at surgery. The claim must include the PA’s name and license number. Only procedures currently allowed for assistant surgeons are payable.

PA’s actively enrolled as a Medicaid provider with an assigned NPI may bill assistant surgery services on a separate claim form using the PA’s individual NPI and modifiers U7 and 80.

**9.2.74.4      Bilateral Procedures**

When a bilateral procedure is performed and an appropriate bilateral code is not available, a unilateral code must be used. The unilateral code must be billed twice with a quantity of 1 for each code. For all procedures, use modifiers LT (left) and RT (right) as appropriate. For example, bilateral application of short leg cast is billed as follows:

| Procedure Code | Modifier |
|----------------|----------|
| 29405          | LT       |
| 29405          | RT       |

**9.2.74.5      Cosurgery**

Cosurgery (two surgeons) may be reimbursed when the skills of two surgeons (usually with different skills) are required in the management of a specific surgical procedure. Cosurgery is for a surgery where the two surgeons’ separate contributions to the successful outcome of the procedure are considered to be of equal importance.

***Note:** No additional reimbursement will be made for an assistant surgeon.*

Cosurgeons may be reimbursed for surgical procedure codes that are billed with modifier 62 if the CMS fee schedule indicates that the procedure allows for cosurgeons. Claims will not suspend for manual review of the documentation of medical necessity. Reimbursement will be calculated at 62.5 percent of the amount allowed for the intraoperative portion of the surgical procedure’s fee.

No cosurgery payment is made for claims submitted without modifier 62. In instances where the surgeons do not use modifier 62, the first claim received at TMHP for the service is considered that of the primary surgeon, and the subsequent claim is denied as a previously paid service.

**9.2.74.6      Global Fees**

Texas Medicaid uses global surgical periods to determine reimbursement for services that are related to surgical procedures. The following services are included in the global surgical period:

- Preoperative care, including history and physical
- Hospital admission work-up
- Anesthesia (when administered and monitored by the primary surgeon)
- Surgical procedure (intraoperative)
- Postoperative follow-up and related services
- Complications following the surgical procedure that do not require return trips to the operating room

Texas Medicaid adheres to a global fee concept for minor and major surgeries and invasive diagnostic procedures. Global surgical periods are defined as follows:

- 0-day Global Period-Reimbursement includes the surgical procedure and all associated services that are provided on the same day.
- 10-day Global Period-Reimbursement includes the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 10 days following the date of the surgical procedure.
- 90-day Global Period-Reimbursement includes the surgical procedure, preoperative services that are provided on the day before the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 90 days following the date of the surgical procedure.

Procedure codes that are designated as “Carrier Discretion” will have their global periods determined by HHSC.

**Note:** All unlisted surgical procedure codes have a 42 day global period assigned by Texas Medicaid.

The global surgical fee period applies to both emergency and nonemergency surgical procedures. Physicians who are in the same group practice and specialty must bill, and are reimbursed, as if they were a single provider.

**Modifiers**

For services that are rendered in the preoperative, intraoperative, or postoperative period to be correctly reimbursed, providers must use the appropriate modifiers from the following table. Failure to use the appropriate modifier may result in recoupment.

| Modifiers Related to Surgical Fees |    |    |    |    |    |
|------------------------------------|----|----|----|----|----|
| 24                                 | 25 | 54 | 55 | 56 | 57 |
| 58                                 | 62 | 76 | 77 | 78 | 79 |

For services that are billed with modifier 54, 55, or 56, medical record documentation must be maintained by both the surgeon and the physician who provides preoperative or postoperative care. Reimbursement for claims associated with modifier 54, 55, or 56 is limited to the same total amount as would have been paid if only one physician provided all of the care, regardless of the number of physicians who actually provide the care.

If a physician provided all of the preoperative, intraoperative, and postoperative care, claims may be considered for reimbursement when they are submitted without a modifier.

**Documentation Requirements**

For services that are billed with any of the listed modifiers to be considered for reimbursement, providers must maintain documentation in the client’s medical record that supports the medical necessity of the services. Acceptable documentation includes, but is not limited to, progress notes, operative reports, laboratory reports, and hospital records.

On a case-by-case basis, providers may be required to submit additional documentation that supports the medical necessity of services before the claim will be reimbursed.

**Note:** Retrospective review may be performed to ensure that the submitted documentation supports the medical necessity of the surgical procedure and any modifier used to bill the claim.

**Preoperative Services**

Preoperative physician E/M services (such as office or hospital visits) that are directly related to the planned surgical procedure and provided during the preoperative limitation period will be denied if they are billed by the surgeon or anesthesiologist who was involved in the surgical procedure.

Reimbursement will be considered when the E/M services are performed for distinct reasons that are unrelated to the procedure. E/M services that meet the definition of a significant, separately identifiable service may be billed with modifier 25 if they are provided on the same day by the same provider as the surgical procedure.

Modifier 25 is not used to report an E/M service that results in a decision to perform a surgical procedure. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request. If the decision to perform a minor procedure is made during an E/M visit immediately before the surgical procedure, the E/M visit is considered a routine preoperative service and is not separately billable.

Physicians who provide only preoperative services for surgical procedures with a 10- or 90-day global period may submit claims using the surgical procedure code with the identifying modifier 56. Reimbursement will be limited to a percentage of the fee for the surgical procedure.

E/M services that are provided during the preoperative period (one day before or the same day) of a major surgical procedure (90-day global period) and result in the initial decision to perform the surgical procedure may be considered for reimbursement when billed with modifier 57. The client's medical record must clearly indicate when the initial decision to perform the procedure was made.

### **Intraoperative Services**

Physicians who perform a surgical procedure with a 10- or 90-day global period but do not render postoperative services must bill the surgical procedure code with modifier 54. Modifier 54 indicates that the surgeon provided the surgical care only. Documentation in the medical record must support the transfer of care and must indicate that an agreement has been made with another physician to provide the postoperative management.

### **Postoperative services**

Postoperative services that are directly related to the surgical procedure are included in the global surgical fee and are not reimbursed separately. Postoperative services include, but are not limited to, all of the following:

- Postoperative follow-up visits (any place of service)
- Postoperative pain management
- Miscellaneous services, including:
  - Dressing changes
  - Local incision care
  - Platelet gel
  - Removal of operative packs
  - Removal of cutaneous sutures, staples, lines, wires, drains, casts, or splints
  - Replacement of vascular access lines
  - Insertion, irrigation, and removal of urinary catheters, routine peripheral intravenous lines, nasogastric tubes, and rectal tubes
  - Changes or removal of tracheostomy tubes

**Note:** *Removal of postoperative dressings or anesthetic devices is not eligible for separate reimbursement as the removal is considered part of the allowance for the primary surgical procedure.*

If the surgeon provides the surgery and only the postoperative care for a procedure that has a 10- or 90-day global period, the surgeon must include the following details on the claim form:

- The surgical procedure, date of the surgery, and modifier 54, which indicates that he or she was the surgeon.
- The surgical procedure, date of service, and modifier 55 to denote the postoperative care.

**Note:** *Providers must not submit a claim for the postoperative care until after the client has been seen during a face-to-face follow-up visit.*

When a transfer of care occurs for postoperative care for procedures that have a 10- or 90-day global period, the following conditions apply:

- When transfer of care occurs immediately after surgery, the surgeon or other provider assuming in-hospital postoperative care must bill subsequent care procedure code 99231, 99232, or 99233.
- When the transfer of care occurs after hospital discharge, the surgeon or other provider who provides postdischarge care must bill the appropriate surgical code with modifier 55. Reimbursement will be limited to a percentage of the allowable fee for the surgical procedure.
- Documentation in the medical record must include all of the following:
  - A copy of the written transfer agreement.
  - The dates the care was assumed and relinquished.
- The claim must indicate in the comments field of the claim form the dates on which care was assumed and relinquished, and the units field must reflect the total number of postoperative care days provided. Claims that are submitted on the CMS-1500 paper claim form must include the date of surgery in Block 14 and the dates on which care was assumed and relinquished in Block 19.

Staged or related surgical procedures or services that are performed during the postoperative period may be reimbursed when they are billed with modifier 58. A postoperative period will be assigned to the subsequent procedure. Documentation must indicate that the subsequent procedure or service was not the result of a complication and any of the following:

- It was planned at the time of the initial surgical procedure.
- It is more extensive than the initial surgical procedure.
- It is for therapy following an invasive diagnostic surgical procedure.

**Note:** *Modifier 58 does not apply to procedure codes that are already defined as staged or sessioned services in the Current Procedural Terminology (CPT) Manual (e.g., 65855 or 66821).*

Hospital visits by the surgeon during the same hospitalization as the surgery are considered to be related to the surgery and, as a result, not separately billable; however, separate payment for such visits can be allowed if any of the following conditions apply:

- Immunotherapy management is provided by the transplant surgeon. Immunosuppressant therapy following transplant surgery is covered separately from other postoperative services, so postoperative immunosuppressant therapy is not part of the global fee allowance for the transplant surgery. This coverage applies regardless of the setting.
- Critical care is provided by the surgeon for a burn or trauma patient.
- The hospital visit is for a diagnosis that is unrelated to the original surgery.

E/M services that are provided by the same provider for reasons that are unrelated to the operative surgical procedure may be considered for reimbursement if they are billed with modifier 24. The submitted documentation must substantiate the reasons for providing E/M services.

- Modifier 24 may be billed with modifier 25 if a significant, separately identifiable E/M service that was performed on the day of a procedure falls within the postoperative period of another unrelated procedure.
- Modifier 24 may be billed with modifier 57 if an E/M service that was performed within the postoperative period of another unrelated procedure results in the decision to perform major surgery.

### **Return Trips to the Operating Room**

Return trips to the operating room for a repeat surgical procedure on the same part of the body may be considered for reimbursement when billed with modifiers 76 and 77. Billing with modifier 76 or 77 initiates the beginning of a new global period. Medical record documentation must support the need for a repeat procedure.

All surgical procedure codes with a predefined limitation (e.g., once per lifetime, one every 5 years) must not be submitted with modifier 76 or 77.

For modifiers 76 and 77, the repeated procedure must be the same as the initial surgical procedure. The repeat procedure must be billed with the appropriate modifier. The reason for the repeat surgical procedure should be entered in the narrative field on the claim form.

Return trips to the operating room for surgical procedures that are related to the initial surgery (i.e., complications) may be considered for reimbursement when they are billed with modifier 78 by the same provider.

- When a surgical procedure has a 0-day global period, the full value of the surgical procedure will be reimbursed; when the procedure has a 10- or 90-day global period only the intraoperative portion will be reimbursed.
- When an unlisted procedure is billed because no code exists to describe the treatment for the complications, reimbursement is a maximum of 50 percent of the value of the intraoperative services that were originally performed.

Reimbursement for the postoperative period of the first surgical procedure includes follow-up services from both surgical procedures, and no additional postoperative reimbursement is allotted. The global period will be based on the first surgical procedure.

Billing with modifier 78 does not begin a new global period.

Surgical procedures that are performed by the same provider during the postoperative period may be considered for reimbursement when they are billed with modifier 79 for any of the following:

- When the same procedure is performed with a different diagnosis.
- When the same procedure is performed on the left and right side of the body in different operative sessions and that procedure is billed with the RT or LT modifier.
- When a different procedure is performed with the same diagnosis.
- When a different procedure is performed with a different diagnosis.

Billing with modifier 79 initiates a new global surgical period.

### **9.2.74.7 Multiple Surgeries**

Medicaid payment for multiple surgeries is based on the following guidelines:

- When two surgical procedures are performed on the same day at the same operative session, the primary procedure (such as the higher paying procedure) is paid at the full TMRM allowance. Secondary procedures performed on the same day are paid at half of the TMRM allowance when medically justified.

- Surgical procedures performed at different operative sessions on the same day are paid at the full TMRM allowance for each primary procedure at each session.
- Vaginal deliveries followed by tubal ligations are considered different operative sessions and are paid at full allowance for each primary procedure at a different session (i.e., both vaginal delivery and tubal ligation are paid at full allowance).
- Procedure code 58611 performed in conjunction with a Cesarean section is reimbursed at full allowance in cases where the allowance already represents half of the primary procedure.
- When a surgical procedure and a biopsy on the same organ or structure is done on the same day, the charges will be reviewed and reimbursement will be made only for the service with the higher of the allowed amounts.

#### 9.2.74.8 Office Procedures

CMS has identified certain surgical procedures that are more appropriately performed in the office setting rather than as outpatient hospital, ASC/HASC procedures. The following list of surgical procedure codes should be billed in POS 1 (physician's office). The medical necessity and/or special circumstances that dictate that these surgical procedures be performed in a POS other than the office must be documented on the claim. These surgical procedures are evaluated on a retrospective basis that may cause recoupment and/or adjustment of the original claim payment. This list is not all inclusive.

| Procedure Codes         |                            |                         |
|-------------------------|----------------------------|-------------------------|
| Excision benign lesions | Excision malignant lesions | Manipulation (urethral) |
| 11400                   | 11600                      | 53600                   |
| 11401                   | 11601                      | 53601                   |
| 11402                   | 11602                      | 53620                   |
| 11403                   | 11603                      | 53621                   |
| 11404                   | 11604                      | 53660                   |

#### 9.2.74.9 Orthopedic Hardware

Reimbursement for the orthopedic hardware (e.g., buried wire, pin, screw, metal band, nail, rod, or plate) is part of the surgeon's global fee or the facility's payment group. The hardware is not reimbursed separately to either the surgeon or the facility.

The removal of orthopedic hardware is not payable to the same provider who inserted it, if removed within the global operative care period of the original insertion.

Services for removal of orthopedic hardware may be reimbursed separately after the global post operative care period.

#### **9.2.74.10 Second Opinions**

Texas Medicaid benefits include payment to physicians when eligible clients request second opinions about specific problems. The claim must be coded with the appropriate office or hospital visit codes, and the notation “Client Initiated Second Opinion” should be identified in Block 24D of the CMS-1500 paper claim form.

**Referto:** Subsection 9.2.60.4.4, “Office and Outpatient Consultation Services” in this handbook.

#### **9.2.74.11 Supplies, Trays, and Drugs**

Payment to physicians for supplies is not allowed under Texas Medicaid. All supplies, including anesthetizing agents, inhalants, surgical trays, or dressings are included in the surgical payment on the day of surgery when the surgery is performed in the office or home setting.

Reimbursement for office visits includes overhead for supplies. If any of these items are submitted separately, they are denied as included in the surgical fee. If the supplies are submitted with a place of service (POS) other than the office, these supplies are denied as services that must be billed by the hospital, or as services that are included in nursing facility charges.

Silver nitrate applicators, used to treat granulated tissue around gastrostomy tubes and tracheostomies, are considered part of the office/hospital visit. Silver nitrate applicators are not a benefit for home use.

#### **9.2.75 Telemedicine Services**

Telemedicine services are a benefit of Texas Medicaid.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for information about telemedicine services.

#### **9.2.76 Therapeutic Apheresis**

The following conditions must be met for therapeutic apheresis:

- To perform the medical services, including all nonphysician services, and to respond to medical emergencies at all times during client care, direct supervision by a physician is required.
- Each client must be under the care of a physician.

Procedure codes 36511, 36512, 36513, 36514, and 36516 are limited to the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|

| T8692           | T8693 | T8699 |       |       |       |       |       |

Procedure code 36516 may be considered for reimbursement when billed for the low density lipoprotein (LDL) apheresis (such as Liposorber LA 15) or the protein A immunoadsorption (such as Prosorba) columns.

The protein A immunoadsorption column is indicated for use in either of the following cases:

- Clients who have a platelet count of less than 100,000 mm<sup>3</sup>.
- Adult clients who have signs and symptoms of moderate to severe rheumatoid arthritis with long-standing disease who have failed, or are intolerant to, DMARDs.

The LDL apheresis column is indicated for use in clients who have severe familial hypercholesterolemia whose cholesterol levels remain elevated despite a strict diet and ineffective or intolerated maximum drug therapy. Coverage is considered for the following high-risk population, for whom diet has been ineffective and maximum drug therapy has either been ineffective or not tolerated:

- Functional hypercholesterolemia homozygotes with LDL-C > 500 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 300 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 200 mg/dL and documented coronary heart disease.

Baseline LDL-C levels are to be obtained after the client has had, at a minimum, a six-month trial on an American Heart Association (AHA) Step II diet or equivalent and maximum tolerated combination drug therapy designed to reduce LDL-C. Baseline lipid levels are to be obtained during a two- to four-week period and should be within 10 percent of each other, indicating a stable condition.

Therapeutic apheresis using the LDL apheresis column may be reimbursed for diagnosis code E780.

Apheresis is denied for all other diagnosis codes. Other diagnosis codes can be reviewed by the TMHP Medical Director or designee on appeal with documentation of medical necessity.

Laboratory work before and during the apheresis procedure is covered when apheresis is performed in the outpatient setting (POS 5). Laboratory work billed in conjunction with apheresis performed in the inpatient setting (POS 3) is included in the DRG reimbursement and is not paid separately.

## 9.2.77 Therapeutic Phlebotomy

Therapeutic phlebotomy is a treatment whereby a prescribed amount of blood is withdrawn for medical reasons. Conditions that cause an elevation of the red blood cell volume or disorders that cause the body to accumulate too much iron may be treated by therapeutic phlebotomy.

Therapeutic phlebotomy is a benefit of Texas Medicaid and may be billed using procedure code 99195. This procedure code should be used only for the therapeutic form of phlebotomy and not for diagnostic reasons.

Reimbursement of therapeutic phlebotomy is limited to the following diagnosis codes:

| Diagnosis Codes |       |        |        |       |      |       |       |
|-----------------|-------|--------|--------|-------|------|-------|-------|
| D45             | D649  | D750   | D751   | E800  | E801 | E8020 | E8021 |
| E8029           | E8310 | E83110 | E83118 | E8319 | P611 |       |       |

Therapeutic phlebotomy will be automatically denied for all other diagnosis codes.

**9.2.78 Therapeutic Radiopharmaceuticals**

Therapeutic radiopharmaceuticals, when used for therapeutic treatment, are a benefit of Texas Medicaid.

The following procedure codes may be submitted for therapeutic radiopharmaceuticals:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 79403           | A9513 | A9542 | A9543 | A9563 | A9564 | A9590 | A9600 | A9699 |

**9.2.78.1 Prior Authorization for Therapeutic Radiopharmaceuticals**

Prior authorization is required for ibritumomab tiuxetan procedure codes A9542 and A9543.

Only one ibritumomab tiuxetan (procedure codes A9542 and A9543) may be prior authorized and reimbursed once per lifetime, any provider with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C8259           | C8399 | C8499 | C84A9 | C84Z9 | C8519 | C8529 | C8589 |
| C8599           |       |       |       |       |       |       |       |

Ibritumomab tiuxetan may be prior authorized when all of the following criteria are met:

- Client has a diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin’s lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy and the following is documented:
  - Marrow involvement is less than 26 percent.
  - Platelet count is 100,000 cell/mm3 or greater.
  - Neutrophil count is 1,500 cell/mm3 or greater.
- Client has failed a trial of rituximab.

Prior authorization must be submitted through Special Medical Prior Authorization department.

Prior authorization is required for lutetium lu 177 dotatate (Lutathera) procedure code A9513.

Lutetium lu 177 dotatate (Lutathera) procedure code A9513 will be considered with documentation that meets all of the following criteria:

- The client has a diagnosis of somatostatin receptor-positive gastroenteropancreatic neuroendocrine tumors (GEP-NETs) (one of the following diagnosis codes must be submitted on the prior authorization request: C7A00, C7A010, C7A011, C7A012, C7A019, C7A020, C7A021, C7A022, C7A023, C7A024, C7A025, C7A026, C7A029, C7A092, C7A094, C7A095, C7A096).
- The client is 18 years of age or older.
- The client is not pregnant or breastfeeding.
- The official pathology report documents a GEP-NET with Ki67 index less than 20 percent.

- The disease is metastatic, or locally advanced and unresectable as indicated by one of the following:
  - Positive somatostatin receptor scintigraphy with correlative magnetic resonance imaging (MRI)
  - Computed tomography (CT) imaging of metastatic measurable disease
  - 68-Ga-Dotate positron emission tomography (PET) scan positive for metastatic disease
- The client experienced disease progression while on a long-acting somatostatin analog (e.g. octreotide, lanreotide).
- The client has not had prior treatment with Peptide Receptor Radionuclide Therapy (PRRT), and has not had prior external radiation therapy to more than 25 percent of the bone marrow.
- The documentation includes an oncologist's or nuclear medicine specialist's complete written order and prescription for Lutetium lu 177 dotatate intravenous infusion.
- A treatment plan that includes all of the following documentation:
  - Lutetium lu 177 dotatate 7.4 GBq (200 mCi) every 60 days for a total of 4 doses that is administered in a facility under the control of a physician who is licensed and authorized to administer radiopharmaceuticals
  - The recommended use of premedication and concomitant medications of somatostatin analogs, antiemetics, and specialized amino acid solution
  - The restrictions and usage of long- and short-acting octreotide agents before, during, and after lutetium lu 177 dotatate intravenous infusions
  - Details of withholding the treatments for contraindicated circumstances including, but not limited to:
    - Thrombocytopenia
    - Anemia neutropenia
    - Renal toxicity
    - Hepatotoxicity
    - Other non-hematologic toxicities

Prior authorization requests must be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

An SMPA Request Form must be completed, signed, and dated by the prescribing provider. The SMPA form will not be accepted after 90 days from the date of the prescribing provider's signature.

The completed SMPA Request Form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review.

Section C of the SMPA Request Form under Statement of Medical Necessity must contain the following:

- Documentation of the client's dosage
- The administration schedule
- The number of injections to be administered during the prior authorization period
- The requested units/millicuries per injection

- The dosage calculation

To facilitate the determination of medical necessity and avoid unnecessary denials, the prescribing provider must submit correct and complete information, including documentation of medical necessity for the equipment or supplies requested, the procedure codes, and the numerical quantities for services requested. The provider must maintain documentation of medical necessity in the client’s medical record.

Prior authorization must be requested through the Special Medical Prior Authorization (SMPA) department with appropriate documentation.

Requests can be mailed or faxed to:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**9.2.78.1.1      Reimbursement Limitations for Ibritumomab tiuxetan and Lutetium lu 177 dotatate**

Ibritumomab tiuxetan is indicated for the treatment of clients that have failed rituximab and have CD20 antigen-expressing relapsed or refractory, low grade, follicular, or transformed non-Hodgkin’s lymphoma or refractory non-Hodgkin’s lymphoma.

Ibritumomab tiuxetan may only be considered once per lifetime, any provider, and only one of the agents.

Lutetium Lu 177 dotatate (Lutathera) intravenous injection (procedure code A9513) is indicated for the treatment of adult clients who are 18 years of age or older with a diagnosis of somastatin receptor-positive gastroenteropancreatic neuroendocrine tumors (GEP-NETs), including foregut, midgut, and hindgut neuroendocrine tumors. For all other indications, Lutetium Lu 177 dotatate (Lutathera) injection for intravenous use is not proven to be medically effective and is considered experimental. Lutetium lu 177 dotatate (Lutathera) must be administered under the control of an oncologist or a nuclear medicine specialist who is licensed and authorized to administer radiopharmaceuticals and must be administered in an outpatient setting.

Lutetium lu 177 dotatate (Lutathera) procedure code A9513 is limited to one service every 60 days for a total of four services per lifetime, any provider.

**9.2.78.2      Other Limitations on Therapeutic Radiopharmaceuticals**

Strontium-89 chloride (procedure code A9600) may be reimbursed when submitted with diagnosis code C7951 or C7952.

Strontium-89 chloride is limited to a total of 10 mci intravenously injected every 90 days, any provider.

Sodium phosphate P-32, therapeutic (procedure code A9563) may be reimbursed when submitted with the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C7951           | C7952 | C9110 | C9112 | C9192 | C91Z2 | C9292 | C92Z2 |
| C9512           | C9592 | D45   |       |       |       |       |       |

Chromic phosphate P-32 suspension (procedure code A9564) may be reimbursed when submitted with diagnosis codes C782 and C786.

An appropriate modifier may be used when billing for services more than once per day, same provider.

Iodine i-131 iobenguane procedure code A9590 is a benefit for clients who are 12 years of age and older.

Iodine i-131 iobenguane is a radiopharmaceutical indicated for the treatment of adult and pediatric clients who are 12 years of age and older with iobenguane scan positive, unresectable, locally advanced or metastatic pheochromocytoma or paraganglioma who require systemic anticancer therapy. Iodine i-131 iobenguane should be handled with appropriate safety measures to minimize radiation exposure and should be administered by or under the control of physicians who are licensed and authorized to administer radiopharmaceuticals.

Procedure code A9590 is limited to the following diagnosis codes:

| Diagnosis Codes |       |       |      |      |      |      |
|-----------------|-------|-------|------|------|------|------|
| C7410           | C7411 | C7412 | C755 | C7A1 | C7A8 | D447 |

**9.2.79 Urethral Dilation**

If urethral dilation (procedure code 53600, 53601, 53605, 53620, 53621, 53660, 53661, or 53665) is billed on the same date of service by the same provider as procedure code 52000, the charges will be combined and processed as procedure code 52281.

Urethral dilation will be denied when billed on the same date of service by the same provider as any other cystoscopy.

**9.2.80 Ventilation Assist and Management for the Inpatient**

Use the following procedure codes and guidelines for reimbursement of ventilation assist and management: 94002 and 94003. Procedure codes 94002 and 94003 may be reimbursed only when the client is in observation or inpatient status. Respiratory care billed in any other POS will be denied.

Use the ventilation assist and management subsequent code (procedure code 94003) when respiratory support must be established for a patient in the postoperative period in the hospital (POS 3). Subsequent days of ventilation assistance are payable when documentation indicates a respiratory problem.

When the use of a ventilator is required as part of a major surgery, initial ventilation assist and management will be denied. It should be billed as ventilation assist and management subsequent procedure code 94003.

Procedure codes 94002 and 94003 apply only to hospital care for critically ill patients. They do not apply to routine recovery room ventilation services. Separate support service charges billed on the same day as ventilatory support are denied (for example, arterial or venous punctures; interpretations of arterial blood gases; or pulmonary function tests and management of the hemodynamic functions of the patient).

Use ventilation assist and management and initiation of pressure or volume preset ventilators for assisted or controlled breathing—first day (procedure coed 94002) when respiratory support must be established for a patient. It is a one-time charge per hospitalization that may be paid when the claim documents that a respiratory problem exists (for example, respiratory distress, asphyxia). After the first day, use subsequent days (procedure code 94003).

**9.2.81 Wearable Cardiac Defibrillator (WCD)**

A WCD (procedure codes 93292, 93745, and K0606) are a benefit of Texas Medicaid.

The rental of a WCD (procedure code K0606) is limited to once per month and must be submitted with modifier RR.

Modifier 25 may be used to identify a significant separately identifiable evaluation and management service performed (for example, different diagnosis) on the same day as the initial set up of a WCD by the same provider for the same client. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Procedure code 93292 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

Procedure codes 93000, 93005, 93010, 93040, 93041, and 93042 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

### **9.2.81.1 Prior Authorization for WCD**

Prior authorization is required for the rental of WCD (procedure code K0606).

The WCD may be prior authorized for clients at high-risk of sudden cardiac arrest who meets one of the following criteria:

- Has completed electrophysiologic studies to determine the type of arrhythmia present and confirm that a wearable cardiac defibrillator is the best course of treatment.
- Is contraindicated for an implantable cardiac defibrillator (ICD) at the current time, such as with a systemic infection.
- Is waiting for ICD implantation.
- Is waiting for ICD implantation and is undergoing treatment for a systemic infection.
- Has had an ICD explantation due to pocket infection.
- Is waiting for heart transplantation.
- Has self-limiting arrhythmias from iatrogenic (drug loading with potentially pro-arrhythmic medications) or other causes.
- Has a familial or inherited condition with a high risk of life-threatening ventricular tachyarrhythmias, such as long QT syndrome or hypertrophic cardiomyopathy.
- Has had either documented prior myocardial infarction or dilated cardiomyopathy and a measured left ventricular ejection fraction (LVEF) less than or equal to 35 percent.
- Has received a documented diagnosis of any one of the following conditions:
  - Clinically inducible hemodynamically significant ventricular tachycardia (HSVT) or ventricular fibrillation (VF), where drug treatment has been ineffective, or the side effects of the medication used to treat the arrhythmia are intolerable.
  - Inducible VT or VF despite endocardial ablation or surgical excision when drug therapy has failed.
  - VF or syncopal ventricular tachycardia.
  - Specific ST-T wave changes, borderline CPK-MB isoenzymes, and dangerous ventricular arrhythmias are exhibited in a postmyocardial infarction patient.
  - VT caused by ischemic heart disease not associated with an acute myocardial infarction, and where drug therapy or surgical therapy has failed.
  - Recurrent syncope of undetermined etiology in a patient with HSVT or VF induced by EPS in whom no effective or tolerated drug is available or appropriate. Symptoms must be linked to HSVT or VF.

- Recurrent syncope of undetermined etiology with positive EPS studies where ventricular arrhythmia is documented as the cause.
- Palliative treatment for VT or VF in clients awaiting heart transplant.

The WCD is contraindicated in clients with an active ICD and should not be used in clients who meet the following criteria:

- Have a vision or hearing problem that may interfere with the perception of alarms or messages from the WCD.
- Is taking medications that would interfere with responding to the alarms or message from the WCD by depressing buttons.
- Is unwilling or unable to wear the device continuously, except when bathing or showering.
- Is pregnant or breastfeeding.
- Is of childbearing age and is not attempting to prevent pregnancy.

The WCD is considered investigational and not medically necessary for all other indications, including but not limited to, the following:

- Clients with drug-refractory class IV congestive heart failure who is not candidates for heart transplantation.
- Clients who have a history of psychiatric disorders that interfere with the necessary care and follow-up.
- Clients in whom a reversible triggering factor for VT/VF can be definitely identified, such as ventricular tachyarrhythmias in evolving acute myocardial infarction or electrolyte abnormalities.
- Clients with terminal illnesses.

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form requesting the DME and/or supplies must be signed and dated by a physician familiar with the client before requesting prior authorization for all DME equipment and supplies. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and quantities for services requested.

**Note:** *A physician assistant (PA), certified nurse practitioner (CNP), or clinical nurse specialist (CNS) is not allowed to sign the Title XIX form to lease a WCD.*

The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form with the original dated signature must be maintained by the prescribing physician in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed form to the Home Health Services Prior Authorization Department at 1-512-514-4209 or in writing to the following address:

Texas Medicaid & Healthcare Partnership  
Home Health Services  
PO Box 202977  
Austin, TX 78720-2977

When a WCD is not covered as a home health service, it may be considered for reimbursement through the CCP for clients who are 20 years of age and younger. All of the following criteria must be met for CCP reimbursement for a WCD:

- The client is eligible for CCP benefits.

- The documentation submitted with the request supports the determination of medical necessity based on the criteria listed in the policy.
- Federal financial participation is available.
- The client's cardiac status would be compromised without the requested equipment.
- The requested equipment is safe in the home setting.

**Note:** *For clients who are 21 years of age or older, requests for a WCD that does not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

Rental of an automatic external defibrillator, with integrated electrocardiogram analysis, garment type (procedure code K0606) may be prior authorized (initially for up to three months) with documentation supporting the medical necessity and appropriateness of the device.

The provider may be reimbursed only for the length of time the device is used even though the authorization for the rental may be for a longer period of time.

The rental of the device includes the monitor, electrode belt (four sensors or electrodes and three treatment pads), garment, two rechargeable batteries, a battery charger and modem.

The purchase of a replacement battery (procedure code K0607), the purchase of a garment (procedure code K0608), and electrodes (procedure code K0609) will be considered part of the rental.

Prior authorization extensions for WCDs beyond the initial three-month rental may be considered by the medical director when documentation supports continued medical necessity for the device. Providers must submit new documentation to support continued medical necessity for an extension of the rental to be considered.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the device and is subject to retrospective review. The physician must maintain documentation of medical necessity in the client's medical record. The requesting DME provider may be asked for additional information to clarify or complete a request for the WCD.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when billing the claim.

### **9.2.82 Wound Care Management**

Wound care management includes the care of acute and chronic wounds, which include, but are not limited to, open ulcers (venous pressure or diabetic ulcers), fistulas, or erosion of skin related to cancer. Acute and chronic wounds are defined as the following:

- Acute wounds: Wounds taking less than or up to 30 days for complete healing
- Chronic wounds: Wounds taking more than 30 days for complete healing

Wound care includes the following:

- Optimization of nutritional status
- Debridement by any means to remove devitalized tissue
- Maintenance of a clean, moist bed of granulation tissue
- Necessary treatment to resolve any infection that may be present
- Education of the client or their caregiver on how to clean and properly dress their wound

For clients with an ulcer, wound care may include the following:

- Frequent repositioning of a client who has a pressure ulcer

- Off-loading pressure and good glucose control for a client who has a diabetic ulcer
- Establishment of adequate circulation for a client who has an arterial ulcer
- Use of a compression system for clients who have a venous ulcer

Wound care management includes first- and second-line therapies. First-line wound care is used for acute wounds. If the wound does not improve with first-line treatment, adjunctive second-line therapy may be used. Measurable signs of improved healing can be used as outcome measures in a wound care treatment plan and include the following:

- A decrease in wound size, either in surface area or volume
- A decrease in amount of exudate
- A decrease in amount of necrotic tissue

Wound care must be performed by a licensed health professional who is qualified to safely and effectively provide the medically necessary care. Providers are expected to exercise their clinical judgment to render the most appropriate care in accordance with their scope of practice as designated by their regulatory and governing boards. Education of the client or their caregiver during wound care interventions is a standard of care. Clients or their caregivers should be able to explain why each intervention is being performed for their specific type of wound.

All wound care services require documentation of the wound, and a comprehensive treatment plan is required to be maintained in the client's medical record as outlined in the documentation requirements section. Providers will document progress with each client encounter and use the measurable signs of healing to determine the degree of improvement.

The following services are not a benefit of Texas Medicaid:

- Infrared therapy
- Ultraviolet therapy
- Topical hyperbaric oxygen therapy
- Low-energy ultrasound wound cleanser (MIST therapy)
- Services that are submitted as debridement but do not include the removal of devitalized tissue. Examples include removal of non-tissue integrated fibrin exudates, crusts, biofilms, or other materials from a wound, without the removal of tissue.
- Electrical stimulation and electromagnetic therapy

### **9.2.82.1 First-Line Wound Care Therapy**

First-line wound care therapy includes the following:

- Cleansing, antibiotics, and pressure off-loading
- Compression
- Debridement
- Dressing
- Whirlpool for burns

#### **9.2.82.1.1 Cleansing, Antibiotics, and Pressure Off-loading**

Wound cleansing helps to create an optimal healing environment and decreases the potential for infection by loosening and removing cellular debris and residual topical agents from previous dressings.

Wound cleansing agents may include normal saline, commercial wound cleansers, providone iodine, hydrogen peroxide, or sodium hydrochlorite. Cleansing solutions and methods vary based on effectiveness and individual client needs.

Systemic or topical antibiotics may be used to prevent or treat wound infections and to aid in the healing of wounds.

Pressure off-loading devices, such as pillows, boots, mattresses, and protectors, may also be used as part of first-line wound care therapy to prevent or relieve pressure on the wound.

Procedure code 29445 may be reimbursed for pressure off-loading performed as part of wound care management.

9.2.82.1.2      **Compression**

Compression performed as a part of wound care management is a benefit and may be reimbursed when billed with procedure code 29580 or 29581.

9.2.82.1.3      **Debridement**

Wound debridement includes the pre-debridement wound assessment, the debridement, and the post-procedure instructions provided to the client on the date of service.

Selective debridement consists of the following:

- Conservative sharp debridement
- High-pressure lavage to selected areas

Non-selective debridement consists of the following:

- Autolytic debridement
- Blunt debridement
- Enzymatic debridement
- Hydrotherapy and wound immersion
- Mechanical debridement

The following procedure codes may be reimbursed for wound debridement:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 11000           | 11001 | 11042 | 11043 | 11044 | 11045 | 11046 | 11047 | 97597 | 97598 |
| 97602           |       |       |       |       |       |       |       |       |       |

Professional services for selective wound debridement (procedure codes 97597 and 97598) may be reimbursed to a licensed physical therapist, when it is determined to be within the provider’s scope of practice, and the service is prescribed by a Medicaid-enrolled supervising physician or qualified non-physician provider.

The following procedure codes may be reimbursed for debridement of partial-thickness burns:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| 16020           | 16025 | 16030 |

Prior authorization is not required for debridement of partial-thickness burns (procedure codes 16020, 16025, or 16030).

Prior authorization is required for wound debridement procedure codes 11042, 11043, and 11044. A request for prior authorization must be submitted to TMHP with the Special Medical Prior Authorization (SMPA) Request Form before the procedure is performed. Providers must retain a copy of the signed and dated form in the client's medical record at the provider's place of business. The requesting provider may be asked for additional information to clarify or complete a request for the equipment/supply requested.

Requests for prior authorization for wound debridement procedure codes 11042, 11043, and 11044 must include the following documentation:

- Location of the wound
- Characteristics of the wound, which include all of the following:
  - Dimensions (diameter and depth)
  - Drainage (amount and type)
  - Related signs and symptoms (swelling, pain, inflammation)
  - Presence of necrotic tissue/slough

When submitting an initial prior authorization request, the treating provider (registered nurse, physician, physical therapist) must submit a signed and dated wound care treatment plan or letter of medical necessity that includes all the following documentation:

- Planned interventions for the problem identified
- Treatment goals
- Expected outcomes

The treatment plan or letter of medical necessity is considered current when it is signed and dated within 30 calendar days prior to or on the date the procedure is performed. Otherwise, a new treatment plan must be submitted.

Retroactive authorization requests for wound debridement performed on an urgent or emergent basis (procedure code 11042, 11043, or 11044) will be denied if not submitted within 14 calendar days, beginning the day after the procedure is performed.

For wound debridement retroactive authorization to be considered, the treatment plan or letter of medical necessity must be signed and dated within 14 calendar days beginning the day after the procedure is performed. If the treatment plan is not signed and dated within the 14-calendar-day period, the request will be denied.

For procedure codes 11043 and 11044, at least one of the following conditions must be present and documented:

- Stage III or IV wounds
- Venous or arterial insufficiency ulcers
- Dehiscent wounds or wounds with exposed hardware or bone
- Neuropathic ulcers
- Complications of surgically created or traumatic wound where accelerated granulation therapy is necessary but cannot be achieved by other available topical wound treatment

Wound debridement procedure codes 11042, 11043, and 11044 are not appropriate and will not be approved for the following:

- Washing bacteria or fungal debris from the feet
- Paring or cutting of corns or calluses

- Incision and drainage of an abscess
- Trimming or debridement of nails, or avulsion of nail plates
- Acne surgery
- Destruction of warts
- Burn debridement

Prior authorization requests must be submitted by the provider within 30 calendar days prior to, or on the date the procedure is performed. If the prior authorization request is not submitted within 30 calendar days prior to, or on the date the procedure is performed, the request will be denied. The SMPA Request Form must be signed by the requesting provider on or within 30 days prior to the requested start of service. All dates of service prior to the prescribing providers signature date will be denied.

The physician's signature on the Special Medical Prior Authorization (SMPA) Request Form is considered current when signed and dated within 30 calendar days prior to, or on the date the procedure is performed. If the physician's signature is not signed and dated within the 30-calendar-day period prior to or on the date the procedure is performed, the request will be denied.

Prior authorization requests for procedure codes 11042, 11043, and 11044 will be considered for three calendar months, beginning on the requested procedure date.

Retroactive authorization is required for wound debridement procedure codes 11042, 11043, and 11044 that are performed on an urgent or emergent basis. The provider must submit a request for retroactive authorization within 14 calendar days, beginning the day after the procedure is performed.

For wound debridement retroactive authorization requests, the physician's signature on the Special Medical Prior Authorization (SMPA) Request Form is considered current when signed and dated within 14 calendar days, beginning the day after the procedure is performed. Requests with the physician's signature not signed and dated within the 14-calendar-day period will be denied.

Prior authorization requests for subsequent debridement will be considered on a case-by-case basis with documentation of medical necessity. These requests will be reviewed by the Medical Director.

The wound debridement procedure code submitted on the prior authorization or retroactive authorization request must reflect the level of debrided tissue, e.g., partial-thickness skin, full-thickness skin, subcutaneous tissue, muscle, and/or bone, and not the extent, depth, or grade of the ulcer or wound.

#### 9.2.82.1.4 Dressings and Metabolically Active Skin Equivalents

Wound dressings may include wet and dry dressings.

All dressings applied to the wound during a wound debridement procedure are considered part of the service for wound debridement.

#### 9.2.82.1.5 Whirlpool for Burns

Whirlpool is a benefit when used as first-line wound care therapy for the treatment of burn wounds.

### 9.2.82.2 Second-Line Wound Care Therapy

Second-line wound care therapy is limited to chronic Stage III or IV wounds and may be covered only after first-line therapy has been tried for at least 30 days without measurable signs of improved healing. First-line wound care therapy may continue as appropriate, with the addition of second line wound care measures as indicated by the client's medial condition.

Second-line wound care therapy includes the following:

- Whirlpool
- Irrigation, including pulsatile jet irrigation

- Application of metabolically active skin equivalents/skin substitutes

#### 9.2.82.2.1 Pulsatile-Jet Irrigation

Pulsatile-jet irrigation is a benefit for the treatment of Stage III or IV wounds when other forms of treatment have failed. Removal of devitalized tissue using pulsatile-jet irrigation may be reimbursed when claims are submitted for procedure code 97597 or 97598.

#### 9.2.82.2.2 Negative Pressure Wound Therapy (NPWT)

Negative pressure wound therapy (NPWT) procedure codes 97605, 97606, 97607, and 97608 are a benefit of Texas Medicaid for clients who are 18 years of age or older.

NPWT may be provided utilizing durable medical equipment (DME), or nondurable medical equipment to treat acute and chronic wounds that include diabetic foot ulcers, venous leg ulcers, pressure ulcer wounds, non-healing surgical wounds, non-adhering skin grafts. NPWT may consist of using a traditional computerized electric vacuum pump, or a disposable single use mechanical device which includes the collection canister and the hydrocolloid dressing with the integrated nozzle and tubing.

NPWT may promote tissue granulation and wound healing by providing a warm moist wound bed while removing excessive secretions or bacterial material from the wound and should be considered only when other treatments are not effective.

Procedure codes 97605 and 97606 include management of the exudate collection system, topical application, wound assessment, and instructions for ongoing care services.

DME and supplies are not included for procedure codes 97605 and 97606 and may be reimbursed separately.

Procedure codes 97607 and 97608 include management of the exudate collection system, topical application, wound assessment, instructions for ongoing care services, and the disposable device.

The disposable device is included with procedure codes 97607 and 97608 and is not separately reimbursed.

NWPT is contraindicated for any of the following wound types and conditions:

- Necrotic tissue with eschar present
- Untreated osteomyelitis
- Fistulas
- Wounds containing malignancy
- Exposed vasculature, nerves, anastomotic site, or organs
- Actively bleeding wounds

Prior authorization is not required for the initial 90 days of NPWT. A maximum of 36 NPWT treatments will be allowed in any 90-day period per rolling year, which will begin on the first day of the first NPWT treatment.

Prior authorization is required for more than 36 NPWT treatments within or after the initial 90 days and will be considered on a case-by-case basis with documentation of medical necessity. A request submitted to TMHP may be considered for services beyond the initial 90 days for an additional 30-day treatment period. These requests will be reviewed by the medical director.

Claims for procedure codes 97605, 97606, 97607, and 97608 must include the authorization number on the claim at the time of claim submission.

9.2.82.2.3 Skin Substitutes and Surgical Wound Preparation

The application of skin substitutes is a benefit for the treatment of chronic Stage 3 or 4 wounds that have failed to respond to standard wound care treatment after 30 days. A failed response is defined as a wound that has increased in size or depth, or has not changed in baseline size or depth, and shows no measurable signs of healing improvements after 30 days of appropriate wound-care measures.

Use of the appropriate specific skin substitute product(s) for the episode of each documented wound is expected. Compliance with the Food and Drug Administration (FDA) assessments and submitted guidelines for the specific skin substitute product(s) used is expected. Skin substitute products not used within the scope of the FDA’s intended use and indications are considered experimental and/or investigational. All wound care services require documentation of the wound, and a comprehensive treatment plan is required to be maintained in the client’s medical record.

The following procedure codes may be reimbursed for the application of skin substitute grafts:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 15271           | 15272 | 15273 | 15274 | 15275 | 15276 | 15277 | 15278 |  |  |

Approved skin substitute products used in wound care services that are provided in an office-based setting will be considered for separate reimbursement when submitted with an appropriate application procedure code from the table above.

The approved skin substitute product(s) must have a published average sales price, must be FDA cleared/approved or be designated as 361 HCT/P exempt, and should be used in accordance with each product’s individualized labeling and application guidelines. The approved list of skin substitute products are reviewed and updated biannually. Providers should refer to the Center for Medicare & Medicaid Services (CMS) Medicare Part B Drug Average Sales Price web page at [www.cms.gov](http://www.cms.gov) for updates to the list of approved skin substitute products.

All skin substitute products used in wound care services that are provided in a facility setting are considered part of the application services (procedure codes listed in the table above) and are not separately reimbursed.

Surgical Wound Preparation

Appropriate surgical wound preparation is expected at least once at the initiation of care, prior to placement of the skin substitute graft. Repeated use of surgical preparation services in conjunction with skin substitute application codes will be considered not reasonable or necessary and will not be reimbursed.

The following procedure codes may be reimbursed for surgical wound preparation:

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| 15002           | 15003 | 15004 | 15005 | 15040 | 15050 | 15271 | 15272 |
| 15273           | 15274 | 15275 | 15276 | 15277 | 15278 |       |       |

**Note:** Procedure code 15005 is not a benefit for ambulatory surgical center providers.

Limitations

The treatment of any chronic skin wound will typically last no more than 12 weeks.

Skin substitute applications and grafts are limited to 10 per episode of care in a 12-week period, per rolling year beginning on the first day of the first skin substitute application. If more than one specific product is used or a product change occurs during the 12-week period of care, the expectation remains that the cumulative number of applications will not exceed 10.

More than 10 skin substitute applications in a 12-week period will be considered on a case-by-case basis with documentation of medical necessity. These requests will be reviewed by the Medical Director.

### **Re-Treatment of Healed, Stage 3, or Stage 4 Chronic Wounds**

Retreating healed skin wounds showing greater than 75 percent in size reduction and smaller than 0.5 square cm is not considered medically reasonable or necessary and will not be reimbursed.

Retreating a venous stasis ulcer or diabetic neuropathic foot ulcer with any skin substitute product(s) within one year of previous treatment is considered treatment failure. This unsuccessful treatment does not meet reasonable and necessary criteria for re-treatment and will not be reimbursed.

Unsuccessful treatment is defined as an increase in size or depth of an ulcer, or no change in baseline size or depth and no sign of improvement or indication that improvement is likely (such as granulation, epithelialization, or progress towards closing) for a period of 4 weeks past the start of therapy.

### **Contraindications**

Skin substitute grafts are contraindicated for the following:

- Clients with known hypersensitivity to any component of the specific skin substitute graft (e.g., allergy to avian, bovine, porcine, or equine products).
- Skin substitute grafts will not be considered reasonable and necessary for clients with inadequate control of underlying conditions or exacerbating factors, such as the following:
- Clients with uncontrolled diabetes
- Clients with active infection
- Clients with active Charcot arthropathy of the ulcer extremity
- Clients with vasculitis
- Clients who continue smoking tobacco and have not received smoking cessation guidance from their physician

### **9.2.82.3 Specialized Wound Care Education**

Specialized wound care education with prior authorization may be reimbursed when provided by a wound care services provider.

In addition to the education included in the standard of care, specialized wound care education can be provided by a wound care services provider (with modifier U1) for additional reimbursement. These client interactions are denoted by the addition of the modifier U1 to the healthcare common procedure coding system (HCPCS) procedure code or other applicable HCPCS code billed for the wound care procedure performed. When the modifier U1 is used, documentation (client chart records) should be filed with the claim.

To evaluate progress and determine the degree of improvement, the wound care provider performing the specialized education must document in the client's chart each client encounter including the education provided and a description of the client's wound using measurable signs of healing.

The documentation must include:

- A record of teaching specific to the knowledge and skills necessary for independent care of the client's wound provided to the client or their caregiver.
- An affirmative statement that the client or their caregiver has received the education.

#### **9.2.82.3.1 Limitations of Wound Care Education**

Specialized wound care education is limited to the following:

- Two claims with a wound care procedure code submitted with modifier U1 per wound occurrence in an office setting or facility
- Four claims with modifier U1 per wound occurrence in an ambulatory surgical center

Each wound occurrence is defined as a three-month rolling time period. Additional prior authorization requests for more than the limitation number of claims submitted for wound occurrence will be considered on a case-by-case basis with documentation of medical necessity. These requests will go to a clinical review for consideration.

#### 9.2.82.3.2 Reimbursement

Specialized wound care education will be limited to four wound care education services per 90 days by the same provider for services rendered in the ambulatory surgical center and may be reimbursed with the following procedure codes with modifier U1:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 11000           | 11042 | 11043 | 11044 | 15002 | 15004 | 15040 |
| 15050           | 15271 | 15273 | 15275 | 15277 | 16020 | 16025 |
| 16030           | 29445 | 29580 | 29581 |       |       |       |

Specialized wound care education will be limited to two wound care education services per 90 days by the same provider for services rendered in the office, home, or facility setting and may be reimbursed with the following procedure codes with modifier U1:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 97597           | 97598 | 97602 | 97605 | 97606 | 97607 | 97608 |

#### 9.2.82.4 Documentation Requirements

For all wound care management services, documentation that supports the medical necessity of the service must be maintained in the client's medical records, which includes but is not limited to the following information:

- Accurate diagnostic information that pertains to the underlying diagnosis and condition as well as any other medical diagnoses and conditions, which include the client's overall health status.
- Appropriate medical history related to the current wound, including the following:
- Wound location
  - Wound measurements, which includes length, width, and depth, any tunneling and/or undermining
  - Wound color, drainage (type and amount), and odor, if present
  - The prescribed wound care regimen, which includes frequency, duration, and supplies needed
  - Treatment for infection, if present
  - All previous wound care therapy regimens, if appropriate
  - The client's use of a pressure reducing support surface, mattress, and/or cushion, when appropriate

Documentation maintained in the client's medical record must support the level of debridement service provided.

Fewer than five surgical debridements that involve removal of muscle or bone are typically required for management of most wounds. Documentation that is maintained in the client's medical record must support the number of debridements involving muscle or bone that are performed.

Wound care services providers must document the specialized education covered and the client's progress in the client's wound care education treatment plan with each billed encounter using the U1 modifier.

The measurable signs of healing described will be used as outcome measures to determine the degree of improvement as a result of such education.

#### 9.2.82.4.1 Skin Substitutes

Documentation maintained in the client's medical record must support the need for skin substitute applications and the product used.

Documentation for all wound care treatments involving the application of skin substitute products must include, but is not limited to, the following:

- Wound treatments are accompanied by the appropriate adjunctive measures, and identify the specific adjunctive therapies being provided to the client as part of the wound treatment regimen.
- Clients who use tobacco must satisfy one of the following documentation requirements:
  - The client will have ceased smoking or have refrained from systemic tobacco intake for at least 4 weeks prior to beginning skin substitute applications and during the conservative wound care.
  - Smoking history, cessation counseling on the effects of smoking on surgical outcomes, treatment for smoking cessation (if applicable), and the outcome of counseling must be recorded in the client's medical record.
- Adequate circulation/oxygenation to support tissue growth/wound healing must be present as evidenced by physical examination (e.g., Ankle-Brachial Index [ABI] of no less than 0.60, toe pressure greater than 30 millimeters of mercury [mmHg]).
- The wound has a skin deficit at least 1.0 square centimeter in size.
- For diabetic foot ulcers, the client's medical record reflects a diagnosis of Type 1 or Type 2 diabetes.
- Partial or full thickness ulcers must have a clean granular base without tendon and or muscle involvement, bone exposure, or sinus tracts.
- Documentation of the wound's response to the treatment is required at least every 30 days for each treatment episode. The documentation requirements must include measurements of the initial wound, measurements at the completion of appropriate wound care every 30 days, and measurements immediately prior to placement and with each subsequent placement of the skin substitute.
- Wound care services that include the use of skin substitutes must be FDA cleared/approved or be designated as 361 HCT/P exempt and should be used in accordance with each product's individualized labeling and application guidelines. Skin substitute products not used within the scope of the FDA's intended use and indications are considered experimental, investigational, or both.

#### 9.2.82.5 Exclusions

The following services are not a benefit of Texas Medicaid:

- Separately billed, repeated use of a skin substitute product after 12 weeks for a single wound or episode
- Skin substitute grafting for partial thickness loss with the retention of epithelial appendages is not covered, as epithelium will repopulate the deficit from the appendages, negating the benefit of over grafting

### 9.3 Collaborative Care Model (CoCM)

The Collaborative Care Model (CoCM) is a systematic approach to the treatment of behavioral health conditions (mental health or substance use) in primary care settings. The model integrates the services of behavioral health care managers (BHCMS) and psychiatric consultants with primary care provider oversight to proactively manage behavioral health conditions as chronic diseases, rather than treating acute symptoms.

CoCM services are benefits for persons of all ages who are enrolled in Texas Medicaid and who have a mental health or substance use condition to include a pre-existing or suspected mental health or substance use condition, when provided by a physician, physician assistant, nurse practitioner, clinic or group practices, federally qualified health center (FQHC), or rural health clinic (RHC) (henceforth, referred to as the Primary Care Provider).

Prior to delivering CoCM services, the primary care provider must attest in the Provider Enrollment and Management System (PEMS) that their practice location has an established CoCM program as described in this section. To ensure continued adherence to the CoCM core principles and the specific functional requirements of the model, the primary care provider must also re-attest in PEMS at the time of enrollment revalidation.

CoCM services must be provided under the direction of the primary care provider and are benefits when provided in an office, outpatient hospital, inpatient hospital, skilled nursing facility or intermediate care facility, extended care facility or other locations.

An episode of care of CoCM services begins when the person receiving services is referred by the primary care provider to the BHCM for CoCM services and ends after 12 calendar months (initial calendar month plus 11 subsequent calendar months) of services or earlier if treatment goals are met. A new episode of care must be initiated when either:

- The person receiving services is referred to a behavioral health provider for ongoing treatment of the behavioral health condition.
- There is a break in services, which is defined as no CoCM services provided for six consecutive calendar months.

CoCM services are individually delivered, time-based, monthly services that include outreach and engagement, completing an initial assessment, developing an individualized and person-centered plan of care, monitoring and tracking a person's progress using a registry, providing brief interventions and other focused treatments, and conducting weekly caseload reviews with the psychiatric consultant. For more information on registry requirements refer to The Advancing Integrated Mental Health Solutions (AIMS) Center, University of Washington, Psychiatry and Behavioral Sciences Division of Population Health.

Initial CoCM services (procedure code 99492) are those BHCM activities provided to the person receiving services in the first calendar month of services. Initial CoCM services, using procedure code 99492, must include the following elements and be documented in the electronic medical record (EMR) or electronic health record (EHR) for reimbursement:

- Conducting outreach to and engagement of the person needing services, directed by the primary care provider
- Completing an initial assessment to include administration of a validated rating scale
- Developing a person-centered plan of care that is reviewed and modified, as needed, by the psychiatric consultant
- Monitoring progress and updating the person-centered plan of care, as needed
- Entering information into the registry and tracking follow-up activities and progress through the registry with appropriate documentation

- Participating in weekly caseload consultation meetings with the psychiatric consultant
- Providing evidenced-based brief interventions, such as motivational interviewing or other focused strategies

Subsequent CoCM services (procedure code 99493) are those BHCM activities provided to the person receiving services in the months following the first calendar month of services.

Initial or subsequent CoCM services (procedure code G2214) are those BHCM activities provided to the person receiving services in the first calendar month or subsequent calendar months of services.

Procedure codes 99493 and G2214 must include the following elements and be documented in the EMR or EHR for reimbursement:

- Tracking follow-up activities and progress of the person receiving services through the registry with appropriate documentation
- Participating in weekly caseload consultation meetings with the psychiatric consultant
- Collaborating with and coordinating of the person's care and treatment with the primary care provider or other treating behavioral health providers
- Reviewing progress and recommendations from the psychiatric consultant for changes in treatment to include modifications to the medication regimen
- Providing evidenced-based brief interventions
- Monitoring clinical outcomes using a validated rating scale
- Planning for relapse prevention as the person receiving services prepares for discharge from services

Initial or subsequent CoCM services (procedure code G0512) are activities that are provided by a BHCM and directed by an FQHC or RHC practitioner (physician, physician assistant or nurse practitioner) to the person receiving CoCM services in the first calendar month or subsequent calendar month of services.

Initial or subsequent CoCM services (procedure code G0512) must include the following elements, and the FQHC or RHC practitioner or BHCM must document the elements in the EMR or EHR for reimbursement:

- Conducting outreach to and engagement with the person needing services
- Completion of an initial assessment to include administration of a validated rating scale resulting in a person-centered plan of care
- Entering information into the registry and tracking follow-up activities and progress through the registry with appropriate documentation
- Participation in weekly caseload consultation meetings with the psychiatric consultant and modifying treatment, if needed
- Providing evidenced-based brief interventions, such as motivational interviewing, problem-solving treatment, or other focused strategies
- Tracking follow-up activities and progress of the person receiving services, through the registry and with appropriate documentation, using validated rating scales
- Ongoing collaboration and coordination of the person's care and treatment with treating FQHC and RHC providers
- Planning for relapse prevention as the person receiving services prepares for discharge from services

### 9.3.1 CoCM Team Member Qualifications and Responsibilities

The primary care provider must be a physician (including specialists, such as a cardiologist or oncologist), physician assistant, or nurse practitioner that has an established CoCM program.

The primary care provider must:

- Direct the BHCM and other clinical staff.
- Oversee the care of the person receiving services to include prescribing medications, providing treatments for medical conditions, and making referrals to specialty care when needed.
- Remain actively involved in the care and treatment of the person receiving services through continuous oversight, management, collaboration, and reassessment.
- Comply with all applicable licensure board rules.

The BHCM must be credentialed as a Qualified Mental Health Professional-Community Services (QMHP-CS), as defined in Title 1 Texas Administrative Code (TAC) §353.1415. The BHCM works under the oversight and direction of the primary care provider and, in consultation with the psychiatric consultant, provides care management services, including:

- Completing an initial assessment
- Administering a validated rating scale
- Developing a person-centered plan of care
- Providing evidenced-based brief interventions
- Collaborating with the primary care provider
- Maintaining the registry

The BHCM must:

- Be available to provide CoCM services in person when needed.
- Maintain a continuous relationship with the person receiving CoCM services.
- Be able to engage the person receiving CoCM services outside of regular office hours, as needed, to perform CoCM duties.

**Note:** *BHCM activities may be provided in person or by synchronous audio-visual or audio only (telephone) technology, if clinically appropriate, safe, and agreed to by the person receiving CoCM services. Providers must defer to the needs of the person receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience*

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth.

The psychiatric consultant must be a medical professional who is trained in psychiatry and qualified to prescribe the full range of medications. The psychiatric consultant must engage, at a minimum, in weekly caseload reviews with the BHCM that may be conducted in person or by synchronous audio-visual or audio only (telephone) technology. Caseload reviews typically focus on persons who are new to CoCM services or who are not improving as expected under their current person-centered plan of care. The psychiatric consultant advises and makes recommendations, either directly to the primary care provider or through the BHCM, regarding psychiatric and other medical care to include:

- Psychiatric and other medical diagnoses
- Treatment strategies to include appropriate therapies, medication management, and medical management of complications associated with treatment of psychiatric disorders

- Referral for specialty services

The psychiatric consultant typically does not meet with the person receiving services but must be able to do so either in person or by synchronous audio-visual technology if clinically indicated. The psychiatric consultant must also facilitate referrals to a behavioral health provider when clinically appropriate.

### 9.3.2 Prior Authorization Requirements

Prior authorization is not required for the first six calendar months (initial month and five subsequent months) of CoCM services.

Prior authorization is required for an additional six calendar months (beyond the first six calendar months) of CoCM services.

**Note:** *Prior authorization is a condition of reimbursement, not a guarantee of payment.*

Prior authorization requests are considered on a case-by-case basis with documentation supporting medical necessity for an additional six calendar months of CoCM services. Requests must be received prior to the last day of the sixth calendar month of services. The documentation must demonstrate the person receiving services continues to meet eligibility criteria, as outlined in the section above, and include the following:

- The current person-centered recovery plan that includes goals and objectives
- Progress made relative to the goals and objectives outlined in the person-centered recovery plan

Requests must be submitted by the primary care provider to the Special Medical Prior Authorization (SMPA) department using the Special Medical Prior Authorization (SMPA) Request Form. The form must be signed and dated within 30 calendar days prior to the start of an additional six calendar months of CoCM services, and must include the following information:

- Identifying information for the person receiving services
- Provider information
- Service and procedure code information
- Expected dates of service
- Diagnosis or diagnoses
- Medical necessity information

**Note:** *A nurse practitioner and physician assistant may sign all documentation related to the provision of CoCM services on behalf of the physician when the physician delegates this authority to the nurse practitioner or physician assistant.*

Primary care providers are required to adhere to prior authorization requirements.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department through mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically signed documents must have an electronic date on the same page as the signature, electronic signatures that are generated through an EMR or EHR system that complies with applicable federal and state statutes and rules are acceptable. All electronically signed transactions and electronically signed documents must be kept in the person's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that the electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signa-

tures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, responsible adults of persons receiving services, and persons receiving services may sign prior authorization forms and supporting documentation using electronic or wet signatures.

To complete the prior authorization process by paper, the provider must fax or mail the completed prior authorization request form to the TMHP Prior Authorization Department and retain a copy of the signed and dated prior authorization form in the client's medical record.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated prior authorization form in the person's medical record.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the services requested. The physician must maintain documentation of medical necessity in the person's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested services.

### **9.3.3 Documentation Requirements**

Prior to receiving CoCM services, the primary care provider must obtain verbal or written consent from the person being referred for CoCM services to consult with the psychiatric consultant and other relevant specialists. A new consent is not required for each subsequent calendar month of services or annually unless the person receiving services changes primary care providers. If the person receiving services changes primary care providers, then a new verbal or written consent must be obtained and documented by the new primary care provider prior to the provision of CoCM services. Informed consent must be documented in the EMR or EHR.

Primary care providers must use a registry that is used jointly with the EMR or EHR of the practice to track clinical outcomes.

All elements for the procedure code being billed (99492, 99493 or G2214), as described in this section must be documented in the registry for reimbursement. In addition, documentation must also include the following:

- The initial assessment and any subsequent assessments
- The validated rating scale, or scales, used to include results
- All versions of the individualized, person-centered plan of care.
- The person-centered plan of care must:
  - Identify the goals of treatment
  - Indicate progress of the person receiving services towards their goals
  - Include any modifications to care and treatment.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the person's medical record supports the medical necessity of the services provided.

### **9.3.4 Claims Reimbursement**

CoCM services are time-based and reported as the total amount of time the BHCM spends engaging in clinical activities over the course of a calendar month.

Only the primary care provider may submit claims for CoCM services. The BHCM and psychiatric consultant are reimbursed by the primary care provider through a contract, employment, or other arrangement. If a contract or other arrangement is pursued, it must be as a billing agent, such as billing service or accounting firm, that furnishes statements and receives payments in the name of the provider; a facility under which the service is provided; or a foundation plan or similar organization under which the organization submits the claim, in accordance with 42 CFR 447.10.

To be reimbursed for CoCM services, the primary care provider must meet the following core components:

- Provide active treatment and care management for an identified population
- Use a registry to monitor treatment and outcomes, and to conduct psychiatric caseload reviews

The primary care provider must use procedure codes 99492, 99493, 99494, or G2214 to bill for monthly CoCM services in all settings. The primary care provider must also use the place of service code for the location where services would normally be provided for in-person care and treatment.

CoCM services begin after the referral is made by the primary care provider and the BHCM starts engaging in reimbursable clinical activities, as described in this section.

The primary care provider must use procedure code 99492 for the first 70 minutes accrued during the initial calendar month of BHCM activities, in consultation with the psychiatric consultant.

The primary care provider must use procedure code 99493 for the first 60 minutes accrued during each subsequent calendar month of BHCM activities, in consultation with the psychiatric consultant.

The primary care provider must use add-on procedure code 99494 for each additional 30 minutes accrued during the initial calendar month or subsequent calendar months of BHCM activities, in consultation with the psychiatric consultant. The add-on procedure code must be billed with the appropriate primary procedure code 99492 or 99493.

The primary care provider must use procedure code G2214 for no more than 30 minutes accrued during an initial calendar month or subsequent calendar months of BHCM activities, in consultation with the psychiatric consultant.

The primary care provider may not bill both procedure codes 99492 and G2214 during the initial calendar month of services or procedure codes 99493 and G2214 during any subsequent calendar month of services for the same person, same provider. See the CoCM procedure codes table for information about time thresholds.

The primary care provider must use the appropriate evaluation and management (E/M) code for the initial presenting visit with the person.

All required elements of the procedure codes, as described in this section, must be performed and documented, and time thresholds met, to be reimbursed for services.

The BHCM may provide other outpatient mental health services, if eligible for reimbursement, in the same calendar month as CoCM services but those services are separate and distinct from CoCM services and do not count toward the time thresholds for CoCM services. Therefore, the BHCM must report separately those other mental health services that are delivered in the same calendar month as CoCM services.

The psychiatric consultant may provide E/M services and other outpatient mental health services, if eligible for reimbursement, in the same calendar month as CoCM consultation services but those services are separate and distinct from CoCM services and do not count toward the time thresholds for CoCM services. Therefore, the psychiatric consultant must report separately E/M or other mental health services that are delivered in the same calendar month as CoCM services.

**Referto:** The “Behavioral Health and Case Management Services Handbook” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for more information about outpatient mental health services, and Section 9.2.60, “Physician Evaluation and Management (E/M) Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about physician evaluation and management (E/M) services.

The following procedure codes may be reimbursed for CoCM services based on the time thresholds listed:

| Procedure Code | Additional Information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 99492          | <p>Billable at 36 minutes. Time threshold is 36 to 85 minutes. Administrative and clerical duties do not count towards the time threshold.</p> <p>May only be billed by the primary care provider during the initial calendar month of an episode of care.</p> <p>Limited to one per initial calendar month, same person, same provider.</p> <p>May not be billed in subsequent months of services.</p>                                                                                                                  |
| 99493          | <p>Billable at 31 minutes. Time threshold is 31 to 75 minutes. Administrative and clerical duties do not count towards the time threshold.</p> <p>May only be billed by the primary care provider during subsequent calendar months of an episode of care.</p> <p>Limited to one per subsequent calendar month, same person, same provider.</p> <p>May not be billed in the initial calendar month of services.</p>                                                                                                      |
| 99494          | <p>Billable at 16 minutes, beyond total time, to 30 minutes. Administrative and clerical duties do not count towards the time threshold.</p> <p>May only be billed by the primary care provider during any calendar month (initial or subsequent) of an episode of care.</p> <p>Limited to two per calendar month (initial or subsequent), same person, same provider.</p> <p>Add-on code must be billed with primary procedure code 99492 or 99493.</p> <p>May not be submitted with procedure code G0512 or G2214.</p> |

| Procedure Code | Additional Information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| G0512          | <p>RHCs and FQHCs are required to bill with procedure code G0512.</p> <p>Procedure code G0512 is paid outside the encounter rate.</p> <p>A minimum of 60 minutes is required to be furnished within the calendar month. Administrative and clerical duties do not count towards the time threshold.</p> <p>May only be billed by a RHC or FQHC provider during any calendar month (initial or subsequent) of an episode of care.</p> <p>Limited to one per calendar month (initial or subsequent), same person, same provider.</p>                                                                                                    |
| G2214          | <p>Billable at 16 minutes. Time threshold is 16 to 30 minutes. Administrative and clerical duties do not count towards the time threshold.</p> <p>May only be billed by the primary care provider during any calendar month (initial or subsequent) of an episode of care.</p> <p>Limited to one per calendar month (initial or subsequent), same person, same provider.</p> <p>The primary care provider may not bill both procedure codes 99492 and G2214 during the initial calendar month of services or procedure codes 99493 and G2214 during any subsequent calendar month of services for the same person, same provider.</p> |

Procedure code 99492 is limited to one occurrence or unit in the initial calendar month of CoCM services, same person, same provider during an episode of care. Procedure code 99492 will be denied if billed during any subsequent calendar month of CoCM services.

Procedure code 99493 is limited to one occurrence or unit per calendar month for all subsequent calendar months of CoCM services, same client, same provider during an episode of care. Procedure code 99493 will be denied if billed during the initial calendar month of CoCM services.

Procedure code 99494 is limited to two occurrences or units per calendar month (initial or subsequent) of CoCM services, same person, same provider during an episode of care. Procedure code 99494 will be denied if billed without primary procedure code 99492 or 99493 for the same person, same provider.

Procedure code G2214 is limited to one occurrence or unit per calendar month (initial or subsequent) of CoCM services, same person, same provider during an episode of care.

Procedure codes 99492, 99493, G0512, and G2214 will be denied if billed in the same calendar month of CoCM services, same person, same provider.

Procedure code G0512 is limited to one occurrence or unit per calendar month (initial or subsequent) of CoCM services directed by an RHC or FQHC practitioner (i.e., physician, physician assistant, nurse practitioner), same person, same provider during an episode of care. Procedure code G0512 may only be billed by a RHC or FQHC and will be denied if billed by another provider type. Procedure code G0512 may be reimbursed in addition to the encounter rate.

### 9.3.5 Exclusions

Administrative and clerical duties, except for entering information in the registry which is a required element of the procedure codes are not a covered benefit of Texas Medicaid.

## 9.4 Doctor of Dentistry Practicing as a Limited Physician

This section outlines the guidelines for the Doctor of Dentistry practicing as a limited physician. The THSteps dental program is not addressed in these guidelines.

Services by a dentist (DDS or DMD) are covered by Texas Medicaid in accordance with the Omnibus Budget Reconciliation Act (OBRA) of 1987 §4103 and Title 2 *Texas Human Resources Code* §32.054, if the services are furnished within the dentist's scope of practice as defined by Texas state law and would be covered under Texas Medicaid when provided by a licensed physician (MD or DO).

Dentist (DDS or DMD) who want to participate as a dentist-physician in Texas Medicaid must be separately enrolled as a Doctor of Dentistry practicing as a limited physician even if they are enrolled in the THSteps Dental Program.

Dual licensure (MD, DO, and DDS) is not required for a dentist to enroll as a limited physician. Medicare enrollment is required for a dentist to enroll as a limited physician.

### 9.4.1 Prior Authorization for General Dental Services Due to Life-Threatening Medical Condition

Reimbursement for general dental services by any provider, irrespective of the medical or dental qualifications of the provider, is not a Medicaid benefit for Medicaid clients who are 21 years of age and older (who do not reside in an ICF-IID facility).

The TMHP Medical Director or designee may allow an exception for a dental condition causally related to a life-threatening medical condition. *Mandatory prior authorization is required* and the dental diagnoses *must* be secondary to a life-threatening medical condition.

Examples of dental procedures that may be authorized for a *general dentist* who is enrolled as a limited physician are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement.

Examples of dental procedures that may be authorized for an *oral and maxillofacial surgeon* who is enrolled as a limited physician are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement maxillofacial surgeries to correct defects caused by accident or trauma.
- Surgical corrections of craniofacial dysostosis.

**Note:** *Therapeutic procedures such as restorations, dentures, and bridges are not a benefit of the program and will not be authorized.*

9.4.1.1 Guidelines for Requesting Mandatory Prior Authorization

The limited physician dentist must request the mandatory prior authorization, and the request must include:

- A treatment plan that clearly outlines the dental condition as related to the life-threatening medical condition.
- Narrative describing the current medical problem, client status, and medical need for requested services.
- The client name and Medicaid number.
- The limited physician dentist’s NPI.
- The name and address of the facility.
- CPT procedure codes.
- The history and physical.
- The limited physician dentist’s signature.

**Note:** The “limited physician” dentist who will perform the procedure(s) must submit the request for prior authorization.

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax: 1-512-514-4213

9.4.2 Benefits and Limitations

Dental procedure codes and their corresponding CPT procedures may not be billed on the same date of service by any provider.

Cosmetic procedures are not a benefit of Texas Medicaid. Certain procedure codes, including, but not limited to, the procedure codes in the following table, may be considered cosmetic and are not a benefit except when the procedure is performed as a result of trauma or injury for the purpose of:

- Reconstructing tissues/body structures.
- Repairing damaged tissues.

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 11950           | 11951 | 11952 | 11954 | 11970 | 15780 | 15781 | 15786 | 15787 | 15788 |
| 15789           | 15838 | 15876 | 21089 | 21497 | 41820 | 41821 | 41828 | 61501 | Q3031 |

9.4.2.1 Additional Payable Procedure Codes

The following procedure codes are a benefit when prior authorized and the dentist is qualified and licensed to perform the procedures:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Surgery         |       |       |       |       |       |       |       |       |       |
| 10004           | 10005 | 10006 | 10007 | 10008 | 10009 | 10010 | 10011 | 10012 | 10021 |
| 10060           | 10061 | 10120 | 10121 | 10140 | 10160 | 10180 | 11000 | 11001 | 11010 |

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 11011           | 11012 | 11042 | 11043 | 11044 | 11045 | 11046 | 11047 | 11102 | 11103 |
| 11104           | 11105 | 11106 | 11107 | 11200 | 11201 | 11305 | 11306 | 11307 | 11308 |
| 11310           | 11311 | 11312 | 11313 | 11420 | 11421 | 11422 | 11423 | 11424 | 11426 |
| 11440           | 11441 | 11442 | 11443 | 11444 | 11446 | 11620 | 11621 | 11622 | 11623 |

### 9.4.2.2 Radiographs by a Doctor of Dentistry Practicing as a Limited Physician

When a Doctor of Dentistry Practicing as a Limited Physician uses appropriate radiograph equipment to produce required radiographs, the following procedure codes are eligible for reimbursement:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 70100           | 70110 | 70120 | 70130 | 70140 | 70150 | 70160 | 70190 | 70200 | 70250 |
| 70260           | 70300 | 70310 | 70320 | 70328 | 70332 | 70336 | 70350 | 70355 | 70370 |
| 70371           | 70380 | 70390 | 73100 | 70450 | 70460 | 70470 | 70480 | 70481 | 70482 |
| 70486           | 70487 | 70488 | 70490 | 70491 | 70492 |       |       |       |       |

### 9.4.2.3 Dental Anesthesia by a Doctor of Dentistry Practicing as a Limited Physician

A Doctor of Dentistry Practicing as a Limited Physician who is licensed by the Texas State Board of Dental Examiners (TSBDE) practicing in Texas, who has obtained an Anesthesia Permit from the TSBDE in accordance with Title 22 TAC §§110.1 through 110.15, may be reimbursed for anesthesia services on clients having dental/oral and maxillofacial surgical procedures in the dental office or hospital in accordance with all applicable rules for physician administration and supervision of anesthesia services.

Dentists providing sedation/anesthesia services must have the appropriate permit from TSBDE for the level of sedation/anesthesia provided.

The following anesthesia services are payable to dentists as physician services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 00100           | 00102 | 00160 | 00162 | 00164 | 00170 | 00190 | 00192 | 00300 | 99100 |
| 99116           | 99135 | 99140 |       |       |       |       |       |       |       |

## 9.5 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including physician services. Physician services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 9.6 Claims Filing and Reimbursement

### 9.6.1 Claims Information

Claims for physician and doctor services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

Physicians who submit a claim using the physician's own NPI for services provided by an NP, CNS, PA, or CNM must submit one of the following modifiers on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit:

- SA – Services were provided by an NP or CNS
- U7 – Services were provided by a physician assistant
- SB – Services were provided by a CNM

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

**9.6.2 National Drug Codes (NDC)**

**Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

**9.6.3 Reimbursement**

Texas Medicaid rates for physicians and other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](#).

Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by an NP, CNS, PA, or CNM if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit. The 92 percent reimbursement rate will not apply to laboratory services, X-ray services, and injections provided by an NP, CNS, PA, or CNM.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](#).

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare/Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices.

Reimbursement for these services will be 60 percent of the Texas Medicaid rate for the service furnished in the physician’s office. The following table identifies the services applicable to the 60-percent limitation when furnished in outpatient hospital settings:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 | 99281 |
| 99282           | 99283 |       |       |       |       |       |       |       |       |

These procedures are designated with note code “1” in the current [physician fee schedule](#), which is available at [www.tmhp.com](#). The following list shows the services excluded from the 60-percent limitation:

- Services furnished in rural health clinics (RHCs).
- Surgical services that are covered ambulatory surgical center (ASC)/hospital-based ambulatory surgical center (HASC) services.
- Anesthesiology and radiology services.
- Prenatal services when billed with modifier TH and the appropriate E/M procedure code to the highest level of specificity.

- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client's health.
  - Serious impairment to bodily functions.
  - Serious dysfunction of any bodily organ or part.

Because of TEFRA, Texas Medicaid reimbursement for a payable nonemergency office service that is performed in the outpatient department of a hospital is limited to 60 percent of Texas Medicaid rate for that service. If the condition qualifies as an emergency or if the client is critically ill or critically injured, the 60 percent professional service reimbursement limit does not apply.

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 2.2.1.1, “Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about conditions that are excluded from the 60-percent limitation.

Subsection 9.2.7, “Anesthesia” in this handbook for information on anesthesia services that are reimbursed according to relative value units (RVUs).

### 9.6.3.1 Affordable Care Act of 2010 (ACA) Rate Increase for Primary Care Services

To qualify for the Affordable Care Act of 2010 (ACA) rate increase for primary care services, a physician must have a specialty designated of general internal medicine, family practice, or pediatrics and must attest to one of the following:

- The provider has a certification recognized by the American Board of Allergy and Immunology (ABAI), American Board of Medical Specialties (ABMS), American Board of Physician Specialties (ABPS), or American Osteopathic Association (AOA) and meets the requirements as required by federal and state regulation to receive the increased payment.
- The provider does not have a certification recognized by the ABAI, ABMS, ABPS, or AOA, but at least 60 percent of the provider's Medicaid billings for the previous calendar year (or for the previous calendar month if the provider has been enrolled in Medicaid for less than one year) were for the evaluation and management (E/M) and vaccine administration procedure codes as published in the final federal and state regulations and the provider meets the requirement to receive payment.

**Note:** *New providers with no history of Medicaid billings can attest that 60 percent of their Medicaid billing will be for primary care services.*

Providers can attest using the Texas Medicaid Attestation for ACA Primary Care Services Rate Increases form. ABAI-certified allergists must indicate “ABAI-allergy” in the “List subspecialties” field of the attestation form.

**Important:** *By signing the form, providers attest that they qualify for the rate increase, and that the increase will be applied to paid claims for primary care services on or after the effective date. Payment of the rate increase may be subject to retrospective review and recoupment if it is determined at a later time that the provider did not qualify for the ACA primary care services rate increase. Federal regulations require states to conduct an annual audit of provider attestations.*

Non-physician practitioners who are under the supervision of a provider who has self-attested, are not required to submit a separate provider attestation form. Increased payment may be available to the supervising physician when the following conditions are met:

- The non-physician practitioner renders services under the personal supervision of a provider who has self-attested to meeting the requirements.
- Services are billed under the qualifying provider's provider identification number.

## 10 Physician Assistant

### 10.1 Enrollment

To enroll in Texas Medicaid, a PA must be licensed and recognized as a PA by the Texas Physician Assistant Board. Texas Medicaid accepts a signed letter of certification from the Texas Physician Assistant Board as acceptable documentation of appropriate licensure and certification for enrollment. The PA must identify their supervising physician in the appropriate field of the enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days.

Enrollment as an individual provider is optional. PAs currently treating clients and billing under the supervising physician's NPI may continue this billing arrangement.

All PA services must be delivered according to protocols developed jointly within the scope of practice and state law governing PAs.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA are not reimbursed for laboratory services.

PAs may enroll as providers of THSteps medical checkups.

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)" in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 4.2, "Enrollment" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about enrolling as a THSteps provider.

PAs may be included as primary care providers in the provider network for Medicaid and CHIP programs (both fee-for-service and managed care), regardless of whether the physician supervising the PA is enrolled in Medicaid or in the provider network.

### 10.2 Services, Benefits, Limitations, and Prior Authorization

Services performed by PAs are covered if the services meet the following criteria:

- Are within the scope of practice for PAs, as defined by Texas state law
- Are consistent with rules and regulations promulgated by the Texas Medical Board or other appropriate state licensing authority
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO)
- Are reasonable and medically necessary as determined by HHSC or its designee

Services provided to Medicaid clients must be documented in the client's medical record to include the following:

- Services provided

- Date of service
- Pertinent information about the client's condition supporting the need for service
- The individual practitioner of the service

PAs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Physicians who submit a claim using the physician's own NPI for services provided by a PA must submit modifier U7 on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and claims must be received within 95 days from the date of service.

**Note:** *Payment to providers for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.*

**Referto:** Section 2, "Medicaid Title XIX Family Planning Services" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Section 9, "Physician" in this handbook.

Section 4, "THSteps Medical" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 9.3, "Collaborative Care Model (CoCM)" in this handbook for information about CoCM services.

### 10.2.1 Prior Authorization

Services performed by a PA are subject to the same prior authorization guidelines as services performed by other provider types.

## 10.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including PA services. PA services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 10.4 Claims Filing and Reimbursement

### 10.4.1 Claims Information

Claims for PA services must include modifier U7 on the claim details to indicate that the client was treated by a PA.

PA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

**10.4.2 Reimbursement**

According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

**Note:** *PA providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps NPI as the billing provider.*

PAs who bill Medicaid directly for services they perform must use their individual NPI. If the services were performed by the PA but billed by a physician or physician group, the billing provider is the physician or physician group. Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by a PA if the physician does not make a decision regarding the client’s care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, or injections provided by a PA.

Providers can refer to the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com). To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

“Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on how to obtain electronic fee schedules from the TMHP website.

# 1 General Information

The Medical Transportation Program (MTP), under the direction of the Texas Health and Human Services Commission (HHSC), arranges nonemergency medical transportation services and travel-related services for eligible fee-for-service (FFS) Medicaid, Children with Special Health Care Needs (CSHCN) Services Program, and Transportation for Indigent Cancer Patients (TICP) clients who have no other means of transportation. MTP is responsible for the prior authorization of all FFS MTP services. Medicaid managed care organizations (MCOs) are responsible for approval of managed care nonemergency medical transportation services. This handbook does not apply to managed care.

MTP provides for the following general services:

- Mass transit (intercity and intracity): Passes or tickets for client transport within a city and from city to city. Air travel is also an allowable service.
- Demand response transportation: Common carriers such as taxi, wheelchair van, and other transportation according to contractual requirements.
- Mileage reimbursement for registered individual transportation participant (ITP): The registered ITP can be the responsible party, family member, friend, neighbor, or client.
- Meals: Eligible for clients birth through 20 years of age and their guardian or responsible adult.
- Lodging: Eligible overnight stays for clients birth through 20 years of age and their guardian or responsible adult.
- Advanced funds: Financial services travel-related expenses for clients birth through 20 years of age.

Under the contract between Texas Medicaid & Healthcare Partnership (TMHP) and HHSC, TMHP is responsible for enrollment of Demand Response Transportation Service (DRTS) providers, including Transportation Network Companies (TNC), registration of ITPs, and processing of certain MTP claims.

MTP contracts with various provider types to arrange transportation and travel-related services for eligible MTP clients and their attendants.

There are two MTP provider types that enroll directly with TMHP:

- DRTS
- TNC

**Note:** *ITPs register with TMHP but do not enroll as Medicaid providers.*

## 1.1 Contacting MTP

If health-care providers have MTP-eligible clients who express difficulty accessing health-care services, advise the clients or their advocates to call the statewide MTP toll-free number at 1-877-633-8747 to request transportation services. Clients or their advocates must call the MTP office at least 2 business days before the scheduled appointment. For clients who need to travel beyond the county where they live, clients or their advocates must call the MTP office at least 5 business days before the scheduled appointment. Appointments are available with less than 48-hour notice if they involve:

- Discharge of a client from a health care facility.
- Obtaining pharmacy services and prescription drugs.
- Receipt of urgent care.

The client must provide the following information to the intake operator at the time of the call:

- Client name, address, and, if available, the telephone number

- Medicaid, TICP or CSHCN Services Program client identification number (if applicable) or Social Security number, and date of birth
- Name, address, and telephone number of health-care provider and/or referring health-care provider
- Purpose and date of trip and time of appointment
- Affirmation that other means of transportation are unavailable
- Special needs, including wheelchair lift or attendant(s)
- Medical necessity verified by the Health Care Provider's Statement of Need, if applicable
- Affirmation that advance funds are needed in order for the recipient to access health-care services

**Note:** *Clients must reimburse the department for any advance funds, and any portion thereof, that are not used for the specific prior authorized service.*

## 2 Individual Transportation Participants (ITP)

ITPs are individuals who use their personal vehicle to drive themselves, a friend, or a family member safely to the doctor, dentist, or drug store.

### 2.1 Registration for ITPs

To initiate the registration process, the MTP client must contact MTP to request a ride from an individual who is a potential ITP. This request is the first step in the registration process for the ITP.

After the client's call, MTP sends the potential ITP's information to TMHP, and TMHP mails the potential ITP a registration package. The ITP must fill out the Individual Transportation Participant Application and mail it to TMHP with all requested documentation.

The participant must identify the MTP clients they will be transporting and whether they are related to the client. The application packet also includes an Electronic Funds Transfer (EFT) Agreement form that authorizes TMHP to deposit payments directly into a bank account, which results in faster payments.

After the ITP application has been processed, the ITP will receive a letter from TMHP that includes the Atypical Provider Identifier (API) and the Taxonomy Code to be used when the ITP submits claim forms for mileage reimbursement.

### 2.2 Prior Authorization for ITPs

Once an ITP is registered with TMHP and a client calls MTP to request a ride, MTP will mail a preprinted ITP Service Record (Form H3017) to the MTP client. The H3017 is the form the ITP must mail to TMHP to be reimbursed for the ride.

**Important:** *Only claims that are authorized by MTP will be considered for payment. All claims must be prior authorized to be paid.*

**Referto:** Subsection 3, "Prior Authorization" in this handbook.

## 2.3 Claims Filing for ITPs

To file a claim, the ITP must complete the H3017 form that was sent to the Medicaid client and mail it to TMHP at the following address:

Texas Medicaid & Healthcare Partnership  
Claims  
PO Box 200555  
Austin, TX 78720-0555

The H3017 includes the following transportation details:

- Date of the ride
- Number of miles authorized
- MTP Authorization Number
- MTP client's name
- ITP's name
- API
- Taxonomy code

The H3017 claim form must be signed by the doctor, dentist, or drug store representative that rendered services to the MTP client. This signature stands as proof that the ride authorized by MTP was taken. The ITP must also sign the claim form and include the API and taxonomy code that was assigned to them by TMHP. If any of this required information is missing, the claim will be denied.

The ITP must mail the completed claim form to TMHP after the client's authorized ride, but no later than 95 days from the date of the ride. Any claims received by TMHP more than 95 days after the date of the ride will be denied.

An ITP may not charge an MTP client a fee for completing claim forms or for denied claims or additional fees above the rate approved. TMHP also cannot be charged for the filing of claim forms.

## 3 Prior Authorization

All MTP services must be prior authorized by MTP, which issues all prior authorizations for transportation services. The eligible MTP client must contact MTP to obtain an authorization. Claims that are submitted without proper prior authorization will be denied.

### 3.1 Retention of Prior Authorization Documents

MTP prior authorization documents relating to Medicaid services or benefits provided to clients who are 20 years of age and younger must not be destroyed until the provider receives notice from HHSC. Examples of such documents include but are not limited to:

- Correspondence with HHSC/MTP;
- Invoices
- Receipts
- Contacts with clients who are class members

### **3.2 Definition of Prior Authorization Documents**

The term “prior authorization document” is broad and includes, but is not limited to, the following:

- Paper records
- Electronic files in any format
- Database entries
- The original and any drafts or non-identical copies of any document
- Exhibits or attachments to documents
- Handwritten documents
- Emails
- Drawings, graphs, charts
- Electronic or videotape recordings
- Computer disks
- Other forms of computer memory storage

### **3.3 Copies of Prior Authorization Documents**

Providers are not required to retain multiple exact copies of a document. For example:

- An exact electronic copy (e.g., scanned computer image, microfiche) may be retained instead of a paper copy.
- If the last in a chain of emails is retained, it is not necessary to retain each of the individual emails included in the chain, as long as the email that is retained reflects all of the earlier emails.

However, a document containing any substantive editorial comment, margin notes, underlining, etc., is not an exact copy and becomes a new original that must be retained.

### **3.4 Storage of Prior Authorization Document Storage**

Relevant information and documents should be stored in a way that is protected from unintentional disclosure or destruction.

## **4 Claims Filing**

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions carefully and complete all requested information. A correctly completed claim form is processed faster.

Texas Medicaid cannot make payments to clients, so the provider who performs the service must file an assigned claim. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms or for denied claims or additional fees above the rate approved. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business. Providers cannot bill Texas Medicaid or Medicaid clients for missed appointments or failure to keep an appointment. Only claims for services rendered are considered for payment.

Medicaid providers are also required to complete and sign authorized medical transportation forms (e.g., Form H3017, Individual Transportation Participant (ITP)) Service Record, or Form 3111, Verification of Travel to Healthcare Services by Mass Transit) or provide an equivalent (e.g., provider statement on official letterhead) to attest that services were provided to a client on a specific date. The client presents these forms to the provider.

Providers are not allowed to bill clients or Texas Medicaid for completing these forms.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same provider identifier and program and ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) Report, which may be received as a downloadable portable document format (PDF) version or on paper. A Health Insurance Portability and Accountability Act (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

An R&S Report is generated for providers that have weekly claim or financial activity with or without payment. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, an R&S Report is not generated for the week.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system using TexMedConnect or a third party vendor. Claims must contain the provider's complete name, address, and provider identifier to avoid unnecessary delays in processing and payment.

## **4.1 Claims Filing Deadlines**

All claims for services rendered to eligible MTP clients are subject to a filing deadline from the date of service (DOS) of:

- 95 days for in-state providers
- 365 days for out-of-state providers

Claims submitted by newly-enrolled MTP providers must be received within 95 days of the date the national provider identifier or the atypical provider identifier (API) is issued, and within 365 days of the DOS. Providers with a pending application should submit any claims that are nearing the 365-day deadline from the DOS. TMHP will reject all claims until an API is issued. MTP providers can use the TMHP rejection report or Return to Provider (RTP) letters as proof of meeting the 365 day deadline and submit an appeal.

## **4.2 Auditing of Claims**

Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

HHSC and TMHP routinely perform retrospective reviews of all providers. HHSC ultimately is responsible for Texas Medicaid utilization review activities. This review includes comparing services billed to the client's clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client's medical record subjects the associated services to recoupment.

### 4.3 Important Codes for All MTP Providers

MTP providers must use the following codes when submitting claims:

- Benefit Code = MTP
- Provider Type = MT
- Diagnosis Code = Z753
- Place of Service = 09 for paper claims, 99 for TexMedConnect claims
- Type of Service = 9
- Taxonomy Code = 347C00000X

The following table shows additional codes that TMHP recommends for filing MTP claims. The codes are based on transportation provider type:

| MTP Provider Description                               | Provider Specialty | Taxonomy Code | Recommended Procedure Code | Modifier Codes |
|--------------------------------------------------------|--------------------|---------------|----------------------------|----------------|
| Individual Transportation Participant (ITP)            | T4                 | 347C00000X    | S0215                      |                |
| Demand Response Transportation Service Provider (DRTS) | TS                 | 343800000X    | T2003                      | U1             |
|                                                        |                    |               |                            | U2             |
|                                                        |                    |               |                            | U3             |
| DRTS Transportation Network Company                    | TS                 | 347C00000X    | T2003                      | U1             |
|                                                        |                    |               |                            | U2             |
|                                                        |                    |               |                            | U3             |

### 4.4 Delegation of Signature Authority

A provider that delegate signatory authority to a member of the office staff or to a billing service remains responsible for the accuracy of all information on a claim submitted for payment. A provider's employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print "Signature on File" in place of the provider's signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.

### 4.5 Electronic Claims

#### 4.5.1 TMHP Electronic Data Interchange (EDI)

Providers are encouraged to submit claims using electronic methods. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP EDI Gateway. TMHP uses the HIPAA-compliant American National Standards Institute (ANSI) ASC X12 4010A1 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security. Providers can access TMHP's electronic services through the TMHP website at [www.tmhp.com](http://www.tmhp.com), TexMedConnect, vendor software, and billing agents. Providers may also submit claims using paper forms. Version 2001 0805 3 MTP Claim Filing.

**Note:** This option is not applicable to ITPs.

### 4.5.2 TexMedConnect

TexMedConnect is a free, web-based, claims submission application provided by TMHP. Technical support and training for TexMedConnect are also available free from TMHP. DRTS/TNC Providers can submit claims, eligibility requests, claim status inquiries, appeals, and download ER&S Reports (in either PDF or ANSI 835 formats) using TexMedConnect. TexMedConnect can interactively submit individual claims that are processed in seconds. To use TexMedConnect, providers must have:

- An internet service provider (ISP)

One of the following:

- Microsoft Edge®
- Google Chrome®
- Mozilla Firefox®

A broadband connection is recommended but not required. Providers that use TexMedConnect can find the online instruction manual on the home page and on the EDI page of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

*Note: This option is not applicable to ITPs.*

### 4.5.3 Vendor Software

Providers that do not use TexMedConnect may use vendor software to create, submit, and retrieve data files. Providers can use software from any vendor listed on the EDI Submitter List, which is located on the [EDI Vendor Testing web page](http://www.tmhp.com) of the TMHP website at [www.tmhp.com](http://www.tmhp.com). There are hundreds of software vendors that have a wide assortment of services and that have been approved to submit electronic files to TMHP. Providers that plan to access TMHP's electronic services with vendor software should contact the vendor for details on software requirements. TMHP does not make vendor recommendations or provide any assistance for vendor software. Not all vendor software offers the same features or levels of support. Providers are encouraged to research their software thoroughly to make certain that it meets their needs and that it has completed testing with TMHP.

Providers must setup their software or billing agent services to access the TMHP EDI Gateway. Providers who use billing agents or software vendors should contact those organizations for information on installation, settings, maintenance, and their processes and procedures for exchanging electronic data.

Providers that download the ANSI 835 file through TexMedConnect and providers that use vendor software must request a submitter ID. A submitter ID is necessary for vendor software to access TMHP's electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files. To order a submitter ID, providers must call the EDI Help Desk at 1-888-863-3638. Providers that use a billing agent do not need a submitter ID.

Providers may receive an ER&S Report by completing the Electronic Remittance and Status (ER&S) Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway. 4 Version 2001 0805 MTP Claim Filing.

*Note: This option is not applicable to ITPs.*

### 4.5.4 Third Party Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. Vendors that wish to begin testing may either call the EDI Help Desk at 1-888-863-3638 or visit the EDIFECs testing site at [editesting.tmhp.com](http://editesting.tmhp.com) and use the TMHP Support link. An EDIFECs account will be created for the vendor to begin testing EDI formats once they have enrolled for testing. After the successful completion of EDIFECs testing and the submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Software vendors

and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. When end-to-end testing has been completed, the software vendor or billing agent will be added to the EDI Submitter List. Providers and billing agents may then order production submitter IDs for use with the vendor's software. Companion guides and vendor specifications are available in the [EDI section](#) of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Note:** *This option is not applicable to ITPs.*

## 4.6 Paper Claims

MTP providers can also file claims using the CMS-1500 paper claim form. Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice. ITPs are required to submit H3017 claim form; TMHP does not supply them.

Providers must submit paper claims to TMHP at the following address:

Texas Medicaid & Healthcare Partnership  
Claims  
PO Box 200555  
Austin, TX 78720-0555

### 4.6.1 Tips on Expediting Paper Claims

Use the following guidelines to enhance the accuracy and timeliness of paper claims processing.

#### 4.6.1.1 General requirements

- Use original claim forms. Don't use copies of claim forms.
- Detach claims at perforated lines before mailing.
- Use 10 x 13 inch envelopes to mail claims. Don't fold claim forms, appeals, or correspondence.
- Don't use labels, stickers, or stamps on the claim form.
- Don't send duplicate copies of information.
- Use 8 ½ x 11 inch paper. Don't use paper smaller or larger than 8 ½ x 11 inches.
- Don't mail claims with correspondence for other departments. Version 2001 0805 5 MTP Claim Filing

#### 4.6.1.2 Data Fields

- Print claim data within defined boxes on the claim form.
- Use black ink, but not a black marker. Don't use red ink or highlighters.
- Use all capital letters.
- Print using 10-pitch (12-point) Courier font, 10 point. Don't use fonts smaller or larger than 12 points. Don't use proportional fonts, such as Arial or Times Roman.
- Use a laser printer for best results. Don't use a dot matrix printer, if possible.
- Don't use dashes or slashes in date fields.

#### 4.6.1.3 Attachments

- Use paper clips on claims or appeals if they include attachments. Don't use glue, tape, or staples.
- Place the claim form on top when sending new claims, followed by any medical records or other attachments.
- Number the pages when sending when sending attachments or multiple claims for the same client (e.g., 1 of 2, 2 of 2).

- Don't total the billed amount on each claim form when submitting multi-page claims for the same client.

**Note:** *It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send.*

- All paper claims must be submitted with an API or NPI.
- Modifiers describe and qualify the services provided by Texas Medicaid. A modifier is placed after the five-digit procedure code.

#### 4.6.1.4 Attachments to Claims

To expedite claims processing, providers and ITPs must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim.

#### 4.6.2 CMS-1500 Instruction Table

The table below describes what information must be entered in each of the block numbers of the CMS-1500 claim form. Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

**Block numbers not referenced in the table may be left blank. They are not required for TMHP to process MTP claims.**

| CMS 1500 - Required MTP Information |                                                                                        |                                                                                                                                                                                                                         |
|-------------------------------------|----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Block No                            | Description                                                                            | Guidelines                                                                                                                                                                                                              |
| 1a                                  | Insured's ID No. (for program checked above, include all letters)                      | Enter the patient's MPCN (10-digit) patient number from the MTP authorization form.                                                                                                                                     |
| 2                                   | Patient's name                                                                         | Enter the patients last name, first name, and middle initial as printed on the MTP authorization form.<br>If the insured uses a last name suffix (e.g., Jr, Sr) enter it after the last name and before the first name. |
| 21                                  | Diagnosis or nature of illness or injury                                               | The ICD-10-CM diagnosis codes recommended for MTP claims are Z753.                                                                                                                                                      |
| 23                                  | Prior authorization number                                                             | Enter the Prior Authorization Number issued by MTP.                                                                                                                                                                     |
| 24a                                 | Date(s) of service                                                                     | Enter the date of service for each MTP authorization provided in a MM/ DD/YYYY format.                                                                                                                                  |
| 24b                                 | Place of service                                                                       | The recommended POS code for MTP paper claims is 09. For electronic filing using TexMedConnect, the POS code is 99.                                                                                                     |
| 24d                                 | Fully describe procedures, medical services, or supplies furnished for each date given | The recommended procedure code for DRTS claim is T2003.                                                                                                                                                                 |
| 24e                                 | Diagnosis pointer                                                                      | The recommended diagnosis codes are Z753 for all MTP claims.                                                                                                                                                            |
| 24f                                 | Charges                                                                                | Indicate the charges for the service listed                                                                                                                                                                             |

# **OUTPATIENT DRUG SERVICES HANDBOOK**

**TEXAS MEDICAID PROVIDER PROCEDURES MANUAL: VOL. 2**

**OCTOBER 2025**

OUTPATIENT DRUG SERVICES HANDBOOK

Table of Contents

1 General Information ..... 10

1.1 About the Vendor Drug Program.....10

1.2 \* Pharmacy Enrollment .....10

1.3 Program Contact Information.....11

1.4 Education .....11

1.4.1 Continuing Education ..... 11

1.4.2 Texas Health Steps Quick Course ..... 11

1.4.3 TMHP Learning Management System ..... 11

2 Clinician-Administered Drugs .....12

2.1 Services, Benefits, Limitations, and Prior Authorization.....12

2.1.1 Clinician-administered Drug Search ..... 12

2.1.2 Prior Authorization Requests..... 12

2.1.3 Electronic Signatures in Prior Authorizations ..... 13

3 Reimbursement.....13

4 Injectable Medications as a Pharmacy Benefit.....14

5 National Drug Code (NDC) .....15

5.1 Calculating Billable HCPCS and NDC Units .....15

5.1.1 Single-Dose Vials Calculation Examples ..... 16

5.1.2 Multi-Dose Vials Calculation Examples ..... 16

5.1.3 Single and Multi-Use Vials ..... 17

5.1.4 Nonspecific, Unlisted, or Miscellaneous Procedure Codes ..... 17

6 Outpatient Drugs—Benefits and Limitations.....18

6.1 Abatacept (Orencia).....18

6.1.1 Prior Authorization for Abatacept (Orencia) ..... 19

6.2 Adalimumab.....20

6.3 Adu-trastuzumab entansine (Kadcyla).....21

6.4 Afamelanotide Implant (Scenesse) .....22

6.5 Afamitresgene autoleucl (Tcelra) .....22

6.5.1 Prior Authorization Requirements..... 22

6.5.2 Documentation Requirements ..... 23

6.6 Ajovy (Fremanezumab-vfrm) .....23

6.7 Alzheimer’s Disease (AD) .....23

6.7.1 Prior Authorization ..... 23

6.8 Amisulpride (Barhemsys) .....24

6.9 Antibiotics and Steroids .....24

6.10 Antineoplastic (Oncology) Agents.....25

6.10.1 Amivantamab-vmjw (Rybervant) ..... 25

|             |                                                                                   |           |
|-------------|-----------------------------------------------------------------------------------|-----------|
| 6.10.2      | Cemiplimab-rwlc (Libtayo) .....                                                   | 25        |
| 6.10.3      | Daratumumab and Hyaluronidase-fihj (Darzalex Faspro) .....                        | 25        |
| 6.10.4      | Degarelix (Firmagon) .....                                                        | 25        |
| 6.10.5      | Dostarlimab-gxly (Jemperli) .....                                                 | 25        |
| 6.10.6      | Enfortumab Vedotin-ejfv (Padcev) .....                                            | 25        |
| 6.10.7      | Hydroxyprogesterone Caproate .....                                                | 25        |
| 6.10.8      | Isatuximab-irfc (Sarclisa) .....                                                  | 26        |
| 6.10.9      | Loncastuximab Tesirine-lpyl (Zynlonta) .....                                      | 26        |
| 6.10.10     | Lurbinectedin (Zepzelca) .....                                                    | 26        |
| 6.10.11     | Margetuximab-cmkb (Margenza) .....                                                | 26        |
| 6.10.12     | Melphalan (Evomela) .....                                                         | 26        |
| 6.10.13     | Mitomycin for Pyelocalyceal Solution (Jelmyto) .....                              | 26        |
| 6.10.14     | Naxitamab-ggqk (Danyelza) .....                                                   | 26        |
| 6.10.15     | Polatuzumab vedotin (Polivy) .....                                                | 26        |
| 6.10.16     | Sacituzumab govitecan-hziy (Trodelvy) .....                                       | 26        |

## 1 General Information

The information in this handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to outpatient drugs.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers may also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information).

### 1.1 About the Vendor Drug Program

The Texas Vendor Drug Program (VDP) provides statewide access to prescription drugs as authorized by a prescribing provider for clients enrolled in:

- Medicaid (fee-for-service and managed care).
- Children's Health Insurance Program (CHIP).
- Children with Special Health Care Needs (CSHCN) Services Program.
- Healthy Texas Women (HTW) Program.
- Kidney Health Care (KHC) Program.

VDP manages the Medicaid and CHIP drug formularies and Medicaid Preferred Drug List (PDL).

**Note:** *Pharmacy services for clients in Medicaid managed care are administered by a client's managed care organization (MCO).*

**Referto:** The *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*) for additional information about managed care prescription drug and pharmacy benefits.

### 1.2 \* Pharmacy Enrollment

VDP enrolls any eligible, in-state pharmacy licensed as Class A or C by the Texas State Board of Pharmacy.

Any out-of-state pharmacies or pharmacies holding any other class of pharmacy license are considered for inclusion in the program on a case-by-case basis. Consideration is relative to the benefits made available to the client eligible for pharmacy benefits. Enrollment is not granted unless additional benefits are established.

[Revised] Pharmacy providers must enroll with Texas Medicaid through the Provider Enrollment and Management System (PEMS) before providing outpatient prescription services and prior to participating in any Medicaid managed care network. To participate in the Medicaid or CHIP managed care networks, the pharmacy must contact the health plan.

Pharmacy providers enrolled with HHSC should refer to the VDP Pharmacy Provider Procedure Manual for policies and procedures pertaining to fee-for-service outpatient pharmacy claims, including drug benefit guidance, pharmacy prior authorization, coordination of benefits, drug pricing, and reimbursement.

**Referto:** The [VDP Pharmacy Provider Procedure Manual](#) on the VDP website.

Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about procedures for enrolling as a Medicaid provider.

Subsection 2.2, “Provider Enrollment and Responsibilities” in the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

### 1.4 Education

HHSC and TMHP provide several provider education and training opportunities.

#### 1.4.1 Continuing Education

Texas Health Steps offers more than 40 continuing education courses accredited by the Accreditation Council of Pharmacy Education (ACPE). Pharmacy-related continuing education modules.

The [Pharmacy module](#) equips pharmacists and pharmacy providers in delivering outpatient pharmacy services to clients enrolled in Texas Medicaid, Children’s Health Insurance Program, Children with Special Health Care Needs Services Program, Healthy Texas Women Program, and Kidney Health Care Program.

#### 1.4.2 Texas Health Steps Quick Course

Quick courses are short, targeted training modules available to anyone. Most take 15 minutes or less to complete and do not offer continuing education credit. Outpatient drug-related quick-courses include the following:

- [Prescriber’s Guide to Medicaid Prior Authorizations](#)
- [Texas Medicaid Mosquito Repellent Benefit: What Pharmacy Providers Need to Know](#)

#### 1.4.3 TMHP Learning Management System

The TMHP Learning Management System is an education portal. To access the LMS, providers must register and obtain a username. Refer to the LMS Registration and Navigation Job Aid to learn more about creating an account and navigating the LMS.

- [TMHP LMS](#)
- [LMS Registration and Navigation Job Aid](#)

Pharmacy-related computer-based training (CBT) modules include the following:

- Durable Medical Equipment
  - The Pharmacy DME CBT provides DME and pharmacy DME providers information and resources necessary to enroll in Texas Medicaid as a DME provider and provide DME and supplies to Texas Medicaid clients.
- NDC Requirements for the Submission of Clinician-Administered Drug Claims
  - Provides information about national drug code (NDC) and healthcare common procedure coding system (HCPCS) requirements on clinician-administered drug (CAD) claims.

## 2 Clinician-Administered Drugs

### 2.1 Services, Benefits, Limitations, and Prior Authorization

Clinician-administered drugs or biologicals (CADs), also known as physician-administered drugs, are injectable medications given in an office or outpatient clinic setting when oral medications are not appropriate and may be reimbursable as a medical benefit through Texas Medicaid and CHIP.

Newly released HCPCS codes for CADs and biologicals are reviewed by Texas Medicaid throughout the year. If the CADs are determined to be appropriate benefits for Medicaid, then the HCPCS codes are presented at a rate hearing as part of the process to become a benefit. An application to initiate this review process is not necessary. HHSC's review of any new CAD does not guarantee that the new CAD will become a benefit. If a manufacturer is interested in having a CAD included on the Texas Medicaid Vendor Drug Program (VDP) formulary list it is necessary to contact VDP for an application.

If a HCPCS code that already is a benefit of Texas Medicaid has a new NDC that needs to be added to the Texas NDC-to-HCPCS crosswalk, contact the Texas Medicaid Vendor Drug Program. A new NDC for a currently payable HCPCS code generally does not require a new rate hearing.

**Referto:** Subsection 10, "Pharmacy Benefit" in this handbook for more information.

The *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)* for information about the managed care prescription drug and pharmacy benefits.

#### 2.1.1 Clinician-administered Drug Search

The VDP clinician-administered drug search is an online tool available to health-care providers to help clients get access to medications.

Users can search by either brand or generic name of the drug or product, the 11-digit national drug code (NDC), the HCPCS code, or the HCPCS description for products.

**Referto:** The [VDP CAD Search](#) for more information.

#### 2.1.2 Prior Authorization Requests

Prior authorization requests for CADs must be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal.

To facilitate determination of medical necessity and avoid unnecessary denials, the prescribing provider must submit correct and complete information, including documentation for medical necessity for the equipment or supplies requested, procedure codes, and numerical quantities for services requested. The provider must maintain documentation of medical necessity in the client's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

To complete the prior authorization process by paper, the provider must fax or mail the completed Special Medical Prior Authorization (SMPA) Request form to the Special Medical Prior Authorization (SMPA) unit.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated SMPA Request form in the client's medical record.

A SMPA Request Form must be completed, signed, and dated by the prescribing provider. The SMPA form will not be accepted beyond 90 days from the date of the prescribing provider's signature.

The completed SMPA Request Form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review.

Documentation of the client's dosage, administration schedule, number of injections to be administered during the prior authorization period, requested units per injection, and the dosage calculation must be submitted in Section C of the Special Medical Prior Authorization (SMPA) Request Form under Statement of Medical Necessity.

### 2.1.3 Electronic Signatures in Prior Authorizations

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

## 3 Reimbursement

Clinician-administered drugs, vaccines, and biologicals are reimbursed under Texas Medicaid in accordance with 1 TAC rule §355.8085. Reimbursement for clinician-administered drugs, vaccines, and biologicals are based on the lesser of the billed amount, a percentage of the Medicare rate, or one of the following methodologies:

- If the drug or biological is considered a new drug or biological (that is, approved for marketing by the Food and Drug Administration within 12 months of implementation as a benefit of HHSC-administered programs), it may be reimbursed at an amount equal to 89.5 percent of average wholesale price (AWP).
- If the drug or biological does not meet the definition of a new drug or biological, it may be reimbursed at an amount equal to 85 percent of AWP.
- Vaccines may be reimbursed at an amount equal to 89.5 percent of AWP.
- Infusion drugs furnished through an item of implanted durable medical equipment may be reimbursed at an amount equal to 89.5 percent of AWP.
- Drugs, other than vaccines and infusion drugs, may be reimbursed at a percentage of the Medicare rate.

HHSC may use other data sources or methodologies to establish its fees for physician-administered drugs, vaccines, and biologicals when HHSC determines that the above methodologies are unreasonable or insufficient.

Texas Medicaid reimburses providers using several different reimbursement methodologies, including fee schedules, reasonable cost with interim rates, hospital reimbursement methodology, provider-specific encounter rates, reasonable charge payment methodology, and manual pricing. Each Texas Medicaid service describes the appropriate reimbursement for each service area.

**Note:** *If a client is covered by a Medicaid managed care organizations (MCO) or dental plan, providers must contact the client's MCO or dental plan for reimbursement information. The MCOs and dental plans are not required to follow the Texas Medicaid fee schedules, so there may be some differences in reimbursement based on decisions made by the individual health and dental plans.*

When services or products do not have an established reimbursement amount, the detail or claim is manually reviewed to determine an appropriate reimbursement.

Texas Medicaid (FFS and MCO) providers can bill and receive reimbursement for the unused portion of weight-based or variable dosing CADs that are only manufactured in single-dose vials. A multi-dose vial is a vial of liquid medication that is intended for parenteral administration (injection or infusion), contains more than one dose of medication, and may be used for more than one patient preparation or administration. Multi-dose vials are excluded from reimbursement under Texas Medicaid for any unused or discarded portions.

Claims will only be considered for reimbursement if an HHSC review has determined that the medication has a weight-based, variable dosing schedule or that it requires dosing adjustments for pharmacokinetic or pharmacodynamic considerations. The administration of the medication for the recommended dosing must result in a patient dose portion plus a discarded portion of a drug vial. The provider may be eligible for reimbursement up to the amount of drug or biological in accordance with the drug label.

Claims submitted for the unused portion and discarded portion of weight-based or variable dosing clinician-administered drugs (CADs) manufactured only in single-dose vials must include the modifier JW for consideration of reimbursement.

This only applies to medical claims for weight-based or variable dosing CADs billed with Healthcare Common Procedure Coding System (HCPCS) procedure codes, manufactured only in single-dose vials, and provided in a professional or outpatient setting.

Providers must use the modifier JW to identify the unused portion of the vial contents and the discarded amount of the drug or biological. Medicaid and CHIP providers must bill the JW on a separate line.

**Example:** *A single use vial labeled to contain 100 units of a drug has 95 units administered to the client and 5 units discarded. The 95-unit dose is billed on one line, while the discarded 5 units are billed on another line by using the JW modifier. Both line items are reviewed for reimbursement. The provider must record the discarded amounts of drugs and biologicals in the client's medical record.*

**Referto:** Subsection 9.1, "JW Modifier Claims Filing Instructions" in this handbook for further instructions about the JW modifier.

## 4 Injectable Medications as a Pharmacy Benefit

Some injectable drugs or biologicals are available by prescription and are reimbursable as a pharmacy benefit through the Vendor Drug Program (VDP) under Texas Medicaid.

**Referto:** Subsection 10, "Pharmacy Benefit" in this handbook for more information.

Oral medications that are given in the hospital or physician’s office are considered part of the hospital or office visit and cannot be reimbursed separately. Take-home and self-administered drugs may be a pharmacy benefit when they are provided to eligible Texas Medicaid fee-for-service clients through VDP with a valid prescription.

Providers may utilize the “white-bagging” delivery method, in which the treating provider submits prescriptions to pharmacies and the prescription is shipped or mailed to the provider’s office.

**Referto:** Subsection 11.5.1, “Pharmacy Delivery Method for Clinician-Administered Drugs” in this handbook for additional information on the “white-bagging” delivery method.

Providers must use oral medication in preference to injectable medication in the office and outpatient hospital. If an oral medication cannot be used, the KX modifier must be submitted on the claim. The following situations are acceptable reasons for the use of administering an injectable medication instead of administering an oral medication.

| Claim Form  | Reason for Injection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Modifier KX | <ul style="list-style-type: none"><li>• No acceptable oral equivalent is available.</li><li>• Injectable medication is the standard treatment of choice.</li><li>• The oral route is contraindicated.</li><li>• The client has a temperature over 102 degrees Fahrenheit (documented on the claim and in the medical record) and a high blood level of antibiotic is needed quickly.</li><li>• The client has demonstrated noncompliance with orally prescribed medication (must be documented on the claim and in the medical record).</li><li>• Previously attempted oral medication regimens have proven ineffective (must be supported by documentation in the medical record).</li><li>• Situation is emergent.</li></ul> |

The claim and the client’s medical record must include documentation of medical necessity to support the need for the service. Retrospective review may be performed to ensure that the documentation supports the medical necessity of the service and any modifier used when billing the claim.

5 National Drug Code (NDC)

The NDC is an 11-digit number on the package or container from which the medication is administered.

Some packages may display less than 11 digits. In those cases, leading zeros can be assumed and are required for billing. For example, 5678-0123-01 becomes 05678-0123-01. In another example, 78513-677-2 becomes 78513-0677-02.

**Note:** The NDCs in the examples show hyphens between the segments for easier visualization. NDCs submitted on claims should not include hyphens or spaces between the segments.

**Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (Vol. 1, General Information) for more information on NDC requirements as well as drug rebates.

5.1 Calculating Billable HCPCS and NDC Units

All drug claims must include HCPCS billing units as well as NDC billing units. HCPCS billing units are calculated by dividing the amount administered by the units found in the procedure code description. The calculated HCPCS billing unit is also needed to determine the correct NDC billing unit. NDC billing units are calculated by multiplying the HCPCS billing unit by the conversion factor. The conversion

factor is calculated by dividing the HCPCS unit (found in the code description) by the NDC unit (found on the box or packaging). See calculation examples in the following sections. Conversion factors are already computed and included on the Texas NDC-to-HCPCS Crosswalk. The NDC billing unit also requires a unit of measurement. For example, if the NDC is for a liquid medication the submitted units must be in milliliters (ML). If the NDC is for a powder form then the submitted units are Unit (UN). Other allowable NDC units are GR for gram, F2 for international unit, and ME for milligram. For all claims, the HCPCS and NDC billing units are required, along with the specific NDC and HCPCS procedure code. Claims submitted with incorrect unit calculations may cause delayed or incorrect payment.

### 5.1.1 Single-Dose Vials Calculation Examples

Below are three examples of how to calculate the HCPCS and NDC billing units using single-dose vials.

- 1) A patient receives 4 mg Zofran IV in the physician's office. The NDC of the product used is 00173-0442-02 (Zofran 2 mg/ml in solution form). There are 2 milliliters per vial. The provider should bill J2405 for ondansetron hydrochloride with 4 HCPCS units and the NDC units submitted should be 2 ML.
- 2) A patient receives 8mg of Avastin IV in the physician's office. The NDC of the product used is 50242-060-01 (Avastin 25mg/ml). The provider should bill J9035 for bevacizumab with 0.8 HCPCS unit. The NDC unit is 0.32 ML.
- 3) A patient receives 1 gm Rocephin IM in the physician's office. The NDC of the product used is 00004-1963-02 (Rocephin 500 mg vial in a powder form that is reconstituted prior to the injection). The provider should bill J0696 for ceftriaxone sodium with 4 HCPCS units. The NDC units are 2 UN because this NDC is in powder form.

|                                                                                                                | Zofran                  | Avastin                   | Rocephin                    |
|----------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------|-----------------------------|
| <b>Dose Administered to Patient</b>                                                                            | 4 mg                    | 8mg                       | 1gm = 1000mg                |
| <b>HCPCS Code and Unit found in description</b>                                                                | J2405 Per 1 mg          | J9035 Per 10 mg           | J0696 Per 250 mg            |
| <b>HCPCS CODE BILLING UNIT(s) = Dose divided by units found in HCPCS code description</b>                      | 4mg/1mg=4               | 8mg/10mg=0.8              | 1000mg/250mg=4              |
| <b>NDC Information on Vial/Box</b>                                                                             | 2mg/ml                  | 25mg/ml                   | 500mg/vial (powder form)    |
| <b>Determining Conversion Factor (CF) = HCPCS unit from code description divided by NDC unit from vial/box</b> | 1mg/2mg=0.5<br>CF = 0.5 | 10mg/25mg=0.4<br>CF = 0.4 | 250mg/500mg=0.5<br>CF = 0.5 |
| <b>NDC BILLING UNIT(s) = HCPCS Units x CF</b>                                                                  | 4 x 0.5 = 2 ML          | 0.8 x 0.4 = 0.32 ML       | 4 x 0.5 = 2 UN              |
| <b>Quantity Information Required on Claim (HCPCS and NDC)</b>                                                  | 4 and 2 ML              | 0.8 and 0.32 ML           | 4 and 2 UN                  |

### 5.1.2 Multi-Dose Vials Calculation Examples

Below is an example of calculating the correct billing units for a drug administered from a multi-dose vial. Calculations for multi-dose vials differ from those for single-dose vials.

A patient receives 8 mg Dexamethasone in the physician's office. A 20 mg multi-dose vial is used. The NDC of the product used is 63323-0165-05 (Dexamethasone 20 MG/5 ml Vial). The provider should bill J1100 for dexamethasone with 8 HCPCS units and the NDC units submitted should be 2 ML. There are 12mg (3 ml) remaining in the vial.

| Multi-Dose Calculation Examples for Dexamethasone                      |                    |
|------------------------------------------------------------------------|--------------------|
| Dose Administered to Patient                                           | 8 mg               |
| HCPCS Code and Given Unit                                              | J1100 Per 8 mg     |
| HCPCS CODE BILLING UNIT(s) = Dose divided by units found in HCPCS code | 8mg/1mg = 8        |
| NDC Information on Vial/Box                                            | 20mg/5ml = 4mg/1ml |
| NDC BILLING UNIT(s) = Dose divided by NDC unit from vial/box           | 8/4 = 2            |
| Quantity Information Required on Claim (HCPCS and NDC)                 | 8 and 2 ML         |

### 5.1.3 Single and Multi-Use Vials

A single-dose (or single-use) vial of medication intended for administration through injection or infusion contains a single dose of medication. A multi-dose (or multi-use) vial of medication intended for administration through injection or infusion contains more than one dose of medication.

Many drugs have recommended doses that are based on factors such as height, weight, and initial tolerance for the drug. It is important to clearly document how the dosage is calculated so those who review the patient health record can verify the dosage amount when reviewing the claim.

Other resources on clinician-administered drugs may be found online by visiting the TMHP, CDC and CMS websites.

### 5.1.4 Nonspecific, Unlisted, or Miscellaneous Procedure Codes

Drugs or biologicals that do not have a unique CPT or HCPCS procedure code must be billed using a nonspecific, unlisted, unclassified, or miscellaneous procedure code. All claims for nonspecific, unlisted, unclassified, or miscellaneous procedure codes are processed manually and must be submitted on paper with accompanying documentation. The billing provider must include the following required documentation:

- The name and NDC number of the drug administered.
- The quantity of the drug administered, the amount discarded (if applicable for reimbursement), and the units of measurement.
- A brief description of the recipient's condition(s) that supports the medical need for the drug.
- One of the following pricing information sources:
  - The manufacturer's average wholesale price (AWP)
  - A copy of the invoice for the drug

The claim and attached information will suspend for manual review to determine whether the drug is clinically appropriate based on the information provided and to price the claim using the information provided. Miscellaneous drug or biological procedure codes are reimbursed a percentage of the average wholesale price (AWP). HHSC reserves the option to use other data sources to determine Texas Medicaid fees for drugs when AWP calculations are determined to be unreasonable or insufficient.

The claim will be denied when:

- The information is not sufficient to determine medical necessity.

- The pricing information is insufficient for pricing the claim.
- There is a more appropriate billing procedure code for the drug or biological.
- The NDC and HCPCs (if applicable) codes are missing.

Providers are responsible for administering drugs based on the U.S. Food and Drug Administration (FDA)-approved guidelines.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

Some injectable medications require prior authorization, which is a condition for reimbursement; it is not a guarantee of payment. To avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the service requested. The physician must maintain documentation of medical necessity in the client's medical record. Providers may fax or mail prior authorization requests, including all required documentation, to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization Department  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418  
Fax: 1-512-514-4213

The following injections in the table below are benefits of Texas Medicaid but are subject to the indicated limitations. Those with an asterisk have more information and can be found listed after the table.

## 6 Outpatient Drugs—Benefits and Limitations

The clinician administered drugs identified throughout this handbook are benefits of Texas Medicaid, but are subject to the indicated limitations.

Clinician administered drugs may be considered for reimbursement in the home, office, or outpatient hospital settings. Certain procedure codes may be restricted for place of service and provider types. Providers should verify the restrictions for specific procedure codes of injectable or infused medications prior to rendering services.

### 6.1 Abatacept (Orencia)

Abatacept (Orencia) (procedure code J0129) is a selective T-cell costimulation modulator that is indicated for the following:

- Moderate to severe rheumatoid arthritis in adult clients. Concomitant use of abatacept with other immunosuppressives [e.g., biologic disease modifying antirheumatic drugs (bDMARDs), Janus kinase (JAK) inhibitors] is not recommended. Concomitant use with a Tumor necrosis factor (TNF) antagonist can increase the risk of infections and serious infections.
- Moderate to severe juvenile arthritis in adult and pediatric clients who are 2 years of age or older (clients who are 2 years of age or older may receive subcutaneous formulation and clients who are 6 years of age or older may receive intravenous formulation). Abatacept may be used as monotherapy or concomitantly with methotrexate.
- Psoriatic arthritis in clients who are 2 years of age or older.
- The prophylaxis of acute graft versus host disease (aGVHD), in combination with a calcineurin inhibitor and methotrexate, in adults and pediatric clients who are 2 years of age or older undergoing hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated donor.

### 6.1.1 Prior Authorization for Abatacept (Orencia)

Prior authorization may be given for an initial six months for eight doses. Prior authorization for an initial request for abatacept injections will be considered when all of the following criteria are met:

- Dates of treatment
- The number of anticipated doses
- The dosage to be administered
- Diagnosis of adult RA, juvenile idiopathic arthritis (JIA), adult psoriatic arthritis (PsA), or as prophylaxis of acute graft versus host disease (aGVHD)

A diagnosis of RA in an adult client must conform to the American College of Rheumatology (ACR) RA classification that requires the following:

- Presence of synovitis in at least one joint
- Absence of an alternative diagnosis to explain the synovitis
- Abatacept will not be used in combination with another biologic agent
- A combined score of at least six out of ten on the level of involved joints, abnormality, and symptom duration from the individual scores in four domains:
  - The number and sites of involved joints
  - Serologic abnormality
  - Elevated acute-phase response
  - Symptom duration

Prior authorization for moderate to severe Juvenile Idiopathic Arthritis (JIA) will be considered when the following criteria are met:

- The client is an adult or pediatric client who is 2 years of age or older.
- Clients who are 2 years of age or older may receive subcutaneous formulation, and clients who are 6 years of age or older may receive intravenous formulation.
- Abatacept (Orencia) may be used as monotherapy or concomitantly with methotrexate.

Prior authorization for adult Psoriatic Arthritis (PsA) will be considered when the following criteria are met:

- The client is 2 years of age or older.
- Abatacept (Orencia) will not be used in combination with another biologic agent.

Prior authorization for prophylaxis acute graft versus host disease will be considered when the following criteria are met:

- The client is 2 years of age or older.
- Abatacept should be used in combination with a calcineurin inhibitor and methotrexate.
- The client is undergoing hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated-donor.

Screening for latent tuberculosis (TB) infection and viral hepatitis should be carried out prior to therapy initiation.

Prior authorization for subsequent dosing may be given when documentation supports medical necessity for continued treatment with abatacept. Prior authorization for a subsequent request must include all of the following:

- Documentation from the physician stating that there has been at least an improvement
- The number of anticipated doses
- The dosage to be administered

The documentation of medical necessity must be maintained by the requesting provider in the client's medical record and is subject to retrospective review.

## 6.2 Adalimumab

Adalimumab is a benefit when billed with one of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| J0139           | Q5140 | Q5141 | Q5142 | Q5143 | Q5144 | Q5145 |  |  |  |

Procedure codes Q5141, Q5142, and Q5144 are restricted to clients who are 2 years of age or older.

Procedure codes Q5140, Q5143, and Q5145 are restricted to clients who are 4 years of age or older.

The procedure codes in the table above may be reimbursed when billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| K5000           | K50011 | K50012 | K50013 | K50014 | K50018 | K5010  | K50111 |
| K50112          | K50113 | K50114 | K50118 | K5080  | K50811 | K50812 | K50813 |

| M45A8           | M45AB  | M488X1 | M488X2 | M488X3 | M488X4 | M488X5 | M488X6 |
| M488X7          | M488X8 | M488X9 |        |        |        |        |        |

### 6.3 Ado-trastuzumab entansine (Kadcyla)

Ado-trastuzumab emtansine (Kadcyla), procedure code J9354, is a benefit of Texas Medicaid for clients of any age when all of the following indications are present:

- Individuals have a diagnosis of HER2 positive metastatic breast cancer
- Individuals have previously received trastuzumab and a taxane separately or in combination, and have either:
  - Received prior therapy for metastatic disease
  - Experienced disease reoccurrence during or within six months of completing adjuvant therapy

Documentation must be maintained by the treating physician in the client's medical record to support administration of Ado-trastuzumab emtansine (Kadcyla). Prior authorization is not required for ado-trastuzumab emtansine (Kadcyla).

At initiation of treatment, documentation must include all of the following:

- Evidence of HER2 positive breast cancer as evidenced by immunochemistry (IHC) test or fluorescent in situ hybridization (FISH) test
- Evidence of metastatic breast cancer
- Evidence demonstrating prior treatment for this diagnosis with trastuzumab and a taxane oncology agent separately or in combination

- Evidence demonstrating receipt of prior therapy for this diagnosis or recurrent disease, including the previous treatment protocol, within six months of completing adjuvant therapy.

**6.4 Afamelanotide Implant (Scenesse)**

Afamelanotide implant (Scenesse) (procedure code J7352) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to diagnosis code E800.

**6.5 Afamitresgene autoleucel (Tecelra)**

Afamitresgene autoleucel (Tecelra) is a melanoma-associated antigen A4 (MAGE-A4)-directed genetically modified autologous T cell immunotherapy indicated to treat adult clients with unresectable or metastatic synovial sarcoma who have received prior chemotherapy, are HLA-A\*02:01P, HLA-A\*02:02P, HLA-A\*02:03P, or HLA-A\*02:06P positive and whose tumor expresses the MAGE-A4 antigen as determined by FDA-approved or cleared companion diagnostic devices.

Afamitresgene autoleucel (Tecelra) (procedure code Q2057) is a benefit of Texas Medicaid with prior authorization.

**6.5.1 Prior Authorization Requirements**

Afamitresgene autoleucel (Tecelra) is administered as a single intravenous infusion and is indicated to treat clients who meet all the following requirements:

- The client is 18 years of age or older.
- The client has a diagnosis of unresectable or metastatic synovial sarcoma with one of the following diagnosis codes:

| Diagnosis Codes |      |       |       |       |       |       |       |
|-----------------|------|-------|-------|-------|-------|-------|-------|
| C380            | C381 | C382  | C383  | C384  | C388  | C481  | C482  |
| C488            | C490 | C4910 | C4911 | C4912 | C4920 | C4921 | C4922 |
| C493            | C494 | C495  | C496  | C498  | C499  |       |       |

- The client’s tumor is positive for human leukocyte antigen HLA-A\*02:01P, HLA-A\*02:02P, HLA-A\*02:03P, or HLA-A\*02:06P.
- The client’s tumor expresses the MAGE-A4 antigen (as determined by an FDA-approved or cleared companion diagnostic device).
- The client is not heterozygous or homozygous for HLA-A\*02:05P.
- The client has experienced disease progression following at least one or more prior systemic chemotherapy.
- The client has not received prior treatment with CAR-T therapy.
- The client has not had a prior hematopoietic stem cell transplant (HSCT).
- The client does not have any active or clinically significant infections and/or inflammatory disorders.

Afamitresgene autoleucel (Tecelra) (procedure code Q2057) is limited to one transfusion treatment per lifetime.

Monitoring parameters for Afamitresgene autoleucel (Tecelra) are as follows:

- Monitor for signs and symptoms of cytokine release syndrome (CRS) for at least 7 days following afamitresgene autoleucel (Tecelra) treatment with continued monitoring for at least 4 weeks.

- Monitor for signs and symptoms of immune effector cell-associated neurotoxicity syndrome (ICANS) for at least 7 days following afamitresgene autoleucel (Tecelra) treatment with continued monitoring for at least 4 weeks.

### **6.5.2 Documentation Requirements**

In addition to documentation requirements outlined in the Prior Authorization Requirements section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

## **6.6 Ajovy (Fremanezumab-vfrm)**

Ajovy (fremanezumab-vfrm) (procedure code J3031) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## **6.7 Alzheimer's Disease (AD)**

Donanemab-azbt (Kisunla) (procedure code J0175) and lecanemab-irmb (Leqembi) (procedure code J0174) are benefits of Texas Medicaid for clients with prior authorization. Procedure codes J0174 and J0175 are limited to diagnosis codes G300, G301, G308, or G309.

Donanemab-azbt (Kisunla) and lecanemab-irmb (Leqembi) are amyloid beta-directed antibodies indicated to treat Alzheimer's disease (AD) by reducing amyloid-beta plaques in clients with mild cognitive impairment (MCI) or mild dementia stage of disease.

This clinical prior authorization applies to Medicaid clients only. Dual eligible clients must follow the Medicare National Coverage Determination policy guidelines for monoclonal antibodies directed against amyloid for the treatment of Alzheimer's disease.

### **6.7.1 Prior Authorization**

#### **Initial Requests**

Initial therapy for donanemab-azbt (Kisunla) or lecanemab-irmb (Leqembi) may be approved for a 6-month duration if all the following criteria are met:

- Client has a confirmed diagnosis of Alzheimer's disease (G300, G301, G308, or G309).
- Prescriber attestation that other forms of dementia except Alzheimer's disease have been ruled out by appropriate lab and/or other diagnostic testing.
- Prescriber's confirmation of amyloid beta-plaques presence.
- Clinical testing must confirm client has mild cognitive impairment caused by Alzheimer's disease or mild stage of Alzheimer's disease.
- Documentation that client has received a baseline brain-magnetic resonance imaging (MRI) prior to initiating treatment (within the past year) to evaluate for pre-existing Amyloid Related Imaging Abnormalities (ARIA).
- The prescriber attests to having tested for ApoE ε4 status and counsel ApoE ε4 homozygotes clients on higher incidence of developing ARIA prior to initiation of treatment.
- The following are the monitoring requirements during the donanemab-azbt (Kisunla) treatment period:
  - Prescriber must ensure the client is not currently taking any anti-coagulant (except for aspirin at a prophylactic dose or less) or have a history of clotting disorder.
  - Prescriber must monitor for ARIA during the first 24 weeks of treatment.

- Prescriber attestation to obtain a brain MRI prior to the 2nd, 3rd, 4th, and 7th infusion to check for asymptomatic ARIA.
- Clients with severe amyloid-related imaging abnormalities-hemosiderin deposition (ARIA-H) may continue therapy only if radiographic stabilization has been confirmed by a follow-up brain MRI and supported by clinical evaluation.

The following are the monitoring requirements during the lecanemab-irmb (Leqembi) treatment period:

- Prescriber must monitor for ARIA during the first 14 weeks of treatment.
- Prescriber attestation to obtain a brain MRI prior to the 5th, 7th, and 14th infusion to check for ARIA.
- Clients with severe ARIA-H may continue therapy only if radiographic stabilization has been confirmed by a follow-up brain MRI and supported by clinical evaluation.

### Re-certification/Extension

For renewal or continuation therapy of donanemab-azbt (Kisunla) or lecanemab-irmb (Leqembi), the client must meet the following requirements:

- Client continues to meet all the initial authorization approval criteria.
- Client has not progressed to moderate or severe dementia caused by Alzheimer's disease.
- Client experienced positive clinical response to therapy as demonstrated by no increase in amyloid plaque or radiographic stabilization as compared to baseline.
- Documentation of a brain MRI prior to the 2nd, 3rd, 4th, and 7th infusion to check for ARIA with donanemab-azbt (Kisunla) treatment.
- Documentation of brain MRI prior to the 5th, 7th, and 14th infusion to check for ARIA with lecanemab-irmb (Leqembi) treatment.
- Client has not experienced any complications or unacceptable toxicities during donanemab-azbt (Kisunla) or lecanemab-irmb (Leqembi) treatment.

## 6.8 Amisulpride (Barhemsys)

Amisulpride (procedure code J0184) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.9 Antibiotics and Steroids

Injectable antibiotic or steroid medications may be considered for reimbursement even if the same oral medications are appropriate and available. Injected antibiotics or steroid medications, when used in place of oral medications, require the use of the modifier KX.

Physicians billing for injectable antibiotic and steroid medications must indicate the appropriate modifiers with the appropriate injection code and quantity.

| Modifier | Use                   |
|----------|-----------------------|
| AT       | For acute conditions* |

| Modifier | Use                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| KX       | <p>To indicate any of the following:</p> <ul style="list-style-type: none"><li>• Oral route contraindicated or an acceptable oral equivalent is not available.</li><li>• Injectable medication is the accepted treatment of choice. Oral medication regimen has proven ineffective or is not applicable.</li><li>• The patient has a temperature over 102 degrees and a high level of antibiotic is needed immediately.</li><li>• Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare-up of a chronic condition.</li></ul> |

If a steroid medication is injected into joints, bursae, tendon sheaths, or trigger points, modifier AT must be used to indicate an acute condition. When performed for a chronic condition, these procedures are denied.

6.10 Antineoplastic (Oncology) Agents

6.10.1 Amivantamab-vmjw (Rybervant)

Amivantamab-vmjw (procedure code J9061) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.2 Cemiplimab-rwlc (Libtayo)

Cemiplimab-rwlc (procedure code J9119) is a benefit for clients who are 18 years of age and older.

6.10.3 Daratumumab and Hyaluronidase-fihj (Darzalex Faspro)

Daratumumab and hyaluronidase-fihj (procedure code J9144) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.4 Degarelix (Firmagon)

Degarelix injection (procedure code J9155) is a benefit when billed with diagnosis codes C61, C7982, D400.

*Referto:* Subsection 6.62, “Hormonal Therapy Agents” in this handbook for additional information.

6.10.5 Dostarlimab-gxly (Jemperli)

Dostarlimab-gxly (procedure code J9272) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.6 Enfortumab Vedotin-ejfv (Padcev)

Enfortumab vedotin-ejfv (procedure code J9177) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.7 Hydroxyprogesterone Caproate

Hydroxyprogesterone caproate (procedure code J1729) is a benefit and restricted to clients who are nonpregnant women when billed with the following diagnosis codes:

| Diagnosis Codes |      |      |      |      |      |      |  |
|-----------------|------|------|------|------|------|------|--|
| C541            | N897 | N910 | N911 | N912 | N925 | N938 |  |

**6.10.8 Isatuximab-irfc (Sarclisa)**

Isatuximab-irfc (procedure code J9227) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.9 Loncastuximab Tesirine-lpyl (Zynlonta)**

Loncastuximab tesirine-lpyl (procedure code J9359) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.10 Lurbinectedin (Zepzelca)**

Lurbinectedin (procedure code J9223) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.11 Margetuximab-cmkb (Margenza)**

Margetuximab-cmkb (procedure code J9353) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.12 Melphalan (Evomela)**

Melphalan (procedure codes J9245 and J9246) are a benefit when billed with diagnosis codes C9000, C9001, and C9002.

**6.10.13 Mitomycin for Pyelocalyceal Solution (Jelmyto)**

Mitomycin for pyelocalyceal solution (procedure code J9281) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.14 Naxitamab-gqgk (Danyelza)**

Naxitamab-gqgk (procedure code J9348) is a benefit of Texas Medicaid for clients who are 1 year of age or older.

**6.10.15 Polatuzumab vedotin (Polivy)**

Polatuzumab vedotin (procedure code J9309) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.16 Sacituzumab govitecan-hziy (Trodelvy)**

Sacituzumab govitecan-hziy (procedure code J9317) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.17 Tafasitamab-cxix (Monjuvi)**

Tafasitamab-cxix (procedure code J9349) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.10.18 Tisotumab Vedotin-tftv (Tivdak)**

Tisotumab Vedotin-tftv (procedure code J9273) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.11 Antisense Oligonucleotides (etepirsen, golodirsen, and nusinersen)**

Antisense oligonucleotides, casimersen (Amondys 45) (procedure code J1426), etepirsen (Exondys 51) (procedure code J1428), golodirsen (Vyondys 53) (procedure code J1429), nusinersen (Spinraza) (procedure code J2326), tofersen (Qalsody) (procedure code J1304), or viltolarsen (Viltepso) (procedure code J1427) may be benefits of Texas Medicaid with prior authorization.

An antisense oligonucleotide is a synthetic single stranded nucleic acid that binds to RNA and thereby alters or reduces expression of the target RNA. This may result in an improvement in physical function.

### 6.11.1 Prior Authorization Requirements

Prior authorization requests for procedure codes J1304, J1426, J1427, J1428, J1429, and J2326 must be submitted by the prescribing provider to the Special Medical Prior Authorization (SMPA) department at TMHP using the Special Medical Prior Authorization (SMPA) Request Form.

Prior authorization is not required for physician services associated with the administration of casimersen, eteplirsen, golodirsen, nusinersen, tofersen, or viltolarsen. Physician services include the procedural costs and the associated supplies for the administration of the medication.

For situations in which procedure code J1304, J1426, J1427, J1428, J1429, or J2326 are being dispensed by a pharmacy via white bagging, the prescribing provider must provide the dispensing durable medical equipment (DME) pharmacy the authorization approval number.

The dispensing DME pharmacy may not request prior authorization.

The DME pharmacy provider billing for nusinersen (Spinraza) (procedure code J2326) will be responsible for coordinating with the rendering provider to obtain the prior authorization request approval number.

The requesting provider (physician or hospital) may coordinate with the DME Pharmacy provider for the initial or recertification prior authorization request for the specific oligonucleotide. DME Pharmacy providers may assist in providing necessary information such as their National Provider Identifier (NPI) number, fax number, and business address to the requesting provider. However, the Special Medical Prior Authorization (SMPA) form must be signed and dated and submitted by the Medicaid-enrolled requesting provider, not the DME Pharmacy provider.

The dispensing pharmacy must submit the authorization approval number when billing for the drug. Reimbursement for dispensing of the drug by the pharmacy may not occur unless an approved prior authorization for the specific oligonucleotide is in place.

**Note:** For additional information on white bag delivery, providers may refer to Subsection 11.5.1, “Pharmacy Delivery Method for Clinician-Administered Drugs” in this handbook.

Documentation of the client’s dosage, administration schedule, the number of injections to be administered during the prior authorization period, the requested units per injection, and the dosage calculation must be submitted in Section C of the SMPA Request Form under Statement of Medical Necessity. When the FDA approves dosing guidelines that require a weight based calculation, the client’s current weight must be included.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

#### 6.11.1.1 Initial Requests (for all Antisense Oligonucleotides)

Initial prior authorization requests for all antisense oligonucleotides will be considered by Medical Director Review for a six month period. The initial request must include documentation supporting medical necessity for the requested antisense oligonucleotide in addition to the SMPA request form completed, signed, and dated by the prescribing provider.

Documentation supporting medical necessity for an initial prior authorization for all requested antisense oligonucleotides must include the following information:

- A diagnosis specific to the requested antisense oligonucleotide
- Genetic testing specific to the requested antisense oligonucleotide
- Documentation of baseline physical function. Testing tools used to measure physical function must be age appropriate for the client being tested.

- Documentation of the requested antisense oligonucleotide dosage and administration schedule, including the number of injections to be administered during the prior authorization period, the requested units per injection, and the dosage calculation. This information must be submitted in Section C of the SMPA request form under Statement of Medical Necessity.

Each antisense oligonucleotide has specific clinical indications and unique documentation requirements.

The initial request for casimersen (Amondys 45) must include the following documentation to support medical necessity for casimersen.

- Genetic testing must confirm that the client's Duchenne muscular dystrophy (DMD) gene is amenable to exon 45 skipping (diagnosis code G7101).
- Serum cystatin C, urine dipstick, and urine protein-to-creatinine ratio should be measured prior to initiating Amondys 45.
- Monitor baseline renal function (i.e. Glomerulus Filtration Rate, GFR) with therapy initiation and continuation.
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Baseline 6MWT (6-minute walk test)
- BrookeUpperExtremity Scale
- North Star Ambulatory Assessment

Amondys 45 should not be used concomitantly with other exon skipping therapies for DMD.

The initial request for eteplirsen (Exondys 51) must include the following documentation to support medical necessity for eteplirsen:

- Genetic testing must confirm that the client's DMD gene is amenable to exon 51 skipping (diagnosis code G7101).
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Brooke Upper Extremity Scale
- Baseline 6-minute walk test (6MWT)
- Pediatric Evaluation of Disability Inventory

Exondys 51 should not be used concomitantly with other exon skipping therapies for DMD.

The initial request for golodirsen (Vyondys 53) must include the following documentation to support medical necessity for golodirsen:

- Genetic testing must confirm that the client's Duchenne muscular dystrophy (DMD) gene is amenable to exon 53 skipping (diagnosis code G7101).
- Baseline renal function test (i.e. Glomerulus Filtration Rate, GFR) with therapy initiation and continuation.
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.
- Baseline function testing documented in patient chart or electronic health record.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Brooke Upper Extremity Scale
- Baseline 6MWT (6-minute walk test)
- Pediatric Evaluation of Disability Inventory

Vyondys 53 should not be used concomitantly with other exon skipping therapies for DMD.

The initial request for nusinersen (Spinraza) must include the following documentation to support medical necessity for nusinersen:

- Genetic testing must confirm biallelic pathogenic variants in the client's survival motor neuron 1 (SMN1) gene (diagnosis codes G120, G121, G128, and G129).
- Baseline pulmonary status, including any requirements for invasive or non-invasive ventilation

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- The Hammersmith Infant Neurological Exam (HINE).
- The Hammersmith Functional Motor Scale Expanded (HFMSE).
- The Upper Limb Module (UML).
- Baseline 6MWT.
- Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP-INTEND).

The initial request for tofersen (Qalsody) must include the following documentation:

- The client is 18 years of age or older.
- Diagnostic testing confirming client has amyotrophic lateral sclerosis (ALS) (diagnosis code G1221).
- Genetic testing must confirm there is the presence of a mutation in the superoxide dismutase1 (SOD1) gene.
- Documentation of baseline measure of the plasma neurofilament light chain (NfL).
- Documentation of baseline functional ability (e.g., climbing stairs, walking, and speech) prior to treatment initiation.

The initial request for viltolarsen (Viltepso) must include the following documentation:

- Genetic testing must confirm that the client's Duchenne muscular dystrophy (DMD) gene is amenable to exon 53 skipping (diagnosis code G7101).
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.
- Baseline renal function test (i.e. Glomerulus Filtration Rate) and urine protein-to-creatinine ratio should be measured before starting treatment.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Brooke Upper Extremity Scale
- Baseline 6MWT (6-minute walk test)
- Pediatric Evaluation of Disability Inventory

Viltepso should not be used concomitantly with other exon skipping therapies for DMD.

### **6.11.1.2 Recertification/Extension Requests (for all Antisense Oligonucleotides)**

Recertification/extension prior authorization requests for antisense oligonucleotides, excluding nusinersen (Spinraza), will be considered by Medical Director Review for additional six month periods. Recertification/extension prior authorization requests for nusinersen (Spinraza) will be considered by Medical Director Review for additional 12-month periods. All recertification/extension requests must include documentation supporting the ongoing medical necessity for the requested antisense oligonucleotide in addition to a new SMPA request form completed, signed, and dated by the prescribing provider.

A complete recertification/extension request must be received no earlier than 30 days before the current authorization period expires. Requests for recertification/extension of prior authorization received after the current prior authorization expires will be denied for dates of service that occurred before the date the request is received.

Documentation supporting a recertification/extension prior authorization for all requested antisense oligonucleotide must include the following:

- A diagnosis specific to the requested antisense oligonucleotide
- Current documentation of physical function
- Testing tools used to measure physical function must be age appropriate for the client being tested. Providers must use the same testing instrument as used in the initial evaluation. If re-use of the initial testing instrument is not appropriate, for example, due to change in client status or restricted age range of the testing tool, the provider must explain the reason for the change.
- The physical function testing tool results must include one of the following:
  - An increase in physical function from baseline has been observed
  - Baseline physical function has been maintained
- Statement from prescribing clinician that the client has been compliant with the treatment
- Documentation of the requested antisense oligonucleotide dosage and administration schedule, including the number of injections to be administered during the prior authorization period, the requested units per injection, and the dosage calculation must be submitted in Section C of the Special Medical Prior Authorization (SMPA) Request Form under Statement of Medical Necessity.

The medical necessity documentation for eteplirsen (Exondys 51) recertification/extension requests must include the client's current weight the date on which the weight was obtained. The weight must be dated no more than 30 days before the request date.

The medical necessity documentation for casimersen, golodirsen and viltolarsen recertification/extension requests must include the client's continual renal function test while on therapy and current client weight, including the date the weight was obtained. The weight must be dated no more than 30 days before the request date.

The medical necessity documentation for nusinersen (Spinraza) recertification/extension requests must include the client's pulmonary status, including any requirements for invasive or non-invasive ventilation. Any changes in pulmonary status that have occurred since the previous prior authorization request must be addressed.

The medical necessity documentation for tofersen (Qalsody) recertification/extension requests must include the following:

- The client has met all initial authorization approval criteria at the time of initial approval.
- The client has responded positively to therapy as evident by any improvement in the plasma neurofilament light chain (NfL) measurement as compared to baseline.

- Documentation that client has stabilization in disease state and has shown a slowed pattern in disease progression.
- Absence of unacceptable toxicities (aseptic meningitis, serious myelitis and/or radiculitis, papilledema, and elevated cranial pressure) from tofersen therapy.

#### **6.11.1.3 Exclusions**

Casimersen (Amondys 45), Eteplirsen (Exondys 51), Golodirsen (Vyondys 53), nusinersen (Spinraza), tofersen (Qalsody), and viltolarsen (Viltepso) should not be continued on clients who experience decreasing physical function while on the medication.

Casimersen (Amondys 45), Eteplirsen (Exondys 51) and Golodirsen (Vyondys 53) should not be used concomitantly or with other exon skipping therapies for DMD.

Nusinersen (Spinraza) is not a continuing benefit for clients with decreasing pulmonary function while on the medication.

### **6.12 Aripiprazole (Abilify Asimtufii)**

Aripiprazole (Abilify asimtufii) (procedure code J0402) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### **6.13 Aripiprazole Lauroxil, (Aristada Initio)**

Aripiprazole lauroxil (procedure codes J1943 and J1944) are benefits of Texas Medicaid for clients who are 18 years of age or older.

### **6.14 Asparagine Specific Enzymes**

#### **6.14.1 Calaspargase Pegol-Mknl (Asparlas)**

Calaspargase pegol-mknl (procedure code J9118) is a benefit of Texas Medicaid for clients who are birth through 21 years of age.

Procedure code J9118 is limited to diagnosis codes C9100, C9101, and C9102.

#### **6.14.2 Pegaspargase (Oncaspar)**

Pegaspargase injection (procedure code J9266) is a benefit of Texas Medicaid when billed with diagnosis codes C9100, C9101, or C9102.

### **6.15 Atidarsagene Autotemcel (Lenmeldy)**

Atidarsagene Autotemcel (Lenmeldy) (procedure code J3391) is a benefit of Texas Medicaid with prior authorization.

Atidarsagene Autotemcel (Lenmeldy) is an autologous hematopoietic stem cell-based gene therapy indicated for the treatment of clients with pre-symptomatic late infantile (PSLI), pre-symptomatic early juvenile (PSEJ), or early symptomatic early juvenile (ESEJ) metachromatic leukodystrophy.

#### **6.15.1 Prior Authorization Requirements**

Atidarsagene Autotemcel (Lenmeldy) is a once per lifetime infusion therapy indicated for the treatment of a client for whom hematopoietic stem cell therapy (HSCT) is appropriate and must meet all the following requirements:

- The client is 7 years of age or younger or the client is between 7 years and 17 years of age with the onset of symptoms before 7 years of age.
- The client has a documented biochemical and molecular diagnosis of one of the following forms of metachromatic leukodystrophy (MLD) (diagnosis code E7525):

- Pre-symptomatic late infantile
- Pre-symptomatic early juvenile (PSEJ)
- Early symptomatic early juvenile
- The client has an MLD diagnosis that is confirmed by:
  - Biochemical testing indicating Arylsulfatase A (ARSA) activity below the normal range.
  - Genetic testing confirming two disease causing ARSA alleles.
  - If ARSA mutations are present, a 24-hour urine collection showing elevated sulfatide levels.
- The client is a candidate for and has not previously received HSCT.
- The client will not take prophylactic human immunodeficiency virus (HIV) anti-retroviral medications for at least one month prior to mobilization or for the expected duration of time needed for the elimination of medications.

The required monitoring parameters following atidarsagene autotemcel (Lenmeldy) are:

- Monitor for signs and symptoms of encephalitis, thrombocytopenia and/or serious infection after atidarsagene autotemcel (Lenmeldy) infusion.
- Monitor for signs and symptoms of veno-occlusive disease including liver function tests during the first month post atidarsagene autotemcel (Lenmeldy) infusion.
- Monitor life-long for hematologic malignancies, including a complete blood count (with differential) annually and integration site analysis, as warranted, for at least 15 years after treatment.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

## 6.16 Axatilimab-csfr (Niktimvo)

Axatilimab-csfr (Niktimvo) (procedure code J9038) is a benefit of Texas Medicaid with prior authorization.

Axatilimab-csfr (Niktimvo) is a colony stimulating factor-1 receptor (CSF-1R)-blocking antibody indicated for the treatment of chronic graft-versus-host disease (cGVHD) after failure of at least two prior lines of systemic therapy in adult and pediatric clients weighing at least 40 kilograms.

### 6.16.1 Prior Authorization Requirements

Axatilimab-csfr (Niktimvo) is an intravenous infusion indicated for clients who meet the following requirements:

- The client weighs at least 40 kg (88 pounds).
- The client has a confirmed diagnosis of cGVHD (diagnosis codes D89811 and D89812).
- The client has undergone allogenic stem cell transplantation.
- The client has previously had at least two failed systemic therapies for cGVHD.
- The prescribing provider attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment of axatilimab-csfr (Niktimvo) and for 30 days after the last dose of therapy.

Clients who are taking axatilimab-csfr (Niktimvo) must be monitored prior to starting axatilimab-csfr (Niktimvo) therapy, every two weeks for the first month of axatilimab-csfr (Niktimvo) therapy, and one to two months after completing axatilimab-csfr (Niktimvo) therapy. Clients will be monitored for aspartate aminotransferase (AST), alanine aminotransferase (ALT), alkaline phosphatase (ALP), creatine phosphokinase (CPK), amylase, and lipase.

For continuation therapy, the client must meet the following requirements:

- The client must meet the initial requirements for prior authorization.
- The client must be undergoing treatment with axatilimab-csfr (Niktimvo) with the absence of unacceptable toxicity (e.g., severe infusion-related reactions).
- The client must experience a positive clinical response to therapy.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

6.17 Azacitidine (Vidaza)

Procedure code J9025 is a benefit when billed with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C9200           | C9202 | C9210 | C9212 | C9220 | C9222 | C9232 | C9242 |
| C9252           | C9262 | C9290 | C9292 | C92A2 | C92Z2 | C9310 | C9312 |
| C9330           | C9332 | C9502 | C9510 | C9512 | C9592 | D460  | D461  |
| D4620           | D4621 | D4622 | D464  | D469  | D46A  | D46B  | D46C  |
| D46Z            | D640  | D641  | D642  | D643  |       |       |       |

6.18 Beremagene geperpavec-svdt (Vyjuvek)

Beremagene geperpavec-svdt (Vyjuvek) is a herpes-simplex virus type 1 (HSV-1) vector-based gene therapy indicated to treat wounds in patients who are 6 months of age or older with dystrophic epidermolysis bullosa (DEB) with mutation in the collagen type VII alpha 1 chain (COL7A1) gene.

Beremagene geperpavec-svdt (Vyjuvek) (procedure code J3401) is a benefit of Texas Medicaid for clients who are 6 months of age or older with prior authorization and restricted to diagnosis code Q812.

6.18.1 Prior Authorization Requirements

Prior authorization is required for beremagene geperpavec-svdt (Vyjuvek) therapy and must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

Initial therapy for beremagene geperpavec-svdt (Vyjuvek) may be approved for a 6-month duration if all the following criteria are met:

- The client is at least 6 months of age or older.
- The client has a confirmed diagnosis of DEB (diagnosis code Q812).
- Genetic test confirming client has a mutation in the collagen type VII alpha 1 chain (COL7A1) gene.
- The client does not have current evidence or history of squamous cell carcinoma or active infection in the area requiring beremagene geperpavec-svdt (Vyjuvek) application.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment with beremagene geperpavec-svdt (Vyjuvek).

For renewal or continuation of beremagene geperpavec-svdt (Vyjuvek) therapy, the client must meet the following requirements:

- The client continues to meet all the initial requirements for prior authorization and is currently treated with beremagene geperpavec-svdt (Vyjuvek) with no severe adverse reactions.
- The client has experienced positive clinical response to therapy as documented by any of the following:
  - Reduction in the number of wounds, decrease in wound size, increase in granulation tissue, and/or complete wound closure.
  - The client has not experienced any complications while being treated with beremagene geperpavec-svdt (Vyjuvek).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

**Referto:** Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

## 6.19 Betibeglogene Autotemcel (Zynteglo)

Betibeglogene autotemcel (Zynteglo) (procedure code J3393) is a benefit of Texas Medicaid for clients who are 4 years of age or older with prior authorization. Prior authorization may be approved for a duration of 12 months.

Betibeglogene autotemcel (Zynteglo) is an autologous hematopoietic stem cell-based gene therapy indicated for treating adult and pediatric clients with  $\beta$ -thalassemia who require regular red blood cell (RBC) transfusions.

Betibeglogene autotemcel (Zynteglo) (procedure code J3393) is limited to one transfusion treatment per lifetime and may be infused as a single infusion in one or more infusion bags.

### 6.19.1 Prior Authorization Requirements

Betibeglogene autotemcel (Zynteglo) is a one-time infusion therapy indicated for the treatment of clients with  $\beta$ -thalassemia who meet the following requirements:

- The client is 4 years of age or older.
- The client has a documented diagnosis of  $\beta$ -thalassemia (diagnosis code D561) and other forms of thalassemia have been ruled out.
- The client is RBC transfusion dependent and has documented history of receiving RBC transfusions of at least 100 ml per kilogram per year (pRBC/kg/yr) or at least 8 or more transfusions of regular RBCs per year for two years.
- The client has not had a prior hematopoietic stem cell transplant (HSCT) and is unable to find a matched related donor.
- The client is stable and eligible for HSCT, according to the following criteria:
  - No advanced liver disease
  - No human immunodeficiency virus (HIV) positive diagnosis
  - No hepatitis B virus (HBV) and hepatitis C virus (HCV)
  - No prior or current malignancies

- No bleeding disorders
- Normal iron levels in the heart
- Normal levels of white blood cells
- Normal platelet counts
- The prescriber attests to avoid the use of anti-retroviral medications or hydroxyurea for one month prior to mobilization and until all cycles of apheresis are completed
- The prescriber attests to discontinue iron chelators at least seven days prior to initiation of myeloablative conditioning and the use of myelosuppressive iron chelators should be avoided for 6 months after betibeglogene autotemcel (Zynteglo) infusion

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, the prescriber must monitor the following:

- The client’s platelet count for thrombocytopenia and bleeding during the treatment period with betibeglogene autotemcel (Zynteglo)
- The client for at least 15 years post betibeglogene autotemcel (Zynteglo) infusion for possible hematologic malignancies

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

6.20 Botulinum Toxin Type A and Type B

OnabotulinumtoxinA (Botox brand of botulinum toxin type A), abobotulinumtoxinA (Dysport brand of botulinum toxin type A), incobotulinumtoxin A (Xeomin brand of botulinum toxin type A), rimabotulinumtoxinB (Myobloc brand of botulinum toxin type B), and daxibotulinumtoxinA-lanm (Daxxify brand toxin type A) are benefits of Texas Medicaid.

Botulinum toxins are potent neuromuscular blocking agents that are useful in treating various focal muscle spastic disorders and excessive muscle contractions, such as dystonia, spasms, and twitches. They produce a presynaptic neuromuscular blockade by preventing the release of acetylcholine from the nerve endings. Since the resulting chemical denervation of muscle produces local paresis or paralysis, selected muscles can be treated. Two of the seven naturally occurring serotypes of botulinum toxin have been approved by the FDA for human use in the United States-type A and type B.

Due to the unique manufacturing process of each toxin, botulinum toxins are chemically, clinically, and pharmacologically distinct; as a consequence, these products are not interchangeable. The units of biological activity of one botulinum toxin product cannot be compared to, nor converted into, units of any other botulinum toxin product. The established drug names of the botulinum products emphasize the differing dose-to-potency ratios of these products.

Procedure code J0585 is a benefit when billed with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |        |        |        |
|-----------------|-------|-------|-------|-------|--------|--------|--------|
| G114            | G2401 | G241  | G243  | G244  | G245   | G248   | G250   |
| G251            | G252  | G253  | G35   | G360  | G370   | G371   | G372   |
| G374            | G375  | G3781 | G3789 | G379  | G43701 | G43709 | G43711 |
| G43719          | G800  | G801  | G802  | G803  | G804   | G808   | G809   |
| G8110           | G8111 | G8112 | G8113 | G8114 | G8220  | G8221  | G8222  |
| G8250           | G8251 | G8252 | G8253 | G8254 | G830   | G8310  | G8311  |
| G8312           | G8313 | G8314 | G8320 | G8321 | G8322  | G8323  | G8324  |

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| G8330           | G8331  | G8332  | G8333  | G8334  | G834   | H4901  | H4902  |
| H4903           | H4911  | H4912  | H4913  | H4921  | H4922  | H4923  | H4931  |
| H4932           | H4933  | H4941  | H4942  | H4943  | H499   | H5000  | H50011 |

Procedure codes J0586, J0587, J0588, and J0589 are denied when billed on the same date of service by any provider as procedure code J0585. Procedure codes J0587, J0588, and J0589 are denied when billed on the same date of service by any provider as procedure code J0586. Procedure code J0587 and J0589 are denied when billed on the same date of service by any provider as procedure code J0588. Procedure code J0588 is denied when billed on the same date of service by any provider as procedure code J0589.

IncobotulinumtoxinA, procedure code J0588, is FDA-approved for the treatment of adults with blepharospasm previously treated with onabotulinumtoxinA (J0585).

Physicians, hospitals, and other providers and suppliers should care for and administer drugs to patients in such a way that they can use drugs or biologicals most efficiently, in a clinically appropriate manner. Texas Medicaid encourages scheduling patients to make the most efficient use of the drugs administered. Safe handling guidelines per manufacturer must be observed (e.g., shelf life, cold chain requirements). The smallest size vial to cover the dose is encouraged to be used.

Claims for botulinum toxin type A and B must indicate the number of units used. If the number of units is not specified, the claim will be paid a quantity of one. Claims that exceed the following quantity limitations, per day, may be considered on appeal with documentation of medical necessity:

| Procedure Codes | Quantity Limitations of Medication | Billing Units                                                                                                                                                         |
|-----------------|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| J0585           | 400 units                          | One billing unit is equal to 1 unit of medication.<br><i>Example:</i> A provider that administers 400 units of medication would submit a claim for a quantity of 400. |

| Procedure Codes | Quantity Limitations of Medication | Billing Units                                                                                                                                                               |
|-----------------|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| J0586           | 1,500 units                        | One billing unit is equal to 5 units of medication.<br><i>Example:</i> A provider that administers 1,500 units of medication would submit a claim for a quantity of 300.    |
| J0587           | 10,000 units                       | One billing unit is equal to 100 units of medication.<br><i>Example:</i> A provider that administers 10,000 units of medication would submit a claim for a quantity of 100. |
| J0588           | 400 units                          | One billing unit is equal to 1 unit of medication.<br><i>Example:</i> A provider that administers 400 units of medication would submit a claim for a quantity of 400.       |

Procedures performed in conjunction with botulinum toxin injections are subject to guidelines set forth in the policies specific for those procedures. Any supplies billed by the provider for the administration of botulinum toxin type A or B are not separately payable.

Botulinum toxins administered more frequently than every 12 weeks must include documentation of medical necessity justifying why the medication was given at an interval sooner than 12 weeks.

Documentation in the client's medical record must include the following elements:

- Support for the medical necessity of the botulinum toxin injection:
- A covered diagnosis
- Dosage and frequency of the injections
- Support of the clinical effectiveness of the injections
- Specific site(s) injected

All documentation is subject to retrospective review.

## 6.21 Brolucizumab-DBLL (Beovu)

Brolucizumab-dbl (procedure code J0179) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.22 Bupivacaine

Bupivacaine (procedure code J0665) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.23 \* Burosumab-Twza (Crysvita)

Burosumab-Twza (Crysvita) (procedure code J0584) is a benefit of Texas Medicaid with prior authorization. Burosumab-Twza (Crysvita) may be approved for a duration of every 12 months per prior authorization request.

Burosumab-twza (Crysvita) is a fibroblast growth factor 23 (FGF23) blocking antibody, indicated to treat the following:

- X-linked hypophosphatemia (XLH, a rare, inherited form of rickets) in adult and pediatric clients who are 6 months of age and older

- FGF23-related hypophosphatemia in tumor-induced osteomalacia associated with phosphaturic mesenchymal tumors that cannot be localized or is not amenable by surgical excision in adult and pediatric clients who are two years of age and older

The initial therapy for X-linked hypophosphatemia (XLH) must meet the following criteria:

- The client is 6 months of age or older.
- **[Revised] The client has a diagnosis of X-linked hypophosphatemia (XLH) (diagnosis code E8331 or E8339) that is supported by one of the following:**
  - Confirmed phosphate regulating gene with homology to endopeptidases located on the X chromosome (PHEX-gene) mutation
  - Serum fibroblast growth factor-23 (FGF23) level >30 pg/ml
- The prescriber discontinues any oral phosphate or active vitamin D analog supplementation at least one week prior to starting burosumab-twza (Crysvita) therapy.
- The prescriber agrees to measure serum phosphate throughout therapy and withhold medication when serum phosphorus is above 5 mg/dl.

The initial therapy for FGF23-related hypophosphatemia in tumor-induced osteomalacia must meet the following criteria:

- **[Revised] The client is 2 years of age or older.**
- **[Revised] The client has a diagnosis of FGF23-related hypophosphatemia produced by an underlying tumor that cannot be localized or is not amenable to surgical excision (diagnosis code M838).**
- The prescriber discontinues any oral phosphate or vitamin D analog supplement at least two weeks prior to starting burosumab-twza (Crysvita) therapy.
- The prescriber agrees to measure serum phosphate throughout therapy.

For renewal or continuation therapy, the following criteria must be met:

- The client has previously received treatment with burosumab-twza (Crysvita).
- Documentation from the physician that the client has demonstrated a positive clinical response to burosumab-twza (Crysvita) (e.g., enhanced height velocity, improvement in a skeletal deformity, reduction of fractures, reduction of generalized bone pain).
- The physician continues to monitor serum phosphate level.

Burosumab-twza (Crysvita) is not a benefit for the following:

- Clients who currently use oral phosphates and active vitamin D analogs.
- Clients whose serum phosphorus is within or above the normal range for client's age.
- Clients with severe renal impairment or end stage renal disease.

**Referto:** Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

## 6.24 Cabotegravir and Rilpivirine (Cabenuva)

Cabotegravir and Rilpivirine (Cabenuva) (procedure code J0741) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

Cabotegravir (Apretude) (procedure code J0739) is a benefit of Texas Medicaid for clients who are 10 years of age or older.

## 6.25 Caffeine Citrate (Cafcit)

Caffeine citrate (procedure code J0706) is a benefit of Texas Medicaid for clients who are birth through 6 months of age.

## 6.26 Calcitonin Gene Related Peptide (CGRP) agents

### 6.26.1 Eptinezumab-JJMR (Vyepti)

Eptinezumab-jjmr (procedure code J3032) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.26.2 Fremanezumab-vfrm (Ajovy)

Fremanezumab-vfrm (procedure code J3031) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.27 Cantharidin

Cantharidin (procedure code J7354) is a benefit of Texas Medicaid for clients who are 2 years of age or older and is restricted to diagnosis code B081.

## 6.28 Cefiderocol (Fetroja)

Cefiderocol (procedure code J0699) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.29 Chelating Agents

Chelating agent procedure code J0895 is a benefit of Texas Medicaid when billed with an appropriate diagnosis code.

### 6.29.1 Deferoxamine Mesylate (Desferal)

Procedure code J0895 must be billed with one of the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |

### 6.30 \* Chimeric Antigen Receptor (CAR) T-Cell Therapy

[Revised] Axicabtagene ciloleucel (Yescarta) (procedure code Q2041), brexucabtagene autoleucel (Tecartus) (procedure code Q2053), ciltacabtagene autoleucel (Carvykti) (procedure code Q2056), idecabtagene vicleucel (ABECMA) (procedure code Q2055), lisocabtagene maraleucel (Breyanzi) (procedure code Q2054), obecabtagene autoleucel (Aucatzyl) (procedure code Q2058), and tisagenlecleucel (Kymriah) (procedure code Q2042) are benefits of Texas Medicaid with prior authorization.

Procedure codes Q2041, Q2042, Q2053, Q2054, Q2055, Q2056, and Q2058 are limited to once per lifetime, any provider.

Axicabtagene ciloleucel (Yescarta) is a CD-19-directed genetically modified autologous T-cell immunotherapy indicated to treat the following:

- Adult clients with relapsed or refractory large B-cell Lymphoma after two or more lines of systemic therapy, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified, primary mediastinal large B-cell lymphoma, high grade B-cell lymphoma, and DLBCL arising from follicular lymphoma.
- Adult clients with large B-cell lymphoma that is refractory to first-line chemoimmunotherapy or that relapses within 12 months of first-line chemoimmunotherapy.
- Adult clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy.

Brexucabtagene autoleucel (Tecartus) is a CD-19-directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory mantle cell lymphoma (MCL). Brexucabtagene autoleucel is also indicated to treat adult clients with relapsed or refractory B-cell precursor acute lymphoblastic leukemia (ALL).

Ciltacabtagene autoleucel (Carvykti) is a B-cell maturation antigen-directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory multiple myeloma after one or more lines of therapy, including a proteasome inhibitor, an immunomodulatory agent, and are refractory to lenalidomide.

Idecabtagene vicleucel (ABECMA) is a B-cell maturation antigen directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory multiple myeloma after two or more prior lines of therapy including an immunomodulatory agent, a proteasome inhibitor and an anti-CD38 monoclonal antibody.

Lisocabtagene maraleucel (Breyanzi) is a CD-19 directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with the following:

- Large B-cell lymphoma, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified (including DLBCL arising from indolent lymphoma), high-grade B-cell lymphoma, primary mediastinal large B-cell lymphoma, and follicular lymphoma grade 3B who have:

- Refractory disease to first-line chemoimmunotherapy or relapse within 12 months of first-line chemoimmunotherapy.
- Refractory disease to first-line chemoimmunotherapy or relapse after first-line chemoimmunotherapy and are not eligible for hematopoietic stem cell transplant (HSCT) due to comorbidities or age.
- Relapsed or refractory disease after two or more lines of systemic therapy.
- Relapsed or refractory chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL) who have received at least two prior lines of therapy, including a Bruton tyrosine kinase (BTK) inhibitor and a B-cell lymphoma 2 (BCL-2) inhibitor.
- Relapse or refractory follicular lymphoma who has received two or more lines of systemic therapy.
- Relapse or refractory mantle cell lymphoma (MCL) who have received at least two prior lines of systemic therapy.

Obecabtagene autoleucel (Aucatzyl) is a CD19-directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory B-cell precursor acute lymphoblastic leukemia (ALL).

Tisagenlecleucel (Kymriah) is a CD-19-directed genetically modified autologous T-cell immunotherapy indicated to treat the following:

- Clients who are 25 years of age or younger who have acute lymphoblastic leukemia (ALL) that is refractory or second/later relapse.
- Adult clients who have relapsed or refractory large B-cell lymphoma after two or more lines of systemic therapy, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified, high grade B-cell lymphoma, and DLBCL arising from follicular lymphoma.
- Adult clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy.

Providers and facilities must ensure that the client:

- Receives the recommended pre-medications before treatment.
- [Revised] Is closely monitored for at least two weeks, including daily monitoring for at least one week.
- [Revised] Is instructed to remain within proximity of a certified healthcare facility for at least two weeks and to avoid driving for two weeks following product administration.

### **6.30.1 Prior Authorization Criteria for Axicabtagene Ciloleucel (Yescarta)**

Prior authorization approval of axicabtagene ciloleucel (Yescarta) (procedure code Q2041) infusion therapy will be considered for the following:

- The client is 18 years of age or older.
- The client has one of the following:
  - Relapsed or refractory disease, defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant)
  - Large B-cell lymphoma that is refractory to first-line chemoimmunotherapy or that relapses within 12 months of first-line chemoimmunotherapy
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.

- The client must have a histologically confirmed diagnosis of one of the following types of aggressive non-Hodgkin's lymphoma diagnosis codes:

| Diagnosis Codes |        |       |       |       |       |       |       |
|-----------------|--------|-------|-------|-------|-------|-------|-------|
| C8330           | C8331  | C8332 | C8333 | C8334 | C8335 | C8336 | C8337 |
| C8338           | C83398 | C833A | C8510 | C851A | C8520 | C852A |       |

Prior authorization approval for clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy will be considered when all of the following criteria are met:

- The client is 18 years of age or older.
- The client has relapsed or refractory disease defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant).
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.
- The client has a histologically confirmed diagnosis of one of the following types of follicular lymphoma:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C8200           | C8201 | C8202 | C8203 | C8204 | C8205 | C8206 | C8207 |
| C8208           | C8209 | C820A | C8210 | C8211 | C8212 | C8213 | C8214 |
| C8215           | C8216 | C8217 | C8218 | C8219 | C821A | C8220 | C8221 |
| C8222           | C8223 | C8224 | C8225 | C8226 | C8227 | C8228 | C8229 |
| C822A           | C8230 | C8231 | C8232 | C8233 | C8234 | C8235 | C8236 |
| C8237           | C8238 | C8239 | C823A | C8240 | C8241 | C8242 | C8243 |
| C8244           | C8245 | C8246 | C8247 | C8248 | C8249 | C824A | C8250 |
| C8251           | C8252 | C8253 | C8254 | C8255 | C8256 | C8257 | C8258 |
| C8259           | C825A | C8260 | C8261 | C8262 | C8263 | C8264 | C8265 |
| C8266           | C8267 | C8268 | C8269 | C826A | C8280 | C8281 | C8282 |
| C8283           | C8284 | C8285 | C8286 | C8287 | C8288 | C8289 | C828A |
| C8290           | C8291 | C8292 | C8293 | C8294 | C8295 | C8296 | C8297 |
| C8298           | C8299 | C829A |       |       |       |       |       |

### 6.30.2 Prior Authorization Criteria for Brexucabtagene Autoleucel (Tecartus)

Prior authorization approval for brexucabtagene autoleucel (Tecartus) (procedure code Q2053) infusion therapy for mantle cell lymphoma will be considered when all of the following criteria are met:

- The client has histologically confirmed diagnosis of relapse or refractory mantle cell lymphoma (diagnosis codes C8310, C8311, C8312, C8313, C8314, C8315, C8316, C8317, C8318, C8319, and C831A).
- The client is 18 years of age or older.
- The client does not have primary central nervous system lymphoma/disease.
- The client has not received prior CD-19 directed CAR-T therapy.

Prior authorization approval for clients with B-cell Precursor Acute Lymphoblastic Leukemia (ALL) will be considered once all of the following criteria are met:

- The client has histologically confirmed diagnosis of relapse or refractory B-cell precursor Acute Lymphoblastic Leukemia (ALL) (diagnosis codes C9100, C9101, C9102).
- The client is 18 years of age or older.
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.

### **6.30.3 Prior Authorization Criteria for Ciltacabtagene Autoleucel (Carvykti)**

Prior authorization approval for ciltacabtagene autoleucel (Carvykti) (procedure code Q2056) infusion therapy will be considered when all of the following criteria are met:

- The client is 18 years of age or older.
- The client has histologically confirmed diagnosis of relapse or refractory multiple myeloma (diagnosis codes C9000 and C9002).
- The client has relapsed or refractory disease and has received at least one line of the following systemic therapies before treatment with ciltacabtagene autoleucel (Carvykti) and are refractory to lenalidomide, which must include:
  - A proteasome inhibitor
  - An immunomodulatory agent
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CAR-T therapy.
- Ciltacabtagene autoleucel (Carvykti) (procedure code Q2056) is limited to once per lifetime.

### **6.30.4 Prior Authorization Criteria for Idecabtagene Vicleucel (ABECMA)**

Prior authorization approval of idecabtagene vicleucel (ABECMA) (procedure code Q2055) infusion therapy will be considered when all of the following criteria are met:

- The client is 18 years of age or older.
- The client has a histologically confirmed diagnosis of relapse or refractory multiple myeloma (diagnosis codes C9000 and C9002).
- The client must have received two or more prior lines of the following therapies before treatment with idecabtagene vicleucel:
  - An immunomodulatory agent
  - A proteasome inhibitor
  - An anti-CD-38 monoclonal antibody
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CAR-T therapy.

Idecabtagene vicleucel (ABECMA) (procedure code Q2055) is limited to once per lifetime.

**6.30.5 Prior Authorization Criteria for Lisocabtagene Maraleucel (Breyanzi)**

Prior authorization approval of lisocabtagene maraleucel (Breyanzi) (procedure code Q2054) infusion therapy will be considered when the client has one of the diagnoses listed below, and also meets the following criteria:

- The client has a histologically confirmed diagnosis of large B-cell lymphoma, including diffuse large B-cell lymphoma not otherwise specified (including DLBCL arising from indolent lymphoma), high-grade B-cell lymphoma, primary mediastinal large B-cell lymphoma, or follicular lymphoma grade 3B with one of the following:
  - Refractory disease to first-line chemoimmunotherapy or relapse within 12 months of first line chemoimmunotherapy; or
  - Refractory disease to first-line chemoimmunotherapy or relapse after first line chemoimmunotherapy, and are not eligible for hematopoietic stem cell transplant (HSCT) due to comorbidities or age; or
  - Relapsed or refractory disease after two or more lines of systemic therapy.
- The client has confirmed diagnosis of relapsed or refractory chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL) who has received at least two prior lines of therapy, including a Bruton tyrosine kinase (BTK) inhibitor and a B-cell lymphoma 2 (BCL-2) inhibitor.
- The client has confirmed diagnosis of relapsed or refractory follicular lymphoma who has received two or more lines of systemic therapy.
- The client has confirmed diagnosis of relapsed or refractory mantle cell lymphoma (MCL) who has received at least two prior lines of systemic therapy.
- The client is 18 years of age or older.
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.
- The client has one of the following lymphoma diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |        |       |
|-----------------|-------|-------|-------|-------|-------|--------|-------|
| C8200           | C8201 | C8202 | C8203 | C8204 | C8205 | C8206  | C8207 |
| C8208           | C8209 | C820A | C8210 | C8211 | C8212 | C8213  | C8214 |
| C8215           | C8216 | C8217 | C8218 | C8219 | C821A | C8220  | C8221 |
| C8222           | C8223 | C8224 | C8225 | C8226 | C8227 | C8228  | C8229 |
| C822A           | C8230 | C8231 | C8232 | C8233 | C8234 | C8235  | C8236 |
| C8237           | C8238 | C8239 | C823A | C8240 | C8241 | C8242  | C8243 |
| C8244           | C8245 | C8246 | C8247 | C8248 | C8249 | C824A  | C8250 |
| C825A           | C8280 | C8281 | C8282 | C8283 | C8284 | C8285  | C8286 |
| C8287           | C8288 | C8289 | C828A | C8290 | C8291 | C8292  | C8293 |
| C8294           | C8295 | C8296 | C8297 | C8298 | C8299 | C829A  | C8300 |
| C8301           | C8302 | C8303 | C8304 | C8305 | C8306 | C8307  | C8308 |
| C8309           | C830A | C8310 | C8311 | C8312 | C8313 | C8314  | C8315 |
| C8316           | C8317 | C8318 | C8319 | C831A | C8330 | C8331  | C8332 |
| C8333           | C8334 | C8335 | C8336 | C8337 | C8338 | C83398 | C833A |
| C8390           | C8391 | C8392 | C8393 | C8394 | C8395 | C8396  | C8397 |

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C8398           | C8399 | C839A | C8510 | C8511 | C8512 | C8513 | C8514 |
| C8515           | C8516 | C8517 | C8518 | C8519 | C851A | C8520 | C8521 |
| C8522           | C8523 | C8524 | C8525 | C8526 | C8527 | C8528 | C8529 |
| C852A           | C8580 | C8581 | C8582 | C8583 | C8584 | C8585 | C8586 |
| C8587           | C8588 | C8589 | C858A | C9110 | C9112 |       |       |

Lisocabtagene maraleucel (Breyanzi) (procedure code Q2054) is limited to once per lifetime.

### 6.30.6 Prior Authorization Criteria for Obecabtagene Autoleucel (Aucatzyl)

Obecabtagene autoleucel (Aucatzyl) may be approved for a duration of 12 months.

Obecabtagene autoleucel (Aucatzyl) is a once in a lifetime cell suspension therapy with split dose infusion and is indicated for clients who meet all the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of relapsed or refractory B-cell precursor ALL (diagnosis codes C9100 and C9102).
- The client has adequate cardiac, hepatic, pulmonary, and renal function.
- A bone marrow blast assessment was conducted, and results from the sample were obtained in order to start lymphodepleting chemotherapy.
- The client does not have a clinically significant active infection or inflammatory disorder.
- The client has been screened and does not have active/latent Hepatitis B virus, active Hepatitis C virus or human immunodeficiency virus (HIV).
- The client has not previously received CAR-T therapy.

Obecabtagene autoleucel (Aucatzyl) (procedure code Q2058) is limited to a one-time split dose transfusion treatment.

The required monitoring parameters following obecabtagene autoleucel (Aucatzyl) are:

- Monitor for signs and symptoms of cytokine release syndrome (CRS), neurologic toxicities/immune effector cell-associated neurotoxicity syndrome (ICANS), and other acute toxicities daily for at least 14 days at the healthcare facility following Aucatzyl infusion.
- Monitor blood counts for cytopenia (e.g., anemia, neutropenia, thrombocytopenia) and secondary malignancies.

### 6.30.7 Prior Authorization Criteria for Tisagenlecleucel (Kymriah)

Prior authorization approval of tisagenlecleucel (Kymriah) (procedure code Q2042) infusion for the treatment of clients with refractory or second relapse B-cell precursor acute lymphoblastic leukemia will be considered when all of the following criteria are met:

- The client has a confirmed diagnosis of B-cell acute lymphoblastic leukemia (diagnosis codes C9100, C9101, and C9102).
- The client is 25 years of age or younger.
- The client has a confirmed CD-19 tumor expression.
- The client has not received prior CAR-T therapy.

Prior authorization approval of tisagenlecleucel (Kymriah) infusion for the treatment of clients with relapsed or refractory diffuse large B-cell lymphoma will be considered when all of the following criteria are met:

- The client has a confirmed diagnosis of relapsed or refractory large B-cell lymphoma (diagnosis codes C8330, C8331, C8332, C8333, C8334, C8335, C8336, C8337, C8338, C83398, and C833A):
  - Diffuse large B-cell lymphoma, not otherwise specified
  - High grade B-cell lymphoma
  - Diffuse large B-cell lymphoma arising from follicular lymphoma
- The client is 18 years of age or older.
- The client must have relapsed or refractory disease defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant).
- The client does not have primary central nervous system lymphoma
- The client has not received prior CD-19 directed CAR-T therapy

Prior authorization approval for clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy will be considered once all the following criteria are met:

- The client is 18 years of age or older
- The client has relapsed, or refractory disease defined as progression after two or more lines of systemic therapy.
- The client does not have primary central nervous system lymphoma/disease
- The client does not have an active infection or inflammatory disorder
- The client has not received prior CD-19 directed CAR-T therapy
- The client has histologically confirmed diagnosis of one of the following types of follicular lymphoma:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C8200           | C8201 | C8202 | C8203 | C8204 | C8205 | C8206 | C8207 |
| C8208           | C8209 | C820A | C8210 | C8211 | C8212 | C8213 | C8214 |
| C8215           | C8216 | C8217 | C8218 | C8219 | C821A | C8220 | C8221 |
| C8222           | C8223 | C8224 | C8225 | C8226 | C8227 | C8228 | C8229 |
| C822A           | C8230 | C8231 | C8232 | C8233 | C8234 | C8235 | C8236 |
| C8237           | C8238 | C8239 | C823A | C8240 | C8241 | C8242 | C8243 |
| C8244           | C8245 | C8246 | C8247 | C8248 | C8249 | C824A | C8250 |
| C8251           | C8252 | C8253 | C8254 | C8255 | C8256 | C8257 | C8258 |
| C8259           | C825A | C8260 | C8261 | C8262 | C8263 | C8264 | C8265 |
| C8266           | C8267 | C8268 | C8269 | C826A | C8280 | C8281 | C8282 |
| C8283           | C8284 | C8285 | C8286 | C8287 | C8288 | C8289 | C828A |
| C8290           | C8291 | C8292 | C8293 | C8294 | C8295 | C8296 | C8297 |
| C8298           | C8299 | C829A |       |       |       |       |       |

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

## 6.31 Clofarabine

Clofarabine is used for the treatment of relapsed or refractory acute lymphoblastic leukemia. Clofarabine is administered by IV infusion once daily for five days and is repeated every two to six weeks, as needed.

### 6.31.1 Prior Authorization for Clofarabine

Prior authorization is required for treatment with clofarabine (procedure code J9027) and may be granted for a maximum of six weeks.

Clofarabine may be prior authorized for the treatment of relapsed or refractory acute lymphoblastic leukemia. The following criteria apply to requests for prior authorization

- The number of anticipated injections needed as well as the dosage per injection must be submitted with the request for prior authorization.
- Prior authorization must be obtained before services are rendered whenever possible. If authorization cannot be obtained prior to the rendering of the service, the authorization request must be submitted within three business days from the date the treatment is initiated.

Prior authorization requests may be considered with documentation of both of the following:

- A diagnosis of refractory or relapsed acute lymphoblastic leukemia
- A history of at least two prior failed chemotherapy regimens

The prior authorization number must be included on the claim along with the number of units, based on the dosage given. Failure to place the prior authorization number on the claim or to obtain prior authorization within the allotted timeframe will result in denied claims.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

## 6.32 Coagulation Factor IX (Ixinity)

Coagulation factor IX (Ixinity) (procedure code J7213) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

## 6.33 Colony Stimulating Factors (Filgrastim and Pegfilgrastim)

Colony stimulating factors (CSFs) are growth factors (glycoproteins) that support survival, clonal expansion and differentiation of blood forming cells and are a benefit of Texas Medicaid. CSFs reduce the likelihood of neutropenic complications due to chemotherapy and bone marrow transplant.

Filgrastim (Neupogen) (procedure code J1442), tbo-filgrastim (Granix) (procedure code J1447), pegfilgrastim (Neulasta) (procedure code J2506), sargramostim (Leukine) (procedure code J2820), and eflapegrastim-xnst (Rolvedon) (procedure code J1449) are granulocyte colony stimulating factors (G-CSFs).

Filgrastim (Neupogen) (procedure code J1442) biosimilars are filgrastim-aafi (Nivestym) (procedure code Q5110), filgrastim-ayow (Releuko) (procedure code Q5125), and filgrastim-sndz (Zarxio) (procedure code Q5101).

Pegfilgrastim (Neulasta) (procedure code J2506) biosimilars are pegfilgrastim-jmdb (Fulphila) (procedure code Q5108), pegfilgrastim-pbbk (Fylnetra) (procedure code Q5130), pegfilgrastim-apgf (Nyvepria) (procedure code Q5122), pegfilgrastim-fpgk (Stimufend) (procedure code Q5127), pegfilgrastim-cbqv (Udenyca) (procedure code Q5111), and pegfilgrastim-bmez (Ziextenzo) (procedure code Q5120).

To submit claims for reimbursement of colony stimulating factors, providers must submit the most appropriate procedure code with the number of units administered.

Procedure code J2506 will be denied if billed on the same date of service as procedure codes J1442, J1449, and J2820.

Procedure code J1442 will be denied if billed on the same date of service as procedure codes J1449, J2506, and J2820.

Procedure code J1449 will be denied if billed on the same date of service as procedure codes J1442, J2506, and J2820.

Procedure code J2820 will be denied if billed on the same date of service as procedure codes J1442, J1449, and J2506.

Procedure code 96377 must be billed with procedure code J2506 on the same day by the same provider.

Procedure code J1449 is restricted to clients who are 18 years of age or older.

## 6.34 Crizanlizumab-tmca (Adakveo)

Crizanlizumab-tmca (Adakveo) (procedure code J0791) is a benefit of Texas Medicaid for clients who are 16 years of age and older.

Crizanlizumab-tmca (Adakveo) is indicated for clients with sickle cell disease to reduce the frequency of vaso-occlusive crises (VOCs).

### 6.34.1 Prior Authorization

Prior authorization is required for crizanlizumab-tmca (Adakveo) and may be approved for a duration of 12 months.

Initial therapy requests for Crizanlizumab-tmca (Adakveo) may be approved for a 12-month duration if all of the following criteria are met:

- The client must be 16 years of age or older.
- The client has a diagnosis of sickle cell disease of any genotype.
- The client has experienced two or more vaso-occlusive events in the past 12 months.

For renewal or continuation therapy requests, the client must meet all of the following requirements:

- The client continues to meet the following initial approval criteria:
  - The client must be 16 years of age or older.
  - The client has a diagnosis of sickle cell disease of any genotype.
- The client experienced positive clinical response to therapy as demonstrated by reduced frequency of vaso-occlusive crisis.
- The client has previously received treatment with Crizanlizumab-tmca (Adakveo) without complications.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

## 6.35 Delandistrogene moxeparvovec-rokl (Elevidys)

Delandistrogene moxeparvovec-rokl (Elevidys) is an adeno-associated virus vector-based gene therapy indicated for the treatment of ambulatory and non-ambulatory clients who are 4 years of age or older with Duchenne muscular dystrophy (DMD) with a confirmed mutation in the DMD gene.

Delandistrogene moxeparvovec-rokl (Elevidys) (procedure code J1413) is a benefit of Texas Medicaid and limited to one transfusion treatment per lifetime. Procedure code J1413 is restricted to diagnosis code G7101.

### 6.35.1 Prior Authorization Requirements

Prior authorization is required for delandistrogene moxeparvovec-rokl (Elevidys) therapy and must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

Delandistrogene moxeparvovec-rokl (Elevidys) is a one-time intravenous infusion therapy indicated for the treatment of clients with Duchenne muscular dystrophy who meet the following requirements:

- The client is 4 years of age or older.
- The client has a confirmed mutation in the DMD gene (diagnosis code G7101). Prescribers should monitor clients with a mutation in exons 1-17 and/or 59-71 of the DMD gene, for immune-mediated myositis.
- The client does not have any deletion in exon 8 or exon 9 in the DMD gene.
- The client is not on concomitant DMD antisense oligonucleotide therapy (e.g., golodirsen, casimersen, viltolarsen, eteplirsen, etc.).
- Documentation of client's baseline testing for presence of anti-AAVrh74 total binding antibody titers of <1:400.
- The client has no current infection. If there are signs of infection prior to infusion, treatment with delandistrogene moxeparvovec-rokl (Elevidys) should be postponed until the infection clears.
- Due to the possibility of acute serious liver injury, client's liver function must be monitored prior and post delandistrogene moxeparvovec-rokl (Elevidys) therapy.
- Documentation of client's platelet count and troponin-I level should be obtained prior to infusion.
- The client does not have a history of previously receiving treatment with delandistrogene moxeparvovec-rokl (Elevidys) infusion.

The required monitoring parameters following delandistrogene moxeparvovec-rokl (Elevidys) infusion are:

- Liver function should be monitored upon initiation of therapy and continued on a weekly schedule for the first 3 months after delandistrogene moxeparvovec-rokl (Elevidys) infusion.
- Troponin-I level should be monitored weekly for the first month after treatment with delandistrogene moxeparvovec-rokl (Elevidys).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

**Referto:** Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

### 6.36 Dexamethasone (Hemady)

Dexamethasone (Hemady) (procedure code J8541) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.37 Dexmedetomidine

Dexmedetomidine (procedure code J1105) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.38 Dimethyl sulfoxide

Dimethyl sulfoxide (procedure code J1212) is a benefit of Texas Medicaid and is limited to diagnosis codes N3010 and N3011.

6.39 Eculizumab (Soliris)

Eculizumab (Soliris) (procedure code J1299) is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

| Diagnosis Codes |       |      |      |       |       |  |  |
|-----------------|-------|------|------|-------|-------|--|--|
| D5932           | D5939 | D595 | G360 | G7000 | G7001 |  |  |

6.40 Edaravone (Radicava)

Procedure code J1301 is a benefit of Texas Medicaid for clients who are 18 years of age and older with prior authorization. Client must have a diagnosis of amyotrophic lateral sclerosis (ALS).

6.41 Efgartigimod

Efgartigimod alfa-fcab (Vyvgart) (procedure code J9332) and efgartigimod alfa (Vyvgart Hytrulo) (procedure code J9334) are benefits of Texas Medicaid and are limited to clients who are 18 years of age or older and restricted to diagnosis codes G700 and G7001. Procedure code J9334 is also restricted to diagnosis code G6181.

6.42 Elivaldogene Autotemcel (Skysona)

Elivaldogene autotemcel (Skysona) (procedure code J3590) is a benefit of Texas Medicaid for male clients who are 4 through 17 years of age with prior authorization.

Elivaldogene autotemcel (Skysona) is indicated to slow the progression of neurological dysfunction in boys who are 4 through 17 years of age with early, active cerebral adrenoleukodystrophy (CALD).

Elivaldogene autotemcel (Skysona) (procedure code J3590) is limited to one transfusion treatment per lifetime.

6.42.1 Prior Authorization Requirements

Elivaldogene autotemcel (Skysona) is a one-time infusion therapy indicated for the treatment of clients who meet the following requirements:

- The client is male who is 4 through 17 years of age.
- The client has a documented diagnosis of CALD (diagnosis code E71511, E71520, E71521, E71528, or E71529).
- The client has a variant in the ABCD1 gene as evident by a genetic test.
- The client’s CALD is caused by the presence of a variant of the ABCD1 gene causing elevated very long chain fatty acid (VLCFA) and not secondary to head trauma.
- The client has early, active CALD as defined by all the following:
  - The client is asymptomatic or mildly symptomatic with neurologic function score (NFS) of less than or equal to 1.
  - The client has gadolinium enhancement on brain magnetic resonance imaging (MRI).
  - The client has a Loes score ranging from 0.5 to 9.
- The client has not had a hematopoietic stem cell transplant (HSCT), is eligible for HSCT, and is unable to find a matched related donor.

- The client's screening result is negative for hepatitis B virus (HBV), hepatitis C virus (HCV), human immunodeficiency virus (HIV)-1 and HIV-2, and Human T-lymphotropic virus type I (HTLV-I) and type II (HTLV-II) prior to the collection of cells for manufacturing.
- The prescriber must attest to monitor the client closely for evidence of life-threatening hematological malignancy through complete blood counts (CBC) at least every six months and through assessment for possible clonal expansion at least twice in the first year and annually thereafter.
- The prescriber must attest to monitor the client for signs of bleeding and infections after the treatment with elivaldogene autotemcel (Skysona) as life-threatening bacterial or viral infections may occur as well as thrombocytopenia and prolonged cytopenia.
- The client must avoid taking anti-retroviral medications for at least one month prior to initiating medication for stem cell mobilization and for the expected duration for elimination of the medications, and until all cycles of apheresis are complete.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

### 6.43 Elranatamab-bcmm (Elfrexio)

Elranatamab-bcmm (Elfrexio) (procedure code J1323) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.44 \* Emapalumab-lzsg (Gamifant)

[Revised] Emapalumab-lzsg (Gamifant) is an interferon gamma (IFN $\gamma$ ) blocking antibody that is indicated for the treatment of the following:

- [Revised] Adult and pediatric (newborn and older) clients with primary hemophagocytic lymphohistiocytosis (HLH) with refractory, recurrent, or progressive disease or intolerance with conventional HLH therapy.
- [Revised] Adult and pediatric (newborn and older) clients with HLH/macrophage activation syndrome (MAS) in known or suspected Still's disease, including systemic juvenile idiopathic arthritis (sJIA), with an inadequate response or intolerance to glucocorticoids, or with recurrent MAS.

Emapalumab-lzsg (Gamifant) (procedure code J9210) is a benefit of Texas Medicaid for clients (newborn and older) with prior authorization.

Prescriber must administer dexamethasone concomitantly with emapalumab-lzsg (Gamifant) therapy.

Emapalumab-lzsg (Gamifant) is administered as part of the induction/maintenance phase of hematopoietic stem cell transplant (HSCT) and therapy will be discontinued once client is at the initiation phase for HSCT and no longer requires emapalumab-lzsg (Gamifant) therapy for HLH.

#### 6.44.1 \* Prior Authorization Requirements

Prior authorization is required for emapalumab-lzsg (Gamifant) (procedure code J9210).

[Revised] Prior authorization for initial therapy will be approved for a duration of six months when the client has one of the diagnoses listed below and meets the following criteria:

- Client has a documented diagnosis of primary HLH (diagnosis code D761) based on the following:
  - Genetic mutation of the gene known to cause primary HLH (e.g., PRF1, UNC13D, STX11, or STXBP2) or a family history consistent with primary HLH or
  - Confirmation of least 5 of the following criteria:

- Fever  $\geq 101.3^{\circ}\text{F}$
- Splenomegaly
- Cytopenia defined by at least 2 of the following: Hemoglobin  $< 9\text{ g/dl}$ ; OR platelet count  $< 100 \times 10^9/\text{L}$ ; OR neutrophils  $< 1 \times 10^9/\text{L}$ ; OR fasting triglycerides  $> 265\text{ mg/dl}$  OR fibrinogen  $\leq 1.5\text{ g/L}$
- Hemophagocytosis in the liver, bone marrow, spleen or lymph node
- Low or absent natural killer (NK) cell activity
- Serum ferritin concentration  $\geq 500\text{ mg/L}$
- High plasma concentration of soluble CD25 (i.e., soluble interleukin-2 receptor)  $> 2,400\text{ U/mL}$
- Client has refractory, recurrent or progressive disease or intolerance with conventional HLH therapy (e.g., etoposide, cyclosporine A, or anti-thymocyte globulin).
- Client has been tested/screened for latent tuberculosis infection prior to initiation of emapalumab-lzsg (Gamifant) therapy.
- Client has not undergone hematopoietic stem cell transplant and is candidate for HSCT once emapalumab-lzsg (Gamifant) therapy has been discontinued.
- [Revised] Client has a documented diagnosis of HLH/MAS in Still's disease based on the following:
  - [Revised] Client has a diagnosis of HLH along with a confirmed or suspected diagnosis of systemic juvenile idiopathic arthritis or adult onset of Still's disease.

**[Revised] Diagnosis Codes**

|        |        |        |        |        |        |        |        |
|--------|--------|--------|--------|--------|--------|--------|--------|
| D761   | M061   | M0820  | M08211 | M08212 | M08219 | M08221 | M08222 |
| M08229 | M08231 | M08232 | M08239 | M08241 | M08242 | M08249 | M08251 |
| M08252 | M08259 | M08261 | M08262 | M08269 | M08271 | M08272 | M08279 |
| M0828  | M0829  |        |        |        |        |        |        |

- [Revised] Client has a diagnosis of active MAS with ferritin level greater than  $684\text{ ng/mL}$  and any two of the four laboratory criteria listed below:
  - [Revised] Platelet count  $\leq 181 \times 10^9/\text{L}$
  - [Revised] Aspartate aminotransferase (AST)  $> 48\text{ U/L}$
  - [Revised] Triglycerides  $> 156\text{ mg/dL}$
  - [Revised] Fibrinogen levels  $\leq 360\text{ mg/dL}$
- [Revised] Client has an inadequate response to high-dose IV glucocorticoids.
- [Revised] Client does not have any active infections caused by specific pathogens favored by IFN $\gamma$  neutralization (e.g., mycobacteria and Histoplasma capsulatum).

For renewal or continuation therapy with emapalumab-lzsg (Gamifant), the client must meet all of the following requirements:

- Client continues to meet the initial approval criteria.
- [Revised] Client continues to require emapalumab-lzsg (Gamifant) as HLH treatment pending the initiation of HSCT or when treatment is no longer needed for HLH/MAS.

**Referto:** Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

## 6.45 \* Enzyme Replacement Therapy (ERT)

ERT is a medical treatment that replaces a specific enzyme that is deficient or absent in the body.

The following ERT therapies are benefits of Texas Medicaid:

- Agalsidase beta (Fabrazyme) is indicated in clients who are 2 years of age or older with Fabry disease and may be reimbursed with diagnosis code E7521.
- Alglucosidase alfa (Lumizyme) is indicated for clients with Pompe disease (GAA deficiency) and may be reimbursed with diagnosis code E7402.
- Apadamtase alfa (Adzynma) is indicated in pediatric and adult clients for prophylactic or on demand ERT for congenital thrombotic thrombocytopenic purpura (cTTP) and may be reimbursed with diagnosis code D6942.
- Avalglucosidase alfa-ngpt (Nexviazyme) is indicated for clients who are 1 year of age or older with late onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) and may be reimbursed with diagnosis code E7402.
- Cerliponase alfa (Brineura) is indicated to slow the loss of ambulation in pediatric clients with late neuronal ceroid lipofuscinosis type 2 (CLN2) and may be reimbursed with diagnosis code E754.
- Cipaglucosidase alfa-atga (Pombiliti) is indicated to treat adult clients who are 18 years of age or older with Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) who weigh over 40 kilograms, are not improving on current ERT, and may be reimbursed with diagnosis code E7402.
- Elosulfase alfa (Vimizim) is a hydrolytic lysosomal glycosaminoglycan- (GAG) specific enzyme indicated for clients who are 5 years of age or older with mucopolysaccharidosis type IVA and may be reimbursed with diagnosis code E76210.
- Galsulfase (Naglazyme) is a hydrolytic lysosomal glycosaminoglycan- (GAG) specific enzyme indicated for clients with mucopolysaccharidosis VI (MPS VI; Maroteaux-Lamy syndrome) and may be reimbursed with diagnosis code E7629.
- Idursulfase (Elaprase) is a hydrolytic lysosomal glycosaminoglycan- (GAG) specific enzyme indicated for clients with Hunter syndrome (mucopolysaccharidosis II [MPS II]) and may be reimbursed with diagnosis code E761.
- Imiglucerase (Cerezyme) is indicated for long-term ERT for clients who are 2 years of age or older with a confirmed diagnosis of Type 1 Gaucher disease (diagnosis code E7522) that results in one or more of the following conditions:
  - Anemia (low red blood cell count)
  - Thrombocytopenia (low blood platelet count)
  - Bone disease
  - Hepatomegaly or splenomegaly (enlarged liver or spleen)
- Laronidase (Aldurazyme) is indicated in clients with Hurler and Hurler-Scheie forms of mucopolysaccharidosis I (MPS I) and clients with the Scheie form who have moderate to severe symptoms and may be reimbursed with diagnosis codes E7601, E7602, and E7603.
- [Revised] Olipudase alfa-rpcp (Xenpozyme) is indicated for the treatment of non-central nervous system manifestations of acid sphingomyelinase deficiency (ASMD) in adult and pediatric patients and may be reimbursed with diagnosis codes E75240, E75241, E75244, E75248, and E75249. The following requirements must be met:
  - Pregnancy status of female clients of reproductive potential must be verified prior to initiating treatment.

- Client’s baseline transaminase level must be obtained.
- Assessment of alanine transaminase (ALT) and aspartate aminotransferase (AST) must be conducted within one month prior to initiation of Olipudase alfa-rpcp, within 72 hours prior to any infusion during dose escalation, or prior to the next scheduled Olipudase alfarpcp infusion upon resuming treatment following a missed dose.
- Pegunigalsidase alfa-iwxj (Elfabrio) is indicated for the treatment of adult clients with confirmed Fabry disease and may be reimbursed with diagnosis code E7521.
- Protein C concentrate, human (Ceprotin) is indicated in pediatric and adult clients with severe congenital protein C deficiency for the prevention and treatment of venous thrombosis and purpura fulminans and may be reimbursed with diagnosis cod D6859.
- Sebelipase alfa (Kanuma) is indicated for the treatment of pediatric and adult clients with a diagnosis of lysosomal acid lipase (LAL) deficiency and may be reimbursed with diagnosis code E755.
- Taliglucerase alfa (Elelyso) is indicated for long-term ERT for adult clients with Type 1 Gaucher disease and may be reimbursed with diagnosis code E7522.
- Velaglucerase alfa (VPRIV) is indicated for long-term ERT for clients with Type 1 Gaucher disease and may be reimbursed with diagnosis code E7522.
- Velmanase alfa-tycv (Lamzede) is indicated to treat non-central nervous system manifestation of alpha-mannosidosis in adult and pediatric clients and may be reimbursed with diagnosis code E771. The following requirement must be met:
  - Pregnancy status of female clients of reproductive potential must be verified prior to initiating treatment.

**6.45.1 Reimbursement for ERT**

The following procedure codes may be reimbursed for ERT services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| J0180           | J0217 | J0218 | J0219 | J0221 | J0567 | J1203 | J1322 | J1458 | J1743 |
| J1786           | J1931 | J2508 | J2724 | J2840 | J3060 | J3385 | J7171 |       |       |

**6.45.2 Prior Authorization**

Prior authorization is required for enzyme replacement therapy and documentation must include all of the following:

- A request for the specific enzyme replacement therapy.
- Laboratory evidence of the enzyme deficiency, (i.e., below the laboratory-defined cut-off value as determined by the laboratory).

The requesting provider may be asked for additional information to clarify or complete a request for enzyme replacement therapy.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies.

**6.46 Epcoritamab-bysp (Epkinly)**

Epcoritamab-bysp (procedure code J9321) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.47 Eravacycline (Xerava)

Eravacycline (procedure code J0122) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.48 Esketamine (Spravato)

Esketamine (Spravato) is a benefit of Texas Medicaid for clients who are 18 years of age or older with prior authorization. Providers must submit claims for esketamine (Spravato) with procedure code S0013.

Esketamine (Spravato) nasal spray is an N-methyl-D-aspartate (NMDA) receptor antagonist that is indicated for any of the following treatments:

- Treatment-resistant depression (TRD) in adult clients, as monotherapy or in conjunction with an oral antidepressant
- Depressive symptoms in adult clients with major depressive disorder (MDD) with acute suicidal ideation or behavior in conjunction with an oral antidepressant

Esketamine (Spravato) is only available through a restricted program under a Risk Evaluation and Mitigation Strategy (REMS).

Providers/health-care settings must be certified in the Spravato REMS program to administer Spravato to clients enrolled in the REMS program. Administration of the drug must take place in a health-care facility under the direct observation of a health-care provider.

Pharmacies must be certified in the Spravato REMS program to dispense to health-care settings who are authorized to administer the drug.

Clients must be enrolled in the Spravato REMS program and comply with the ongoing requirements for Spravato treatment.

Esketamine (Spravato) is not a benefit for clients who have aneurysmal vascular disease, arteriovenous malformation or history of intracerebral hemorrhage.

6.48.1 \* Prior Authorization

Prior authorization is required for esketamine (Spravato) (procedure code S0013) and may be approved for a duration of six months.

Initial therapy for esketamine (Spravato) nasal spray may be approved when all of the following criteria is met:

- The client is 18 years of age or older.
- The client has a diagnosis of major depressive disorder (MDD) with one of the following diagnosis codes:

| [Revised] Diagnosis Codes |       |       |      |      |      |      |      |
|---------------------------|-------|-------|------|------|------|------|------|
| F0631                     | F0632 | F0634 | F320 | F321 | F322 | F323 | F324 |
| F325                      | F3289 | F329  | F32A | F330 | F331 | F332 | F333 |
| F3340                     | F3341 | F3342 | F338 | F339 | F341 | F350 |      |

- Client has either of the following:
  - A treatment-resistance depression (as monotherapy or in combination with an oral antidepressant) that has been confirmed as an inadequate response/failure to previous antidepressant treatment.

- A major depressive disorder with acute suicidal ideation or behavior (in conjunction with an oral antidepressant) and the prescriber's evaluation shows that the client:
  - Has suicidal ideation with intent.
  - Needs acute psychiatric hospitalization due to an imminent risk of suicide.
- Esketamine (Spravato) must be administered under the direct observation of a health-care provider and the client must be monitored for at least 2 hours after each treatment.
- Prior to starting esketamine (Spravato) treatment, there must be an attestation of baseline scoring of clinical assessment of MDD.
- The client must not have contraindications to esketamine (Spravato), such as aneurysmal vascular disease, arteriovenous malformation, or intracerebral hemorrhage.

For renewal or continuation therapy, the client must meet all of the following requirements:

- The client continues to meet the initial prior authorization approval criteria.
- The client demonstrates positive clinical response to esketamine (Spravato) therapy by an improvement from baseline assessment.
- The client has previously received treatment esketamine (Spravato) without complications.

**Referto:** Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

## 6.49 Esmolol Hydrochloride

Esmolol hydrochloride (procedure code J1805 and J1806) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.50 Etranacogene Dezaparvovec-drlb (Hemgenix)

Etranacogene dezaparvovec-drlb (Hemgenix) is an adeno-associated virus vector-based gene therapy indicated to treat adult clients with Hemophilia B (congenital Factor IX deficiency).

Etranacogene dezaparvovec-drlb (Hemgenix) (procedure code J1411) is a benefit of Texas Medicaid for adult clients who are 18 years of age or older with prior authorization.

### 6.50.1 Prior Authorization Requirements

Prior authorization is required for etranacogene dezaparvovec-drlb (Hemgenix) therapy.

Etranacogene dezaparvovec-drlb (Hemgenix) is a one-time infusion therapy indicated for the treatment of clients who meet the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of Hemophilia B (Hereditary factor IX deficiency) (diagnosis code D67) and all other bleeding disorders not related to Hemophilia B have been ruled out.
- The client must meet one of the following criteria:
  - Is currently using Factor IX prophylaxis therapy, or
  - Has current or historical life-threatening hemorrhage, or
  - Has a history of repeated, serious spontaneous bleeding episodes.
- A Factor IX inhibitor titer testing must be performed, and client must have a baseline anti-AAV5 antibody titer of  $\leq 1:678$ .
- The client must be tested for Factor IX inhibitor presence and testing result must be negative.

- If testing yields a positive result, a second Factor IX inhibitor titer test should be performed within two weeks.
- Etranacogene dezaparvovec-drlb (Hemgenix) should not be administered if the results for the initial and second test for human Factor IX inhibitor are positive.
- Baseline liver condition and function assessment must be assessed prior to etranacogene dezaparvovec-drlb (Hemgenix) infusion.
  - Documentation includes, but is not limited to alanine aminotransferase (ALT), aspartate aminotransferase (AST), alkaline phosphatase (ALP), and total bilirubin
  - Documentation of hepatic ultrasound and elastography must be provided.
- The client does not have a history of previously receiving treatment with etranacogene dezaparvovec-drlb (Hemgenix) infusion.

Etranacogene dezaparvovec-drlb (Hemgenix) (procedure code J1411) is limited to one infusion per lifetime.

These are the required monitoring parameters following etranacogene dezaparvovec-drlb (Hemgenix) infusion:

- Liver transaminase levels must be assessed once weekly for at least three months after etranacogene dezaparvovec-drlb (Hemgenix) infusion to monitor for any signs of potential hepatotoxicity.
- Factor IX activity must be monitored weekly for at least three months post-infusion.

In addition to the documentation requirements outlined in this section, if any, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

### 6.51 Evinacumab-dgnb (Evkeeza)

Evinacumab-dgnb (procedure code J1305) is a benefit of Texas Medicaid for clients who are 5 years of age or older.

### 6.52 Fam-trastuzumab Deruxtecan-nxki

Fam-trastuzumab Deruxtecan-nxki (procedure code J9358) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.53 Fecal Microbiota

Fecal microbiota (procedure code J1440) is a benefit of Texas Medicaid for clients who are 18 years of age or older and restricted to diagnosis codes A0471 and A0472.

### 6.54 Fluocinolone Acetonide (Retisert)

Procedure code J7311 is a benefit of Texas Medicaid for clients of all ages but is only considered for reimbursement with a posterior uveitis diagnosis of more than six months in duration and only when the condition has been unresponsive to oral or systemic medication treatment.

**Referto:** Subsection 4.2.11, "Fluocinolone Acetonide" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional prior authorization requirements.

### 6.55 Furosemide (Furoscix)

Furosemide (Furoscix) (procedure code J1941) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.56 Givosiran (Givlaari)

Givosiran (procedure code J0223) is a benefit of Texas Medicaid for clients who are 18 years of age or older and when billed with diagnosis codes E8020, E8021, and E8029.

## 6.57 Glofitamab-gxbm

Glofitamab-gxbm (procedure code J9286) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.58 Granisetron Hydrochloride

Granisetron hydrochloride is a benefit of Texas Medicaid and is limited to diagnosis codes Z5189, Z510, Z5111, and Z5112.

## 6.59 \* Hematopoietic Injections

[Revised] Hematopoietic agents erythropoietin alfa, epoetin alfa (EPO), methoxy polyethylene glycol-epoetin beta (Mircera), and darbepoetin alfa are benefits of Texas Medicaid and reimbursed using procedure codes J0881, J0885, and J0888 with an appropriate diagnosis code.

Providers must maintain medical records in their offices that document regular monitoring of hemoglobin or hematocrit levels and explain the rationale for the dosing of epoetin alfa, methoxy polyethylene glycol-epoetin beta, and darbepoetin alfa. These records are subject to retrospective review to determine appropriate utilization and reimbursement for this service.

EPO, Mircera, and darbepoetin alfa injections are limited to specific diagnosis codes as indicated in this section.

**Referto:** Subsection 7.2.7.1, “Hematopoietic Injections” in the *Clinics and Other Outpatient Facility Services Handbook* (Vol. 2, *Provider Handbooks*) for information about outpatient facility criteria.

### 6.59.1 \* Darbepoetin Alfa

[Revised] Darbepoetin alfa (procedure code J0881) is an erythropoiesis-stimulating protein closely related to erythropoietin. Darbepoetin stimulates erythropoiesis by the same mechanism as EPO. Darbepoetin alfa has approximately a three-fold longer half-life than EPO, resulting in a sustained erythropoietic effect and less frequent dosing. Darbepoetin alfa is indicated for:

- Treatment of anemia associated with chronic renal failure (CRF), including clients on dialysis and clients not on dialysis.
- Treatment of anemia in clients who have non-myeloid malignancies where anemia is due to the effect of chemotherapy.

[Revised] Procedure code J0881 must be billed with one of the following diagnosis codes:

| [Revised] Diagnosis Codes |       |       |      |       |       |       |       |
|---------------------------|-------|-------|------|-------|-------|-------|-------|
| C9000                     | C9001 | C9002 | D460 | D461  | D462  | D464  | D46A  |
| D46B                      | D611  | D612  | D613 | D6189 | D619  | D630  | D631  |
| D644                      | D6481 | D6489 | D649 | N181  | N182  | N1830 | N1831 |
| N1832                     | N184  | N189  | N19  | Z5111 | Z5112 |       |       |

Darbepoetin alfa injections are limited to once weekly (Sunday through Saturday).

### 6.59.2 \* Epoetin Alfa (EPO)

[Revised] EPO (procedure code J0885) is a glycoprotein that stimulates the formation of red blood cells and the production of the precursor red blood cells of the bone marrow. EPO is indicated for:

- Anemia associated with chronic renal failure (CRF), including clients not on dialysis.
- Anemia related to therapy with zidovudine (AZT) in HIV-infected clients.
- Anemia due to the effects of concomitantly administered chemotherapy in clients who have non-myeloid malignancies.
- Anemia of prematurity.
- Clients scheduled to undergo elective noncardiac, nonvascular surgery to decrease need for allogenic blood transfusion.

[Revised] Procedure code J0885 must be billed with one of the following diagnosis codes:

| [Revised] Diagnosis Codes |       |       |       |       |      |       |       |
|---------------------------|-------|-------|-------|-------|------|-------|-------|
| B20                       | C9000 | C9001 | C9002 | D460  | D461 | D4621 | D4622 |
| D464                      | D469  | D46A  | D46B  | D46C  | D46Z | D471  | D479  |
| D47Z9                     | D611  | D612  | D613  | D6189 | D619 | D630  | D631  |
| D644                      | D6481 | D6489 | D649  | I120  | N181 | N182  | N1830 |
| N1831                     | N1832 | N184  | N189  | N19   | P612 |       |       |

EPO may be considered for reimbursement when the dose is titrated consistent with prevailing, evidence-based clinical guidelines, as published by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative, including appropriate monitoring of the rise and fall of the hemoglobin or hematocrit levels.

EPO is limited to three injections per calendar week (Sunday through Saturday).

### 6.59.3 \* Methoxy Polyethylene Glycol-Epoetin Beta (Mircera)

Methoxy polyethylene glycol-epoetin beta (Mircera) is indicated for the treatment of anemia associated with chronic kidney disease (CKD) and may be administered subcutaneously or intravenously. Mircera is not indicated for use in the treatment of anemia due to cancer chemotherapy or as a substitute for red blood cell transfusions in clients who require immediate correction of anemia. Mircera is indicated for the following:

- Treatment of anemia associated with CKD in adult clients on hemodialysis and adult clients not on hemodialysis.
- Treatment of anemia associated with CKD in pediatric clients who are 5 through 17 years of age. These clients must be on hemodialysis and converting from another erythropoiesis-stimulating agent (ESA) after their hemoglobin level was stabilized with an ESA.

**Note:** In pediatric clients, Mircera is administered by intravenous injection only.

Methoxy polyethylene glycol-epoetin beta (Mircera) (procedure code J0888) is limited to the following diagnosis codes:

| [Revised] Diagnosis Codes |      |      |      |      |       |       |       |
|---------------------------|------|------|------|------|-------|-------|-------|
| D631                      | I129 | I130 | N181 | N182 | N1830 | N1831 | N1832 |
| N184                      |      |      |      |      |       |       |       |

Methoxy polyethylene glycol-epoetin beta (Mircera) may be considered for reimbursement when the dose is titrated consistent with prevailing, evidence-based, clinical guidelines as published by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative, including appropriate monitoring of the rise and fall of the hemoglobin or hematocrit levels.

Methoxy polyethylene glycol-epoetin beta (Mircera) is limited to one injection every 2 calendar weeks, any provider (Sunday through Saturday).

## **6.60 Hemophilia Drugs**

### **6.60.1 Prothrombin complex concentrate (Human-lans), per I.U. of factor 1x activity**

Prothrombin complex concentrate, human-lans, (procedure code J7165) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### **6.60.2 Prothrombin complex (Human), per I.U. of factor 1x activity (Kcentra)**

Prothrombin complex, human (procedure code J7168) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### **6.60.3 Coagulation factor Xa (Recombinant), Inactivated-zhzo (Andexxa)**

Coagulation factor XA (recombinant), inactivated-zhzo (procedure code J7169) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### **6.60.4 Factor VIIa (Antihemophilic factor, Recombinant)-JNCW (Sevenfact)**

Factor VIIa (Antihemophilic factor, recombinant)-jncw (procedure code J7212) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

## **6.61 Hereditary Angioedema (HAE) agents**

### **6.61.1 C1 Esterase Inhibitor (Human) (Berinert)**

C-1 esterase inhibitor (human) (Berinert) (procedure code J0597) is a benefit of Texas Medicaid for clients who are 5 years of age or older when billed with diagnosis code D841.

### **6.61.2 C1 Esterase Inhibitor (Human) (Cinryze)**

C-1 esterase inhibitor (human) (Cinryze) (procedure code J0598) is a benefit of Texas Medicaid for clients who are 6 years of age or older when billed with diagnosis code D841.

### **6.61.3 C1 Esterase Inhibitor (Human) (Haegarda)**

C1 esterase inhibitor (human) (Haegarda) (procedure code J0599) is a benefit of Texas Medicaid for clients who are 6 years of age or older when billed with diagnosis code D841.

### **6.61.4 C1 Esterase Inhibitor (Recombinant) (Ruconest)**

C1 esterase inhibitor (recombinant) (procedure code J0596) is a benefit of Texas Medicaid for clients who are 13 years of age or older when billed with diagnosis code D841.

### **6.61.5 Ecallantide (Kalbitor)**

Ecallantide (Kalbitor) (procedure code J1290) is a benefit of Texas Medicaid for clients who are 12 years of age or older when billed with diagnosis code D841.

### **6.61.6 Hympavzi (Marstacimab-hncq)**

Hympavzi (Marstacimab-hncq) (procedure code J7172) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

**6.61.7     Icatibant (Firazyr)**

Icatibant (Firazyr) (procedure code J1744) is a benefit of Texas Medicaid for clients who are 18 years of age or older when billed with diagnosis code D841.

**6.61.8     Lanadelumab-flyo (Takhzyro)**

Lanadelumab-flyo (Takhzyro) (procedure code J0593) is a benefit of Texas Medicaid for clients who are 2 years of age or older when billed with diagnosis code D841.

**6.62     Hormonal Therapy Agents**

The following hormonal therapy agent procedure codes require prior authorization. Hormonal therapy agents are not a benefit when submitted with diagnosis codes F640, F641, F642, F648, and F649.

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| J1000           | J1071 | J1072 | J1380 | J1950 | J1951 | J3121 | J3145 | J3315 | J3316 |
| J9155           | J9217 | J9218 | J9226 | S0189 |       |       |       |       |       |

**6.63     Ibalizumab-uiyk (Trogarzo)**

Ibalizumab-uiyk (Trogarzo) (procedure code J1746) is a benefit of Texas Medicaid for clients who are 18 years of age and older with prior authorization. Ibalizumab-uiyk (Trogarzo) may be approved for a duration of every 12 months per prior authorization request.

For initial therapy, all of the following criteria must be met:

- The client is 18 years of age or older.
- The client has a documented diagnosis of multi-drug resistant human immunodeficiency virus (diagnosis code B20) from the provider and meets the following criteria:
  - Has received antiretroviral treatment for at least 6 months and is failing or has recently failed therapy
  - Has documented resistance, measured by resistance testing, to at least one antiretroviral medication from each of the following 3 classes of ARV:
    - Nucleoside reverse transcriptase inhibitors (NRTI)
    - Non-Nucleoside reverse transcriptase inhibitors (NNRTI)
    - Protease inhibitor (PI)
- The client has documented RNA viral load greater than 1,000 copies/mL.

Providers must use ibalizumab-uiyk (Trogarzo) concomitantly with another antiretroviral medication to which the client’s virus is susceptible.

For renewal or continuation of therapy, all of the following criteria must be met:

- The client has previously received treatment with ibalizumab-uiyk (Trogarzo).
- Documentation from the physician confirming that the client has achieved a clinical viral response defined as one of the following:
  - Decrease in viral load
  - Sustained viral load reduction
- The physician continues ibalizumab-uiyk (Trogarzo) therapy with another antiretroviral.

Trogarzo is not a benefit for clients who fail to demonstrate heavily treated multi-drug resistance.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

## 6.64 Imetelstat (Rytelo)

Imetelstat (Rytelo) is an oligonucleotide telomerase inhibitor indicated for the treatment of adult clients meeting both of the following criteria:

- The client has low- to intermediate-1 risk myelodysplastic syndromes (MDS) with transfusion-dependent anemia requiring four or more red blood cell (RBC) units over eight weeks.
- The client has not responded to, has lost response to, or is ineligible for erythropoiesis-stimulating agents (ESA).

Imetelstat (Rytelo) (procedure code J0870) is a benefit of Texas Medicaid for clients with prior authorization.

### 6.64.1 Prior Authorization Requirements

Prior authorization requests for imetelstat (Rytelo) must be submitted with a Special Medical Prior Authorization (SMPA) Request Form and documentation of all the following.

Imetelstat (Rytelo) is an intravenous infusion indicated for the treatment of a client who meets all of the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of low- to intermediate-1 risk MDS (diagnosis codes D460, D461, D464, D469, D46A, D46B, D46C, and D46Z).
- The client has transfusion-dependent anemia requiring regular RBC transfusions defined as >4 RBC units over eight weeks.
- The prescriber has ruled out or addressed other causes of anemia (e.g., abnormal bleeding, hemolysis, nutritional deficiency, renal disease)
- The prescriber attests that the client has not responded to, has lost response to, or is ineligible for ESAs.
- The client does not have deletion 5q cytogenic abnormalities.
- Imetelstat (Rytelo) will not be prescribed concomitantly with other erythropoiesis stimulating agents.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment with imetelstat (Rytelo).

The required monitoring parameters following imetelstat (Rytelo) infusion are:

- Monitor for thrombocytopenia and neutropenia.
- Monitor liver function tests prior to imetelstat (Rytelo) administration, then weekly for the first cycle, and prior to each cycle thereafter.

### 6.64.2 Documentation Requirements

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

## 6.65 Imipenem, Cilastatin, and Relebactam (Recarbrio)

Imipenem, Cilastatin, and Relebactam (procedure code J0742) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.66 Immune Globulin

Immune globulins may be indicated for treatment of certain immune disorders and states of immunodeficiency. Age and diagnosis restrictions for the procedure codes listed below may vary according to the FDA approved indications. The following immune globulin procedure codes are benefits of Texas Medicaid:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90284           | 90291 | J1552 | J1554 | J0850 | J1459 | J1460 | J1551 | J1555 | J1556 |
| J1557           | J1558 | J1559 | J1561 | J1566 | J1568 | J1569 | J1572 | J1575 | J1576 |
| J1599           | J1670 | J2788 | J2791 | J2792 | J7504 | J7511 |       |       |       |

**Note:** Procedure codes 90291 and J0850 may only be reimbursed when billed with diagnosis code Z940, Z941, Z942, Z943, Z944, or Z9483.

## 6.67 Immunosuppressive Drugs

Immunosuppressive drugs weaken or modulate the activity of the immune system and are most often used in organ transplantation to prevent rejection or to treat autoimmune diseases such as rheumatoid arthritis.

The following procedure codes are benefits of Texas Medicaid:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| J0202           | J0257 | J0480 | J0485 | J0717 | J1595 | J1602 | J7501 | J7514 | J7516 |
| J7519           | J7525 |       |       |       |       |       |       |       |       |

The following procedure codes may be indicated for, but are not limited to, treatment of the following conditions:

| Procedure Code | Conditions                                                                                                                                                                                                                                                |
|----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| J0202          | Multiple sclerosis (MS):<br>For treatment of relapsing forms of MS and should be reserved for clients who have had an inadequate response to two or more drugs indicated for the treatment of MS.                                                         |
| J0257          | Alpha-1 proteinase inhibitor deficiency:<br>For the treatment of clients who have a deficiency of the alpha-1 proteinase inhibitor enzyme (also known as alpha-1 antitrypsin deficiency) in the treatment of emphysema.                                   |
| J0480          | Organ rejection:<br>For the prophylaxis of acute organ rejection in patients receiving renal transplantation when used as part of an immunosuppressive regimen that includes cyclosporine and corticosteroids.                                            |
| J0485          | Organ rejection:<br>For the prophylaxis of organ rejection in adults receiving a kidney transplant, to be used in combination with basiliximab injection, mycophenolate mofetil, and corticosteroids.                                                     |
| J0717          | Psoriatic arthritis, Ulcerative colitis, Ankylosing spondylitis, Crohn's disease                                                                                                                                                                          |
| J1595          | Multiple sclerosis (MS):<br>For the reduction of the frequency of relapses in clients with relapsing remitting MS, including clients who have experienced a first clinical episode and have magnetic resonance imaging (MRI) features consistent with MS. |
| J1602          | Psoriatic arthritis, Rheumatoid arthritis, Ankylosing spondylitis                                                                                                                                                                                         |

| Procedure Code      | Conditions                                                                                                                                                                                                                                                                                               |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| J7501               | Renal homotransplantations:<br>Adjunct for the prevention of rejection in renal homotransplantation.<br>Rheumatoid arthritis:<br>Azathioprine is indicated only in adult patients meeting the criteria for classic or definite rheumatoid arthritis as specified by the American Rheumatism Association. |
| J7514, J7516, J7519 | Allogeneic transplants:<br>For prophylaxis of organ rejection in kidney, liver, and heart allogeneic transplants.                                                                                                                                                                                        |
| J7525               | Organ rejection prophylaxis:<br>For the prophylaxis of organ rejection in clients receiving allogeneic liver, kidney, or heart transplants.                                                                                                                                                              |

**Note:** Oral, self-administered immunosuppressive drugs may be reimbursed for Medicaid fee-for-service clients through the Medicaid Vendor Drug Program (VDP).

Retrospective review may be performed to ensure documentation supports the medical necessity of the service. Authorization is not required for immunosuppressive drugs.

## 6.68 Inclisiran (Leqvio)

Inclisiran (Leqvio) (procedure code J1306) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.69 \* Inebilizumab-cdon (Uplizna)

Inebilizumab-cdon (Uplizna) (procedure code J1823) is a benefit of Texas Medicaid for clients who are 18 years of age or older with prior authorization.

[Revised] Inebilizumab-cdon (Uplizna) is indicated for the treatment of adult clients with the following:

- [Revised] Neuromyelitis optica spectrum disorder (NMOSD/NMOSD) who are anti-aquaporin-4 antibody positive
- [Revised] Immunoglobulin G4-related disease (IgG4-RD)

### 6.69.1 \* Prior Authorization Criteria

[Revised] Prior authorization approval for initial therapy for inebilizumab-cdon (Uplizna) will be considered and approved for a 12-month duration when the client has one of the diagnoses listed below and meets the following criteria:

#### \* Neuromyelitis Optica Spectrum Disorder

- Client must be 18 years of age or older.
- [Revised] Client has a diagnosis of neuromyelitis optica spectrum disorder (diagnosis code G360).
- Client is anti-aquaporin 4 (AQP4) antibody seropositive.
- Client has been screened for hepatitis B virus (HBV), quantitative serum immunoglobulins, and tuberculosis (TB) prior to initiating treatment.
- Client has at least one attack requiring rescue therapy in the last year OR two attacks requiring rescue therapy in the last 2 years.
- Client is not receiving Inebilizumab-cdon (Uplizna) concomitantly with the following therapies:
  - Anti-CD20 monoclonal antibody treatments

- Complement inhibitors (e.g. Eculizumab, Ravulizumab)
- Immunosuppressant drugs (e.g. Cyclosporine, Methotrexate)
- Satralizumab

**\* Immunoglobulin Related Disease**

- [Revised] Client must be 18 years of age or older.
- [Revised] Client has a diagnosis of immunoglobulin G4-related disease (diagnosis code D8984) and other conditions that mimic IgG4-RD have been ruled out (e.g., malignancy, infection, other autoimmune disorders).
- [Revised] Client experiences (or recently experienced) an IgG4-RD flare that requires initiation or continuation of glucocorticoid treatment.
- [Revised] Client has history of IgG4-RD affecting at least two organs.

For renewal or continuation of therapy, the client must meet all of the following requirements:

- Client continues to meet the following initial approval criteria.
- Client experienced positive clinical response to therapy as demonstrated by decreased attacks or disease stabilization.
- [Revised] Client has previously received inebilizumab-cdon (Uplizna) treatment without complications or unacceptable toxicity (e.g., infusion reactions, serious infections).

## 6.70 Infliximab (Remicade), Avsola, Inflectra, Renflexis, and Zymfentra

Procedure codes J1745, Q5103, Q5104, and Q5121 are benefits of Texas Medicaid, and may not be reimbursed for the same date of service by any provider. Procedure codes J1745, Q5103, Q5104, and Q5121 are limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| K5000           | K50011 | K50012 | K50013 | K50014 | K50018 | K5010  | K50111 |
| K50112          | K50113 | K50114 | K50118 | K5080  | K50811 | K50812 | K50813 |
| K50814          | K50818 | K5090  | K50911 | K50912 | K50913 | K50914 | K50918 |
| K50919          | K5100  | K51011 | K51012 | K51013 | K51014 | K51018 | K5120  |
| K51211          | K51212 | K51213 | K51214 | K51218 | K5130  | K51311 | K51312 |
| K51313          | K51314 | K51318 | K5150  | K51511 | K51512 | K51513 | K51514 |
| K51518          | K5180  | K51811 | K51812 | K51813 | K51814 | K51818 | K5190  |
| K51911          | K51912 | K51913 | K51914 | K51918 | K6030  | K60311 | K60312 |
| K60313          | K60319 | K60321 | K60322 | K60323 | K60329 | K632   | L400   |
| L401            | L402   | L403   | L404   | L4050  | L4051  | L4052  | L4053  |

Procedure code J1748 is a benefit for clients who are 18 years of age or older and limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| K5000           | K50011 | K50012 | K50013 | K50014 | K50018 | K50019 | K5010  |
| K50111          | K50112 | K50113 | K50114 | K50118 | K5080  | K50811 | K50812 |
| K50813          | K50814 | K50818 | K50819 | K5090  | K50911 | K50912 | K50913 |
| K50914          | K50918 | K5100  | K51011 | K51012 | K51013 | K51014 | K51018 |
| K51019          | K5120  | K51211 | K51212 | K51213 | K51214 | K51218 | K5130  |
| K51311          | K51312 | K51313 | K51314 | K51318 | K5180  | K51811 | K51812 |
| K51813          | K51814 | K51818 | K5190  | K51911 | K51912 | K51913 | K51914 |
| K51918          | K51919 |        |        |        |        |        |        |

## 6.71 Inotuzumab ozogamicin (Besponsa)

Inotuzumab ozogamicin (Besponsa) (procedure code J9229) is a benefit of Texas Medicaid for pediatric and adult clients who are 1 year of age or older with prior authorization.

Inotuzumab ozogamicin (Besponsa) is a CD22-directed antibody-drug conjugate (ADC) that has 3 components:

- The antibody inotuzumab
- N-acetyl-gamma-calicheamicin dimethylhydrazide (a cytotoxic agent)
- An acid cleavable linker

Besponsa is indicated for the treatment of relapsed or refractory precursor B-cell acute lymphoblastic leukemia (ALL).

**6.71.1     Prior Authorization Requirements for Inotuzumab ozogamicin (Besponsa)**

Prior authorization approval for Besponsa intravenous injection (procedure code J9229) will be considered when all of the following criteria are met:

- Client is 1 year of age or older
- Client has a confirmed diagnosis of precursor B-cell acute lymphoblastic leukemia (ALL) that is refractory or in relapse
- The prescriber must agree to monitor the client for signs and symptoms of hepatic veno-occlusive disease (VOD) for the duration of Besponsa therapy

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

**6.71.2     Documentation Requirements**

In addition to documentation requirements outlined above all services are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

**6.71.3     Exclusions**

Besponsa is not a benefit for patients who have hepatic veno-occlusive disease.

**6.72     Insulin**

Insulin [Fiasp (procedure code J1812) and Lyumjev (procedure code J1814)] is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.73     Interferon**

Interferons are a family of naturally-occurring proteins that are produced by cells of the immune system. Three classes of interferons have been identified: alfa, beta, and gamma. Each class has different effects, though their activities overlap. Together, the interferons direct the immune system’s attack on viruses, bacteria, tumors, and other foreign substances that may invade the body. Once interferons have detected and attacked a foreign substance, they alter it by slowing, blocking, or changing its growth or function.

The following interferon procedure codes are benefits of Texas Medicaid:

| Procedure Codes |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|--|--|
| J1826           | J1830 | J9216 | S0145 | Q3027 | Q3028 |  |  |

Interferon Gamma-1B (procedure code J9216) may be indicated for, but is not limited to, treatment of the following:

- Chronic granulomatous disease
- Malignant osteoporosis

Interferon Beta-1A (procedure codes J1826, Q3027, and Q3028), and Interferon Beta-1B (procedure code J1830) may be indicated for, but are not limited to, treatment of relapsing forms of multiple sclerosis.

**Note:** *Pegylated interferons are self-administered weekly and are available through Texas Medicaid Vendor Drug Program for Medicaid fee-for-service clients.*

## 6.74 Invega Hafyera

Invega hafyera (procedure code J2427) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.75 Iron Injections

Iron is a hematinic, essential to the synthesis of hemoglobin to maintain oxygen transport and to the function and formation of other physiologically important heme and non-heme compounds.

Ferric derisomaltose (procedure code J1437) may be indicated for, but is not limited to, treatment of iron deficiency anemia for adult clients with:

- Intolerance or unsatisfactory response to oral iron.
- Non-dialysis-dependent chronic kidney disease.

Ferric carboxymaltose (procedure code J1439) may be indicated for, but is not limited to, treatment of iron deficiency anemia for the following:

- Adult and pediatric clients who are 1 year of age and older that have either intolerance or unsatisfactory response to oral iron.
- Adult clients who have non-dialysis-dependent chronic kidney disease.

Iron Dextran injection (procedure code J1750) may be indicated for, but is not limited to treatment of Iron deficiency anemia when oral administration is unsatisfactory or impossible.

Iron Sucrose injection (procedure code J1756) may be indicated for, but is not limited to treatment of iron deficiency anemia for the following conditions:

- Non-dialysis-dependent chronic kidney disease (NDD-CKD) for clients who are receiving erythropoietin.
- NDD-CKD for clients who are not receiving erythropoietin.
- Hemodialysis-dependent chronic kidney disease (HDD-CKD) for clients who are receiving erythropoietin.
- Peritoneal dialysis-dependent chronic kidney disease (PDD-CKD) clients who are receiving erythropoietin.

Sodium Ferric Gluconate Complex injection (procedure code J2916) may be indicated for, but is not limited to treatment of Iron deficiency anemia in clients who are six years of age or older who are undergoing long term hemodialysis treatments and who are receiving supplemental epoetin therapy.

Ferumoxitol injection (procedure code Q0138) may be indicated for, but is not limited to treatment of Iron deficiency anemia in adults who have chronic kidney disease (CKD).

**Note:** Report procedure code Q0138 for non-end stage renal disease (ESRD).

Authorization is not required for iron injections. Retrospective review may be performed to ensure documentation supports the medical necessity for the service being billed.

## 6.76 Labetalol Hydrochloride

Labetalol hydrochloride [(procedure code J1920) and Hikma (procedure code J1921)] is a benefit of Texas Medicaid for clients who are 1 year of age or older.

## 6.77 Lactated Ringer's

Lactated Ringer's (procedure code J7121) is a benefit of Texas Medicaid for clients who are birth through 20 years of age.

## 6.78 Lenacapavir (Sunlenca)

Lenacapavir (Sunlenca) (procedure code J1961) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.79 Leuprolide Acetate (Lupron Depot)

Procedure codes J1950, J9217, or J9218 may be reimbursed for leuprolide acetate injections with prior authorization. The following limitations apply to procedure codes J1950 and J9217:

| Procedure Code | Limitation(s)                 |
|----------------|-------------------------------|
| J1950          | Reimbursed once every 28 days |

Procedure code J9217 may be reimbursed in monthly, three-month, four-month, and six-month doses as follows:

| Frequency | Dosage  | Limitations                                                   |
|-----------|---------|---------------------------------------------------------------|
| Monthly   | 7.5 mg  | Billed with a quantity of 1<br>Reimbursed once every 28 days  |
| 3-month   | 22.5 mg | Billed with a quantity of 3<br>Reimbursed once every 84 days  |
| 4-month   | 30 mg   | Billed with a quantity of 4<br>Reimbursed once every 112 days |
| 6-month   | 45 mg   | Billed with a quantity of 6<br>Reimbursed once every 168 days |

The total dosage allowed within a 6-month period is 45 mg.

Procedure codes J1950, J9217, and J9218 will be denied if billed on the same date of service by the same provider.

**Referto:** Subsection 6.62, “Hormonal Therapy Agents” in this handbook for additional information.

## 6.80 Lumasiran (Oxlumo)

Lumasiran (procedure code J0224) is a benefit of Texas Medicaid for clients when billed with diagnosis code E7253.

## 6.81 Lupus Treatment Agents

Anifrolumab-fnia (Saphnelo) (procedure code J0491) and Belimumab (Benlysta) (procedure code J0490) are benefits of Texas Medicaid for clients with prior authorization.

Anifrolumab-fnia (Saphnelo) is indicated to treat moderate to severe systemic lupus erythematosus (SLE) in adult clients who are receiving standard therapy.

Belimumab (Benlysta) is indicated to treat the following:

- Active, autoantibody-positive, systemic lupus erythematosus (SLE) in clients who are 5 years of age or older, and receiving standard therapy.
- Adult clients with active Lupus Nephritis who are receiving standard therapy.

### 6.81.1 Initial Requests

Initial therapy for anifrolumab-fnia (Saphnelo) may be approved for a 12-month duration if all the following criteria are met:

- The client is 18 years of age or older.

- The client has a confirmed diagnosis of systemic lupus erythematosus (M3210, M3211, M3212, M3213, M3214, M3215, M3219, M328, M329).
- The client does not have active lupus nephritis or severe active central nervous lupus.
- The client is currently receiving at least one stable standard-of-care treatment for active systemic lupus erythematosus.
- The client is not receiving anifrolumab-fina (Saphnelo) in combination with a biologic agent.

Initial therapy for belimumab (Benlysta) may be approved for a 12-month duration if all the following criteria are met:

- Diagnosis of SLE:
  - The client is 5 years of age or older.
  - The client has a confirmed diagnosis of SLE (M320, M3210, M3211, M3212, M3213, M3214, M3215, M3219, M328, M329).
  - The client has laboratory testing confirming the presence of autoantibodies.
  - The client is currently receiving at least one standard-of-care treatment for active SLE.
  - The client is not receiving belimumab (Benlysta) in combination with a biologic disease-modifying antirheumatic drug (DMARD) agent.
- Diagnosis of active lupus nephritis:
  - The client is 18 years of age or older.
  - The adult client has a confirmed diagnosis of active lupus nephritis.
  - The client has laboratory testing confirming the presence of autoantibodies.
  - The client is currently receiving at least one standard-of-care treatment.
  - The client is not receiving belimumab (Benlysta) in combination with a biologic DMARD agent.

### **6.81.2 Recertification or Extension**

For renewal or continuation therapy for anifrolumab-fina (Saphnelo), the client must meet the following criteria:

- The client continues to meet the initial authorization approval criteria.
- The client has experienced a positive clinical response to therapy as demonstrated by stabilization of the disease or absence of disease progression.
- The client has not experienced any complications or unacceptable toxicities during anifrolumab-fina (Saphnelo) treatment.

For renewal or continuation therapy for belimumab (Benlysta), the client must meet the following criteria:

- The client continues to meet the initial authorization approval criteria.
- The client has experienced a positive clinical response to therapy as demonstrated by stabilization of the disease or absence of disease progression.
- The client has not experienced any complications or unacceptable toxicities during belimumab (Benlysta) treatment.

## 6.82 Luspatercept-aamt (Reblozyl)

Luspatercept-aamt (Reblozyl) (procedure code J0896) is a benefit of Texas Medicaid with prior authorization.

Luspatercept-aamt (Reblozyl) is restricted to clients who are 18 years of age or older, and may be approved for treatment of the following:

- Anemia in adult clients with beta thalassemia requiring red blood cell (RBC) transfusions
- Anemia failing an erythropoiesis stimulating agent and requiring two or more red blood cell units over eight weeks in adult clients with low to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS) or with myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T)

### 6.82.1 Prior Authorization for Luspatercept-aamt (Reblozyl)

Prior authorization requests for procedure code J0896 must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

For initial prior authorization requests for Luspatercept-aamt (Reblozyl), the client must be 18 years of age or older and meet the following criteria:

- Client who has anemia with beta thalassemia requiring regular RBC transfusions:
  - The client must have a diagnosis of beta thalassemia.
  - The client requires regular RBC transfusions of six or more units within the previous 24 weeks and has had no transfusion-free period for 35 days or longer during the review period.
- Client who has anemia failing an erythropoiesis stimulating agent:
  - The client must have a diagnosis of myelodysplastic syndrome classified as low to intermediate risk disease.
  - The client must require RBC transfusions of two or more units over a period of eight weeks.
  - The client must be ineligible or must have failed prior erythropoietin stimulating agent treatment.

For renewal or continuation of therapy, the client must meet the initial age and diagnosis criteria, in addition to the following requirements:

- Client who has anemia with beta thalassemia requiring regular RBC transfusions:
  - The client had a positive response/hematological improvement demonstrated by a reduction in RBC transfusion as indicated by the prescribing physician.
  - The client previously received treatment with luspatercept-aamt (Reblozyl) without complications.
- Client who has anemia failing an erythropoiesis stimulating agent:
  - The client had a positive response demonstrated by RBC transfusion independence during any consecutive eight-week period or a decrease in transfusion requirement as indicated by the prescribing physician.
  - The client previously received treatment with luspatercept-aamt (Reblozyl) without complications.

## 6.83 Medroxyprogesterone Acetate (Depo Provera)

**Referto:** The *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (Vol. 2, *Provider Handbooks*) for information about procedure code J1050.

6.84 Meloxicam (Anjeso)

Meloxicam (procedure code J1738) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.85 Mepsevii (Vestronidase alfa-vjbk)

Vestronidase alfa-vjbk (Mepsevii) (procedure code J3397) is a benefit of Texas Medicaid for pediatric and adult clients with prior authorization. Vestronidase alfa-vjbk (Mepsevii) may be approved for a duration of every 12 months per prior authorization request.

For initial therapy, the following criteria must be met:

- Documentation of clinical signs and symptoms of Mucopolysaccharidosis VII (MPS VII) (e.g., skeletal deformities; enlarged liver, spleen, or both; airway obstruction or pulmonary problems; joint limitations; etc.)
- Diagnosis of Mucopolysaccharidosis VII (MPS VII, Sly syndrome) (diagnosis code E7629 or diagnosis code E763) supported by elevated urine glycosaminoglycans excretion at a minimum of 3-fold over the mean normal for age at screening and either or the following:
  - Beta-glucuronidase enzyme deficiency in peripheral blood based on leukocytes or cultured fibroblasts
  - Mutation in the glucuronidase beta (GUSB) gene, confirmed by molecular genetic testing

For renewal or continuation of therapy, the following criteria must be met:

- Client has previously received treatment with vestronidase alfa-vjbk without an adverse reaction.
- Documentation from physician confirms client has experienced an improvement in clinical response compared to pretreatment baseline (e.g., stability in skeletal deformities; reduction in liver volume; reduction in spleen volume, or both; stable or improved pulmonary function; improved endurance; and functional capacity, etc.).

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

6.86 Methotrexate

Methotrexate (Jylamvo) (procedure code J8611) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

Methotrexate (Xatmep) (procedure code J8612) is a benefit of Texas Medicaid for clients who are 18 years of age or younger.

6.87 Mirikizumab-mrkz

Mirikizumab-mrkz (procedure code J2267) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| K5100           | K51011 | K51012 | K51013 | K51014 | K51018 | K51019 | K5120  |
| K51211          | K51212 | K51213 | K51214 | K51218 | K51219 | K5130  | K51311 |
| K51312          | K51313 | K51314 | K51318 | K51319 | K5180  | K51811 | K51812 |
| K51813          | K51814 | K51818 | K51819 | K5190  | K51911 | K51912 | K51913 |
| K51914          | K51918 | K51919 |        |        |        |        |        |

6.88 Mirvetuximab Soravtansine-gynx (Elahere)

Mirvetuximab Soravtansine-gynx (Elahere) (procedure code J9063) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.89 Mogamulizumab-kpkc (Poteligeo)

Mogamulizumab-kpkc (Poteligeo) procedure code J9204 is a benefit of Texas Medicaid. Mogamulizumab-kpkc (Poteligeo) is a CCR4-directed monoclonal antibody indicated for the treatment of an adult client with relapsed or refractory mycosis fungoides or Sézary syndrome after at least one prior systemic therapy.

Mogamulizumab-kpkc (Poteligeo) (procedure code J9204) may be approved for a duration of every 12 months.

6.89.1 Prior Authorization Criteria

Prior authorization for initial therapy using mogamulizumab-kpkc (Poteligeo) infusion will be considered when all of the following criteria are met:

- The client is 18 years of age or older
- The client has relapsed or refractory disease
- The client has received at least one prior systemic therapy
- The client has a histologically confirmed diagnosis of Mycosis fungoides or Sézary syndrome

One of the following diagnosis codes must be submitted with procedure code J9204 if the diagnosis is mycosis fungoides:

| Diagnosis Codes for Mycosis Fungoides |       |       |       |       |       |       |       |
|---------------------------------------|-------|-------|-------|-------|-------|-------|-------|
| C8400                                 | C8401 | C8402 | C8403 | C8404 | C8405 | C8406 | C8407 |
| C8408                                 | C8409 |       |       |       |       |       |       |

One of the following diagnosis codes must be submitted with procedure code J9204 if the diagnosis is sézary syndrome:

| Diagnosis for Sézary Syndrome |       |       |       |       |       |       |       |
|-------------------------------|-------|-------|-------|-------|-------|-------|-------|
| C8410                         | C8411 | C8412 | C8413 | C8414 | C8415 | C8416 | C8417 |
| C8418                         | C8419 |       |       |       |       |       |       |

For renewal or continuation of therapy, the client must meet all the following requirements:

- The client demonstrates partial or complete response to treatment or stabilization of disease, shown by a decrease in spread or size of the tumor
- The absence of unacceptable drug toxicity, such as dermatological toxicity, severe infection, infusion reactions (Stevens-Johnson Syndrome or toxic epidermal necrolysis), and life-threatening autoimmune complications

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

6.90 Monoclonal Antibodies

6.90.1 Omalizumab

Omalizumab may be a benefit of Texas Medicaid when medically necessary with prior authorization.

Omalizumab (procedure code J2357) is an injectable drug that is FDA-approved for the following treatments:

- Clients who are 6 years of age or older with moderate to severe persistent asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma).
- Clients who are 12 years of age or older and have chronic spontaneous urticaria (CSU) who remain symptomatic despite H1 antihistamine treatment.
- Add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRwNP) in adult clients who are 18 years of age or older with inadequate response to nasal corticosteroids.
- IgE-mediated food allergy in adult and pediatric clients who are 1 year of age or older for the reduction of allergic reactions (Type I), including anaphylaxis, that may occur with accidental exposure to one or more foods.

Clients who are younger than the FDA approved age will be considered on a case-by-case basis by the TMHP medical director.

### **6.90.2 Benralizumab**

Benralizumab (procedure code J0517) is a benefit of Texas Medicaid for clients who are 6 years of age and older with prior authorization.

Benralizumab is an injectable drug that is FDA-approved and indicated for the following treatment:

- Add-on maintenance treatment of clients who are 6 years of age or older and have severe asthma with an eosinophilic phenotype
- Adult clients who are 18 years of age or older with eosinophilic granulomatosis with polyangiitis (EGPA)

### **6.90.3 Mepolizumab**

Mepolizumab (procedure code J2182) is a benefit of Texas Medicaid when medically necessary with prior authorization.

Mepolizumab is an injectable drug that is approved by the FDA and indicated for the following treatments:

- Add-on maintenance treatments for clients who are 6 years of age or older and have severe asthma with an eosinophilic phenotype
- Adult clients who are 18 years of age or older with eosinophilic granulomatosis with polyangiitis (EGPA)
- Adult and pediatric clients who are 12 years of age or older with hypereosinophilic symptoms (HES) for 6 months or longer without identifiable non-hematologic secondary cause
- Add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult clients who are 18 years of age or older with inadequate response to nasal corticosteroids

Clients who are younger than the FDA-approved age will be considered on a case-by-case basis by the TMHP medical director.

### **6.90.4 Reslizumab**

Reslizumab (procedure code J2786) is a benefit of Texas Medicaid when medically necessary with prior authorization.

Reslizumab is an injectable drug that is FDA-approved and indicated for the treatment of clients who are 18 years of age and older and have severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and Management of Asthma) with an eosinophilic phenotype. Clients who are younger than the FDA-approved age will be considered on a case-by-case basis by the TMHP medical director.

### **6.90.5 Tezepelumab-ekko (Tezspire)**

Tezepelumab-ekko (procedure code J2356) is a benefit of Texas Medicaid when medically necessary with prior authorization.

Tezepelumab-ekko is an injection drug that is FDA-approved and indicated as an add-on maintenance treatment of adult and pediatric clients who are 12 years of age and older with severe asthma.

### **6.90.6 Prior Authorization for Omalizumab, Benralizumab, Mepolizumab, Reslizumab, and Tezepelumab-ekko**

Prior authorization for omalizumab (Xolair) will be considered for the following:

- Moderate to severe persistent asthma
  - Client is 6 years of age or older.
  - Client has a diagnosis of moderate to severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis codes J4540 and J4550).
  - Client has a positive skin test or radioabsorbent assay test (RAST) to a perennial (not seasonal) aeroallergen within the past 36 months.
  - Client has a total IgE level greater than 30 IU/ml but less than 1300 IU/ml within the past 12 months.
- Chronic Spontaneous Urticaria (CSU)
  - Client is 12 years of age or older
  - Client has a diagnosis of CSU with symptoms despite H1 antihistamine treatment (diagnosis code L501).
  - Documentation supporting medical necessity for the treatment of CSU with omalizumab must be submitted with request and include the following:
    - Documented failure of, or contraindication to, antihistamine
    - Evidence of an evaluation that excludes other medical diagnosis associated with chronic urticaria
- Add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRwNP)
  - Client is 18 years of age or older
  - Client has a diagnosis of CRwNP (diagnosis codes J330, J331, J338, J339) with inadequate response to nasal corticosteroids
  - Documentation supporting medical necessity for maintenance treatment of nasal polyps with omalizumab must be submitted with the request and include the following:
    - Client has bilateral nasal polyposis confirmed by physical examination or nasal endoscopy
    - Documented failure of, or contraindication to, prior corticosteroids as monotherapy
    - Documented inadequate response to prior corticosteroid treatments
- IgE-mediated food allergy to reduce allergic reactions (Type I)

- Client has a diagnosis of IgE-mediated food allergy (diagnosis codes Z91010, Z91011, Z91012, Z91013, Z91018)
- Client is 1 year of age or older
- Must use drug in conjunction with food allergen avoidance

Prior authorization for benralizumab (Fasenra) will be considered for the following:

- Severe asthma with eosinophilic phenotype
  - Client is 6 years of age or older
  - Client has a diagnosis of severe asthma with eosinophilic phenotype (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and Management of Asthma) (diagnosis codes J4550, J4551, J4552, and J8283)
- Eosinophilic Granulomatosis with Polyangiitis (EGPA)
  - Client is 18 years of age or older
  - Client has a medical history of asthma
  - Client has a diagnosis of EGPA (diagnosis code M301)
  - Client has a refractory disease or has had a history of EGPA relapse

Prior authorization for mepolizumab (Nucala) will be considered for the following:

- Severe asthma with eosinophilic phenotype
  - Client is 6 years of age or older

Client has a diagnosis of severe asthma with eosinophilic phenotype (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis codes J4550, J4551, J4552, and J8283).

- Eosinophilic granulomatosis with polyangiitis (EGPA)
  - Client is 18 years of age or older
  - Confirmed diagnosis of eosinophilic granulomatosis with polyangiitis (diagnosis code M301)
  - Documentation supporting medical necessity for treatment of EGPA with mepolizumab must be submitted with the request and meet the following:
    - Diagnosis of EGPA
    - Medical history of asthma
    - Presence of at least 2 of the following EGPA characteristics below:
      - Histopathological findings of eosinophilic vascularitis, perivascularitis eosinophilic infiltration or eosinophil-rich granulomatous inflammation
      - Neuropathy
      - Pulmonary infiltrates, non-fixed; Sino-nasal abnormality
      - Cardiomyopathy
      - Glomerulonephritis
      - Alveolar hemorrhage
      - Palpable purpura

- Anti-neutrophils cytoplasmic antibody
- Client use of an oral glucocorticoid and/or cyclophosphamide, azathioprine, methotrexate, or leflunomide
- Refractory disease or has had a history of EGPA relapse
- Hypereosinophilic Symptoms (HES)
  - Client is 12 years of age or older
  - Client has a diagnosis of hypereosinophilic symptoms (HES) for 6 months or longer without identifiable non-hematologic secondary cause (diagnosis codes D72110, D72111, D72118, and D72119)
  - Documents supporting medical necessity for treatment of HES in clients who are 12 years of age or older with mepolizumab must be submitted with the request and meet all of the following:
    - Diagnosis of HES for 6 months or longer without any non-hematologic secondary cause
    - History of 2 or more HES flares (flare defined as worsening clinical symptoms or blood eosinophil counts requiring an increase in prior therapy) within the past 12 months prior to the initiation of Mepolizumab therapy
    - Prescriber's attestation that client has been on a stable dose of HES therapy which includes, but no limited to corticosteroids, immunosuppressive and cytotoxic therapy
- Chronic Rhinosinusitis with Nasal Polyps (CRSwNP)
  - Prior authorization for mepolizumab (Nucala) will be considered for clients as an add-on maintenance treatment of chronic rhinosinusitis with nasal polyps when all the following are met:
    - Client is 18 years of age or older
    - Confirmed diagnosis of chronic rhinosinusitis with nasal polyps (diagnosis codes J330, J331, J338, J339)
    - Evidence of inadequate response to nasal corticosteroid

Prior authorization for reslizumab (Cinqair®) will be considered for clients who are 18 years of age or older with severe asthma (as defined by the National Heart, Lung and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis codes J4550, J4551, J4552, and J8283).

Prior authorization for tezepelumab-ekko (Tezspire) will be considered for the following:

- Add-on maintenance for severe asthma
  - Client is 12 years of age and older
  - Client has a diagnosis of severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis codes J4550 and J4551).
  - Tezepelumab-ekko is being used as an add-on maintenance therapy. Tezepelumab-ekko is not to be used as a single or primary therapy.
  - Client is currently on the following as a regular treatment for severe asthma and compliant on the therapy:
    - Medium or high-dose inhaled corticosteroid therapy, and
    - An additional asthma controller
  - Tezepelumab-ekko should not be used for relief of acute bronchospasm or status asthmaticus.

- Tezepelumab-ekko may not be used in combination with anti-IgE, anti-IL4 or anti-IL5 monoclonal antibody agents (i.e., benralizumab, omalizumab, mepolizumab, reslizumab, dupilumab, etc.)
- Tezepelumab-ekko should not be administered concurrently with live attenuated vaccination.

A client with preexisting helminth infections should be treated prior to receiving omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko therapy.

- If there is active helminth infection, the client should be treated with anti-helminth treatment.
- If there is no response, treatment should be discontinued until the parasitic infection resolves.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

### **6.90.7 Prior Authorization Criteria for Asthma — Moderate to Severe (Omalizumab) and Severe (Benralizumab, Mepolizumab, Reslizumab, and Tezepelumab-ekko)**

Requests for prior authorization must be submitted by the treating physician to the Special Medical Prior Authorization (SMPA) department by mail or approved electronic method using the SMPA request form.

Documentation supporting medical necessity for treatment of asthma with omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko must be submitted with the request and must indicate the following:

- Symptoms are inadequately controlled with use of any of the following combination therapies:
  - A minimum of 3 months of controller medication (which includes but is not limited to a long-acting beta2-agonist [LABA], an inhaled or oral corticosteroid, leukotriene receptor antagonist [LTRA], or theophylline), unless the individual is intolerant of or has a medical contraindication to these agents

**Note:** *Exceptions to the criteria above will be considered on a case-by-case basis, which will require a letter from the prescribing provider stating the medical necessity for omalizumab, benralizumab, mepolizumab, or reslizumab, the client’s asthma severity level, and the duration of current and past therapies and lack of asthma control. Consideration for these exceptions will be reviewed by the TMHP medical director.*

Prior authorization approvals for omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko are for intervals of six months at a time. Clients must be compliant with their omalizumab, benralizumab, mepolizumab, reslizumab, tezepelumab-ekko regimen in order to qualify for additional prior authorizations. The provider must submit a statement documenting compliance with the requests for each renewal.

Treatment of benralizumab, mepolizumab, or reslizumab may not be used concurrently with omalizumab or any other interleukin-5 antagonist.

Tezepelumab-ekko may not be used in combination with anti-IgE, anti-IL4 or anti-IL5 monoclonal antibody agents (i.e., benralizumab, omalizumab, mepolizumab, reslizumab, dupilumab, etc.)

### **6.90.8 Requirements for Continuation of Therapy for Omalizumab, Benralizumab, Mepolizumab, Reslizumab, or Tezepelumab-ekko**

For continuation of therapy with omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko after 6 continuous months, the requesting provider must submit the following documentation of the client’s compliance and satisfactory clinical response to omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko:

- Documentation of clinical improvement must include one or more of the following:

- Decreased utilization of rescue medications; or
- Increase in predicted FEV1 (forced expiratory volume) from pretreatment baseline; or
- Reduction in reported asthma-related symptoms, as evidenced by decreases in frequency or magnitude of one or more of the following symptoms:
  - Asthma attacks
  - Chest tightness or heaviness
  - Coughing or clearing throat
  - Difficulty taking deep breath or difficulty breathing out
  - Shortness of breath
  - Sleep disturbance, night waking, or symptoms upon awakening
  - Tiredness
  - Wheezing/heavy breathing/fighting for air, and
- Member has not exhibited symptoms of hypersensitivity or anaphylaxis (bronchospasm, hypotension, syncope, urticaria, and/or angioedema) after administration of omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko.

After lapses in treatment of 3 months or greater, prior authorization requests submitted with documentation will be reviewed by the TMHP medical director.

Requests for clients who do not meet the above criteria will be reviewed for medical necessity by the TMHP medical director.

### **6.90.9 Reimbursement**

Procedure codes J0517, J2182, J2356, J2357, and J2786 may not be billed in any combination for the same date of service by any provider.

Providers may not bill for an office visit if the only reason for the visit is an omalizumab, benralizumab, mepolizumab, reslizumab, or tezepelumab-ekko injection.

### **6.90.10 Mosunetuzumab-axgb**

Mosunetuzumab-axgb (procedure code J9350) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## **6.91 Nadofaragene Firadenovec-vncg (Adstiladrin)**

Nadofaragene firadenovec-vncg (Adstiladrin) is an adenoviral vector-based gene therapy indicated to treat adult clients with high-risk *Bacillus Calmette-Guérin* (BCG)-unresponsive non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.

Nadofaragene firadenovec-vncg (Adstiladrin) (procedure code J9029) is a benefit of Texas Medicaid for clients who are 18 years of age or older with prior authorization.

### **6.91.1 Prior Authorization Requirements**

Prior authorization is required for nadofaragene firadenovec-vncg (Adstiladrin) therapy and must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

Initial therapy for nadofaragene firadenovec-vncg (Adstiladrin) may be approved for a 6-month duration for clients who meet the following requirements:

- The client is 18 years of age or older.

- The client has a confirmed diagnosis of non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.
- The client’s disease is high-risk and BCG unresponsive as defined as persistent disease following adequate BCG therapy, disease recurrence after an initial tumor-free state following adequate BCG therapy, or T1 disease following a single induction course of BCG.
- The client does not have any metastatic urothelial carcinoma.
- The client does not have a hypersensitivity to interferon alfa.
- The client is not immunocompromised or immunodeficient.

For renewal or continuation of therapy, the client continues to meet the requirements listed above and must:

- Have been treated with nadofaragene firadenovec-vncg (Adstiladrin) with no adverse reactions.
- Have no signs of unacceptable toxicity (e.g., risk of disseminated adenovirus infection) while on treatment with nadofaragene firadenovec-vncg (Adstiladrin).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

Subsection 5.5.1.2, “Document Requirements and Retention” in “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for additional information about electronic signatures.

6.92    **Natalizumab**

Procedure code J2323 is a benefit when billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| G35             | K5000  | K50011 | K50012 | K50013 | K50014 | K50018 | K5010  |
| K50111          | K50112 | K50113 | K50114 | K50118 | K5080  | K50811 | K50812 |
| K50813          | K50814 | K50818 | K5090  | K50911 | K50912 | K50913 | K50914 |
| K50918          | K50919 |        |        |        |        |        |        |

6.93    **Nitroglycerin**

Nitroglycerin (procedure code J2305) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.94    **Nivolumab and Relatlimab-rmbw**

Nivolumab and relatlimab-rmbw (procedure code J9298) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.95    **Nogapendekin Alfa Inbakicept-pmln (Anktiva)**

Nogapendekin alfa inbakicept-pmln (Anktiva) is an interleukin-15 (IL-15) receptor agonist indicated to treat adult clients with Bacillus Calmette-Guérin (BCG)-unresponsive non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.

Nogapendekin alfa inbakicept-pmln (Anktiva) is a benefit of Texas Medicaid (procedure code J9028) for adult clients with prior authorization.

### 6.95.1 Initial Requests

Initial therapy for nogapendekin alfa inbakicept-pmln (Anktiva) may be approved for a 6-month duration for clients who meet the following requirements:

- The client is at least 18 years of age or older.
- The client has a confirmed diagnosis of NMIBC with CIS with or without papillary tumors.
- The client's disease is high-risk and BCG unresponsive, defined as persistent disease following adequate BCG therapy, disease recurrence after an initial tumor-free state following adequate BCG therapy, or T1 disease following a single induction course of BCG.
- Nogapendekin alfa inbakicept-pmln (Anktiva) is used in combination with BCG.
- The client has undergone transurethral resection of bladder tumor (TURBT) to remove all resectable disease (Ta and T1 components).
- The client does not have any metastatic urothelial carcinoma.

### 6.95.2 Recertification or Extension

For renewal or continuation of therapy of nogapendekin alfa inbakicept-pmln (Anktiva), the client must meet the following requirements:

- The client continues to have a diagnosis as listed in the initial authorization section above and has been treated with nogapendekin alfa inbakicept-pmln (Anktiva) in the past with no adverse reactions.
- The client has no signs of unacceptable toxicity (e.g., hematuria, dysuria, or micturition urgency) while on treatment with nogapendekin alfa inbakicept-pmln (Anktiva).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

## 6.96 Onasemnogene abeparvovec-xioi (Zolgensma)

Onasemnogene abeparvovec-xioi (Zolgensma) is a benefit of Texas Medicaid, with prior authorization. Claims for onasemnogene abeparvovec-xioi (Zolgensma) must be submitted with unlisted procedure code J3399.

Onasemnogene abeparvovec-xioi (Zolgensma) (procedure code J3399) is limited to one treatment per lifetime, per client.

Onasemnogene abeparvovec-xioi (Zolgensma) is a one-time infusion therapy indicated for the treatment of a client who meets all of the following requirements:

- Has spinal muscular atrophy (SMA)
- Has biallelic mutations in the survival motor neuron 1 (SMN1) gene
- Is 24 months of age or younger

Onasemnogene abeparvovec-xioi (Zolgensma) is not a benefit for clients with a tracheostomy or invasive ventilator support.

### 6.96.1 Prior Authorization Requirements

To be considered for the approval of a one-time intravenous infusion, prior authorization requests for onasemnogene abeparvovec-xioi (Zolgensma) (unlisted procedure code J3399) must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

All of the following must be included in Section C (located under Statement of Medical Necessity) of the Special Medical Prior Authorization (SMPA) Request Form:

- Documentation of the client's dosage
- Administration schedule
- Number of injections to be administered during the prior authorization period
- Requested units per injection
- Dosage calculation

The Special Medical Prior Authorization (SMPA) Request Form must be completed, signed, and dated by the prescribing provider. The completed form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review. The form will not be accepted beyond 90 days from the date of the prescribing provider's signature.

### **6.96.2 \* Documentation Requirements**

The prior authorization request for an onasemnogene abeparvovec-xioi (Zolgensma) single-dose intravenous infusion must include documentation of all of the following:

- Client is 24 months of age or younger.
- Medical record supports any of the following mutation or deletion of genes in chromosome 5q:
  - Homozygous gene deletion of the SMN1 gene (e.g., absence of SMN1 gene)
  - Homozygous mutation of the SMN1 gene (e.g., biallelic mutation of exon 7)
  - Compound heterozygous mutation in the SMN1 gene (e.g., deletion of SMN1 exon 7 [allele 1] and mutation of SMN1 [allele 2])
- **[Revised] Confirmed diagnosis of SMA (diagnosis codes G120, G121, G128, and G129) based on gene mutation analysis with biallelic SMN1 mutation (deletion or point mutation).**
- The administration of onasemnogene abeparvovec-xioi (Zolgensma) may cause serious liver injury or failure. Providers must also complete the following to administer the drug:
  - Examine the client's liver function by clinical examination and laboratory testing (e.g., hepatic aminotransferases [aspartate aminotransferase (AST) and alanine aminotransferase (ALT)], total bilirubin, and prothrombin time) before infusion of onasemnogene abeparvovec-xioi (Zolgensma).
  - Administer a systemic corticosteroid before and after the administration of the drug.
  - Continue to monitor the client's liver function at least 3 months after the infusion of the drug.
- Evaluation of motor skill and function must be documented using a standardized test. However, it is not a prerequisite of therapy and should not delay treatment. Standardized testing tools that may be used to evaluate motor skill/function include, but are not limited to:
  - Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorder (CHOP-INTEND) score
  - Bayley scale of infant and toddler development screening test
  - WHO Multicenter Growth Reference Study (WHO MGRS)
- Baseline documentation supports an AAV9 antibody titer of 1:50 or lower, as determined by enzyme-linked immunosorbent assay (ELISA) binding immunoassay.
- Physician attestation supports that the client has not received prior onasemnogene abeparvovec-xioi (Zolgensma) therapy.

If nusinersen (Spinraza) (procedure code J2326) or risdiplam (Evrysdi) have been previously prescribed, the prescriber must provide documentation of one of the following before switching to onasemnogene abeparvovec-xioi (Zolgensma) therapy:

- Evidence of clinical deterioration (e.g., decreased physical function and motor skill/function test scores) while on nusinersen (Spinraza) or risdiplam (Evrysdi) therapy
- Prescriber's attestation that nusinersen (Spinraza) or risdiplam (Evrysdi) therapy has been discontinued

## 6.97 Panhematin

Panhematin (procedure code J1640) is a benefit of Texas Medicaid and is limited to diagnosis code E8021.

## 6.98 \* Pegcetacoplan (Empaveli)

[Revised] Pegcetacoplan (Empaveli) (procedure code J2781) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

## 6.99 Pemivibart

Pemivibart (intravenous infusion procedure code M0224) and (injection procedure code Q0224) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

## 6.100 Phenylephrine Hydrochloride (Immphentiv)

Phenylephrine hydrochloride (Immphentiv) (procedure code J2373) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

## 6.101 Polyneuropathy of Hereditary Transthyretin-mediated (hATTR) Amyloidosis

Onpattro (Patisiran) and Amvuttra (Vutrisiran) are benefits of Texas Medicaid with prior authorization for the treatment of the polyneuropathy of hereditary transthyretin-mediated (hATTR) amyloidosis in adults.

Prior authorization requests for patisiran (procedure code J0222) and vutrisiran (procedure code J0225) must be submitted with a Special Medical Prior Authorization (SMPA) Request Form and may be approved for 12 months per prior authorization request.

For initial therapy of patisiran (Onpattro), all of the following criteria must be met:

- The client is 18 years of age or older.
- The client has a diagnosis of hATTR amyloidosis (diagnosis code E851), supported by the following:
  - Transthyretin (TTR) mutation proven by genetic testing
  - Clinical signs and symptoms of the disease (e.g., peripheral/autonomic neuropathy, motor disability)
- The client will not receive patisiran (Onpattro) therapy in combination with other polyneuropathy hATTR amyloidosis therapies (e.g., inotersen tafamidis meglumine or vutrisiran).
- The client has not had a liver transplant.

For initial therapy of vutrisiran (Amvuttra), all of the following criteria must be met:

- The client is 18 years of age or older
- The client has a diagnosis of hATTR amyloidosis (diagnosis code E851), supported by the following:

- Transthyretin (TTR) mutation proven by genetic testing
- Clinical signs and symptoms of the disease (e.g., peripheral or autonomic neuropathy, motor disability)
- The client will not receive vutrisiran (Amvuttra) therapy in combination with other therapies for polyneuropathy caused by hATTR amyloidosis (e.g., inotersen, patisiran, or tafamidis meglumine).
- The client will receive vitamin A supplementation at the recommended daily allowance while on vutrisiran (Amvuttra) therapy.
- The client has not had a liver transplant.

For renewal or continuation of therapy, all of the following criteria must be met:

- The client has previously received treatment with patisiran (Onpattro) or vutrisiran (Amvuttra) without an adverse reaction.
- The client has a positive clinical response to patisiran (Onpattro) or vutrisiran (Amvuttra) (e.g., improved neurologic impairment, improved motor function, slowing of disease progression).

Documentation of the client’s dosage, administration schedule, number of injections to be administered during the prior authorization period, requested units per injection, and the dosage calculation must be submitted in Section C of the Special Medical Prior Authorization (SMPA) Request Form under Statement of Medical Necessity.

*Referto:* Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

**6.102 Plasminogen Human-tvmh (Ryplazim)**

Plasminogen human-tvmh (Ryplazim) (procedure code J2998) is a benefit of Texas Medicaid and is limited to diagnosis code E8802.

**6.103 Plazomicin**

Plazomicin (procedure code J0291) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.104 Ravulizumab-cwvz (Ultomiris)**

Ravulizumab-cwvz (procedure code J1303) is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

| Diagnosis Codes |       |       |       |      |      |      |      |
|-----------------|-------|-------|-------|------|------|------|------|
| D588            | D5930 | D5932 | D5939 | D594 | D595 | D598 | G360 |
| G7000           | G7001 |       |       |      |      |      |      |

**6.105 Remimazolam**

Remimazolam (procedure code J2249) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.106 Retifanlimab-dlwr (Zynyz)**

Retifanlimab-dlwr (procedure code J9345) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.107 Rilonacept (Arcalyst)

Rilonacept (procedure code J2793) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

### 6.108 Risperidone

Risperidone (Perseris) (procedure code J2798) and (Uzedy) (procedure code J2799) are benefits of Texas Medicaid for clients who are 18 years of age or older.

### 6.109 Rituximab-Abbs, (Truxima)

Rituximab-abbs (Truxima) (procedure code Q5115) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.110 Romosozumab

Romosozumab (procedure code J3111) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.111 Ronzanolixizum-noli (Rystiggo)

Ronzanolixizum-noli (procedure code J9333) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to diagnosis codes G7000 and G7001.

### 6.112 \* Sickle Cell Disease Gene Therapy

Exagamglogene autotemcel (Casgevy) is an autologous genome edited hematopoietic stem cell-based gene therapy indicated for the treatment of clients who are 12 years of age or older with one of the following:

- Sickle cell disease (SCD) with recurrent vaso-occlusive crises, or
- Transfusion-dependent  $\beta$ -thalassemia

[Revised] Exagamglogene autotemcel (Casgevy) (procedure code J3392) and lovotibeglogene autotemcel (Lyfgenia) (procedure code J3394) are benefits of Texas Medicaid with prior authorization. Prior authorization is approved for a duration of 12 months.

Exagamglogene autotemcel (Casgevy) (procedure code J3392) is limited to one transfusion treatment per lifetime.

Lovotibeglogene autotemcel (Lyfgenia) is an autologous hematopoietic stem cell-based gene therapy indicated for the treatment of clients who are 12 years of age or older with sickle cell disease and a history of vaso-occlusive events with at least four vaso-occlusive events in the past 24 months or currently receiving chronic transfusion therapy for recurrent vaso-occlusive events.

Lovotibeglogene autotemcel lovotibeglogene autotemcel (Lyfgenia) (procedure code J3394) is limited to one transfusion treatment per lifetime.

#### 6.112.1 \* Prior Authorization Requirements

##### Exagamglogene Autotemcel (Casgevy)

Prior authorization requests for exagamglogene autotemcel (Casgevy) and lovotibeglogene autotemcel (Lyfgenia) must be submitted using the Special Medical Prior Authorization (SMPA) Request Form.

Exagamglogene autotemcel (Casgevy) is a one-time infusion therapy indicated for the treatment of clients for whom autologous hematopoietic stem cell transplantation is appropriate and who meet all the following criteria:

- The client is 12 years of age or older and has been diagnosed with sickle cell disease.
- [Revised] The client has a diagnosis of sickle cell disease as confirmed by genetic testing with recurrent vaso-occlusive crises, with at least two vaso-occlusive crisis events per year in the past 2 years, as documented with one of the following diagnosis codes or provider attestation:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| D5700           | D5701  | D5702  | D5703  | D5704  | D5709  | D571   | D5720  |
| D57211          | D57212 | D57213 | D57214 | D57218 | D57219 | D5740  | D57411 |
| D57412          | D57413 | D57414 | D57418 | D57419 | D5742  | D57431 | D57432 |
| D57433          | D57434 | D57438 | D57439 | D5744  | D57451 | D57452 | D57453 |
| D57454          | D57458 | D57459 | D5780  | D57811 | D57812 | D57813 | D57814 |
| D57818          | D57819 |        |        |        |        |        |        |

- The client has inadequate response to hydroxyurea or crizanlizumab.
- The client is 12 years of age or older and has been diagnosed with transfusion-dependent  $\beta$ -thalassemia, and the following additional criteria must be met:
  - Genetic testing confirms the client’s diagnosis of transfusion-dependent  $\beta$ -thalassemia, as documented with diagnosis code D561 or D565.
  - The client has a history of requiring at least 100 mL/kg/year or ten units/year of red blood cell (RBC) transfusions in the past 24 months.
- [Revised] The client has not previously received allogeneic or autologous hematopoietic stem cell transplantation.
- The client has not previously received exagamglogene autotemcel (Casgevy) or any other gene therapy.
- The client has a confirmed negative serum pregnancy test.
- The client does not have active HIV-1, HIV-2, HBV, or HCV.
- The client has a history of requiring at least 100 mL/kg/year or 10 units/year of red blood cell (RBC) transfusions in the past 24 months.
- The client does not have advanced liver or chronic kidney disease.
- For transfusion-dependent  $\beta$ -thalassemia diagnosis, prescriber attestation will be required to discontinue iron chelators at least 7 days prior to initiation of myeloablative conditioning.

For diagnosis of sickle cell disease, the prescriber attestation is required for the following:

- Hydroxyurea is discontinued at least eight weeks before mobilization and conditioning.
- Crizanlizumab is discontinued at least eight weeks before mobilization or conditioning.
- Iron chelators are discontinued at least seven days before initiation of myeloablative conditioning.

Monitoring parameters for exagamglogene autotemcel (Casgevy) are as follows:

- Monitor for bleeding and conduct frequent platelet counts until platelet engraftment and platelet recovery are achieved.
- Monitor absolute neutrophil counts until engraftment has been achieved.

**Lovotibeglogene autotemcel (Lyfgenia)**

Lovotibeglogene autotemcel (Lyfgenia) is a one-time infusion therapy indicated for the treatment of clients for whom autologous hematopoietic stem cell transplantation is appropriate and who meets the following requirements:

- The client is 12 years of age or older at the expected time of gene therapy administration.
- [Revised] The client has a diagnosis of sickle cell disease confirmed by genetic testing and a history of vaso-occlusive events, with at least four vaso-occlusive events in the past 24 months, or currently receiving chronic transfusion therapy for recurrent vaso-occlusive events, as documented with one of the following diagnosis codes or provider attestation:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| D5700           | D5701  | D5702  | D5703  | D5704  | D5709  | D571   | D5720  |
| D57211          | D57212 | D57213 | D57214 | D57218 | D57219 | D5740  | D57411 |
| D57412          | D57413 | D57414 | D57418 | D57419 | D5742  | D57431 | D57432 |
| D57433          | D57434 | D57438 | D57439 | D5744  | D57451 | D57452 | D57453 |
| D57454          | D57458 | D57459 | D5780  | D57811 | D57812 | D57813 | D57814 |
| D57818          | D57819 |        |        |        |        |        |        |

- [Revised] The client has not previously received allogeneic or autologous hematopoietic stem cell transplantation.
- [Revised] The client has inadequate response or contraindication to hydroxyurea per the healthcare provider’s discretion.
- The client has not previously received lovotibeglogene autotemcel (Lyfgenia) or any other gene therapy.
- The client has a confirmed negative serum pregnancy test and is not breastfeeding.
- The client has confirmed negative serology test for HIV-1 or HIV-2.
- The client does not have advanced liver or chronic kidney disease.
- Prescribers must attest and document the following:
  - Hydroxyurea is discontinued two months before mobilization and two days before conditioning.
  - Anti-retroviral medication is discontinued at least one month before mobilization and until all cycles of apheresis are completed.
  - Iron chelators are discontinued at least seven days before initiation of myeloablative conditioning.

Monitoring parameters for lovotibeglogene autotemcel (Lyfgenia) are as follows:

- Monitor for evidence of malignancy through complete blood counts at least every six months and through integration site analysis at month 6, month 12, and as warranted.
- Monitor for thrombocytopenia and bleeding.
- Monitor neutrophil counts until engraftment has been achieved.

**6.112.2 Documentation Requirements**

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

### 6.113 Secukinumab (Cosentyx)

Secukinumab (Cosentyx) (procedure code J3247) is a benefit of Texas Medicaid for clients who are 2 years of age or older and is restricted to the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| L400            | L401  | L402  | L403  | L404  | L405  | L4050 | L4051 |
| L4052           | L4053 | L4054 | L4059 | L408  | L409  | M0880 | M450  |
| M451            | M452  | M453  | M454  | M455  | M456  | M457  | M458  |
| M459            | M4680 | M4681 | M4682 | M4683 | M4684 | M4685 | M4686 |
| M4687           | M4688 | M4689 |       |       |       |       |       |

### 6.114 Sirolimus Protein-bound Particles (Fyarro)

Sirolimus protein-bound particles (Fyarro) (procedure code J9331) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.115 Spesolimab-sbzo (Spevigo)

Spesolimab-sbzo (Spevigo) (procedure code J1747) is a benefit of Texas Medicaid for clients who are 12 years of age or older and restricted to diagnosis code L401.

### 6.116 Sutimlimab-jome (Enjaymo)

Sutimlimab-jome (Enjaymo) (procedure code J1302) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.117 Sumatriptan succinate (Imitrex)

Procedure code J3030 is a benefit when billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| G43001          | G43009 | G43011 | G43019 | G43101 | G43109 | G43111 | G43119 |
| G43401          | G43409 | G43411 | G43419 | G43501 | G43509 | G43511 | G43519 |
| G43601          | G43609 | G43611 | G43619 | G43701 | G43709 | G43711 | G43719 |
| G43801          | G43809 | G43811 | G43819 | G43821 | G43829 | G43831 | G43839 |
| G43901          | G43909 | G43911 | G43919 | G43A0  | G43A1  | G43B0  | G43B1  |
| G43C0           | G43C1  | G43D0  | G43D1  |        |        |        |        |

### 6.118 Tagraxofusp-erzs (Elzonris)

Tagraxofusp-erzs (Elzonris) (procedure code J9269) is a CD 123-directed cytotoxin indicated for the treatment of blastic plasmacytoid dendritic cell neoplasm (BPDCN) in adults and pediatric clients who are 2 years of age and older.

Tagraxofusp-erzs (Elzonris) (procedure code J9269) is a benefit of Texas Medicaid with prior authorization.

#### 6.118.1 Prior Authorization Requirements

Prior authorization is required for tagraxofusp-erzs (Elzonris) (procedure code J9269) and may be approved for a duration of every 12 months.

Prior authorization approval for tagraxofusp-erzs (Elzonris) infusion will be considered once all of the following criteria are met for initial therapy:

- Client has a diagnosis of blastic plasmacytoid dendritic cell neoplasm (diagnosis code C8640) excluding, acute promyelocytic leukemia (APL, FAB, M3)
- Client is 2 years of age or older
- Client has a CD-123 positive/expressing disease
- Client has adequate serum albumin level and baseline organ function, including cardiac, renal, and hepatic function prior to each course of therapy:
  - Baseline serum albumin level of 3.2 g/dl or greater
  - Left ventricular ejection fraction (LVEF) of 40% or greater
  - Serum creatinine (Scr) of 1.5 mg/dl or less
  - Bilirubin level of 1.5 mg/dl or less
- For renewal or continuation therapy, the client must meet all of the following criteria:
  - Client continues to meet initial approval criteria
  - Client has previously received treatment with tagraxofusp-erzs (Elzonris) with absence of drug toxicity (i.e. capillary leak syndrome, severe hepatotoxicity, and nephrotoxicity)
  - Client has a positive clinical response demonstrated by disease stabilization

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

**6.119 Talquetamab-tgvs (Talvey)**

Talquetamab-tgvs (procedure code J3055) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.120 Tarlatamab-dlle (Imdelltra)**

Tarlatamab-dlle (Imdelltra) is a bispecific delta-like ligand 3 (DLL3)-directed CD3 T-cell engager indicated for the treatment of adult clients with extensive stage small cell lung cancer (ES-SCLC) with disease progression on or after platinum-based chemotherapy.

Tarlatamab-dlle (Imdelltra) (procedure code J9026) is a benefit of Texas Medicaid with prior authorization.

Tarlatamab-dlle (Imdelltra) infusion is to be administered by a qualified healthcare professional in a healthcare setting with appropriate medical support.

**6.120.1 Initial Requests**

Tarlatamab-dlle (Imdelltra) is an intravenous infusion indicated for the treatment of a client who meets the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of extensive stage small cell lung cancer with one of the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| C3400           | C3401 | C3402 | C3410 | C3411 | C3412 | C342  | C3430 |
| C3431           | C3432 | C3480 | C3481 | C3482 | C3490 | C3491 | C3492 |

- The client has previously received platinum-based chemotherapy (e.g., cisplatin, or carboplatin).
- The client does not have a clinically significant active systemic infection.
- The prescriber attests to counseling female clients of childbearing age regarding the risk of embryo-fetal toxicity and counseling to prevent pregnancy during treatment period and two months after the last infusion of tarlatamab-dlle (Imdelltra) by using an effective method of contraception.

Providers should monitor the following parameters:

- Signs and symptoms of severe reactions such as cytokine release syndrome (CRS).
- Neurologic toxicity, including immune effector cell-associated neurotoxicity syndrome (ICANS).
- Cytopenia including neutropenia, thrombocytopenia, and anemia. Perform complete blood counts before each tarlatamab-dlle (Imdelltra) treatment.
- Signs and symptoms of hepatotoxicity. Monitor liver enzymes and bilirubin before each tarlatamab-dlle (Imdelltra) treatment.

### 6.120.2 Recertification or Extension

For renewal or continuation therapy of tarlatamabdille (Imdelltra), the client must meet the following requirements:

- The client continues to meet the requirements listed above and has been treated with tarlatamabdille (Imdelltra) in the past.
- The client experienced positive clinical response to treatment, as documented by stabilization of disease, and/or decrease in tumor size or spread.
- The client has not experienced any unacceptable, clinically significant adverse reactions or toxicity (e.g., severe cytopenia, hepatotoxicity, neurotoxicity, etc.) while on tarlatamab-dlle (Imdelltra) therapy.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

### 6.121 Tebentafusp-tebn (Kimmtrak)

Tebentafusp-tebn (Kimmtrak) (procedure code J9274) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.122 Teclistamab-cqyv (Tecvayli)

Teclistamab-cqyv (Tecvayli) (procedure code J9380) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.123 Teplizumab-mzwv (Tziel)

Teplizumab-mzwv (Tziel) is indicated to delay the onset of Stage 3 type 1 diabetes (T1D) in adult and pediatric clients who are 8 years of age or older with Stage 2 T1D.

Teplizumab-mzwv (Tziel) (procedure code J9381) is a benefit of Texas Medicaid with prior authorization.

Teplizumab-mzwv (Tziel) therapy may be approved for the 14-day treatment duration if all the following criteria are met:

- The client is 8 years of age or older.

- The client is given teplizumab-mzwv (Tzield) to delay the onset of Stage 3 T1D. The use of teplizumab-mzwv (Tzield) is not approved in type 2 diabetes or any other stages of type 1 diabetes other than Stage 2 T1D.
- The client has a diagnosis of Stage 2 T1D confirmed by the following:
  - Documentation of at least two positive pancreatic islet autoantibodies:
    - Islet cell autoantibody (ICA)
    - Insulinoma-associated antigen 2 autoantibody (IA-2A)
    - Insulin autoantibody (IAA)
    - Zinc transporter 8 autoantibody (ZnT8A)
    - Glutamic acid decarboxylase 65 (GAD) autoantibodies
  - Documentation of dysglycemia without overt hyperglycemia using oral glucose tolerance test (OGTT), or another appropriate test for dysglycemia may be used if OGTT is not available.
- The clinical history does not suggest that the client has type 2 diabetes.
- The prescriber must obtain and assess a complete blood count and liver enzyme tests prior to the initiation of treatment with teplizumab-mzwv (Tzield) because the use of teplizumab-mzwv (Tzield) is not recommended in clients with certain lab abnormalities.
- The prescriber must assess client's history of chronic infection and monitor for any signs of active serious infection while on teplizumab-mzwv (Tzield). If a serious infection develops, teplizumab-mzwv (Tzield) therapy should be discontinued.

## 6.124 Teprotumumab-trbw (Tepezza)

Teprotumumab-trbw (Tepezza) (procedure code J3241) is a benefit of Texas Medicaid and prior authorization is required. Teprotumumab-trbw (Tepezza) is indicated for the treatment of thyroid eye disease (TED) regardless of TED activity or duration.

### 6.124.1 Prior Authorization Requirements

Prior authorization requests for procedure code J3241 must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

The client must meet all of the following requirements for approval of Teprotumumab-trbw (Tepezza):

- The client has a diagnosis of Graves' disease associated with TED.
- The client is euthyroid, or the client has either mild hypothyroidism or mild hyperthyroidism.
- The client has no history of prior surgical intervention for TED and does not plan to have surgical treatment while on Teprotumumab-trbw (Tepezza).
- The client may not exceed the course of eight total infusions per lifetime.

### 6.124.2 Exclusions

Teprotumumab-trbw (Tepezza) should not be used in pregnancy as it may potentially lead to fetal loss. Females of reproductive potential should use effective contraception prior to initiation, during treatment with Teprotumumab-trbw (Tepezza) and for 6 months after the last dose of Teprotumumab-trbw (Tepezza).

### 6.125 Thyrotropin alpha for injection (Thyrogen)

Thyrotropin alpha for injection (Thyrogen) (procedure code J3240) is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

| Diagnosis Codes |       |       |        |      |      |      |      |
|-----------------|-------|-------|--------|------|------|------|------|
| C323            | C73   | D020  | D093   | D098 | D380 | D440 | D442 |

### 6.126 Tildrakizumab (Ilumya)

Tildrakizumab (procedure code J3245) is a benefit of Texas Medicaid for clients who are 18 years of age or older, and is limited to diagnosis code L400.

### 6.127 Tisotumab Vedotin-tftv

Tisotumab Vedotin-tftv (procedure code J9273) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.128 Tocilizumab-aazg (Tyenne)

Tocilizumab-aazg (Tyenne) (procedure code Q5135) is a benefit of Texas Medicaid for clients who are 2 years of age or older, and is limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| M0500           | M05011 | M05012 | M05019 | M05021 | M05022 | M05029 | M05031 |
| M05032          | M05039 | M05041 | M05042 | M05049 | M05050 | M05052 | M05059 |
| M05061          | M05062 | M05069 | M05071 | M05072 | M05079 | M0509  | M0510  |
| M05111          | M05112 | M05119 | M05121 | M05122 | M05129 | M05131 | M05132 |
| M05139          | M05141 | M05142 | M05149 | M05151 | M05152 | M05159 | M05161 |
| M05162          | M05169 | M05171 | M05172 | M05179 | M0519  | M0520  | M05211 |
| M05212          | M05219 | M05221 | M05222 | M05229 | M05231 | M05232 | M05239 |
| M05241          | M05242 | M05249 | M05251 | M05252 | M05259 | M05261 | M05262 |
| M05269          | M05271 | M05272 | M05279 | M0259  | M0530  | M05311 | M05312 |
| M05319          | M05321 | M05322 | M05329 | M05331 | M05332 | M05339 | M05341 |
| M05342          | M05349 | M05351 | M05352 | M05359 | M05361 | M05362 | M05369 |
| M05371          | M05372 | M05379 | M0539  | M0540  | M05411 | M05412 | M05419 |
| M05421          | M05422 | M05429 | M05431 | M05432 | M05439 | M05441 | M05442 |
| M05449          | M05451 | M05452 | M05459 | M05461 | M05462 | M05469 | M05471 |
| M05472          | M05479 | M0549  | M0550  | M05511 | M05512 | M05519 | M05521 |
| M05522          | M05529 | M05531 | M05532 | M05539 | M05541 | M05542 | M05549 |

| M08279          | M0829  | M082A  | M083   | M315   | M316   |        |        |

### 6.129 Toripalimab-tpzi

Toripalimab-tpzi (procedure code J3263) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.130 Trastuzumab

Procedure code J9355 is a benefit of Texas Medicaid. Reimbursement for this drug is considered when it is used as a single agent for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have received one or more chemotherapy regimens for their metastatic disease. Trastuzumab may also be reimbursed when:

- Used in combination with paclitaxel for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have not received chemotherapy for their metastatic disease.
- Used as part of a treatment regimen containing doxorubicin, cyclophosphamide, and paclitaxel for the adjuvant treatment of clients who have Her-2-overexpressing, node-positive breast cancer.

Trastuzumab is a benefit for clients whose tumors have Her-2 protein overexpression.

When billing for the test used to determine whether a client overexpresses the Her-2 protein, use procedure code 83950. Diagnosis of overexpression of the Her-2 protein must be made before Texas Medicaid will consider reimbursement for trastuzumab. This test may be reimbursed only once in a client's lifetime to the same provider. An additional test by the same provider requires documentation to support the medical necessity.

### 6.131 Travoprost

Travoprost (procedure code J7355) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.132 Tremelimumab-actl (Imjudo)

Tremelimumab-actl (Imjudo) (procedure code J9347) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.133 Treosulfan (Grafapex)

Treosulfan (Grafapex) (procedure code C9175) is a benefit of Texas Medicaid with prior authorization.

Treosulfan (Grafapex) is an alkylating drug indicated for use in combination with fludarabine as a preparative regimen for allogeneic hematopoietic stem cell transplantation (HSCT) in adult and pediatric clients who are 1 year of age or older with acute myeloid leukemia (AML) or myelodysplastic syndrome (MDS).

6.133.1 Prior Authorization Requirements

Treosulfan (Grafapex) is an intravenous infusion, given on three consecutive days in conjunction with fludarabine prior to hematopoietic stem cell infusion. It is indicated for clients who meet the following requirements:

- The client is 1 year of age or older.
- The client has a confirmed diagnosis of one of the following:
  - Acute myeloid leukemia (diagnosis code C9200)
  - Myelodysplastic syndrome (diagnosis code D469)
- The client is undergoing allogeneic hematopoietic stem cell transplantation.
- Fludarabine must be administered in conjunction with treosulfan (Grafapex) as a preparative regimen for allogeneic HSCT.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment and up to six months after the last dose of therapy. Male clients with female partners of reproductive potential should also be counseled.

The required monitoring parameters following treosulfan (Grafapex) are:

- Monitor hematologic laboratory parameters, as treosulfan (Grafapex) can cause severe and prolonged myelosuppression.
- Monitor for signs of neurological adverse reactions (e.g., seizures).
- Monitor for extravasation and tissue necrosis.
- Monitor for infections, anemia, thrombocytopenia, and secondary malignancies.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

6.134 Triamcinolone Acetonide

Procedure code J3304 is a benefit of Texas Medicaid and is restricted to the following diagnosis codes:

| Diagnosis Codes |       |       |      |       |       |      |      |
|-----------------|-------|-------|------|-------|-------|------|------|
| M170            | M1711 | M1712 | M172 | M1731 | M1732 | M174 | M175 |

6.135 Trilaciclib (Cosela)

Trilaciclib (procedure code J1448) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.136 Ublituximab-xiyy (Briumvi)

Ublituximab-xiyy (Briumvi) (procedure code J2329) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

### 6.137 Valoctocogene Roxaparvovec-rvox (Roctavian)

Valoctocogene roxaparvovec-rvox (Roctavian) is an adeno-associated virus vector-based gene therapy indicated to treat adult clients with severe hemophilia A (congenital Factor VIII deficiency with factor VIII activity < 1 IU/dL) without pre-existing antibodies to adeno-associated virus serotype 5 (AAV5) detected by an FDA-approved test.

Valoctocogene roxaparvovec-rvox (Roctavian) (procedure code J1412) is a benefit of Texas Medicaid with prior authorization and restricted to diagnosis code D66. Procedure code J1412 is limited to once per lifetime.

#### 6.137.1 Prior Authorization Requirements

Prior authorization is required for valoctocogene roxaparvovec-rvox (Roctavian) therapy and must be submitted with a Special Medical Prior Authorization Form.

Valoctocogene roxaparvovec-rvox (Roctavian) is a one-time infusion therapy indicated for the treatment of a client who meets the following criteria:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of severe Hemophilia A (congenital Factor VIII deficiency) as defined by:
  - Factor VIII activity level < 1 IU/dL (in the absence of exogenous Factor VIII).
- Evidence of other bleeding disorders not related to Hemophilia A has been ruled out.
- The client has no history of Factor VIII inhibitors and a negative screening test prior to treatment.
- The client's baseline test (as determined by an FDA-approved test) is negative for pre-existing antibodies to adeno-associated virus serotype 5 (AAV5).
- The client's baseline liver function assessment must be assessed prior to valoctocogene roxaparvovec-rvox (Roctavian) infusion and include the following documentation, but not limited to:
  - Alanine aminotransferase (ALT), aspartate aminotransferase (AST), alkaline phosphatase (ALP), and total bilirubin.
  - Hepatic ultrasound and elastography or laboratory assessments for liver fibrosis must be provided.
- The prescriber attests to counseling clients regarding consuming alcohol post-administration of valoctocogene roxaparvovec-rvox (Roctavian).
- The client does not have any active infections, either acute or chronic.
- The client does not have stage 3 or 4 liver fibrosis or cirrhosis.
- The client does not have a known hypersensitivity to mannitol.
- The client does not have a history of previously receiving treatment with valoctocogene roxaparvovec-rvox (Roctavian) infusion.

Monitoring parameters after valoctocogene roxaparvovec-rvox (Roctavian) infusion include the following:

- Monitor hepatic function and liver enzymes. Alanine aminotransferase (ALT) should be monitored weekly for at least 26 weeks post-infusion as there are risks of hepatotoxicity. Monitor for and manage adverse reaction from corticosteroid use.
- Monitor for elevated Factor VIII activity as thromboembolic events may occur with elevated factor VIII activity above the upper limit of normal (ULN).
- Monitor for hepatocellular malignancy in patients with risk factors for hepatocellular carcinoma (e.g., hepatitis B or C, non-alcoholic fatty liver disease, chronic alcohol consumption, non-alcoholic steatohepatitis, advanced age). Perform regular (annually) liver ultrasound and alpha-fetoprotein testing following administration.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

**Referto:** Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

Subsection 5.5.1.2, “Document Requirements and Retention” in “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for additional information about electronic signatures.

**6.138 Valrubicin sterile solution for intravesical instillation (Valstar)**

Procedure code J9357 valrubicin sterile solution for intravesical instillation (Valstar), is a benefit for clients with the diagnosis of bladder cancer in situ who have been treated unsuccessfully with BCG therapy and have an unacceptable morbidity or mortality risk if immediate cystectomy should be performed. Documentation of diagnosis and treatment must be submitted with the claim.

**6.139 Vasopressin**

Vasopressin (procedure codes J2598, J2599, and J2601) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

**6.140 Vitamin B12 (Cyanocobalamin) Injections**

Vitamin B12 injections are a benefit of Texas Medicaid. Vitamin B12 injections should only be considered for clients with conditions that are refractory to, or have a contraindication to, oral therapy.

Vitamin B12 injections may be considered for the following indications:

- Dementia secondary to vitamin B12 deficiency
- Resection of the small intestine
- Schilling test (vitamin B12 absorption test)

Procedure code J3420 must be used when billing for Vitamin B12 (cyanocobalamin) injections. Vitamin B12 (cyanocobalamin) injections are limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| B700            | D510   | D511   | D512   | D513   | D518   | D520   | D521   |
| D528            | D529   | D531   | D649   | E538   | E710   | E71110 | E71111 |
| E71118          | E71120 | E71121 | E71128 | E7119  | E712   | E7210  | E7211  |
| E7212           | E7219  | E723   | E7251  | E7259  | E7281  | E7289  | G621   |
| G63             | H4611  | H4612  | H4613  | H463   | K900   | K901   | K902   |
| K903            | K9041  | K9049  | K90821 | K90822 | K90829 | K9083  | K9089  |

| Diagnosis Codes |      |      |      |       |      |  |  |
|-----------------|------|------|------|-------|------|--|--|
| K909            | K911 | K912 | Z903 | Z9221 | Z980 |  |  |

Claims that are denied for indications or other diagnosis codes may be considered on appeal with documentation of medical necessity. For the list of diagnosis codes above, documentation in the medical record must include rationale as to why the client was unable to be treated with oral therapy.

6.141 Voretigene neparvovec-rzyl (Luxturna)

Voretigene neparvovec-rzyl (Luxturna) is an adeno-associated virus vector-based gene therapy indicated for the treatment of patients with confirmed biallelic RPE65 mutation-associated retinal dystrophy, who have viable retinal cells in each eye as determined by the treating physician.

Luxturna (procedure code J3398) is a benefit of Texas Medicaid for clients who are 1 year through 65 years of age with prior authorization.

Voretigene neparvovec-rzyl (Luxturna) must be prescribed and administered by a retinal surgeon at an ocular gene therapy treatment center with experience performing intraocular surgery.

6.141.1 Prior Authorization Requirements

Prior authorization is not required for the physician services associated with administration of Luxturna. Physician services include the procedural costs and the associated supplies for administration of the medication.

Prior authorization is required for voretigene neparvovec-rzyl (Luxturna) (procedure code J3398).

For situations in which voretigene neparvovec-rzyl (Luxturna) is being dispensed by a pharmacy via white bagging, the prescribing provider must provide the dispensing DME pharmacy the authorization approval number. The dispensing DME pharmacy may not request prior authorization.

The DME Pharmacy provider billing for voretigene neparvovec-rzyl (Luxturna) will be responsible for coordinating with the rendering provider to obtain the prior authorization request approval number.

The requesting provider (physician or hospital) may coordinate with the DME Pharmacy provider for the initial request for voretigene neparvovec-rzyl (Luxturna). DME Pharmacy providers may assist in providing necessary information, such as their NPI number, fax number, and business address, to the requesting provider. However, the Special Medical Prior Authorization (SMPA) form must be signed, dated, and submitted by the Medicaid-enrolled requesting provider, not the DME Pharmacy provider.

The dispensing pharmacy must submit the authorization approval number when billing for the drug. Reimbursement for dispensing of the drug by the pharmacy may not occur unless an approved prior authorization for voretigene neparvovec-rzyl (Luxturna) is in place.

**Referto:** Subsection 11.5.1, “Pharmacy Delivery Method for Clinician-Administered Drugs” in this handbook for additional information on the “white bagging” delivery method.

Subsection 2.1.2, “Prior Authorization Requests” in this handbook for additional prior authorization information.

Prior authorization request for Luxturna injections will be considered when all of the following criteria are met:

- Client is 1 year of age through 65 years of age
- A documented diagnosis of a confirmed biallelic RPE65 mutation-associated retinal dystrophy (e.g., Leber’s congenital amaurosis subtype 2, retinitis pigmentosa, or early onset severe retinal dystrophy)
- Genetic testing documenting biallelic mutations of the RPE65 gene

- Systemic corticosteroids equivalent to prednisone 1 mg/kg/day are administered for a total of 7 days, starting 3 days before administration of voretigene neparvovec-rzyl to each eye and followed by a tapering dose
- Client has viable retinal cells in each eye as determined by the treating physician and assessed in the previous 6 months. Verification of viable retinal cells must be documented and evident by one of the following:
  - An area of retina within the posterior pole of greater than 100 µm thickness shown on optimal coherence tomography (OCT)
- Greater than or equal to 3 disc areas of retina without atrophy or pigmentary degeneration within the posterior pole
  - Remaining visual field within 30 degrees of fixation as measured by a III4e isopter or equivalent
- Prescribed and administered by retinal surgeon at an ocular gene therapy treatment center with experience performing intraocular surgery
- Patient has not previously received RPE65 gene therapy in intended eye
- Injection of the second eye must be administered at least 6 days after the first eye
- Have not had intraocular surgery within 6 months in either eye indicated for treatment

Benefit not to exceed more than 1 injection per eye per lifetime.

Authorization is valid for a period of 6 months from approval.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the services provided.

6.141.2 Exclusions

Luxturna is not a benefit for patients who have previously received RPE65 gene therapy and who do not have viable retinal cells in each eye as determined by the treating physician.

7 Separate Reimbursement of Certain Inpatient HCCADs

Inpatient high-cost clinician-administered drugs (HCCADs) are drugs or biologics that HHSC has approved to be “carved out” of the All-Patient Refined Diagnosis Related Group (APR-DRG) and can be billed on an outpatient claim.

This section allows for the use of specialty pharmacy billing for the HCCAD if it is available for the drug or bill for the HCCAD on a separate outpatient claim.

**Referto:** Section 6, “Outpatient Drugs—Benefits and Limitations” in this handbook for the prior authorization criteria for the HCCADs.

The section below contains the list of HCCADs and procedure codes approved by HHSC:

| HCCADs   | Procedure Codes |
|----------|-----------------|
| Abecma   | Q2055           |
| Aucatzyl | Q2058           |
| Breyanzi | Q2054           |
| Carvykti | Q2056           |
| Casgevy  | J3392           |
| Elevidys | J1413           |

| HCCADs    | Procedure Codes |
|-----------|-----------------|
| Hemgenix  | J1411           |
| Kymriah   | Q2042           |
| Lenmeldy  | J3391           |
| Lyfgenia  | J3394           |
| Roctavian | J1412           |
| Skysona   | J3590           |
| Tecartus  | Q2053           |
| Tecelra   | Q2057           |
| Yescarta  | Q2041           |
| Zolgensma | J3399           |
| Zynteglo  | J3393           |

**Referto:** Subsection 9.2 \*, “HCCADs Claims Processing Requirements” in this handbook” for claims processing requirements.

## 8 \* Cell and Gene Therapy Access Model (CGT)

[Revised] The CGT Access Model is a Centers for Medicare & Medicaid Services (CMS) led multi-year initiative focusing on potentially lifesaving gene therapies for sickle cell disease.

[Revised] Unique to this model, clients have access to fertility preservation services that otherwise are not a covered Texas Medicaid benefit. The drug manufacturers will cover the cost of these services.

### \* Medications

[Revised] In alignment with CMS, only the following gene therapies are part of the CGT Access Model:

- [Revised] Lyfgenia by bluebird bio, Inc.
- [Revised] Casgevy by Vertex Pharmaceuticals, Inc.

[Revised] The CGT Access Model is only for the treatment of sickle cell disease (beta-thalassemia indication is not included).

[Revised] As part of the CGT Access Model, the prior authorizations for the gene therapy and related care (i.e., genetic and laboratory testing, prescription) are authorized until the end of the original authorization period regardless of whether the client transitions between fee-for-service and managed care or from amongst MCOs. Additionally, the client must have access to the same qualified treatment center that administered the medication for at least one year after receiving their gene therapy infusion.

### \* Eligibility

[Revised] Clients who are eligible to participate must meet the following conditions:

- [Revised] Be actively enrolled in Texas Medicaid and have Medicaid as their primary insurance
- [Revised] Meet the clinical prior authorization criteria outlined in section “6.112 \* Sickle Cell Disease Gene Therapy” in this handbook.

### \* Billing

[Revised] Providers submitting a claim under the CGT Access Model must:

- [Revised] Be a member of the CMS Designated Registry through the Center for International Blood and Marrow Transplant Research (CIBMTR) prior to administering the gene therapy.

- [Revised] Participate in the study related to this model; providers will receive study information directly from CIBMTR.
- [Revised] Adhere to billing requirements outlined in section “7 Separate Reimbursement of Certain Inpatient HCCADs” in this handbook and subsection “9.2 \* HCCADs Claims Processing Requirements” in this handbook for claims submission guidelines.
- [Revised] Submit the invoice of the actual acquisition cost of the drug.

#### \* Resources

[Revised] CGT Access Model:

- [Revised] CMS: Cell and Gene Therapy Access Model
- [Revised] CMS: Improved Access to Gene Therapy for Sickle Cell Disease: Maya’s Care Journey
- [Revised] CMS: CMS Expands Access to Lifesaving Gene Therapies Through Innovative State Agreements

[Revised] For information and enrollment information related to additional client support in navigating through the client’s journey, including the fertility preservation services, see:

- [Revised] Lyfgenia: my bluebird support
- [Revised] Casgevy: Vertex Connects

[Revised] For fee-for-service, providers may contact the following:

- [Revised] TMHP: Provider Enrollment
- [Revised] TMHP: Prior Authorization

## 9 Claims Filing Information

Claims for clinician-administered drugs must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 9.1 JW Modifier Claims Filing Instructions

Providers must not use the JW modifier for medications manufactured in a multi-dose vial format.

Providers must choose the most appropriate vial size(s) required to prepare a dose to minimize the discarded portion of the vial payable.

Claims considered for reimbursement must not exceed the package size of the vial used for preparation of the dose. Providers must not bill for vial contents overfill.

Providers must not use the JW modifier when the actual dose of the drug or biological administered is less than the billing unit.

**Example:** *One billing unit for a drug is equal to 10mg of the drug in a single use vial. A 7mg dose is administered to a client while 3mg of the remaining drug is discarded. The 7mg dose is billed using one billing unit that represents 10mg on a single line item. The single line item of 1 unit would process for payment of the total 10mg of drug administered and discarded. Billing another unit on a separate line item with the JW modifier for the discarded 3mg of drug is not permitted because it would result in overpayment. Therefore, when the billing unit is equal to or greater than the total actual dose and the amount discarded, the use of the JW modifier is not permitted.*

Reimbursement for JW modifier claims is only available for drugs covered in an outpatient setting.

Inpatient and diagnostic radiopharmaceuticals claims are not eligible for reimbursement, and may not include the JW modifier.

Coverage is for “buy and bill” providers only. Specialty pharmacies billing through the medical benefit must not submit claims with a JW modifier because they are unaware of how much the provider administered or discarded.

Federally Qualified Health Center (FQHC) and Rural Healthcare Clinic (RHC) are not eligible to bill with the JW modifier because these providers do not bill for the coverage of drugs or biologicals separately.

Critical Access Hospitals (CAH) are eligible to bill with the JW modifier because these providers bill for the coverage of drugs or biologicals separately.

The JW modifier is not allowed for medications prepared in an institutional setting via “batch processing or bulk productions” methods. An example of a batch processing method is when a hospital or repackaging facility produces multiple non-patient specific doses of medications in advance of anticipated use. These preparations are labeled and distributed with client specific information only when orders are received. Because these doses may be recycled for other client use, they are not eligible.

Providers may utilize automatic systems to calculate dose and discard amounts. However, providers must continue to document the exact usage/discard accurately.

Providers must enter the dose administered (used portion) line item detail of the CAD and also enter the dose discarded (unused portion) line item detail of the CAD on the same claim. The dose discarded (unused portion) line item detail must include the JW modifier to be considered for reimbursement. When billing for reimbursement of wastage on an outpatient claim, the HCPCS and Current Procedural Terminology (CPT) code should always be provided along with the revenue code.

## 9.2 \* HCCADs Claims Processing Requirements

The following special requirements apply when billing the HCCAD on a separate outpatient claim.

Providers must claim separate payment for the HCCAD on an outpatient claim. Payment for the HCCAD must not be bundled with any other service.

The claim for the HCCAD must be separate from any facility or institutional claim the hospital submits for all other hospital services delivered to the member during the same visit. The associated inpatient or outpatient charges with the same date(s) of service are billed separately and remain part of the APR-DRG.

The date of administration of the drug should be used on the HCCAD outpatient claim along with the member’s name, date of service, and other required information. The HCCAD claim must include:

- The NDC qualifier of N4.
- The appropriate 11-digit National Drug Code (NDC) and corresponding HCPCS code for the drug.

- The number of units of the drug administered to the member that is covered by the claim.
- The NDC unit of measurement. There are five allowed values: F2, GR, ML, UN, or ME.

Drugs administered in an inpatient setting do not qualify for 340B discounts.

## 10 Pharmacy Benefit

The Texas Drug Code Index, or formulary (or list of available drugs), includes non-legend (over-the-counter) drugs. Additionally, certain supplies and select vitamin and mineral products are also available as a pharmacy benefit. Some drugs are subject to one or both types of prior authorization, clinical and non-preferred. VDP does not reimburse claims for nutritional products (enteral or parenteral), medical supplies, or equipment other than a limited set of home health supplies.

The PDL is arranged by drug therapeutic class, and contains a subset of many, but not all, drugs that are on the Medicaid formulary. Most drugs are identified as preferred or non-preferred. Drugs listed on the PDL as preferred or not listed at all are available without prior authorization unless there is a clinical prior authorization associated with that drug. For more information about prior authorization, refer to Subsection 13, “Pharmacy Prior Authorization” in this handbook.

### 10.1 Drug and Product Search

The Drug and Product Searches are online tools available to health-care providers to help clients get access to medications.

Users can search by either brand or generic name of the drug or product, the 11-digit national drug code (NDC), the PDL drug class, or HCPCS description (for products).

Detailed filters allow searches as follows:

- By program:
  - Medicaid
  - CHIP
  - CSHCN Services Program
  - HTW Program
  - HTW Plus Program
  - KHC Program (e.g., CHIP, CSHCN, HTW, and KHC)
- By prior authorization status:
  - PDL prior authorization
  - Clinical prior authorization
- By drug types:
  - Family planning
  - Diabetic supplies
  - Injectable drugs
  - LARCs
  - Over-the-counter (OTC)
  - Drugs requiring 90% utilization before refilling (refer to section 10.4)

- By product types:
  - Flu vaccines
  - Mosquito repellents
  - COVID-19 vaccines

**Referto:** The [Drug Search](#) and [Product Search](#) on the VDP website for more information.

### 10.1.1 Epocrates

The Texas Medicaid formulary and Preferred Drug List are available on the Epocrates drug information system. Epocrates ([epocrates.com](https://www.epocrates.com)) is the publisher of mobile device software applications designed to provide information about drugs to doctors and other health care professionals.

Once registered, providers can utilize Epocrates Rx, the free drug reference, and search for brand, generic, or over-the-counter medicines. Providers can select the “Texas Medicaid” formulary option, allowing searches by drug name to find products identified as preferred or non-preferred or are subject to clinical prior authorization criteria. In addition to listing a drug’s preferred status, Epocrates includes drug monographs, dosing information, and warnings.

Epocrates does not mirror the HHSC designations differentiated by dosage form. In these situations, the designation includes an explanatory message.

## 10.2 Drug Shortages

HHSC encourages prescribing providers to notify HHSC about potential drug shortages impacting prescribing choice and pharmacy claim processing using the [Drug Shortage Notification and Expedited Formulary or Preferred Drug List Request](#) (HHS Form 1315).

Significant drug shortages affecting multiple pharmacies and distributors can have a continuing adverse impact on people enrolled in Medicaid if not resolved promptly. The process ensures notification of alternatives to the shorted drug, the timeline of the shortage, and the drug’s availability for use.

## 10.3 Hepatitis C Direct-Acting Antiviral Treatment Products

The Texas Health and Human Services Commission (HHSC) launched a public health initiative called Texas Medicaid HepCure to reduce the rate of Hepatitis C virus (HCV) in Texas. The direct-acting antiviral (DAA) Mavyret (glecaprevir/pibrentasvir) is the preferred agent for Texas Medicaid. The product Mavyret does not require clinical prior authorization when prescribed following Food and Drug Administration (FDA)-approved labeling. No HCV medication is required to be prescribed by or in consultation with a hepatologist, gastroenterologist, or infectious disease specialist. All providers with prescriptive authority can prescribe this treatment to their clients with HCV. All Medicaid clients are eligible for direct-acting antiviral (DAA) treatment with Mavyret, regardless of the client’s METAVIR fibrosis score. Drug screening is not required.

HHSC allows prescribers to write prescriptions for the entire course of therapy for DAAs, and clients do not need to request additional refills throughout their treatment duration. Prescribers may choose to write a prescription for the entire treatment cycle or have the client return for further testing if warranted. This applies to all Hepatitis C DAA medications.

### 10.3.1 Background on Hepatitis C

Hepatitis C is a liver infection caused by HCV. It spreads through contact with blood from an infected person. For some people, hepatitis C is a short-term illness that resolves spontaneously, but it becomes a chronic infection for most people who become infected with HCV. Chronic HCV can result in serious, even life-threatening, health problems like cirrhosis and liver cancer.

People with HCV often have no symptoms and do not feel sick. When symptoms appear, they often are a sign of advanced liver disease. The number of people unknowingly living with undiagnosed HCV infection is why broad population-based HCV screening is important. Screening, testing and treatment can save and prolong life.

DAA medications use molecules that target specific nonstructural proteins of the virus which results in disruption of viral replication and infection. They are oral medications taken once per day for several weeks. With cure rates above 90%, these drugs can virtually eliminate the disease. The medications can be prescribed using simplified treatment algorithms for most clients and do not require specialized clinical oversight or management.

### **10.3.2 HCV Screening and Testing**

The Centers for Disease Control and Prevention (CDC) recommends that all adults who are 18 years of age or older be screened for HCV at least once in a lifetime. They also recommend that people with certain risk factors, including people who inject drugs, be tested regularly. The US Preventative Services Task Force recommends screening for Hepatitis C infection in adults who are 18 through 79 years of age and gives a “B” recommendation (moderate certainty of substantial net benefit).

Screening for HCV involves measuring antibodies to HCV in a client’s serum. A reactive or positive test (detection of the antibody) is not a disease diagnosis; it only indicates that a person was previously exposed to the virus. If the antibody test is reactive, a nucleic acid test (also known as a polymerase chain reaction [PCR] test) for HCV ribonucleic acid (RNA) is needed to determine whether the client currently has active HCV infection. Often, the antibody test and the RNA test can be performed on a single blood draw, with a positive antibody test automatically reflexing to the HCV RNA test. The client can be prescribed HCV treatment if the HCV RNA test is positive. In most instances, a simplified HCV treatment algorithm can be followed.

### **10.3.3 Treatment Coverage**

After confirmatory testing, individuals may not have previously received treatment for Hepatitis C. HHSC encourages Medicaid providers to evaluate their clients at risk for Hepatitis C or previously ineligible for HCV treatment to assess if they would benefit from treatment with Mavyret.

Mavyret is an oral prescription medication for adults and children who are 3 years of age or older with chronic HCV genotypes 1-6. In most cases, the treatment regimen is three pills taken once daily for eight weeks. Mavyret treats all common HCV genotypes; therefore, a genotype test is not required before starting a client on Mavyret. Clinical prior authorization is still required for PDL non-preferred agents.

### **10.3.4 Follow-Up After Treatment**

Clients who have received treatment should be tested for HCV RNA 12 weeks (or longer) after treatment completion. Undetectable or unquantifiable HCV RNA 12 weeks or longer after treatment completion is defined as a sustained virologic response (SVR) consistent with the cure of HCV infection.

### **10.3.5 Pregnant Clients**

The CDC recommends that all pregnant clients should be screened for HCV during each pregnancy, regardless of age. This will aid providers in identifying HCV-infected pregnant clients, which can lead to treatment for the birthing client during the postpartum period. It can also help identify infants with perinatal exposure who should receive testing at a pediatric visit. There are currently no approved curative treatments available for pregnant clients or children who are 3 years of age or younger, but curative treatments are available for non-pregnant clients and for children who are 3 years of age or older.

### **10.3.6 Resources for Providers**

HCV DAAs are safe, associated with high rates of cure, and have few side effects and contraindications. Some HCV clients may need to have their treatment managed by a specialist, such as those with hepatitis B virus or HIV co-infection, those who previously failed HCV treatment, or those with liver cancer or

who have had a liver transplant. However, most cases of HCV can be treated by primary care physicians or advanced practice providers. Providers may find the following resources helpful, and can also visit the [Hepatitis C Treatment](#) page for more information on Texas Medicaid HepCure and Hepatitis C:

- CDC Resources:
  - Recommended Testing Sequence for Identifying Current HCV Infection: [www.cdc.gov/hepatitis/hcv/pdfs/hcv\\_flow.pdf](http://www.cdc.gov/hepatitis/hcv/pdfs/hcv_flow.pdf)
  - Testing Recommendations for HCV infection: [www.cdc.gov/hepatitis-c/hcp/diagnosis-testing/](http://www.cdc.gov/hepatitis-c/hcp/diagnosis-testing/)
  - Hepatitis C Questions and Answers for Health Professionals: [www.cdc.gov/hepatitis-c/hcp/clinical-overview/](http://www.cdc.gov/hepatitis-c/hcp/clinical-overview/)
- Prescriber Resources: [www.hcv.com/provider-resources](http://www.hcv.com/provider-resources)
- Resources from the American Association for the Study of Liver Diseases: [www.hcvguidelines.org](http://www.hcvguidelines.org)
- Texas Hepatitis C Report Card: [stateofhepc.org/states/texas/](http://stateofhepc.org/states/texas/)

## 10.4 Home Health Supplies

Pharmacies enrolled with VDP can dispense a limited set of home health supplies that are commonly found in a pharmacy to clients enrolled in traditional Medicaid. These supplies are also available to clients enrolled in Medicaid managed care, provided the dispensing pharmacy is contracted by the client's health plan.

The list of supplies that can be dispensed at a pharmacy and information about the provisions of these supplies for clients enrolled in traditional Medicaid can be found on the [VDP Product Search](#) page. Users can search by product NDC or name or the HCPCS description.

Providers should contact the appropriate health plan or pharmacy benefit manager for more information about providing these supplies to clients enrolled in managed care.

## 10.5 Long-Acting Reversible Contraception Products

Long-acting reversible contraception (LARC) products are available to clients through either a Medicaid or HTW pharmacy or medical benefit.

The list of LARC drugs dispensed at a pharmacy can be found on the [VDP Drug Search](#) page. Users can select the "LARC" check-box for a list of all drugs.

Providers can obtain LARC products with no upfront cost by submitting a completed and signed prescription request form to certain specialty pharmacies. The specialty pharmacy will dispense the LARC product by shipping it to the practice address in care of the client and bill Medicaid or HTW for the product. Providers can only bill for product administration at the time of service. LARC products obtained by providers from specialty pharmacies must be returned if unused and unopened.

### 10.5.1 Product Billing

The specialty pharmacy bills Medicaid or HTW for LARC products when obtained from a specialty pharmacy. Providers will continue to bill Medicaid or HTW for insertion of the LARC product. Providers may only bill for the LARC product if it was obtained through the buy-and-bill process.

For clients enrolled in traditional Medicaid (fee-for-service (FFS)) or HTW, providers bill HHSC for the insertion of the LARC product using procedure code 58300.

For clients enrolled in Medicaid managed care, providers bill the patient's managed care organization for the insertion of the LARC product. Contact the patient's MCO for specific billing instructions.

### 10.5.2 Specialty Pharmacy Participation

Providers do not need to enroll with specialty pharmacies to obtain LARC products. Any provider currently enrolled with Medicaid or HTW may prescribe and obtain a LARC product and bill Medicaid or HTW for insertion of the LARC product. The participating pharmacies ship statewide.

Prescribing providers should identify whether the patient is enrolled in traditional Medicaid or managed care. For clients enrolled in managed care, the provider's office should coordinate with the managed care organization (MCO) to determine which pharmacy should receive the prescription because the MCO may be contracted with a single specialty pharmacy. The name, phone number, and national provider identifier (NPI) is provided for each specialty pharmacy is listed in the "Manufacturer Information" section.

### 10.5.3 Product Returns and Abandoned Units

Manufacturers offer abandoned unit return programs that allow a provider to return an abandoned LARC product. An "abandoned unit" is an unused and unopened product that was shipped by a participating specialty pharmacy with a prescription label that includes the name of the patient. In order to be returnable, the LARC product should be in its original packaging.

### 10.5.4 Manufacturer Information

#### 10.5.4.1 Bayer (Kyleena, Mirena, and Skyla)

##### 10.5.4.1.1 Specialty Pharmacy Participation

Products are available from CVS CarePlus Specialty Pharmacy or Walgreens Specialty Pharmacy, both shipping statewide.

Walgreens Specialty Pharmacy  
Frisco, TX  
1-800-424-9002  
NPI 1851463087

CVS Caremark Specialty Pharmacy  
Fort Worth, TX  
817-336-7281  
NPI 1366551848

##### 10.5.4.1.2 Obtaining Products

Providers use Bayer's Specialty Pharmacy Prescription Request Form. This form is available on the VDP website at <https://www.txvendordrug.com/resources/forms>.

Complete the Bayer's Specialty Pharmacy Prescription Request Form as follows:

- Enter the patient and prescriber information, including the patient's pharmacy drug benefit and medical insurance information and copies of the patient's pharmacy benefit and medical insurance cards.
- Complete the prescribing information and keep a copy for future use.
- Identify the drug to be administered in the prescription section, including the appropriate diagnosis code, and sign the prescription. Advanced Practice Registered Nurses, Physician Assistants, and Nurse Practitioners should identify who their collaborative agreement is with to write prescriptions, if necessary
- Have the patient read and sign the "Patient Authorization" section of the form.
- Fax the form, including the "Patient Authorization" section, to the pharmacy.

- The pharmacy will call the patient to confirm the patient's intent to receive an intrauterine device (IUD). This is done to limit potentially abandoned IUD units. The pharmacy will not mail the IUD to the provider until confirmation from the patient is received.

#### 10.5.4.1.3 Returning Products

Providers may return abandoned units. The box must be sealed and have been abandoned for at least 60 days (2 months) from the dispensing date but no more than 210 days (7 months) past the fill date. Only LARC products obtained through a specialty pharmacy can be returned through this program.

To return abandoned units complete the Bayer Abandoned Unit Program Return Form. This form is available on the VDP website at <https://www.txvendordrug.com/resources/forms>.

The Bayer Abandoned Unit Program Return Form may be submitted by mail or fax as follows:

- Fax the form to the dispensing specialty pharmacy for verification.
- Wait for an authorization number and return mailing label, and then
- Confirm the specialty pharmacy identification number matches the ID number listed on the return authorization form.
- Package the unit in one of the cardboard boxes the drug was initially shipped in or a large envelope.
- Mail the unit to the specialty pharmacy.

#### 10.5.4.2 Organon (Nexplanon)

##### 10.5.4.2.1 Specialty Pharmacy Participation

Nexplanon is available from CVS CarePlus Specialty Pharmacy or Accredo Specialty Pharmacy, both of which ship statewide.

CVS Caremark Specialty Pharmacy  
Fort Worth, TX  
817-336-7281  
NPI 1366551848

Accredo Specialty Pharmacy  
Irving, TX  
972-929-6800  
NPI 1073569034

##### 10.5.4.2.2 Obtaining Products

Providers use Organon's Nexplanon Direct Service Request Form. Request the form from Organon Customer Support Center for Nexplanon (CSCN) at 1-844-639-4321.

Complete the CSCN Direct Service Request Form as follows:

- At the top of the first page of the form, check the "Prescription Order" box and select a specialty pharmacy.
- Complete the patient and prescriber information including the patient's pharmacy drug benefit and medical insurance information. Include copies of the patient's insurance card and prescription drug card.
- Have the patient read and sign the "Patient Authorization" section.
- Ensure the physician signs both the Dispense as Written and prescriber signature lines, and the appropriate diagnosis code is selected.
- Fax the completed form to the CSCN at 1-844-232-2618.

- The CSCN will forward the prescription to the specialty pharmacy you selected after confirming the benefits of the patient.

#### 10.5.4.2.3 Returning Products

Providers may return an abandoned unit. The Nexplanon box must be sealed and been abandoned for at least 120 days (4 months) from date of dispense but no more than 180 days (6 months) past the fill date.

Complete the Organon Abandoned Unit Program Return Form. This form is available on the VDP website at <https://www.txvendordrug.com/resources/forms>.

The Organon Abandoned Unit Program Return Form may be submitted by mail or fax as follows:

- Fax the form to the specialty pharmacy for verification.
- Wait to receive the return identification number from the specialty pharmacy and return mailing label and instructions, which will be provided by C3i, Organon's third-party processor.
- Confirm the specialty pharmacy return identification number matches the ID number listed in the return mailing label provided by C3i.
- Package the unit in the box in which the Nexplanon was originally shipped or other appropriately sized shipping box or envelope.
- Mail the unit along with the Organon Abandoned Unit Program for Nexplanon Return Form to Cardinal Health 3PL. A pre-paid shipping label and address will be provided by C3i.

Only LARC products obtained through a specialty pharmacy can be returned through this program.

#### 10.5.4.3 Cooper Surgical (Paragard)

##### 10.5.4.3.1 Specialty Pharmacy Participation

Paragard is available from the following specialty pharmacy, which ships statewide:

Biologics by McKesson Specialty Pharmacy  
Cary, NC 27513  
1-888-275-8596  
NPI 1487640314

##### 10.5.4.3.2 Obtaining Products

To obtain products providers should use the Cooper Surgical Patient Authorization Form and Patient Referral Form:

- Patients should complete the Patient Authorization Form and return to the provider.
- Providers should ensure the box next to "PARAGARD T 380A Qty: 1" is checked on the Teva Patient Authorization Form and Patient Referral Form.
- Forms may be returned to the Specialty Pharmacy by fax to 1-855-215-5315 for Biologics by McKesson or fax to 1-212-988-4501 for City Drugs. Upon receipt of your completed forms, Cooper Surgical will send you written confirmation by fax.

##### 10.5.4.3.3 Returning Products

The original Paragard box must be sealed and have been abandoned at least 90 days since it was shipped.

The following will occur ninety days following shipment:

- Paragard will follow-up with your office to confirm the product was placed into the intended Medicaid client.

- If the product was not placed, the Paragard Specialist will obtain your email address to send you the return shipping label.
- Place the original unused and unopened Paragard unit and original packaging with affixed prescription label into a shipping box. You can reuse the original shipping box.
- Print the return shipping label and ship the unused and unopened Paragard unit back to Paragard as soon as possible.
- For additional questions regarding Cooper Surgical Abandoned Unit Return program contact Paragard at 1-877-727-2427.

#### 10.5.4.3.4 Loss of Client Eligibility

If the client was eligible for Medicaid or HTW on the date of service when the LARC product was prescribed and ordered, but the client loses eligibility before the LARC product is inserted, the provider is not required to return the LARC product. If the client is no longer eligible for Medicaid or HTW, the provider may insert the LARC device, but reimbursement for all care and services provided must be resolved between the provider and the client.

If a provider accepts a client as a private pay client, the provider must advise the client she is accepted as a private pay client at the time the service is provided and is responsible for paying for all services received. In this situation, HHSC strongly encourages the provider to ensure the client signs written notification so there is no question how the client was accepted.

#### 10.5.4.3.5 Questions

Contact the specialty pharmacy for questions related to obtaining LARC products. Further questions may be directed to the client's health plan or the TMHP provider help line for FFS Medicaid or HTW clients at 1-800-925-9126.

## 10.6 Mosquito Repellent Benefit

HHSC covers mosquito repellent year-round for the prevention of the Zika virus.

A list of products is available through the [VDP Product Search](#) page. Users can search by product name, the 11-digit National Drug Code (NDC), or click the “mosquito repellent” checkbox to view all products.

Clients that are eligible for the benefit include the following demographics:

- Females who are 10 through 55 years of age
- Pregnant females of any age
- Males who are 14 years of age and older

HHSC requires a prescription for all clients.

## 10.7 Palivizumab (Synagis)

Palivizumab is available to physicians for administration to clients in Medicaid and the CSHCN Services Program through VDP. This enables physicians to have palivizumab shipped directly to their office from a network pharmacy, and not purchase the drug.

Physicians who obtain palivizumab through VDP may not submit claims to TMHP for the drug. The administering provider may submit a claim to TMHP for an injection administration fee and any medically necessary office-based evaluation and management service provided at time of injection.

### 10.7.1 Schedule

The following sections provide information about the forms used for prior authorization requests.

**Referto:** The [Synagis](#) page on the VDP website for the current season's schedule.

## 10.7.2 Forms

**Note:** *Palivizumab is also available for clients enrolled in the Children with Special Health Care Needs (CSHCN) Services Program. Providers can refer to the CSHCN Services Program Provider Manual for details.*

### 10.7.2.1 Managed Care

Medicaid managed care and CHIP require the Texas Standard Prior Authorization Request Form for Prescription Drug Benefits (Texas Department of Insurance Form NOFR002). Prescribing providers should contact the MCO for prior authorization requirements and forms. MCOs may require additional information in addition to the MCO-specific addendum form. The MCO's form will reflect the appropriate MCO contact information and reconsideration request process.

### 10.7.2.2 Traditional Medicaid

The prescribing provider must send the Texas Standard Prior Authorization Request Form for Prescription Drug Benefits (TDI NOFR002), the [Synagis Standard Prior Authorization Addendum](#) (HHS 1321), the prescription for Synagis, and any supporting information to the Medicaid-enrolled pharmacy. Pharmacy staff will submit the form to the Texas Prior Authorization Call Center.

## 10.8 Vitamin and Mineral Products

HHSC-enrolled pharmacies with VDP can dispense vitamin and mineral products to clients who are 20 years of age and younger and enrolled in traditional Medicaid. These products are also available to clients enrolled in Medicaid managed care, if the dispensing pharmacy is contracted with the client's health plan.

To expedite pharmacy claim processing for vitamin and mineral products, prescribing providers are encouraged to include the diagnosis on the prescription.

The list of products that can be dispensed at a pharmacy and information about the provision of these products to clients enrolled in fee-for-service can be found on the [VDP Product Search](#) page. Users can search by product NDC or name or the HCPCS description.

For clients enrolled in Medicaid managed care or CHIP, claims are submitted to the clients' health plans. Pharmacy staff must work with the health plan's pharmacy benefit manager to determine the billing requirements, reimbursement rates, and coverage limitations for these products.

## 11 Prescribing Information

The federal Patient Protection and Affordable Care Act and the Code of Federal Regulations Title 42 §455.410(b) require all physicians or other professionals who order, refer, or prescribe drugs, supplies and services for a recipient of traditional Medicaid, CHIP, CSHCN, and HTW Program to be enrolled as participating Medicaid providers.

**Referto:** "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information.

### 11.1 Tamper-Resistant Prescription Pads

Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the VDP were written on a compliant tamper resistant pad.

The Centers for Medicare & Medicaid Services (CMS) has stated that special copy-resistant paper is not a requirement for electronic medical records (EMRs) or e-prescribing-generated prescriptions and prescriptions that are faxed directly to the pharmacy. These prescriptions may be printed on plain paper and will be fully compliant if they contain at least one feature from each of the following three categories:

- Prevents unauthorized copying of completed or blank prescription forms
- Prevents erasure or modification of information written on the prescription form
- Prevents the use of counterfeit prescription forms

Two features that can be incorporated into computer-generated prescriptions printed on plain paper to prevent passing a copied prescription as an original prescription are as follows:

- Use a very small font that is readable when viewed at 5x magnification or greater and illegible when copied.
- Use a “void” pantograph accompanied by a reverse “Rx,” which causes a word such as “Void” to appear when the prescription is photocopied.

**Referto:** The [VDP Pharmacy Provider Procedure Manual](#) on the VDP website.

## 11.2 Prescription Refills and Expirations

Medicaid prescriptions for non-controlled substances are valid for one year from the date written and up to 11 refills if authorized by prescriber.

Medicaid prescriptions for controlled substances in Schedules III, IV, and V are valid for six months from the date written and up to five refills if authorized by prescriber provider. Controlled substance prescriptions written by advanced practice registered nurses and physicians assistants are valid for 90 days.

Medicaid prescriptions for Schedule II drugs cannot be refilled and must be dispensed within 21 days of the date on which the prescription was written.

Prescriptions for Schedule II drugs may be written as multiples of three for a total of a 90 day supply subject to federal and state law.

**Referto:** The [VDP Pharmacy Provider Procedure Manual](#) on the VDP website.

[Pharmacy Laws and Rules](#) page of the Texas State Board of Pharmacy (TSBP) website for rules about issuance of identical sets of Schedule II prescriptions.

## 11.3 Prescription Monitoring of Controlled Substances

The Substance Use–Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act requires states to have a qualified prescription drug monitoring program. The SUPPORT Act also requires certain Medicaid providers to check beneficiaries’ prescription drug history before prescribing or dispensing controlled substances.

The Texas Prescription Monitoring Program (PMP) collects and monitors prescription data for all Schedule II, III, IV and V controlled substances dispensed by a pharmacy in Texas or to a Texas resident from a pharmacy located in another state. The PMP also provides a venue for monitoring patient prescription history for practitioners and the ordering of Schedule II Texas Official Prescription Forms.

Prescribers are required to check a Medicaid member’s PMP history before prescribing Schedule II, III, IV, and V controlled substances.

Pharmacies that dispense Schedule II, III, IV, and V drugs are required to report the information directly to the Texas State Board of Pharmacy's contracted vendor. Prescription data is reported by the prescriber's federal Drug Enforcement Administration (DEA) number. Prescribers and pharmacies are required by statute to have a valid, active DEA numbers in order to possess, administer, prescribe or dispense controlled substances.

**Referto:** The [Texas Prescription Monitoring Program](#) page of TSBP website.

## 11.4 Requirements for Early Refills

A refill is considered too soon, or early, if the client has not used at least 75 percent of the previous fill of the medication.

For clients enrolled in traditional Medicaid or the CSHCN Services Program, a refill for certain controlled substances is considered too soon if the client has not used at least 90 percent of the previous fill of the medication.

**Note:** *Some drugs, such as attention deficit hyperactivity disorder drugs and certain seizure medications, are excluded from this change.*

To identify drugs that require 90 percent utilization, refer to the VDP Drug Search and select the "90% Utilization" filter. The returned results will include only those drugs that meet this requirement.

**Referto:** The [VDP Drug Search](#) on the VDP website for more information.

Justifications for early refills include, but are not limited to, the following:

- A verifiable dosage increase
- An anticipated prolonged absence from the state

If a client requests an early refill of a drug, the pharmacy must contact VDP to request an override of the early refill restriction. Prescribing providers may be asked to verify the reason for the early refill by the dispensing pharmacy or VDP staff.

**Note:** *Providers who are members of Medicaid managed care plans should contact the appropriate health plan or pharmacy benefits manager for specific requirements and processes related to dispensing early refills.*

## 11.5 Clinician-Administered Drugs

All Texas Medicaid providers must submit a rebate-eligible NDC for professional or outpatient claims submitted to TMHP with a clinician-administered drug procedure code.

The NDC is an 11-digit number on the package or container from which the medication is administered. Providers must enter identifier N4 before the NDC code. The NDC unit and the NDC unit of measure must be entered on all professional or outpatient claims that are submitted to TMHP and Medicaid managed care plans.

Clinician-administered drugs that do not have a rebate-eligible NDC will not be reimbursed by Texas Medicaid.

**Referto:** Subsection 6.3.4, "National Drug Code (NDC)" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for additional information on claim filing using NDC.

The [VDP CAD Search](#) for more information.

### 11.5.1 Pharmacy Delivery Method for Clinician-Administered Drugs

Providers administering clinician-administered drugs in an outpatient setting for clients enrolled in Medicaid (both traditional and managed care) can send a prescription to a pharmacy and wait for the drug to be shipped or mailed to their office. This delivery method is called "white-bagging."

Providers should use the following steps for this delivery method:

- 1) The treating provider identifies that the client is enrolled in Medicaid.
- 2) The treating provider or treating provider's agent sends a prescription to a Texas Medicaid-enrolled pharmacy and obtains any necessary prior authorizations.
- 3) If any prior authorization is approved, the dispensing pharmacy fills the prescription and overnight ships an individual dose of the medication, in the client's name, directly to the treating provider.
- 4) The treating provider administers the medication in the office setting. The provider bills for an administration fee and any medically necessary service provided at time of administration. The provider should not bill Medicaid for the drug.

The pharmacy contacts the provider each month, prior to dispensing any refills, to ensure that the client received all previously dispensed medication. Auto-refills are not allowed.

These medications cannot be used on any other client and cannot be returned to the pharmacy for credit.

**Exception:** *Unused long-acting reversible contraceptives may be returned in certain circumstances.*

**Note:** *Physicians who use this delivery method will not have to buy the clinician-administered drug, therefore, the physician is allowed to administer the drug and should only bill for the administration of the drug.*

## 11.6 Opioid Limitations

For many people, substance use disorder starts after initially receiving opioid prescriptions for an episode of acute pain. To encourage the appropriate use of opioids and reduce the over-prescribing of opioids, Texas Medicaid has implemented the requirements in this section.

### 11.6.1 Affected Clients

The requirements in this section do not apply to clients who are:

- Receiving hospice care or palliative care
- Being treated for cancer
- Residing in a long-term care facility
- Residing in a facility in which residents receive opioid substitution therapy for the treatment of opioid use disorder (OUD).

The requirements also do not apply to other clients that HHSC elects to exempt based on an objective, confirmable physical pathology known to cause severe chronic pain that is not ameliorated by other therapies and for which opioid treatment is appropriate (e.g., sickle cell disease). If diagnoses are not available in the medical data, prescribers can request exemptions on a case-by-case basis through the pharmacy prior authorization process.

### 11.6.2 Morphine Milligram Equivalents

Morphine milligram equivalents (MME) per day is used to compare the potency of one opioid to another. The clinical decision for the MME per day recommendations varies depending on the person's opioid use. Additionally, the Centers for Disease Control and Prevention (CDC) recommends starting opioid treatment with an immediate-release/short-acting formulation at the lowest effective dose instead of an extended-release/long-acting formulation.

A client is considered "opioid naive" if the client has taken opioids for a duration that is less than or equal to seven days in the last 60 days. For clients who are opioid naive, providers must submit a one-time prior authorization request for:

- An opioid prescription that exceeds a ten-day supply.
- A prescription for a long-acting opioid formulation.

- A claim or combination of claims in which the total daily dose of opioids exceeds 90.

The one-time requirement for prior authorization does not apply to subsequent claims because the member will no longer be opioid naïve. The duration of the prior authorization is equal to the days' supply of the claim.

For clients who are not opioid naïve, prior authorization is required for opioid prescriptions if the total daily dose of opioids exceeds 90 MME. For those patients who may require a tapering plan, providers would determine the development and management of a patient specific course of therapy to help manage withdrawal symptoms. A prescriber may request a tapering plan through the pharmacy prior authorization process on a case-by-case basis. Prior authorization approvals last for six-months.

### 11.6.3 Days' Supply Limit

Opioid prescriptions for the treatment of acute pain are rarely required for more than ten days. To reduce the risk of addiction and the diversion of unused opioids, opioid prescriptions for clients who are opioid naïve are limited to a maximum ten-day supply without prior authorization.

### 11.6.4 Fee-For-Service Three Prescription Limit

Prescriptions for opioids to treat acute pain for clients who are 21 years of age and older are exempt from the three-prescription-per-month limit for members in fee-for-service.

## 12 Patient Information

### 12.1 Medicaid Drug Benefits

Clients enrolled in traditional Medicaid are limited to three prescriptions per month with the following exceptions:

- Clients enrolled in waiver programs such as Community Living Assistance (CLASS) and Community-Based Alternatives (CBA)
- Texas Health Steps (THSteps)-eligible clients (clients who are 20 years of age and younger)
- Clients in skilled nursing facilities

The following categories of drugs do not count against the three prescription per month limit:

- Family planning drugs and supplies
- Smoking cessation drugs
- Insulin syringes

**Note:** *Prescriptions for family planning drugs and limited home health supplies are not subject to the three-prescription limit.*

Though TMHP reimburses family planning agencies and physicians for family planning drugs and supplies, the following family planning drugs and supplies are also available through the VDP and are not subject to the three-prescription limit:

- Oral contraceptives
- Long-acting injectable contraceptives
- Vaginal ring
- Hormone patch
- Certain drugs used to treat sexually transmitted diseases (STDs)

## 12.2 Cost Avoidance Coordination of Benefits

Cost avoidance coordination of benefits for pharmacy claims ensures compliance with CMS regulations. Under federal rules, Medicaid agencies must be the payer of last resort. The cost avoidance model checks for other known insurance at point of sale, preventing Medicaid from paying a claim until the pharmacy attempts to obtain payment from the client's primary third party insurance.

## 12.3 Medicaid Children's Services Comprehensive Care Program

Medically-necessary drugs and supplies that are not covered by the VDP may be available to children and adolescents (birth through 20 years of age) through the Medicaid Comprehensive Care Program (CCP). Drugs and supplies not covered could include, as examples, some over-the-counter drugs, nutritional products, diapers, and disposable or expendable medical supplies.

The Prior Authorization fax number is 1-512-514-4212.

**Referto:** Subsection 2.8.1.1, "Pharmacies (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about pharmacy enrollment in CCP.

## 12.4 Pharmacy Lock-In

Clients enrolled in traditional Medicaid can be "locked-in" to a specific primary care pharmacy. Those clients will have "Lock-in" identified on the face of their Your Texas Benefits Medicaid card. Clients who are not "locked-in" to a specific pharmacy may obtain their drugs or supplies from any enrolled Medicaid pharmacy.

**Referto:** Subsection 4.3.2, "Client Lock-in Program" in "Section 4: Client Eligibility" (*Vol. 1, General Information*) for more information about lock-in limitations.

Family planning services are excluded from lock-in limitation.

## 12.5 Free Delivery of Medicaid Prescriptions

Many Medicaid pharmacies offer free delivery of prescriptions to clients enrolled in Medicaid.

To find out which pharmacies offer delivery services:

- Refer clients enrolled in traditional Medicaid to the VDP Pharmacy Search. Click the "Delivers" indicator on the search. The returned results will include only those pharmacies that provide a delivery service. These HHSC-enrolled pharmacies have certified their delivery services meet the minimum conditions for the payment of the delivery fee. These certified delivery pharmacies are reimbursed a delivery fee that is included in the medication dispensing formula.
- Refer clients enrolled in Medicaid managed care to their respective health plan. Each health plan develops its own participating pharmacy network for the delivery service.

Deliveries are made to client's home and not institutions, such as nursing homes. Delivery service is not applicable for mail-order prescriptions and not available for over-the-counter drugs.

**Referto:** The [VDP Pharmacy Search](#) on the VDP website.

## 12.6 Medication Synchronization

### 12.6.1 Overview

Medication Synchronization establishes processes for early refills in order to align the filling or refilling of multiple medications for a client with chronic illnesses.

The Texas Insurance Code §1369(j) allows a client enrolled in Medicaid, their prescribing physician, or the dispensing pharmacist to initiate the medication synchronization request. This process allows for clients to pick up all their medication on a single day each month versus requiring clients to make multiple pharmacy visits to obtain different prescription medications with different refill dates.

### 12.6.2 Eligible Medications

A drug is eligible for medication synchronization if it meets the following conditions:

- It is listed on the Medicaid, CHIP, KHC or CSHCN formulary.
- It is used for treatment and management of chronic illnesses.
- It is a formulation or dosage form that can be effectively dispensed in a medication synchronization protocol.
- It must meet all prior authorization criteria applicable to the medication on the date the synchronization request is made. This includes clinical prior authorizations, non-preferred prior authorizations, and drug utilization review edits.
- The original prescription must have refills.

**Exception:** *The prescription could be new but the drug is categorized with the same Generic Code Number (GCN) class, and if the pharmacy uses the override code, the claim will pay. Having available refills is not required.*

A claim cannot be synchronized if it is a Schedule II controlled substance or a Schedule III controlled substance containing hydrocodone.

### 12.6.3 Chronic Illness

Medications eligible for synchronization must be used to treat chronic illnesses. A chronic illness is defined as an illness or physical condition that is:

- Reasonably expected to continue for an uninterrupted period of at least three months, and
- Controlled, but not cured by medical treatment. This includes drugs used to treat mental health conditions and substance use.

### 12.6.4 Traditional Medicaid Claims Processing

A synchronized claim will count as one of the three prescriptions Medicaid will pay if a client is limited.

### 12.6.5 Medicaid Managed Care and CHIP Claims Processing

Each health plan has an HHSC-approved process for medication synchronization for clients eligible for Medicaid or CHIP. In CHIP, cost sharing or co-payment amounts will be prorated. Dispensing fees will not be prorated.

Pharmacy staff should contact the client's health plan for medication synchronization requirements using the contact information on the MCO Search page.

**Referto:** The [VDP MCO Search](#) on the VDP website.

## 13 Pharmacy Prior Authorization

Some Medicaid drugs are subject to one or both types of prior authorization, clinical and non-preferred.

## 13.1 Clinical Prior Authorization

Clinical prior authorizations utilize evidence-based clinical criteria and nationally recognized peer-reviewed information. These prior authorizations may apply to an individual drug or a drug class on the formulary, including some preferred and non-preferred drugs. There are specific clinical prior authorizations that all health plans are required to perform. Usage of all other clinical prior authorizations will vary between health plans and at the discretion of each health plan.

Some clinical prior authorizations require prescribing providers to submit forms for clients enrolled in traditional Medicaid. Refer to each form's instruction page linked below for submission requirements and instructions. Prescribing providers must submit each form below with the [Texas Standard Prior Authorization Request Form for Prescription Drug Benefits \(TDI Form NOFR002\)](#), and submit by fax to the Texas Prior Authorization Call Center at 866-469-8590.

Health plans may require prior authorization for these drugs. Providers should contact the appropriate health plan for specific requirements and forms.

| Drug Name                                                                                                             | Number        |
|-----------------------------------------------------------------------------------------------------------------------|---------------|
| <a href="#">Cystic Fibrosis Agents (Kalydeco, Orkambi, and Symdeko)</a>                                               | HHS Form 1338 |
| <a href="#">Emflaza</a>                                                                                               | HHS Form 1347 |
| <a href="#">Increlex</a>                                                                                              | HHS Form 1357 |
| <a href="#">Proprotein convertase subtilisin/kexin type 9 (PCSK9) inhibitors</a>                                      | HHS Form 1355 |
| <a href="#">Phosphate Binders</a>                                                                                     | HHS Form 1348 |
| <a href="#">Synagis</a>                                                                                               | HHS Form 1321 |
| Refer to: Subsection 8.6, "Palivizumab (Synagis)" in this section for information about Synagis prior authorizations. |               |
| <a href="#">Xyrem</a>                                                                                                 | HHS Form 1356 |

**Referto:** The Clinical Prior Authorization Assistance Chart is available on the VDP website [www.txvendordrug.com/sites/default/files/docs/cpa-assistance-chart.pdf](http://www.txvendordrug.com/sites/default/files/docs/cpa-assistance-chart.pdf). It identifies each health plans prior authorization and how those authorizations relate to the authorizations used for traditional Medicaid claim processing. The chart is updated quarterly.

## 13.2 Non-preferred Prior Authorization

The PDL is arranged by drug therapeutic class and contains a subset of many, but not all, drugs that are on the Medicaid formulary. Drugs are identified as preferred or non-preferred on the PDL. Drugs listed on the PDL as preferred, or those not listed at all, are available without PDL prior authorization. Drugs identified as non-preferred on the PDL require a PDL prior authorization.

**Referto:** Medicaid health plans are required to adhere to the Texas Medicaid Preferred Drug List.

**Note:** CHIP does not have a PDL.

**Referto:** The [PDL Prior Authorization Criteria Guide](#) that explains the criteria that are used to evaluate the PDL prior authorization requests.

## 13.3 Obtaining Prior Authorization

Prior authorization for clients enrolled in traditional Medicaid is requested through the Texas Prior Authorization Call Center.

The Texas Prior Authorization Call Center accepts prior authorization requests by phone at 1-877-PA-TEXAS (1-877-728-3927) (Monday through Friday, between 7:00 a.m. to 7:00 p.m., Central time) or online through the [VDP Provider Portal](#). Online submissions are only available for non-preferred prior authorization requests. The prescriber can submit both clinical and non-preferred prior authorization requests online.

**Referto:** The [VDP Provider Portal Registration User Manual](#) and the [VDP Provider Portal User Manual](#).

The [VDP VDP Prescriber Prior Authorization Manual](#) on the PAXpress website.

**Note:** *Pharmacists cannot obtain prior authorization for medications. If the client arrives at the pharmacy without prior authorization for a non-preferred drug and/or a drug requiring clinical prior authorization, the pharmacist will alert the provider's office and ask the provider to get prior authorization.*

## 13.4 Prior Authorization Reconsideration

The prescribing provider may request reconsideration if the prior authorization request is denied.

### 13.4.1 Managed Care

Prescribing providers should refer to the [VDP MCO Search](#) to find each MCO's prior authorization call center to learn about their reconsideration or appeal processes.

### 13.4.2 Fee-for-service Medicaid

The Texas Prior Authorization Call Center will notify prescribing providers of their right to request a reconsideration of the decision rendered. Providers should complete the [Texas Medicaid Prior Authorization Reconsideration Request](#) (HHS Form 1322) and submit it to the Texas Prior Authorization Call Center. Refer to the form's instruction page for requirements and submission instructions. Providers may also include supporting documentation with their form submission, including:

- Medication documentation, such as the patient's medical records or lab results supporting the medical reason for the treatment
- Peer-reviewed literature supporting the safety, efficacy, and rationale for using the medication outside the current Medicaid criteria, if applicable

The Texas Prior Authorization Call Center will mail a copy of the reconsideration determinations to the requesting provider and client. The client's letter will include the HHSC prior authorization appeal process if the reconsideration request is denied.

## 13.5 72-Hour Emergency Supply

Federal and Texas law allows for a 72-hour emergency supply of a prescribed drug to be provided when a medication is needed without delay and prior authorization is not available. This rule applies to non-preferred drugs on the PDL and any drug that is affected by a clinical prior authorization.

Drugs not on the PDL may also be subject to clinical prior authorization.

## 14 Retrospective Drug Utilization Reviews

Retrospective DUR provides for the ongoing periodic examination of claims data and other records to identify patterns of fraud, abuse, gross overuse, or inappropriate or medically unnecessary care among prescribing providers, pharmacists, and people associated with specific drugs or groups of drugs.

The retrospective review also allows for active and ongoing educational outreach in the form of letters or face-to-face discussions to educate prescribing providers on common drug therapy problems with the aim of improving prescribing or dispensing practices.

The Texas Drug Utilization Review Board reviews and recommends interventions for traditional Medicaid claims. A fixed-number of interventions are performed each calendar year. MCOs are required to create and perform interventions and education of their population.

## 1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the Medicaid Managed Care Handbook.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, “Carve-Out Services” in the Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).

The information in this handbook is intended for therapy services for clients of all ages. Therapy services include occupational therapy (OT), physical therapy (PT), and speech therapy (ST). The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these therapies.

**Important:** *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment procedures.

All providers are required to report suspected child abuse and neglect, as outlined in subsection 1.7, “Provider Responsibilities” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information).

## 2 Enrollment

**Referto:** Subsection 1.7.18, “Physical, Occupational, and Speech Therapy Providers” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information) for enrollment information.

## 3 Managed Care Organization (MCO) Clients Who Transition to Medicaid Fee-For-Service (FFS)

When client’s transition from an MCO to FFS, providers can request previously approved authorizations be transferred from the MCO to FFS for Comprehensive Care Program (CCP) services, OT, PT, and ST.

### 3.1 Submission Guidelines

The following submission time frames apply for providers that request to transfer previously approved MCO authorizations for PT, OT, and ST services:

- TMHP will consider the reimbursement of claims for services that were rendered on or after the MCO’s disenrollment date only when the provider submits a request to TMHP to transfer the previously approved authorization for PT, OT, and ST services.

- The request to TMHP must be received on or before the end date of the previously approved MCO authorization. Any requests submitted after the MCO's authorization end date will have to meet the regular submission guidelines for the specific service type.

## 3.2 Documentation Requirements

All of the requests to transfer the authorizations from the MCO to FFS must include:

- A copy of the previously approved authorization letter.
- All of the documentation that was sent in the original authorization request, including any orders by the prescribing provider that were used to determine the start of care. TMHP will accept the prescribing provider orders as the required documentation for the requested services.
- The completed CCP prior authorization form, Special Medical Prior Authorization (SMPA) form, Home Health Plan of Care, or Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form whichever is applicable for the requested service. The form must include the dates of service and quantities that are being requested from TMHP, and they must match the dates of service and quantities that were approved in the original MCO authorization. It is not necessary to obtain signatures or dates on the forms if they are submitted to TMHP for the purpose of transferring an authorization from an MCO to FFS Medicaid.

**Note:** *Authorizations for services transferred from an MCO to FFS Medicaid are subject to retrospective review.*

TMHP will verify the client's eligibility, the dates of service, and the quantities requested. TMHP will process reimbursement claims as follows:

- Claims for services that were rendered before the date on which the transfer request was received will be denied as a late submission, and the provider will be notified of their administrative appeal rights through the Health and Human Services Commission (HHSC).
- Claims for services that were rendered on or after the date of receipt use the required information from the transferred authorization and will be processed as if the request was received in a timely manner.

If a request to transfer an MCO authorization is submitted after the end date of the MCO authorization or the provider does not have an authorization letter from the MCO, TMHP will process the request to transfer the authorization based on established TMHP authorization submission guidelines for PT, OT, and ST services.

All new requests for rendered services must meet the documentation requirements.

## 3.3 New Services and Extension of Services

For new services that occur after the client's MCO disenrollment change date, the provider is responsible for submitting all TMHP required paperwork and meeting all established submission guidelines for prior authorization.

Requests for the extension of services that occur after the MCO disenrollment change date must include all of the paperwork that is required by TMHP and meet all established submission guidelines for prior authorization.

## 3.4 Loss of Eligibility

If an MCO disenrolled a client and the client also loses Medicaid eligibility, providers must anticipate, if and when Medicaid eligibility is restored, that the client will initially be considered a Medicaid FFS client and will have a retroactive eligibility period.

All requests for services that require prior authorization and that occur during the client's retroactive eligibility period, must be submitted to TMHP following the process that is outlined in subsection 5.1.1, "Prior Authorization Requests for Clients with Retroactive Eligibility" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*).

If a client is retroactively disenrolled by an MCO, all of the services that are rendered by the provider during this retroactive disenrollment period (specifically from the date on which the client was eligible for FFS to the date of the client's MCO eligibility change) will be denied by TMHP, and the provider will be notified of their administrative appeal rights.

TMHP may consider services for the MCO transition beginning on the date of the client's MCO eligibility change date and going forward. TMHP uses the MCO transition process for the submission of paperwork and the processing of provider requests.

## 4 Therapy Services Overview

Physical, occupational and speech therapy services must be medically necessary to the treatment of the individual's chronic or acute need. A diagnosis alone is not sufficient documentation to support the medical necessity of therapy. To be considered medically necessary, all of the following conditions must be met:

- The services requested must be considered under the accepted standards of practice to be a specific and effective treatment for the patient's condition.
- The services requested must be of a level of complexity or the patient's condition must be such that the services required can only be effectively performed by or under the supervision of a licensed occupational therapist, physical therapist, or speech-language pathologist, and requires the skills and judgment of the licensed therapist to perform education and training.
- Functional goals refer to a series of behaviors or skills that allow the client to achieve an outcome relevant to his/her health, safety, or independence within the context of everyday environments. Functional goals must be specific to the client, objectively measurable within a specified time frame, attainable in relation to the client's prognosis or developmental delay, relevant to client and family, and based on a medical need.
- For clients who are 20 years of age and younger, the following conditions must be met:
  - The goals of the requested services to be provided are directed at improving, adapting, restoring, or maintaining functions which have been lost or impaired due to a recent illness, injury, loss of body part or congenital abnormality or as a result of developmental delay or the presence of a chronic medical condition.
  - Testing must establish a client with developmental delays meets the medical necessity criteria as defined in subsection 5.3, "Developmental Delay Criteria" in this handbook for chronic therapy services.
  - Evidence of care coordination with the prescribed pediatric extended care center (PPECC) provider, when the client receives therapy services in a PPECC setting.
- For clients who are 21 years of age and older, the following conditions must be met:
  - The goals of the requested services to be provided are directed at improving, adapting or restoring functions which have been lost or impaired due to a recent illness, injury, loss of body part and restore client's function to within normal activities of daily living (ADL).
  - There must be reasonable expectation that therapy will result in a meaningful or practical improvement in the client's ability to function within a reasonable and predictable time period.

Medical necessity criteria for therapy services provided in the home must be based on the supporting documentation of the medical need and the appropriateness of the equipment, service, or supply prescribed by the prescribing provider for the treatment of the individual.

The therapy service must be related to the client's medical condition, rather than primarily for the convenience of the client or provider.

Frequency must always be commensurate with the client's medical and skilled therapy needs, level of disability (for clients who are 20 years of age and younger), and standards of practice; it is not for the convenience of the client or the responsible caregivers.

The following apply:

- Treatment plans and plans of care developed must include not only the initial frequency (high, moderate or low) but the expected changes of frequency throughout the duration period requested based on the client's anticipated therapy treatment needs.
- An example of a tapered down frequency request initiated with a high frequency is: 3 times a week for 2 weeks, 2 times a week for 2 weeks, 1 time a week for 2 weeks, 1 time every other week).

**Referto:** Subsection 4.6, "Frequency and Duration Criteria for PT, OT, and ST Services" in this handbook for the frequency prior authorization criteria.

Therapy services are limited to one evaluation, re-evaluation or treatment up to the limits outlined in this handbook for each therapy discipline per date of service.

## 4.1 Physical Therapy

The practice of physical therapy includes:

- Measurement or testing of the function of the musculoskeletal, or neurological, system.
- Rehabilitative treatment concerned with restoring function or preventing disability caused by illness, injury, or birth defect.
- Treatment, consultative, educational, or advisory services to reduce the incidence or severity of disability or pain to enable, train, or retrain a person to perform the independent skills and activities of daily living.

Texas Medicaid limits physical therapy to the skilled treatment of clients who have acute or acute exacerbation of chronic disorders or chronic medical condition of the musculoskeletal and neuromuscular systems. Physical therapy may be provided by a prescribing provider or physical therapist within their licensed scope of practice.

## 4.2 Occupational Therapy

The practice of occupational therapy includes:

- Evaluation and treatment of a person whose ability to perform the tasks of living is threatened or impaired by developmental deficits, sensory impairment, physical injury, or illness.
- Using therapeutic goal-directed activities to:
  - Evaluate, prevent, or correct physical dysfunction.
  - Maximize function in a person's life.
- Applying therapeutic goal-directed activities in treating patients on an individual basis, in groups, or through social systems, by means of direct or monitored treatment or consultation.

Texas Medicaid limits occupational therapy to the skilled treatment of clients whose ability to function in life roles is impaired. Occupational therapy may be provided by a prescribing provider or occupational therapist within their licensed scope of practice.

Occupational therapy uses purposeful activities to obtain or regain skills needed for activities of daily living (ADL) and/or functional skills needed for daily life lost through acute medical condition, acute exacerbation of a medical condition, or chronic medical condition related to injury, disease, or other medical causes. ADLs are basic self-care tasks such as feeding, bathing, dressing, toileting, grooming, and mobility.

### **4.3 Speech Therapy**

Speech therapy is a benefit of Texas Medicaid for the treatment of chronic (for clients who are 20 years of age and younger), acute, or acute exacerbations of pathological or traumatic conditions of the head or neck, which affect speech production, speech communication and oral motor, feeding and swallowing disorders. Speech therapy may be provided by a prescribing provider or speech language pathologist within their licensed scope of practice.

Speech-language pathologists treat speech sound and motor speech disorders, stuttering, voice disorders, aphasia and other language impairments, cognitive disorders, social communication disorders and swallowing (dysphagia) deficits.

Speech therapy is designed to ameliorate, restore, or rehabilitate speech language communication and swallowing disorders that have been lost or damaged as a result of a chronic, acute or acute exacerbation of a medical condition due to a recent injury, disease or other medical conditions, or congenital anomalies or injuries.

#### **4.3.1 Types of Communication Disorders**

There are three types of communication disorders:

- **Language Disorders**—Impaired comprehension and/or use of spoken, written and/or other symbol systems. This disorder may involve the following components: forms of language (phonology, morphology, and syntax), content and meaning of language (pragmatics) and/or the perception/processing of language. Language disorders may involve one, all or a combination of the above components.
- **Speech Production Disorders**—Impairment of the articulation of speech sounds, voice and/or fluency. Speech Production Disorders may involve one, all or a combination of these components of the speech production system. An articulation disorder may manifest as an individual sound deficiency, i.e., traditional articulation disorder, incomplete or deviant use of the phonological system, i.e., phonological disorder, or poor coordination of the oral-motor mechanism for purposes of speech production, i.e., verbal and/or apraxia, dysarthria.
- **Oral Motor/Swallowing/Feeding Disorders**—Impairment of the muscles, structures and/or functions of the mouth (physiological or sensory-based) involved with the entire act of deglutition from placement and manipulation of food in the mouth through the oral and pharyngeal phases of the swallow. These disorders may or may not result in deficits to speech production.

### **4.4 Co-Treatment**

Co-treatment is defined as two different therapy disciplines performing therapy on the same client at the same time by a licensed therapist as defined in this handbook for each therapy discipline, and rendered in accordance with the Executive Council of Physical Therapy and Occupational Therapy Examiners and State Board of Examiners for Speech-Language Pathology and Audiology.

Co-treatment may be a benefit when it is medically necessary for the client to receive therapy from two different therapy disciplines at the same time. The therapy performed requires the expertise of two different disciplines (i.e., licensed physical therapist, licensed occupational therapist, or licensed speech-language pathologist), to perform the therapy safely and effectively to reach the client's goals as determined by the approved plan of care, signed and dated by the client's prescribing provider.

When performing co-treatment, a primary therapist must be designated by the two performing therapists. Only the primary performing therapist may bill for the therapy services rendered. The secondary therapist will not be reimbursed for assisting a designated primary performing therapist.

The following co-treatment documentation requirements must be maintained in the client's medical records as follows:

- Medical necessity for the individual therapy services must be justified before performing co-treatment.
- Documentation supports co-treatment goals and how co-treatment will help the therapist achieve the therapist's goals for the client, for each therapy discipline.
- An explanation of why the client requires and will receive multi-disciplinary team care, defined as at least two therapy disciplines (physical, occupational, or speech therapy) during the same therapy session.

Retrospective review may be performed to ensure documentation supports that the medical necessity of the co-treatment performed and that the billing was appropriate for the services provided by the designated primary-performing therapist.

## 4.5 Telehealth Services

Providers must defer to the needs of the person receiving services, allowing the mode of service delivery (synchronous audiovisual or in-person) to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience.

Evaluation, reevaluation, and treatment of some PT, OT, and ST services may be provided by synchronous audiovisual technology.

Telehealth services for OT, PT or ST by synchronous audiovisual technology are allowed for specific procedure codes if clinically appropriate as determined by the practitioner, per standard of care, safe, agreed to by the person receiving services or by the legally authorized representative (LAR), and in compliance with each discipline's rules.

The following procedure codes may be provided by synchronous audiovisual technology:

- Physical Therapy Evaluations- Low, Moderate, and High Complexity and re-evaluation (procedure codes 97161, 97162, 97163, 97164)
- Occupational Therapy Evaluation- Low, Moderate, and High Complexity and re-evaluation (procedure codes 97165, 97166, 97167, 97168)
- PT or OT Services (individual or group) (procedure codes 97110, 97112, 97116, 97150, 97530, 97535, 97750, 97537)
- Community reintegration (procedure code 97537) may be provided if the person receiving services is currently receiving other therapeutic procedure codes and may not be billed separately.
- Speech Evaluations and re-evaluations (procedure codes 92521, 92522, 92523, 92524, 92610, S9152)
- ST (individual or group) services (procedure codes 92507, 92508, 92526)
- The provider should obtain informed consent for treatment from the patient, patient's parent, or the patient's legal guardian prior to rendering a telehealth service. Verbal consent is permissible and should be documented in the client's medical record.
- Services delivered by synchronous audiovisual technology may require participation of a caregiver or parent to assist with the treatment.

- Therapy assistants may deliver services and receive supervision by synchronous audiovisual technology within limits outlined in each discipline's rules. Providers should refer to state practice rules and national guidelines regarding supervision requirements for each discipline.
- Providers must use modifier 95 to indicate remote delivery. Providers are reminded to use the required modifiers GP, GO, and GN on all claims for physical, occupational, or speech therapy treatment

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telehealth documentation requirements including requirements for informed consent.

**Note:** *Telehealth services must adhere to documentation, privacy and security requirements as outlined in this handbook and those in the Telecommunication Services Handbook (Vol. 2, Provider Handbooks).*

### 4.5.1 Group Therapy

Group therapy consists of simultaneous treatment to two or more clients who may or may not be doing the same activities. If the therapist is dividing attention among the clients, providing only brief, intermittent personal contact, or giving the same instructions to two or more clients at the same time, the treatment is recognized as group therapy. The prescribing provider or therapist involved in group therapy services must be in constant attendance, but one-on-one client contact is not required.

The following requirements must be met in order to meet the Texas Medicaid criteria for group therapy:

- Prescribing provider's prescription for group therapy.
- Performance by or under the general supervision of a qualified licensed therapist as defined by licensure requirements.
- The licensed therapist involved in group therapy services must be in constant attendance (in the same room) and active in the therapy.
- Each client participating in the group must have an individualized treatment plan for group treatment, including interventions and short-and long-term goals and measurable outcomes.

Texas Medicaid does not limit the number of clients who can participate in a group therapy session. Providers are subject to certification and licensure board standards regarding group therapy.

#### 4.5.1.1 Group Therapy Documentation Requirements

The following documentation must be maintained in the client's medical record:

- Prescribing provider's prescription for group therapy.
- Individualized treatment plan that includes frequency and duration of the prescribed group therapy and individualized treatment goals.
- Name and signature of licensed therapist providing supervision over the group therapy session.
- Specific treatment techniques utilized during the group therapy session and how the techniques will restore function.
- Start and stop times for each session.
- Group therapy setting or location.

- Number of clients in the group.

The client's medical record must be made available upon request.

## 4.6 Frequency and Duration Criteria for PT, OT, and ST Services

Frequency must always be commensurate with the client's medical and skilled therapy needs, level of disability and standards of practice; it is not for the convenience of the client or the responsible adult.

Exceptions to therapy limitations may be covered if the medically necessary criteria are met for the following:

- Presentation of new acute condition
- Therapist intervention is critical to the realistic rehabilitative/restorative goal, provided documentation proving medical necessity is received.

When therapy is initiated, the therapist must provide education and training of the client and responsible caregivers, by developing and instructing them in a home treatment program to promote effective carryover of the therapy program and management of safety issues.

Providers may request high, moderate, or low frequencies on the Texas Medicaid Physical, Occupational or Speech Therapy (PT, OT, ST) Prior Authorization Form by indicating 3, 2, or 1 time per week respectively. Providers may request low or maintenance level by requesting 1, 2, or 3 times per month. Additional documentation is required when requesting a frequency of 3 times a week or more.

**Note:** The reference to "maintenance" in the above statement is applicable to clients who are 20 years of age and younger.

### 4.6.1 High Frequency

High frequency (3 times per week) can only be considered for a limited duration (approximately 4 weeks or less) or as otherwise requested by the prescribing provider with documentation of medical need to achieve an identified new skill or recover function lost due to surgery, illness, trauma, acute medical condition, or acute exacerbation of a medical condition, with well-defined specific, achievable goals within the intensive period requested.

Therapy provided three times a week may be considered for 2 or more of these exceptional situations:

- The client has a medical condition that is rapidly changing.
- The client has a potential for rapid progress (e.g., excellent prognosis for skill acquisition) or rapid decline or loss of functional skill (e.g., serious illness, recent surgery).
- The client's therapy plan and home program require frequent modification by the licensed therapist.

On a case-by-case basis, a high frequency requested for a short-term period (4 weeks or less) which does not meet the above criteria may be considered with all of the following documentation:

- Letter of medical need from the prescribing provider documenting the client's rehabilitation potential for achieving the goals identified,
- Therapy summary documenting all of the following:
  - Purpose of the high frequency requested (e.g., close to achieving a milestone)
  - Identification of the functional skill which will be achieved with high frequency therapy
  - Specific measurable goals related to the high frequency requested and the expected date the goal will be achieved.

A higher frequency (4 or more times per week) may be considered on a case-by-case basis with clinical documentation supporting why 3 times a week will not meet the client's medical needs.

### 4.6.2 Moderate Frequency

Therapy provided two times a week may be considered when documentation shows one or more of the following:

- The client is making very good functional progress toward goals.
- The client is in a critical period to gain new skills or restore function or is at risk of regression.
- The licensed therapist needs to adjust the client's therapy plan and home program weekly or more often than weekly based on the client's progress and medical needs.
- The client has complex needs requiring ongoing education of the responsible adult.

### 4.6.3 Low Frequency

Therapy provided one time per week or every other week may be considered when the documentation shows one or more of the following:

- The client is making progress toward the client's goals, but the progress has slowed, or documentation shows the client is at risk of deterioration due to the client's development or medical condition.
- The licensed therapist is required to adjust the client's therapy plan and home program weekly to every other week based on the client's progress.
- Every other week therapy is supported for clients whose medical condition is stable, they are making progress, and it is anticipated the client will not regress with every other week therapy.

**Note:** *As the client's medical need for therapy decreases, it is expected that the therapy frequency will decrease as well.*

### 4.6.4 Maintenance Level/Prevent Deterioration

For clients who are 20 years of age and younger only, this frequency level (e.g., every other week, monthly, every 3 months) is used when the therapy plan changes very slowly, the home program is at a level that may be managed by the client or the responsible adult, or the therapy plan requires infrequent updates by the skilled therapist. A maintenance level or preventive level of therapy services may be considered when a client requires skilled therapy for ongoing periodic assessments and consultations and the client meets one of the following criteria:

- Progress has slowed or stopped, but documentation supports that ongoing skilled therapy is required to maintain the progress made or prevent deterioration.
- The submitted documentation shows that the client may be making limited progress toward goals or that goal attainment is extremely slow.
- Factors are identified that inhibit the client's ability to achieve established goals (e.g., the client cannot participate in therapy sessions due to behavior issues or issues with anxiety).
- Documentation shows the client and the responsible adult have a continuing need for education, a periodic adjustment of the home program, or regular modification of equipment to meet the client's needs.

### 4.6.5 Requesting Therapy Services

Providers may request physical, occupational, or speech therapy services frequency by week for one or more visits per week, or by month for 1, 2, or 3 visits per month.

- A week includes the day of the week on which the prior authorization period begins and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday.

- The number of therapy services authorized for a week or month must be contained in that prior authorization period.
- Services billed, in excess of those authorized are subject to recoupment.

Missed visits may be made up within the authorization period as long as total number of visits or units authorized does not exceed the amount authorized. Provider should document reason for visits outside of the weekly or monthly frequency in the client's medical record.

## 4.7 Criteria for Discontinuation of Therapy

Discontinuation of therapy may be considered in one or more of the following situations:

- Client no longer demonstrates functional impairment or has achieved goals set forth in the treatment plan or plan of care.
- Client has returned to baseline function.
- Client can continue therapy with a home treatment program and deficits no longer require a skilled therapy intervention and, for clients who are 20 years of age and younger only, maintain status.
- Client has adapted to impairment with assistive equipment or devices.
- Client is able to perform ADLs with minimal to no assistance from caregiver.
- Client has achieved maximum functional benefit from therapy in progress or will no longer benefit from additional therapy.
- Client is unable to participate in the treatment plan or plan of care due to medical, psychological, or social complications; and responsible adult has had instruction on the home treatment program and the skills of a therapist are not needed to provide or supervise the service.
- Testing shows client no longer has a developmental delay.
- Plateau in response to therapy/lack of progress towards therapy goals. Indication for therapeutic pause in treatments or, for those under age 21, transition to chronic status and maintenance therapy.
- Non-compliance due to poor attendance and with client or responsible adult, non-compliance with therapy and home treatment program.

## 4.8 Exclusions (Non-covered Services)

The following services are not a benefit of Texas Medicaid:

- Speech therapy provided in the home to adult clients who are 21 years of age and older
- Therapy services that are provided after the client has reached the maximum level of improvement or is now functioning within normal limits
- Massage therapy that is the sole therapy or is not part of a therapeutic plan of care to address an acute condition
- Separate reimbursement for VitalStim therapy for dysphagia. VitalStim must be a component of a comprehensive feeding treatment plan to be considered a benefit.
- Repetitive therapy services that are designed to maintain function once the maximum level of improvement has been reached, which no longer require the skills of a therapist to provide or oversee
- Therapy services related to activities for the general good and welfare of clients who are not considered medically necessary because they do not require the skills of a therapist, such as:
  - General exercises to promote overall fitness and flexibility or improve athletic performance

- Activities to provide diversion or general motivation
- Supervised exercise for weight loss
- Treatment solely for the instruction of other agency or professional personnel in the client’s physical, occupational or speech therapy program
- Emotional support, adjustment to extended hospitalization and/or disability, and behavioral readjustment
- Therapy prescribed primarily as an adjunct to psychotherapy
- Treatments not supported by medically peer-reviewed literature, including but not limited to investigational treatments such as sensory integration, vestibular rehabilitation for the treatment of attention deficit hyperactivity disorder, anodyne therapy, craniosacral therapy, interactive metronome therapy, cranial electro stimulation, low-energy neuro-feedback, and the Wilbarger brushing protocol.
- Therapy not expected to result in practical functional improvements in the client’s level of functioning
- Treatments that do not require the skills of a licensed therapist to perform in the absence of complicating factors (i.e., massage, general range of motion exercises, repetitive gait, activities and exercises that can be practiced by the client on their own or with a responsible adult’s assistance)
- The therapy requested is for general conditioning or fitness, or for educational, recreational or work-related activities that do not require the skills of a therapist
- Equipment and supplies used during therapy visits are not reimbursed separately; they are considered part of the therapy services provided
- Therapy services provided by a licensed therapist who is the client’s responsible adult (e.g., biological, adoptive, or foster parents, guardians, court-appointed managing conservators, other family members by birth or marriage)

Auxiliary personnel (aide, orderly, student, or technician) may participate in physical therapy, occupational therapy, or speech therapy sessions when they are appropriately supervised according to each therapy discipline’s scope of practice and provider licensure requirements. Providers may not bill Texas Medicaid for therapy services provided solely by auxiliary personnel

Auxiliary personnel, a licensed therapy assistant, and a licensed speech-language pathology intern (Clinical Fellow) are not eligible to enroll as therapist providers in Texas Medicaid.

**4.8.1 Telehealth Exclusions**

Texas Medicaid does not reimburse for PT, OT, or ST delivered through synchronous telephone (audio-only) technology. Certain procedure codes are not reimbursable for any telehealth service delivery. The following procedure codes must be provided in-person:

| Procedure codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 97012           | 97014 | 97016 | 97018 | 97022 | 97024 | 97026 | 97028 | 97032 | 97033 |
| 97034           | 97035 | 97036 | 97113 | 97124 | 97140 | 97542 | 97760 | 97761 | 97763 |
| 97799           |       |       |       |       |       |       |       |       |       |

5 Children’s Therapy Services Clients birth through 20 years of age

5.1 Services, Benefits, and Limitations

This section addresses acute and chronic physical therapy (PT), occupational therapy (OT), and speech therapy (ST) services for clients who are 20 years of age or younger. This section does not address freestanding inpatient rehabilitation services.

Unless otherwise specified, “days” refers to calendar days.

PT, OT, and ST are benefits of Texas Medicaid in Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs) for clients who are 20 years of age or younger.

**Note:** CORF and ORF services provided at schools, homes, daycare facilities, or any other non-Medicare approved ORF or CORF facility is not a covered Comprehensive Care Program (CCP) benefit.

Services provided to a client on school premises are only permitted when delivered before or after school hours. The only PT, OT, and ST services that can be delivered during school hours are therapy services provided by school districts as School Health and Related Services (SHARS).

Clients who are eligible for PT, OT, and ST through the public school system (SHARS), may only receive additional therapy through Medicaid if medical necessity criteria is met as outlined in this handbook.

**Referto:** Subsection 2.9, “Early Childhood Intervention (ECI) Services” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*) for the specific guidelines for therapy services that are provided through Early Childhood Intervention (ECI).

Section 2.1.2, “Enrollment” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*) for information about therapy services provided through SHARS.

Therapy services must be performed by one of the following: a licensed physical therapist, licensed occupational therapist, licensed speech-language pathologist, a prescribing provider within their scope of practice, or one of the following under the supervision of a licensed therapist of the specific discipline:

- Licensed therapy assistant
- Licensed speech-language pathology intern (Clinical Fellow)

**Note:** An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of therapy services on behalf of the client’s prescribing provider when the prescribing provider delegates this authority to the APRN or PA.

PT, OT, and ST services are provided in one of the following places of service by setting and provider:

| Place of Service | Provider Types                                                                                                                                                                                                                                                                                           |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Office           | Physician, physical/occupational therapy group, independently enrolled therapist, podiatrist, SHARS and ECI                                                                                                                                                                                              |
| Home             | Home health agency, independently enrolled therapist, physical/occupational therapy group, ECI, SHARS                                                                                                                                                                                                    |
| Outpatient       | Physician: podiatrist, outpatient hospital/clinic, outpatient rehabilitation center (includes comprehensive outpatient rehabilitation facility [CORF]/outpatient rehabilitation facility [ORF])<br>PPECC: home health agency, independently enrolled therapist, physical/occupational therapy group, ECI |
| Other            | ECI, SHARS, independently enrolled therapist, home health agency, and physical/occupational therapy group                                                                                                                                                                                                |

In determining whether a service requires the skill of a licensed physical and occupational therapist or speech language pathologist, consideration must be given to the inherent complexity of the service, the condition of the client, the accepted standards of medical and therapy practice guidelines, with consideration of the following:

- If the service could be performed by the average nonmedical person, the absence of a competent person (such as a family member or medical assistant) to perform it does not cause it to be a skilled therapy service.
- If the nature of a service is such that it can be safely and effectively performed by the average nonmedical person without direct supervision of a licensed therapist, the services cannot be regarded as skilled therapy.

**Referto:** Subsection 2.1, “CCP Overview” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for additional information about CCP.

### 5.1.1 Acute PT, OT, and ST Services

Acute PT, OT, and ST services are benefits of Texas Medicaid for the medically necessary short term treatment of an acute medical condition or an acute exacerbation of a chronic medical condition.

Treatments are expected to significantly improve, restore or develop physical functions diminished or lost as a result of a recent trauma, illness, injury, disease, surgery, or change in medical condition, in a reasonable and generally predictable period of time (60 days), based on the prescribing provider’s and therapist’s assessment of the client’s restorative potential.

**Note:** *Recent is defined as occurring within the past 90 days of the prescribing provider’s evaluation of condition.*

Treatments are directed towards restoration of or compensation for lost function.

Services do not duplicate those provided concurrently by any other therapy.

Services must meet acceptable standards of medical practice and be specific and effective treatment for the client’s condition.

Services are provided within the provider’s scope of practice, as defined by state law.

Acute is defined as an illness or trauma with a rapid onset and short duration.

A medical condition is considered chronic when 120 days have passed from the start of therapy or the condition is no longer expected to resolve or may be slowly progressive over an indefinite period of time.

With documentation of medical need physical, occupational, and speech therapy may continue for a maximum of 120 days for an acute medical condition or an acute exacerbation of a chronic medical condition.

Once the client’s condition is no longer considered acute, continued therapy for a chronic condition will only be considered for clients who are 20 years of age or younger.

### 5.1.2 Chronic Services

Chronic physical, occupational, and speech therapy services are benefits of Texas Medicaid for the medically necessary treatment of chronic medical conditions and developmental delay when a medical need is established for the developmental delay as indicated in this handbook. All eligible clients who are birth through 20 years of age may continue to receive all medically necessary therapy services, with documentation proving medical necessity.

The goals of the services provided are directed at maintaining, improving, adapting, or restoring functions which have been lost or impaired due to a recent illness, injury, loss of body part, congenital abnormality, degenerative disease, or developmental delay.

Services do not duplicate those provided concurrently by any other therapy.

Services must meet acceptable standards of medical practice and be specific and effective treatment for the client's condition.

Services are provided within the provider's scope of practice, as defined by state law.

Treatment for chronic medical conditions and developmental delay will only be considered for clients who are birth through 20 years of age.

## 5.2 Authorization Requirements for PT, OT, and ST Services

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

Providers must list all relevant procedure codes on the Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form when requesting prior authorization for therapy services.

Therapy services performed in the acute care inpatient setting do not require prior authorization.

Coverage periods do not coincide necessarily with calendar weeks or months, but cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period.

### 5.2.1 Initial Evaluation and Considerations for Prior Authorization for Treatment

Initial evaluations do not require prior authorization (procedure codes 92521, 92522, 92523, 92524, 92610, 97161, 97162, 97163, 97165, 97166, and 97167); however, documentation kept in the client's record must include a signed and dated prescribing provider's order for the evaluation, support a medical need for the therapy evaluation, and be available when requested.

A therapy evaluation is considered current when it is performed within 60 days before the prior authorization request is received.

To complete the prior authorization process by paper, the provider must complete and submit the prior authorization requirements documentation through fax or mail, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To complete the prior authorization process electronically, the provider must complete and submit the prior authorization requirements documentation through any approved electronic method, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To avoid unnecessary denials, the prescribing provider must provide correct and complete information, including documentation of medical necessity for the service(s) requested. The prescribing provider must maintain documentation of medical necessity in the client's medical record. The requesting therapy provider may be asked for additional information to clarify or complete a request.

Therapy services, regardless of place or provider, occurring after the initial evaluation, require prior authorization. PT, OT, or ST services may be prior authorized to be provided in the following locations: home of the client, home of the caregiver or guardian, client's daycare facility or the client's school.

### 5.2.1.1 Initial Evaluation for Acute and Chronic Therapy Services

For acute therapy services, i.e. acute services billed with an AT modifier, prior authorization requests may not exceed a 60 day period per each request. After two 60 day authorized periods, any continued requests for therapy services must be considered under the chronic sections of this handbook.

For chronic therapy services, prior authorization may be granted for up to 180 days with documentation of medical necessity and additional prior authorizations.

Initial prior authorization (PA) requests must be received no later than five business days from the date therapy treatments are initiated. Requests received after the five-business-day period will be denied for dates of service that occurred before the date that the PA request was received.

All of the following documentation is required when submitting an initial request for therapy services initiated after the completion of the evaluation for acute or chronic services:

- A completed Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form signed and dated by both the therapist and by the prescribing provider is required. When the request form is unsigned by the prescribing provider, it must be accompanied by a signed and dated written order or prescription or a documented verbal order delineating the prescribed therapy services.
- The prescribing provider must certify that the Texas Health Steps (THSteps) checkup is current or that a developmental screening has been performed within the last 60 days. Signature of prescribing provider on PA form will attest that this service has been provided. If prescribing provider provides verbal order or written order separate from PA form, staff member who conveys the verbal or written order must communicate that prescribing provider attests that THSteps checkup is current or that a developmental screening has been performed within the last 60 days.
- For acute services: Documentation from the prescribing provider that a visit for the acute or acute exacerbation of the medical condition requiring therapy has occurred within the last 90 days.
- Evaluation and Treatment Plan or Plan of Care (POC) with all of the following required elements:
  - Client's medical history and background
  - All medical diagnoses related to the client's condition
  - Date of onset of the client's condition requiring therapy or exacerbation date as applicable
  - Date of evaluation
  - Time in and time out
  - Baseline objective measurements based on standardized testing performed or other standard assessment tools

**Referto:** Subsection 5.3, "Developmental Delay Criteria" in this handbook for information about chronic services.

- Safety risks
- Client-specific, measurable short and long-term functional goals within the length of time the service is requested
- Interpretation of the results of the evaluation, including recommendations for therapy amount, frequency per week and duration of services
- Therapy treatment plan/POC to include specific modalities and treatments planned
- Documentation of client's primary language
- Documentation of client's age and date of birth
- Adaptive equipment or assistive devices, as applicable

- Prognosis for improvement
- Requested dates of service for planned treatments after the completion of the evaluation
- Responsible adult's expected involvement in client's treatment
- History of prior therapy and referrals as applicable
- Signature and date of treating therapist

### **5.2.2 Additional Evaluation and Documentation Requirements for Speech Therapy**

Additional evaluation and documentation requirements for speech therapy include one or more of the following:

- Language evaluations—Oral-peripheral speech mechanism examination and formal or informal assessment of hearing, articulation, voice and fluency skills;
- Speech production (voice)—Formal screening of language skills, and formal or informal assessment of hearing, voice and fluency skills;
- Speech production (fluency and articulation)—Formal screening of language skills, formal or informal assessment of hearing, voice and fluency skills;
- Oral Motor/Swallowing/Feeding—In addition to formal screening of language skills, formal or informal assessment of hearing, voice, and fluency skills, if swallowing problems and/or signs of aspiration are noted, then a statement indicating that a referral has been made to the client's prescribing provider to consider a video fluoroscopic swallow study must be included.

#### **5.2.2.1 Bilingual Testing Requirements**

Bilingual and multilingual speakers are frequently misclassified as developmentally delayed. Equivalent proficiency in both languages should not be expected.

Criterion-referenced assessment tools can be used to identify and evaluate a client's strengths and weaknesses, as opposed to norm-referenced testing, which assesses an individual relative to a group.

When possible, use culturally and linguistically adapted test equivalents in both languages to compare potential deficits and include in the documentation. The therapist will show the highest score of the two languages to determine whether the child qualifies and which language will be used for the child's therapy. Testing for all subsequent re-evaluations should only be conducted in the language used in therapy.

### **5.2.3 Written and Verbal Orders**

For new authorizations and recertifications of therapies, if the submitted request form is not signed and dated by the prescribing provider, the request must be accompanied by a verbal or written order.

The request form or written or verbal order must be signed and dated within the 60-day period before the initiation of services. A prescribing provider's order to evaluate and treat is acceptable for the evaluation or re-evaluation, but is not acceptable for the therapy treatment. The therapy treatment order must contain the prescribing provider's ordered frequency, duration, and affirmation that the client's THSteps checkup is current or that a developmental screening has been performed within the last 60 days.

The documentation for a verbal order must meet the following criteria:

- It must be signed and dated by the licensed professional who by state and federal law may take a verbal order.
- It must have the name and credentials of the licensed professional who took the order and who is responsible for furnishing or supervising the ordered services.

- The verbal order must include the date on which the verbal order was taken.
- The verbal order must include the services, frequency, and duration that was prescribed by the ordering provider.

#### **5.2.4 Requests for Recertification—Acute Therapy Services**

A recertification for prior authorization of acute therapy services may be considered up to a maximum of 60 day increments, when services continue to meet authorization criteria. Re-evaluation codes (procedure codes 97164, 97168, and S9152) require authorization for acute therapy services and must be submitted with the recertification request. Therapy for clients who are birth through 20 years of age who do not meet the acute therapy services criteria may be considered for chronic therapy services.

Recertification for an acute or acute exacerbation of medical conditions includes a progress summary and a Texas Medicaid Physical, Occupational or Speech Therapy (PT, OT, ST) Prior Authorization Form.

A complete recertification request must be received no earlier than 30 days before the current authorization period expires. Requests for recertification services received after the current authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

Prior authorization for recertification requests may be considered for increments up to 60 days for each therapy service request, with documentation supporting the medical necessity including all of the following:

- Texas Medicaid Physical, Occupational or Speech Therapy (PT, OT, ST) Prior Authorization Form or electronic equivalent signed and dated by the therapist and signed and dated by the prescribing provider. When the request form is unsigned by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed therapy services.
- A progress summary (see progress summary documentation requirements), and
- A revised treatment plan or plan of care for the recertification dates of service requested, including all of the following:
  - Date therapy services started
  - Changes in the treatment plan, the rationale and the requested change in frequency of visits for changing the plan
  - Documentation of reasons continued therapy services are medically needed
  - Documentation of client's participation in treatment, as well as client or responsible adult's participation or adherence with a home treatment program
  - New treatment plan or plan of care for the recertification dates of service requested
  - Updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable
  - Adaptive equipment or assistive devices, as applicable
  - Prognosis with clearly established discharge criteria
- Documentation of consults with other professionals and services or referrals made and coordination of service when applicable (e.g., for school aged clients, documentation of the coordination of care and referrals made for school therapies).
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

A progress summary, which may be contained in the last treatment note, must be included with the recertification request and contains all of the following:

- Date therapy started
- Date the summary completed
- Time period (dates of service) covered by the summary
- Client's medical and treatment diagnoses
- A summary of client's response to therapy and current treatment plan, to include:
  - Documentation of any issues limiting the client's progress
  - Documentation of objective measures of functional progress related to each treatment goal established on the initial evaluation
  - An assessment of the client's therapy prognosis and overall functional progress
  - Documentation of client's participation in treatment as well as client or responsible adult's participation or adherence with a home treatment program
  - Updated or new functional and measurable short and long-term treatment goals with time frames, as applicable
  - Documentation of client's continued need for therapy
  - Clearly established discharge criteria
  - Documentation of consults with other professionals and services or coordination of service when applicable.
- The progress summary must be signed and dated by the therapist responsible for the therapy services.

## **5.2.5 Requests for Recertification - Chronic Therapy Services**

### **5.2.5.1 Re-evaluation (every 180 days)**

A re-evaluation is a comprehensive evaluation and must take place every 180 days and contains all the elements of an initial evaluation, including affirmation that the client's THSteps checkup is current or that a developmental screening was performed by the prescribing provider within the last 60 days. It may be used to make a determination whether or not skilled therapy is medically necessary, or when determining the effectiveness of the current plan, or when the current plan requires significant modification and revision of the interventions and goals due to changes in the client's medical status or lack of progress with the current treatment. A re-evaluation requires authorization and must be submitted with the recertification request (procedure codes 97164, 97168, and S9152).

Routine reassessments that occur during each treatment session or visit or for a progress report required for an extension of services or discharge summary are not considered a comprehensive re-evaluation.

Tests used must be norm-referenced, standardized, and specific to the therapy provided.

**Referto:** Subsection 5.3, "Developmental Delay Criteria" in this handbook for information about documentation about developmental delay criteria.

A recertification request may be considered when services will be medically needed after the previously approved authorization period ends.

A complete request must be received no earlier than 30 days before the current authorization period expires.

Requests for recertification services received after the current authorization expires will be denied for dates of service that occurred before the date the request is received.

A re-evaluation may occur as early as 60 days prior to the end of the current authorization period.

A therapy re-evaluation is considered current when it is performed within 60 days before the current authorization period expires.

The re-evaluation must occur within 30 days of the signed and dated order from the referring provider.

Prior authorization for recertification requests may be considered for increments up to 180 days for each request with documentation supporting the medical necessity including all of the following:

- Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form or electronic equivalent signed and dated by the therapist and by the prescribing provider. When the request form is unsigned by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed therapy services.
- A re-evaluation must include a revised treatment plan or plan of care including all of the following:
  - Documentation that the THSteps checkup is current or that a developmental screening was performed by the prescribing provider within the last 60 days

**Note:** *Additional documentation is not necessary if the prescribing provider signs the Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form.*

- Date therapy services started
- Changes in the treatment plan, the rationale, and the requested change in frequency of visits
- Documentation of reasons continued therapy services are medically needed
- Documentation of developmental delay

**Referto:** Subsection 5.3, “Developmental Delay Criteria” in this handbook for information about documentation about developmental delay criteria.

- Documentation of client’s participation in treatment, as well as client or responsible adult’s participation or adherence with a home treatment program
- New treatment plan or POC for the recertification dates of service requested
- Updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable. Previous authorization period’s goals and progress must be included.
- Prognosis with clearly established discharge criteria. The discharge plan must reflect realistic expectations from the episode of therapy.
- Documentation of consults with other professionals and services or referrals made and coordination of service when applicable (e.g., for school aged clients, documentation of the coordination of care and referrals made for school therapies)
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

### **5.2.6 Requests for Revisions to Existing Prior Authorizations or Recertification for Acute and Chronic Therapy Services**

A revision to an existing authorization/recertification must be documented in the client’s record when significant changes occur in the frequency or treatment plan. When frequency is increased, or services requiring separate authorization are added, a request for revision must be submitted for prior authorization.

Requests for revisions must be received no later than five business days from the date the revised therapy treatments are initiated. Requests for revisions received after the five business day period will be denied for dates of service that occurred before the date the request was received.

A prior authorization request for revisions to services may be considered up to the end of the current approved prior authorization.

Requests for revision must be submitted with the following documentation:

- Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form, including the date the revision was initiated, signed and dated by the therapist and signed and dated by the prescribing provider. When the request form is not signed and dated by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed services.
- Progress summary for acute services indicating the medical rationale for the change requested, and
- Updated treatment plan or POC addressing all the elements of the previous plan and addressing all revisions to the services planned, including updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable. Previous authorization period's goals and progress must be included.
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

### **5.2.7 Change of Therapy Provider**

If a provider or client discontinues therapy during an existing prior authorized period and the client requests services through a new provider outside the current group or agency, they must start a new request for authorization and submit all documentation required for an initial evaluation, and also the following:

- A change-of-therapy provider letter, signed by the client or responsible adult
- The letter must document the date that the client ended therapy (effective date of change) with the previous provider, or last date of service
- The name of the new provider and previous provider

When a provider or client discontinues therapy during an existing prior authorization period and the client requests services through a new provider located within the same enrolled group of providers or within a group of independently enrolled providers collaboratively working together, the new provider can use the same evaluation and plan of care.

The authorization period will not change when the provider changes.

### **5.2.8 Treatment Note**

The following documentation must be kept on file by the treating provider and be available when requested:

- Client's name
- Date of service
- Time in and out of each therapy session
- Objectives addressed (should coincide with plan of care) and progress noted, if applicable
- A description of specific therapy services provided and the activities rendered during each therapy session, along with a form of measurement.
- Assessments of client's progress or lack of progress
- Treatment notes must be legible
- Therapy providers must sign each date of entry with full signature and credentials

All documentation for evaluations, re-evaluations, progress summaries, treatment notes, and discharge summaries must show client's name, date of service, time in and time out of each therapy session.

**Note:** *Documentation requirements for a telehealth service are the same as what is required for an in-person visit and must accurately reflect the services rendered. Additionally, documentation must identify the means of delivery when provided by telehealth.*

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telehealth services documentation requirements.

### 5.3 Developmental Delay Criteria

To establish a developmental delay, all of the following criteria must be met:

- Tests used must be norm-referenced, standardized, and specific to the therapy provided.
- Retesting with norm-referenced standardized test tools for re-evaluations must occur every 180 days. Tests must be age appropriate for the child being tested and providers must use the same testing instrument as used in the initial evaluation. If reuse of the initial testing instrument is not appropriate, i.e. due to change in client status or restricted age range of the testing tool, provider should explain the reason for the change.
- Eligibility for therapy will be based upon a score that falls 1.5 standard deviations (SD) or more below the mean in at least one subtest area of composite score on a norm-referenced, standardized test. Raw scores must be reported along with score reflecting SD from mean.
- When the client's test score is less than 1.5 SD below the mean, a criterion-referenced test along with informed evidenced-based clinical opinion must be included to support the medical necessity of services and will be sent to physician review to determine medical necessity.
- If a child cannot complete norm-referenced standardized assessments, then a functional description of the child's abilities and deficits must be included. Measurable functional short and long term goals will be considered along with test results. Documentation of the reason a standardized test could not be used must be included in the evaluation.

Specific developmental delay criteria requirements for speech diagnoses are as follows:

- Language—at least one norm-referenced, standardized test with good reliability and validity, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Articulation—at least one norm-referenced, standardized test with good reliability and validity, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Apraxia—at least one norm-referenced, standardized test with good reliability and validity, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Fluency—at least one norm-referenced, standardized test with good reliability, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Voice—a medical evaluation is required for eligibility and based on medical referral
- Oral Motor/Swallowing/Feeding—an in-depth, functional profile of oral motor structures and function

If the client's test score is less than 1.5 SD below the mean, additional documentation supporting the client's medical need for therapy will be considered and the request will be sent to physician review to determine medical necessity.

Additional speech therapy visits or sessions may be considered for moderate speech language, articulation, voice and dysphagia developmental delays when documentation submitted supports medical necessity as delineated in the frequency criteria in this handbook.

5.4 Age Adjustment for Children Born Prematurely

Age is adjusted for children born before 37 weeks gestation and is based on a 40-week term. The developmental age must be measured against the adjusted age rather than chronological age until the child is 24 months old. The age adjustment cannot exceed 16 weeks.

5.5 PT, OT, and ST Procedure Codes

PT, OT, and ST treatment procedure codes are either time-based and billable in units or untimed and billable per daily encounter.

5.5.1 Timed PT and OT Treatment Procedure Codes

All time-based PT and OT treatment procedure codes are cumulatively limited to one hour per date of service per discipline (4 units).

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 2 units (thirty minutes) per date of service per discipline:

| Procedure Codes |       |
|-----------------|-------|
| 97034           | 97035 |

The following time-based PT and OT treatment procedure code must be billed in 15 minute increments, is limited to a combined total of 3 units (45 minutes) per date of service per discipline, and is not payable in the home or other setting:

| Procedure Codes |
|-----------------|
| 97036           |

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 4 units (one hour) per date of service per discipline:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 97032           | 97033 | 97110 | 97112 | 97113 | 97116 | 97124 | 97140 | 97530 | 97535 |
| 97537           | 97542 | 97750 | 97760 | 97761 | 97763 |       |       |       |       |

**Note:** Procedure code 97113 is not payable to home health agencies.

5.5.2 Untimed PT and OT Treatment Procedure Codes

The following supervised modality PT and OT treatment procedure codes are limited to once per date of service per procedure code and must be delivered on the same date of service as one or more time-based PT and OT procedure codes and are subject to CMS NCCI relationships:

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| 97012           | 97014 | 97016 | 97018 | 97022 | 97024 | 97026 | 97028 |

The following PT and OT group therapy treatment procedure code is limited to once per date of service:

| Procedure Codes |  |
|-----------------|--|
| 97150           |  |

Separate prior authorization is required for medically necessary therapeutic procedures not addressed by procedure codes outlined in this handbook.

The following procedure code requires supporting documentation indicating why an unlisted procedure code is required and is limited to once per date of service:

| Procedure Codes |  |
|-----------------|--|
| 97799           |  |

If the therapy treatment services that are billed exceed one hour (four units per day), the claim will be denied, and it may be appealed. On appeal, the provider must meet the following conditions:

- The appeal must document the prior authorization period week or month for the date of service appealed.
- The appeal must include an attestation that the provider has billed all therapy services for the week or month in question.

For clients who are 20 years of age and younger, when physical or occupational group therapy is administered, providers can bill procedure code 97150 for each member of the group.

A client may receive therapy in more than one discipline (physical, occupational, or speech) in more than one setting (outpatient, office or home setting) in one day.

5.5.3 ST Treatment Procedure Codes

Individual speech treatment is limited to one encounter per date of service any provider. Only one of the following individual speech treatment procedure codes will be reimbursed per date of service:

| Procedure Codes |       |
|-----------------|-------|
| 92507           | 92526 |

An encounter for speech therapy individual treatment is defined as face-to-face time with the patient and/or caregiver for a length of time compliant with nationally recognized professional speech-language pathology standards for a typical session.

The following group speech therapy procedure code is limited to once per date of service:

| Procedure Codes |  |
|-----------------|--|
| 92508           |  |

5.5.4 PT, OT, and ST Evaluation and Re-evaluation Codes

Evaluation and re-evaluation procedure codes in the following table are untimed:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92521           | 92522 | 92523 | 92524 | 92610 | 97161 | 97162 | 97163 | 97164 | 97165 |
| 97166           | 97167 | 97168 | S9152 |       |       |       |       |       |       |

5.5.5 PT, OT, and ST Reimbursement Guidelines

If a therapy evaluation or re-evaluation procedure code and like therapy procedure code are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

Therapy services provided in the nursing home setting are limited to the nursing facility because these services must be made available to nursing home residents on an “as needed” basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources. Nursing home facilities should refrain from admitting clients who need goal directed therapy if the facility is unable to provide these services.

Procedure codes for PT, OT, and ST evaluations are payable once every three years to the same rendering provider.

For acute services, PT, OT, and ST re-evaluations may be reimbursed once every 60 days to any provider when a recertification of services is planned.

For chronic services, PT, OT, and ST re-evaluations are reimbursed once every 180 days to any provider when a recertification of services is planned.

Additional PT, OT, or ST evaluations or re-evaluations exceeding the limits outlined in this handbook may be considered for with documentation of one of the following:

- A significant change in the client’s medical condition as documented in the plan of care or treatment plan
- A change of provider has occurred and a change of provider letter is submitted with the appeal.
- The re-evaluation is required for recertification of an existing authorization.

The following procedure codes are billable for telehealth services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92507           | 92508 | 92521 | 92522 | 92523 | 92524 | 92526 | 92610 | 97110 | 97112 |
| 97116           | 97150 | 97161 | 97162 | 97163 | 97164 | 97165 | 97166 | 97167 | 97168 |
| 97530           | 97535 | 97750 | 97537 | S9152 |       |       |       |       |       |

Therapy services may be billed when rendered in a PPECC even if the provider would typically be restricted to a home setting. Home health providers rendering therapy services in a PPECC must include the PPECC’s NPI number on their institutional claim form, in addition to their own NPI. Therapy providers who bill using a professional claim form must include the PPECC name and NPI number on the claim and indicate outpatient hospital as the place of service. The therapy provider and PPECC must have a written agreement for each client related to the provision of therapy services provided at the PPECC. The written agreement must address responsibilities of both parties, and how the parties will coordinate related to the client’s plan of care. The written agreement must be maintained in the client’s medical record.

A modifier must be used to indicate when treatment services have been rendered by a licensed therapist/ prescribing provider or a therapy assistant under supervision of a licensed therapist. Providers must use modifier 95 for services delivered by synchronous audiovisual technology.

The following modifiers are not required for evaluation or re-evaluation codes because those services may not be rendered by therapy assistants.

| Modifier | Description                                                                                  |
|----------|----------------------------------------------------------------------------------------------|
| UB       | Services delivered by a licensed therapy assistant under supervision of a licensed therapist |
| U5       | Services delivered by a licensed therapist or physician                                      |

5.5.6 Therapy Co-Treatment

Claims for co-treatment services must be submitted with modifier U3:

| Modifier | Description                   |
|----------|-------------------------------|
| U3       | Therapy Co-Treatment Modifier |

Claims for telehealth must be submitted with modifier 95:

| Modifier | Description                                              |
|----------|----------------------------------------------------------|
| 95       | Services delivered by synchronous audiovisual technology |

6 Adult Services

6.1 Services, Benefits, and Limitations

Unless otherwise specified, “days” refers to calendar days.

Physical therapy (PT), occupational therapy (OT), and speech therapy (ST) services are benefits of Texas Medicaid for the medically necessary short term treatment of an acute medical condition or an acute exacerbation of a chronic medical condition for clients who are 21 years of age and older.

Treatments are expected to significantly improve, restore, or develop physical functions diminished or lost as a result of a recent trauma, illness, injury, disease, surgery, or change in medical condition, in a reasonable and generally predictable period of time (60 days), based on the prescribing provider’s and therapist’s assessment of the client’s restorative potential.

***Note:** Recent is defined as occurring within the past 90 days of the prescribing provider’s evaluation of condition.*

Treatments are directed towards restoration of or compensation for lost function.

Services do not duplicate those provided concurrently by any other therapy.

Services must meet acceptable standards of medical practice and be specific and effective treatment for the client’s condition.

Services are provided within the provider’s scope of practice, as defined by state law.

Acute is defined as an illness or trauma with a rapid onset and short duration.

Adult therapy services are limited to a maximum of 120 days per identified acute medical condition or acute exacerbation of a chronic medical condition requiring therapy or whenever the maximum benefit from therapy has been achieved, whichever comes first.

A medical condition is considered chronic when 120 days have passed from the start of therapy, or the condition is no longer expected to resolve or may be slowly progressive over an indefinite period of time.

Physical and occupational therapy services for acute conditions are benefits of Texas Medicaid for adult clients in the office, outpatient, and home settings.

Speech therapy services for acute conditions are benefits of Texas Medicaid for adult clients in the office and outpatient setting only.

Therapy services must be performed by one of the following:

- Licensed physical therapist
- Licensed occupational therapist
- Licensed speech-language pathologist
- Physician within their scope of practice

Therapy services may also be performed by one of the following under the supervision of a licensed therapist of the specific discipline:

- Licensed therapy assistant
- Licensed speech-language pathology intern (Clinical Fellow)

**6.1.1 Adult Acute Therapy Place of Service**

PT and OT providers render acute therapy services for adult clients who are 21 years of age and older in one of the following places of service:

| Place of Service | Provider types                                                                                         |
|------------------|--------------------------------------------------------------------------------------------------------|
| Office           | Physician; podiatrist; independently enrolled therapist; physical/occupational therapy group           |
| Home             | Home health agency; independently enrolled physical therapist; and physical/occupational therapy group |
| Outpatient       | Physician; podiatrist; outpatient hospital/clinic                                                      |
| Other            | Independently enrolled therapist; home health agency; physical/occupational therapy group              |

ST providers render acute therapy services for adult clients who are 21 years of age and older in one of the following places of service:

| Place of Service | Provider types                                                |
|------------------|---------------------------------------------------------------|
| Office           | Physician; independently enrolled speech-language pathologist |
| Outpatient       | Physician; outpatient hospital/clinic                         |

In determining whether a service requires the skill of a licensed therapist, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and therapy practice guidelines.

If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be a skilled therapy service.

If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed therapist, the services cannot be regarded as skilled therapy.

**6.2 Authorization Requirements for Outpatient and Home Health —PT, OT, and ST Services**

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients’ responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, “Document Requirements and Retention” in “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for additional information about electronic signatures.

Coverage periods do not coincide necessarily with calendar weeks or months, but cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period.

### **6.2.1 Initial Evaluation and Considerations for Prior Authorization for Treatment**

Initial evaluations do not require prior authorization (procedure codes 92521, 92522, 92523, 92524, 92610, 97161, 97162, 97163, 97165, 97166, and 97167); however, documentation kept in the client’s record must include a signed and dated prescribing provider’s order for the evaluation, support a medical need for the therapy evaluation and be available when requested.

To complete the prior authorization process by paper, the provider must complete and submit the prior authorization requirements documentation through fax or mail, and must maintain a copy of the prior authorization request and all submitted documentation in the client’s medical record at the therapy provider’s place of business.

To complete the prior authorization process electronically, the provider must complete and submit the prior authorization requirements documentation through any approved electronic method, and must maintain a copy of the prior authorization request and all submitted documentation in the client’s medical record at the therapy provider’s place of business.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment, supplies, and services requested and is subject to retrospective review. The prescribing provider must maintain documentation of medical necessity in the client’s medical record. The requesting therapy provider may be asked for additional information to clarify or complete a request.

Therapy services, regardless of place or provider, occurring after the initial evaluation, require prior authorization. Prior authorization requests may not exceed a 60 day period.

Prior authorization (PA) requests must be received no later than five business days from the date therapy treatments following the evaluation are initiated. Requests received after the five-business-day period will be denied for dates of service that occurred before the date that the PA request is received.

#### **6.2.1.1 Documentation**

All of the following documentation is required when submitting an initial request for therapy services initiated after the completion of the evaluation:

- A completed Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form signed and dated by the therapist and signed and dated by the prescribing provider is required). When the request form is unsigned by the prescribing provider, it must be accompanied by a signed and dated written order, or prescription, or a documented verbal order delineating the prescribed therapy services.
- Documentation of the acute or acute exacerbation of the medical condition requiring therapy. Evaluation and Treatment Plan or Plan of Care (POC) with all of the following required elements:
  - Client’s medical history and background
  - All medical diagnoses related to the client’s condition
  - Date of onset of the client’s condition requiring therapy, or exacerbation date as applicable
  - Date of evaluation

- Baseline objective measurements documented based on any testing performed
- Explanation of how identified limitations impair the overall function of the client
- Safety risks
- Client-specific, measurable short and long-term functional goals within the length of service time requested
- Interpretation of the results of the evaluation, including recommendations for therapy amount, frequency per week and duration of services
- When a client also receives PPECC services, indicate if therapy services will be delivered in a PPECC setting, the amount, frequency, and duration of the therapy services to be delivered in a PPECC setting in contrast with other locations (e.g., the home)
- Therapy treatment plan/POC to include specific modalities and treatments planned
- Documentation of client's primary language
- Documentation of client's age and date of birth
- Adaptive equipment or assistive devices, as applicable
- Prognosis for improvement
- Time in and time out on evaluation
- Requested dates of service for planned treatments after the completion of the evaluation
- Responsible adult's expected involvement in client's treatment
- History of prior therapy and referrals as applicable
- Signature and date of treating therapist

Additional requirements for speech therapy include one or more of the following:

- Language evaluations—oral-peripheral speech mechanism examination and formal or informal assessment of hearing, articulation, voice and fluency skills.
- Speech production (voice)—formal screening of language skills, and formal or informal assessment of hearing, voice and fluency skills.
- Speech production (fluency)—formal screening of language skills, formal or informal assessment of hearing, voice and fluency skills.
- Oral Motor/Swallowing/Feeding—If swallowing problems and/or signs of aspiration are noted, then include a statement indicating that a referral for a video fluoroscopic swallow study has been made; formal screening of language skills, formal or informal assessment of hearing, voice and fluency skills.

### **6.2.2 Written and Verbal Orders**

For new authorizations and recertifications of therapies, if the submitted request form is not signed and dated by the prescribing provider, the request must be accompanied by a verbal or written order.

The request form or written or verbal order must be signed and dated within the 60-day period before the initiation of services. A prescribing provider's order to evaluate and treat is acceptable for the evaluation or re-evaluation, but is not acceptable for the therapy treatment. The therapy treatment order must contain the prescribing provider's ordered frequency and duration.

The documentation for a verbal order must meet the following criteria:

- It must be signed and dated by the licensed professional who by state and federal law may take a verbal order.

- It must have the name and credentials of the licensed professional who took the order and who is responsible for furnishing or supervising the ordered services.
- The verbal order must include the date on which the verbal order was taken.
- The verbal order must include the services and the frequency and duration that was prescribed by the ordering provider.

### **6.2.3 Requests for Recertification-Up to an Additional 60 days for Acute Services**

A recertification request may be considered when services will be medically needed after the previously approved authorization period ends.

Re-evaluation codes (procedure codes 97164, 97168, and S9152) require prior authorization and must be submitted with the recertification request. Required documentation for recertifications includes a progress summary and Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form.

A complete recertification request must be received no earlier than 30 days before the current authorization period expires. Requests for recertification services received after the current authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

One recertification request may be considered for an additional 60 days for each therapy service request with documentation supporting the medical necessity including all of the following:

- Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form or electronic equivalent signed and dated by the therapist and signed and dated by the ordering provider. When the request form is unsigned by the provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed therapy services.
- A progress summary (see progress summary documentation requirements), and
- An updated treatment plan or POC for the recertification dates of service requested, including all of the following:
  - Date therapy services started
  - Changes in the treatment plan, the rationale and the requested change in frequency of visits for changing the plan
  - Documentation of reasons continued therapy services are medically needed
  - Documentation of client's participation in treatment, as well as client and responsible adult's participation or adherence with a home treatment program
  - Updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable
  - Adaptive equipment or assistive devices, as applicable
  - Prognosis with clearly established discharge criteria
  - Documentation of consults with other professionals and services or referrals made and coordination of service when applicable
  - The updated treatment plan or plan of care must be signed and dated by the therapist responsible for the therapy services.

A progress summary which may be contained in the last treatment note, must be included with the recertification request and contains all of the following:

- Date therapy started

- Date the summary completed
- Time period (dates of service) covered by the summary
- Client's medical and treatment diagnoses
- A summary of client's response to therapy and current treatment plan, to include:
  - Documentation of any issues limiting the client's progress
  - Documentation of objective measures of functional progress related to each treatment goal established on the initial evaluation
  - An assessment of the client's therapy prognosis and overall functional progress
  - Documentation of client's participation in treatment as well as client and responsible adult's participation or adherence with a home treatment program
  - Updated or new functional and measurable short and long-term treatment goals with time frames, as applicable
  - Documentation of client's continued need for therapy
  - Clearly established discharge criteria
  - Documentation of consults with other professionals and services or coordination of service when applicable.
- The progress summary must be signed and dated by the therapist responsible for the therapy services.

#### **6.2.4 Requests for Revisions to Existing Prior Authorization or Recertification**

A revision to an existing authorization/recertification must be documented in the client's record when significant changes occur in the frequency or treatment plan. When the frequency is increased or services requiring separate authorization are added, a request for revision must be submitted for prior authorization.

Requests for revisions must be received no later than five business days from the date the revised therapy treatments are initiated.

Requests for revisions received after the five business day period will be denied for dates of service that occurred before the date the request was received.

- A prior authorization request for revisions to services may be considered up to the end of the current approved prior authorization.
- Requests for revision must be submitted with the following documentation:
  - Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form, including the date the revision was initiated, signed, and dated by the therapist and signed and dated by the prescribing provider. When the request form is not signed and dated by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed services.
  - Progress summary including the medical rationale for the change requested, and
- Updated treatment plan or POC addressing all the elements of the previous plan and addressing all revisions to the services planned, including updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable. Previous authorization period's goals and progress must be included.
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

### 6.2.5 Change of Therapy Provider

If a provider or client discontinues therapy during an existing prior authorized period and the client requests services through a new provider outside the current group or agency, they must start a new request for authorization and submit all documentation required for an initial evaluation, and also all of the following:

- A change-of-therapy provider letter signed by the client or responsible adult,
- The letter must document the date that the client ended therapy (effective date of change) with the previous provider, or last date of service,
- The name of the new provider and previous provider

When a provider or client discontinues therapy during an existing prior authorization period and the client requests services through a new provider located within the same enrolled group of providers or within a group of independently enrolled providers collaboratively working together, the new provider can use the same evaluation and plan of care.

The authorization period will not change when the provider changes.

### 6.2.6 Treatment Note

The following documentation must be kept on file by the treating provider and available when requested:

- Client's name
- Date of service
- Time in and out of each therapy session
- Objectives addressed (should coincide with plan of care) and progress noted, if applicable
- A description of specific therapy services provided and the activities rendered during each therapy session, along with a form of measurement.
- Assessments of client's progress or lack of progress
- Treatment notes must be legible
- Therapy providers must sign each date of entry with full signature and credentials

All documentation for evaluations, re-evaluations, progress summaries, treatment notes, and discharge summaries must show client's name, date of service, time in and time out for each therapy session.

**Note:** *Documentation requirements for a telehealth service are the same as what is required for an in-person visit and must accurately reflect the services rendered. Additionally, documentation must identify the means of delivery when provided by telehealth.*

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telehealth services documentation requirements.

## 6.3 PT, OT, and ST Procedure Codes

PT, OT, and ST treatment procedure codes are either time-based and billable in units or untimed and billable per daily encounter.

### 6.3.1 PT and OT Treatment Procedure Codes

All time-based PT and OT treatment procedure codes are cumulatively limited to one hour per date of service per discipline (4 units).

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 2 units (thirty minutes) per date of service per discipline:

| Procedure Codes |       |
|-----------------|-------|
| 97034           | 97035 |

The following time-based PT and OT treatment procedure code must be billed in 15 minute increments, is limited to a combined total of 3 units (45 minutes) per date of service per discipline, and is not payable in the home or other setting:

| Procedure Codes |
|-----------------|
| 97036           |

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 4 units (one hour) per date of service per discipline:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 97032           | 97033 | 97110 | 97112 | 97113 | 97116 | 97124 | 97140 | 97530 | 97535 |
| 97537           | 97542 | 97750 |       |       |       |       |       |       |       |

**Note:** Procedure code 97113 is not payable to home health agencies.

### 6.3.2 Untimed PT and OT Treatment Procedure Codes

The following supervised modality PT and OT treatment procedure codes are limited to once per date of service per procedure code and must be delivered on the same date of service as one or more time-based PT and OT procedure code(s) and are subject to CMS NCCI relationships:

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| 97012           | 97014 | 97016 | 97018 | 97022 | 97024 | 97026 | 97028 |

The following PT and OT group therapy treatment procedure code is limited to once per date of service:

| Procedure Codes |
|-----------------|
| 97150           |

Separate prior authorization is required for medically necessary therapeutic procedures not addressed by procedure codes outlined in this handbook.

The following procedure code requires supporting documentation indicating why an unlisted procedure code is required and is limited to once per date of service:

| Procedure Codes |
|-----------------|
| 97799           |

If the therapy treatment services that are billed exceed one hour (four units per day), the claim will be denied, and it may be appealed. On appeal, the provider must meet the following conditions:

- The appeal must document the prior authorization period week or month for the date of service appealed.

- The appeal must include an attestation that the provider has billed all therapy services for the week or month in question.

For clients who are 21 years of age and older, when physical or occupational group therapy is administered, providers should bill procedure code 97150 for each member of the group.

A client may receive therapy in more than one discipline (physical, occupational, or speech) in the outpatient, office or home setting in one day.

**6.3.3 ST Treatment Procedure Codes**

Individual speech treatment is limited to one encounter per date of service any provider. Only one of the following individual speech treatment procedure codes will be reimbursed per date of service:

| Procedure Codes |       |
|-----------------|-------|
| 92507           | 92526 |

An encounter for speech therapy individual treatment is defined as face-to-face time with the patient and/or caregiver for a length of time compliant with nationally recognized professional speech-language pathology standards for a typical session.

The following group speech therapy procedure code is limited to once per date of service:

| Procedure Codes |
|-----------------|
| 92508           |

**6.3.4 PT, OT, and ST Evaluation and Re-evaluation Procedure Codes**

Evaluation and re-evaluation procedure codes in the following table are untimed:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92521           | 92522 | 92523 | 92524 | 92610 | 97161 | 97162 | 97163 | 97164 | 97165 |
| 97166           | 97167 | 97168 | S9152 |       |       |       |       |       |       |

**6.3.5 PT, OT, and ST Reimbursement Guidelines**

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

Therapy services provided in the nursing home setting are limited to the nursing facility because these services must be made available to nursing home residents on an “as needed” basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources. Nursing home facilities should refrain from admitting clients who need goal directed therapy if the facility is unable to provide these services.

Procedure codes for PT, OT, ST evaluations are payable once every three years to the same rendering provider.

For acute services, PT, OT, ST re-evaluations may be reimbursed once every 60 days to any provider when a recertification of services is planned.

Additional PT, OT, or ST evaluations or re-evaluations exceeding the limits outlined in this handbook may be considered for reimbursement on appeal with documentation of one of the following:

- A significant change in the client’s medical condition as documented in the plan of care or treatment plan,

- A change of provider has occurred and a change of provider letter is submitted with the appeal.

The re-evaluation is required for recertification of an existing authorization.

The following procedure codes are billable for telehealth services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92507           | 92508 | 92521 | 92522 | 92523 | 92524 | 92526 | 92610 | 97110 | 97112 |
| 97116           | 97150 | 97161 | 97162 | 97163 | 97164 | 97165 | 97166 | 97167 | 97168 |
| 97530           | 97535 | 97750 | 97537 | S9152 |       |       |       |       |       |

A modifier must be used to indicate when treatment services have been rendered by a licensed therapist/ prescribing provider or a therapy assistant under supervision of a licensed therapist. Providers must use modifier 95 for services delivered by synchronous audiovisual technology.

The following modifiers are not required for evaluation or re-evaluation codes because those services may not be rendered by therapy assistants:

| Modifier | Description                                                                                  |
|----------|----------------------------------------------------------------------------------------------|
| UB       | Services delivered by a licensed therapy assistant under supervision of a licensed therapist |
| U5       | Services delivered by a licensed therapist or physician                                      |

This modifier is to be utilized as indicated with all physical, occupational, and speech therapy treatment procedure codes.

Claims for co-treatment services must be submitted with modifier U3:

| Modifier | Description                   |
|----------|-------------------------------|
| U3       | Therapy Co-Treatment Modifier |

Claims for telehealth must be submitted with modifier 95:

| Modifier | Description                                              |
|----------|----------------------------------------------------------|
| 95       | Services delivered by synchronous audiovisual technology |

## 7 Claims Filing and Reimbursement

### 7.1 Claims Information

Therapy services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Claims may be filed electronically in a CMS-1500 format as long as the nine-digit prior authorization number is reflected in the equivalent electronic field.

CORF and ORF providers must submit services in an approved electronic claims format or on the UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms. Revenue and Current Procedural Terminology (CPT) procedure codes are used when submitting claims for CORF and ORF services. The only POS is outpatient facility (POS 5).

When completing a CMS-1500 or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key information from attachments.

**Referto:** Subsection 2.8, “Home Health Agency Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for additional claim information for Home Health agencies.

“Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

## 7.2 Reimbursement/Billing Guidelines

Physical, occupational, and speech therapy services are reimbursed in accordance with 1 TAC § 355. See the OFL or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for reimbursement rates.

Therapy providers are reimbursed in accordance with 1 TAC §355.8085.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.4, “Claims Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

When there is a change of provider, or a change in the client’s medical condition requiring therapy, a denied claim for a therapy (PT, OT, or ST) evaluation, re-evaluation or swallowing function evaluation that exceeded the limits outlined in this handbook may be considered on appeal for reimbursement with documentation of one of the following:

- A change in the client’s medical condition or new therapy related diagnosis with date of onset documented in the plan of care or treatment plan
- A change of provider letter signed and dated by the client or responsible adult documenting all of the following:
  - The date the client ended therapy (effective date of change) with the previous provider
  - The name of the new provider and previous provider

### 7.2.1 Method for Counting Minutes for Timed Procedure Codes in 15-Minute Units

Modifiers GP, GO, and GN are required on all claims except when billing evaluation and re-evaluation procedure codes. The AT modifier must be included on claims for acute therapy services.

All claims for reimbursement of procedure codes paid in 15 minute increments are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded up or down to the nearest quarter hour.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to zero units of service if they are seven or fewer minutes.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Time intervals for 1 through 8 units are as follows:

| Units   | Number of Minutes               |
|---------|---------------------------------|
| 0 units | 0 minutes through 7 minutes     |
| 1 unit  | 8 minutes through 22 minutes    |
| 2 units | 23 minutes through 37 minutes   |
| 3 units | 38 minutes through 52 minutes   |
| 4 units | 53 minutes through 67 minutes   |
| 5 units | 68 minutes through 82 minutes   |
| 6 units | 83 minutes through 97 minutes   |
| 7 units | 98 minutes through 112 minutes  |
| 8 units | 113 minutes through 127 minutes |

### 7.3 Claims Resources

Providers may refer to the following sections or forms when filing claims:

| Resource                                                 | Location                                                                                        |
|----------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| Appendix A: State, Federal, and TMHP Contact Information | Appendix A ( <i>Vol. 1, General Information</i> )                                               |
| Appendix D: Acronym Dictionary                           | Appendix D ( <i>Vol. 1, General Information</i> )                                               |
| Automated Inquiry System (AIS)                           | Appendix A: State, Federal, and TMHP Contact Information ( <i>Vol. 1, General Information</i> ) |
| CMS-1500 Paper Claim Filing Instructions                 | Subsection 6.5 ( <i>Vol. 1, General Information</i> )                                           |
| Section 3: TMHP Electronic Data Interchange (EDI)        | Section 3 ( <i>Vol. 1, General Information</i> )                                                |
| TMHP Electronic Claims Submission                        | Subsection 6.2 ( <i>Vol. 1, General Information</i> )                                           |
| UB-04 CMS-1450 Paper Claim Filing Instructions           | Subsection 6.6 ( <i>Vol. 1, General Information</i> )                                           |

### 7.4 Contact TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday-Friday from 7 a.m. to 7 p.m., Central Time.

# 8    Forms

The following linked forms can also be found on the Forms page of the Provider section of the TMHP website at [www.tmhp.com](http://www.tmhp.com):

## 1 General Information

This information is intended for Texas Medicaid independent (freestanding) laboratories, radiological laboratories, and physiological laboratories. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information).

### 1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, *Provider Handbooks*) for additional information about the payment window reimbursement guidelines.

## 2 Independent Laboratory

The requirements in this section apply to all providers who bill laboratory services.

### 2.1 Enrollment

Providers must meet the following requirements and submit a complete application in order to enroll as independent (freestanding) laboratory providers:

- The provider must be actively enrolled in Medicare as an independent laboratory.
- The independent laboratory must be independent from a physician's office or hospital.
- The independent laboratory must meet staff, equipment, and testing capability standards for certification by the Health and Human Services Commission (HHSC).

### 2.1.1 Clinical Laboratory Improvement Amendments (CLIA)

CLIA regulations set standards that are designed to improve quality in all laboratory testing and include specifications for quality control (QC), quality assurance (QA), patient test management, personnel, and proficiency testing.

The regulations concern all laboratory testing that is used for the assessment of human health or the diagnosis, prevention, or treatment of disease. Under CLIA 88, all clinical laboratory providers (including those located in physicians' offices), regardless of location, size, or type of laboratory, must meet certain standards based on the complexity of the tests they perform.

Providers must hold the appropriate CLIA certificates to perform certain tests as indicated in this handbook. Providers that are certified only to perform waived tests must use modifier QW as indicated on the CMS website.

**Referto:** The [CLIA Regulations and Federal Register Documents](#) page of the Centers for Medicare & Medicaid Services (CMS) website at [www.cms.gov](http://www.cms.gov) for the CLIA rules and regulations. The regulations are found at Title 42 Code of Federal Regulations, Part 493.

### 2.1.2 CLIA Requirements

To be eligible for reimbursement by Medicare and Medicaid, all providers that perform laboratory tests must do the following:

- Pay the applicable fee to CMS.
- Contact HHSC at 1-512-834-6650 to receive a CLIA registration or certification number. Submit CLIA applications to the following address:

Health Facility Licensing and Certification Division  
HHSC  
1100 West 49th Street  
Austin, TX 78756

- CLIA updates can be submitted through a PEMS Maintenance-Licenses Transaction.

TMHP monitors claims that are submitted by clinical laboratory providers to verify that the clinical laboratory has a CLIA number on file. If the provider does not have a CLIA number on file with TMHP, the laboratory services claims may be denied.

## 2.2 Services, Benefits, Limitations, and Prior Authorization

Texas Medicaid only covers professional and technical services that an independent laboratory is certified by CLIA to perform.

Provider documentation must be maintained in the client's medical record and must delineate the medical need for administering the laboratory test.

The physician is responsible for providing to the performing laboratory the clinical diagnosis code that is associated with the individual test so that the performing laboratory may bill Texas Medicaid directly for the analysis of the specimen.

**Referto:** The Current Procedural Terminology (CPT) manual for information regarding examples of laboratory codes. Correct use of CPT coding requires using the most specific laboratory code that matches the services provided, based on the code's description.

### 2.2.1 CLIA Certificates

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

**Referto:** The [Categorization of Tests](#) page of the CMS website at [www.cms.gov](http://www.cms.gov) for additional information.

Providers that are certified only to perform waived tests must use modifier QW as indicated on the CMS website.

## **2.2.2 Laboratory Handling Fees and Reference Laboratories**

### **2.2.2.1 Independent Laboratory Providers**

An independent laboratory provider may be reimbursed for tests performed in the laboratory and for laboratory handling fees for tests that are forwarded to another laboratory (i.e., reference laboratory).

An independent laboratory that forwards a specimen to another laboratory without performing any tests on that specimen may not bill for any laboratory tests.

An independent laboratory may only bill Texas Medicaid for tests referred to another independent or hospital laboratory if it performs at least one test that it is certified by CLIA to perform, and forwards a portion of the same specimen to the other laboratory to have one or more tests performed. The referring laboratory may then bill for tests it has performed on the specimen. When billing, the following information must be on the claim:

- Block 20: “Yes” box must be checked.
- Block 32: The name, address, and ZIP Code of the reference laboratory (i.e., the laboratory to which the specimen was referred).
- Block 24-J: The provider number of the reference laboratory must be included next to each procedure to be performed by the reference laboratory.

An independent laboratory that forwards a specimen to another laboratory (independent or hospital) may bill a handling fee (procedure code 99001) for collecting and forwarding the specimen to the other laboratory if the specimen is collected by routine venipuncture or catheterization.

### **2.2.2.2 Physician Providers**

A physician may bill only one laboratory handling charge (procedure code 99000) per client visit when the specimen is collected by drawing a blood sample through venipuncture or collecting a urine specimen by catheterization, unless the specimen is divided and sent to different laboratories or there are different specimens collected and sent to different laboratories.

The claim must indicate the name and address of each laboratory where a specimen is sent for more than one laboratory handling charge to be paid.

**Referto:** Subsection 9.2.42, “Laboratory Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about laboratory services reimbursed to physician providers.

### **2.2.2.3 Outpatient Hospital Providers**

An outpatient hospital may be reimbursed for a laboratory handling charge (procedure code 99001) for each independent laboratory to where it sends specimens when the laboratory handling charge is not being billed through other methods.

### **2.2.2.4 Family Planning Laboratory Tests**

Family planning agencies must use procedure code 99000 with a family planning diagnosis code to bill their laboratory handling charges for laboratory specimens sent out; modifier FP must be omitted. Providers may refer to the appropriate section in the provider manual for instructions for billing family planning services. As with procedure code 99000, only one handling fee may be charged for each laboratory to where the agency sends specimens, regardless of the number of specimens taken.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service.

**Referto:** Subsection 6.1, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for the complete list of family planning diagnosis codes.

### 2.2.3 Nonclinical Laboratory Procedures

The reimbursement for nonclinical laboratory procedure codes can be found on the appropriate Texas Medicaid fee schedules on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 2.2.4 Clinical Laboratory Procedures

The reimbursement for clinical laboratory procedures can be found on the appropriate [Texas Medicaid fee schedule](#). Fee schedules are available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### 2.2.4.1 Repeat Procedures

Modifier 91 should be used for repeat clinical diagnostic tests as follows:

- Modifier 91 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 91, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 91, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures and services must be documented on appeal.

Providers may appeal claims that have been denied for documentation of time. Most procedure codes that initially required modifier 91 will continue to be audited for modifier 91.

When appealing claims with modifier 91 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

### 2.2.5 Automated Laboratory Tests and Laboratory Paneling

The reimbursement for the complete panel procedure code represents the total payment for all automated laboratory tests that are covered under that panel combined with any other automated tests that are billed for the client for the same date of service. The Texas Medicaid allowable fee for the individual components of the complete laboratory panel will not exceed the automated test panel (ATP) fee for the total number of automated tests that are billed for the client for the same date of service.

When all of the components of the panel are performed, the complete panel procedure code must be billed. When only two or more components of the panel are performed, the individual procedure codes for each laboratory test performed may be billed.

#### 2.2.5.1 Fee Calculations for Automated Tests and Laboratory Panels

Automated test and laboratory panel procedure codes may be reimbursed according to the appropriate ATP level payment based on the total number of automated tests that are performed on the same day for the same client.

**Referto:** The “Clinical Laboratory, Automated Test Panels - Insert” [Texas Medicaid fee schedule](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for the ATP level payment for automated test and lab panel procedure codes.

ATP Level Pricing

The amount that is allowed for each automated test and lab panel procedure code that is billed with the same date of service for the same client will be a percentage of the total ATP level payment. To calculate the automated test pricing, the following information is necessary:

- The number of automated tests that are billed for the client for the same date of service (including individual automated tests and all automated tests that are represented by the laboratory panels.) Procedure codes that are duplicated between panels are not counted more than once.
- The ATP pricing fee that corresponds to the number of automated tests that are billed for the client for the same date of service.
- The total billed amount for all automated test and laboratory panel procedure codes that are billed for the client for the same date of service.

The automated test pricing may be calculated as follows:

Step 1

A percentage for each automated test or lab panel detail is derived from dividing the billed amount (B/A) for each procedure by the total billed amount (TB/A) for all automated test and laboratory panel procedure codes with the same date of service for the same client.

Example:

| Automated Test             | B/A             | Percentage |
|----------------------------|-----------------|------------|
| Detail 1 Automated Test    | = \$50.00       | = 29%      |
| Detail 2 Automated Test    | = \$25.00       | = 14%      |
| Detail 3 Lab Panel         | = \$100.00      | = 57%      |
| Detail 4 Clinical Lab Test | = \$20.00       | = 0%       |
|                            | TB/A = \$175.00 |            |

**Note:** The TB/A is for automated test and laboratory panel procedure codes (details 1, 2, and 3 only). Detail 4 is not included in the calculations for the automated tests because it is a clinical lab procedure code and may be reimbursed as indicated on the fee schedule.

Calculations:

|          |                   |                    |       |
|----------|-------------------|--------------------|-------|
| Detail 1 | = 50.00 / 175.00  | = .285714285714... | = 29% |
| Detail 2 | = 25.00 / 175.00  | = .142857142857... | = 14% |
| Detail 3 | = 100.00 / 175.00 | = .571428571428... | = 57% |

Step 2

The detail allowed amount for each automated test (AT) procedure code will be the calculated percentage of the ATP level payment.

**Example:**

| Automated Test             | Number of Automated Tests | Allowed Amount |
|----------------------------|---------------------------|----------------|
| Detail 1 Automated Test    | = 1                       | = \$3.10       |
| Detail 2 Automated Test    | = 1                       | = \$1.55       |
| Detail 3 Lab Panel         | = 4                       | = \$6.19       |
| Detail 4 Clinical Lab Test | = 0                       | = Fee Schedule |
|                            | ATP = 6 = \$10.84         |                |

**Note:** The total number of automated tests includes the individual automated test procedure codes and the number of automated tests that are represented by each panel procedure code that is billed. Automated tests that are duplicated between panels are not counted more than once.

**Calculations:**

|          |                |                              |          |
|----------|----------------|------------------------------|----------|
| Detail 1 | = 29% of 10.84 | = (.285714285714...)X(10.84) | = \$3.10 |
| Detail 2 | = 14% of 10.84 | = (.142857142857...)X(10.84) | = \$1.55 |
| Detail 3 | = 57% of 10.84 | = (.571428571428...)X(10.84) | = \$6.19 |
|          |                |                              | \$10.84  |

**Note:** If a clinical laboratory procedure code is included in a panel, the fee schedule rate for the clinical laboratory procedure is added to the ATP rate, and the resulting sum is divided among the automated test and laboratory panel procedure codes that are billed for the date of service.

The total allowed amount for all laboratory services that are billed for the client for the same date of service will represent the ATP level pricing combined with any clinical laboratory test fee schedule pricing.

### 2.2.6 Complete Blood Count (CBC)

A CBC and its components may be reimbursed by Texas Medicaid without prior authorization. The medical necessity for all laboratory services must be documented in the client's medical record, and the services must be referenced to an appropriate diagnosis code.

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBC tests should be individualized and based on client history, clinical indications, or proposed therapy, and will not be reimbursed for screening purposes.

When related CBC procedure codes are billed for the same date of service by the same provider, the first procedure code will be reimbursed and all other procedure codes will be denied.

Reticulocyte procedure codes may be reimbursed in addition to the CBC, hemogram, differential analysis, and platelet procedure codes indicated above.

**Referto:** The appropriate [Texas Medicaid fee schedule](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for CBC procedure codes that may be reimbursed.

## 2.2.7 Drug Testing and Therapeutic Drug Assays

The following procedure codes for drug testing and therapeutic drug assays may be reimbursed by Texas Medicaid:

| Procedure Codes |       |        |       |       |       |       |        |       |       |
|-----------------|-------|--------|-------|-------|-------|-------|--------|-------|-------|
| 80143           | 80150 | 80151  | 80155 | 80156 | 80157 | 80158 | 80159  | 80161 | 80162 |
| 80163           | 80164 | 80165  | 80167 | 80168 | 80169 | 80170 | 80171  | 80173 | 80175 |

**Note:** The procedure codes above do not require prior authorization.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

Procedure codes G0480, G0481, G0482, G0483, and G0659 are limited to once per day by any provider.

Chemistry procedure codes used for specimen validity testing (procedure codes 82540, 82550, 82552, 82553, 82554, 83986, and 84311) will be denied when submitted on the same date of service by the same provider, as procedure code G0480, G0481, G0482, G0483, or G0659.

The following CPT Drug Assay procedure codes will be denied when billed on the same date of service, by the same provider with the corresponding HCPCS Drug Assay procedure codes identified with an "X":

| 80377                                                                                                                                                                                     | X |  |   |   | X |
| (X) The “80000” CPT procedure code will be denied if billed with the HCPCS “G” procedure code indicated with an “X.”                                                                      |   |  |   |   |   |
| (Blank) There is no relationship between the “80000” CPT procedure code and the HCPCS “G” procedure code. Both procedure codes may be reimbursed if billed with the same date of service. |   |  |   |   |   |
| ^QW Modifier                                                                                                                                                                              |   |  |   |   |   |

### 2.2.7.1 Documentation Requirements

All services outlined in this section are subject to retrospective review. Documentation in the client’s medical record must be maintained by the physician and support the medical necessity for the services provided.

### 2.2.8 Evocative and Suppression Testing

The following procedure codes for evocative and suppression testing may be reimbursed by Texas Medicaid:

| Procedure codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 80400           | 80402 | 80406 | 80408 | 80410 | 80412 | 80414 | 80415 | 80416 | 80417 |
| 80418           | 80420 | 80422 | 80424 | 80426 | 80428 | 80430 | 80432 | 80434 | 80435 |
| 80436           | 80438 | 80439 |       |       |       |       |       |       |       |

**Note:** The procedure codes above do not require prior authorization.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation’s “Choosing Wisely” lists to determine appropriateness of laboratory tests.

## 2.2.9 Hematology and Coagulation

The following hematology and coagulation procedure codes may be reimbursed by Texas Medicaid:

| Procedure Codes                     |       |        |       |       |        |        |        |        |       |
|-------------------------------------|-------|--------|-------|-------|--------|--------|--------|--------|-------|
| 85002                               | 85004 | 85007  | 85008 | 85009 | 85013* | 85014^ | 85018^ | 85025^ | 85027 |
| 85032                               | 85041 | 85044  | 85045 | 85046 | 85048  | 85049  | 85055  | 85060  | 85097 |
| 85130                               | 85170 | 85175  | 85210 | 85220 | 85230  | 85240  | 85244  | 85245  | 85246 |
| 85247                               | 85250 | 85260  | 85270 | 85280 | 85290  | 85291  | 85292  | 85293  | 85300 |
| 85301                               | 85302 | 85303  | 85305 | 85306 | 85307  | 85335  | 85337  | 85345  | 85347 |
| 85348                               | 85360 | 85362  | 85366 | 85370 | 85378  | 85379  | 85380  | 85384  | 85385 |
| 85390                               | 85396 | 85397  | 85400 | 85410 | 85415  | 85420  | 85421  | 85441  | 85445 |
| 85460                               | 85461 | 85475  | 85520 | 85525 | 85530  | 85536  | 85540  | 85547  | 85549 |
| 85555                               | 85557 | 85576^ | 85597 | 85598 | 85610^ | 85611  | 85612  | 85613  | 85635 |
| 85651*                              | 85652 | 85660  | 85670 | 85675 | 85705  | 85730  | 85732  | 85810  | 85999 |
| G0306                               | G0307 |        |       |       |        |        |        |        |       |
| * CLIA Waived Test<br>^ QW Modifier |       |        |       |       |        |        |        |        |       |

**Note:** The procedure codes above do not require prior authorization.

The following procedure codes are limited to one per day by the same provider:

| Procedure Codes |       |       |       |        |        |       |
|-----------------|-------|-------|-------|--------|--------|-------|
| 85027           | 85347 | 85397 | 85520 | 85576^ | 85610^ | 85730 |
| ^ QW Modifier   |       |       |       |        |        |       |

Procedure codes 85460 and 85461 may be reimbursed for female clients who are 10 through 55 years of age.

Procedure code 85004 will deny if billed on the same day by the same provider as procedure code 85007.

Procedure code 85660 is limited to once per lifetime, any provider. An additional test may be considered on appeal with documentation indicating the provider was unaware the client was tested previously or was unable to obtain client's medical records.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

## 2.2.10 Human Immunodeficiency Virus (HIV) Drug Resistance Testing

Standard treatment regimens for HIV therapy require a combination of three or more drugs. Standard therapy continues if a reduction in viral load is achieved. Incomplete virus suppression favors the development of a drug resistance and jeopardizes the success of future therapy. Testing for drug resistance as a prerequisite to further therapy is indicated under such circumstances.

To ensure accurate testing results, the client must be on appropriate antiretroviral therapy at the time of testing or have discontinued the drug regimen within the past four weeks.

Testing for antiretroviral drug resistance is indicated in certain clinical situations. These indications include any of the following:

- Individuals who have an initial (new onset) acute HIV infection, to determine if a drug-resistant viral strain was transmitted and to plan a drug regimen accordingly.

- Individuals who have virological failure during antiretroviral therapy, laboratory results showing HIV RNA levels greater than 500 and less than 1,000 copies/ml.
- HIV-infected pregnant women before initiation of therapy.
- HIV-infected pregnant women entering pregnancy with HIV RNA levels at or below 400 copies/ml while the women are on therapy.

Documentation must be maintained in the client's medical record to support medical necessity for the HIV drug-resistance testing. Specific documentation requirements are dependent on the rationale for the testing. Documentation must include, but is not limited to, the date the drug regimen was initiated, the dosage and frequency of the prescribed medication, and laboratory tests that support all of the following:

- Acute HIV infection, with identification of the specific viral strain
- Virological failure during antiretroviral therapy with HIV RNA levels greater than 500 and less than 1,000 copies/ml
- Positive pregnancy results in an HIV positive female client
- HIV RNA levels of 400 copies/ml or less during pregnancy

HIV drug-resistance testing is not recommended when one of the following criteria is met:

- The drug regimen has been discontinued for more than four weeks
- The viral load is less than 500 copies/ml

**Referto:** Subsection B.1.1, "Routine HIV Testing Procedure Codes" in "Appendix B: HIV/AIDS" (*Vol. 1, General Information*) for additional information about HIV testing laboratory procedures.

## 2.2.11 Microbiology

The following procedure codes may be reimbursed by Texas Medicaid:

| Procedure Codes              |        |        |        |        |        |        |        |       |        |
|------------------------------|--------|--------|--------|--------|--------|--------|--------|-------|--------|
| Microbiology                 |        |        |        |        |        |        |        |       |        |

**Note:** The procedure codes above do not require prior authorization.

The following procedure codes are limited to one per day by the same provider:

| Procedure Codes |       |       |        |        |        |        |        |       |        |
|-----------------|-------|-------|--------|--------|--------|--------|--------|-------|--------|
| 86790           | 86794 | 87015 | 87046  | 87071  | 87075  | 87076  | 87077^ | 87081 | 87088  |
| 87101           | 87102 | 87106 | 87107  | 87140  | 87147  | 87149  | 87150  | 87152 | 87153  |
| 87154           | 87181 | 87184 | 87185  | 87186  | 87188  | 87190  | 87206  | 87209 | 87210^ |
| 87252           | 87254 | 87300 | 87634^ | 87801^ | 87809^ | 87899^ | 87904  |       |        |
| ^ QW Modifier   |       |       |        |        |        |        |        |       |        |

Procedure code G0433 will be denied if billed on the same day by the same provider as procedure code 86703.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

### 2.2.11.1 Zika Virus Testing

Procedure codes 86794 and 87662 may be used to bill for Zika virus testing.

Procedure code 87662 may be reimbursed up to two times on the same day by the same provider.

### 2.2.12 Organ or Disease-Oriented Panels

The following organ or disease-oriented panel procedure codes may be reimbursed by Texas Medicaid:

| Procedure Codes |        |       |        |        |       |        |        |       |       |
|-----------------|--------|-------|--------|--------|-------|--------|--------|-------|-------|
| 80047^          | 80048^ | 80050 | 80051^ | 80053^ | 80055 | 80061^ | 80069^ | 80074 | 80076 |
| 80081           |        |       |        |        |       |        |        |       |       |
| ^ QW Modifier   |        |       |        |        |       |        |        |       |       |

**Note:** The procedure codes above do not require prior authorization.

Procedure codes 80055 and 80081 are limited to female clients who are 10 through 55 years of age. Only one service for procedure code 80055 or one service for procedure code 80081 will be reimbursed per pregnancy to the same provider.

Procedure code 80061 is limited to once per rolling year, by any provider, when performed as part of a preventative care medical checkup.

The reimbursement for the complete panel procedure code represents the total payment for all automated laboratory tests that are covered under that panel combined; including any other automated tests billed for the client for the same date of service (DOS). The Texas Medicaid allowable fee for the individual components of the complete laboratory panel will not exceed the automated test panel (ATP) fee for the total number of automated tests that are billed for the client for the same DOS.

When all of the components of the panel are performed, the complete panel procedure code must be billed. When only two or more components of the panel are performed, the individual procedure codes for each laboratory test may be billed.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

### 2.2.13 Urinalysis and Chemistry

The following urinalysis and chemistry procedure codes may be reimbursed by Texas Medicaid for once per day:

| Procedure Codes   |        |        |        |       |        |       |        |        |        |
|-------------------|--------|--------|--------|-------|--------|-------|--------|--------|--------|
| Urinalysis        |        |        |        |       |        |       |        |        |        |
| 81000             | 81001  | 81002* | 81003^ | 81005 | 81007^ | 81015 | 81020  | 81025* | 81050  |

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

**Referto:** The CMS website at [www.cms.gov/CLIA/10\\_Categorization\\_of\\_Tests.asp](http://www.cms.gov/CLIA/10_Categorization_of_Tests.asp) for information about procedure code and modifier QW requirements.

For waived tests, providers must use modifier QW as indicated on the CMS website.

Texas Medicaid limits reimbursement for the procedure codes listed in the table above to one per day without a modifier and one per day with a modifier when billed by the same provider.

Procedure code 84583 will be denied if it is billed on the same day by the same provider as procedure code 81000, 81001, 81002, 81003, 81005, or 81020.

Procedure codes 82013, 82105, 82106, 82677, 83080, 84163, and 84704 are limited to one per 210 days when billed by any provider.

Procedure code 83698 is limited to the following diagnosis codes:

| Diagnosis Codes |       |      |       |       |      |      |      |
|-----------------|-------|------|-------|-------|------|------|------|
| E1165           | E119  | E139 | E7800 | E7801 | E781 | E782 | E783 |
| E7841           | E7849 | E785 | I2584 |       |      |      |      |

Procedure code 83698 is limited to two per rolling year when billed by any provider. Claims submitted for procedure code 83698 that are in excess of two per year may be considered on appeal with documentation of any of the following:

- Medical necessity for the additional test.
- The provider was unable to obtain the previous records from a different provider.
- The provider was new to treating the client and was not aware the client had received the test.

Procedure codes 82757, 84066, 84152, and 84154 are limited to male clients.

Procedure codes 82120, 84135, and 84138 are limited to female clients.

The following procedure codes are restricted to females who are 10 through 55 years of age:

| Procedure Codes    |       |       |       |       |       |       |       |       |       |
|--------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 81025*             | 82106 | 82143 | 82731 | 83632 | 83661 | 83662 | 83663 | 83664 | 84112 |
| 84163              |       |       |       |       |       |       |       |       |       |
| *CLIA waived tests |       |       |       |       |       |       |       |       |       |

**Referto:** Subsection 9.2.26.8, “*Helicobacter Pylori (H. pylori)*” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about limitations on procedure codes 83009, 83013, and 83014.

## **2.2.14 Additional Laboratory Services**

### **2.2.14.1 Colorectal Cancer Screening**

**Referto:** Subsection 4.2.8, “Colorectal Cancer Screening” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 9.2.15.1.1, “Colorectal Cancer Screening” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

### **2.2.14.2 Cytopathology Studies**

**Referto:** Subsection 9.2.26.4, “Cytopathology Studies—Other Than Gynecological” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Subsection 6.14, “Pap Smear (Cytopathology Studies)” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

### **2.2.14.3 Helicobacter pylori Testing**

**Referto:** Subsection 9.2.26.8, “Helicobacter Pylori (H. pylori)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

### **2.2.14.4 Laboratory Services for Clients on Dialysis**

**Referto:** Subsection 7.2.7, “Laboratory and Radiology Services” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)*.

### **2.2.14.5 Prognostic Breast and Gynecological Cancer Studies**

**Referto:** Subsection 7.2.7, “Laboratory and Radiology Services” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)*.

### **2.2.14.6 THSteps Outpatient Laboratory Services**

**Referto:** Subsection 4.3.12.6, “Laboratory Test” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

### **2.2.14.7 Authorization Requirements**

Prior authorization is not required for most laboratory services. Providers may refer to the specific sections for those services that require authorizations.

## **2.3 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered, including independent laboratory services. Independent laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

Independent laboratory documentation must include the physician’s signed and dated order for the laboratory tests. The specific tests ordered by the physician must be listed on the order. The test results must also be included in the documentation.

## **2.4 Claims Filing and Reimbursement**

### **2.4.1 Claims Information**

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service using a family planning diagnosis code.

**Referto:** Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information about Medicaid Title XIX Family Planning Services.

Subsection 6.1, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information about the Texas Women’s Health Program.

A National Provider Identifier (NPI) is required for all claims. In addition, for paper claims, the NPI is required for the billing and performing provider only. All paper claims must be submitted with an NPI and taxonomy code for the billing and performing provider. All other provider fields on the claim forms require an NPI only.

Providers must submit independent laboratory services to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

#### **2.4.1.1 Electronic Filing for Laboratory Providers**

Referring provider information is always required on laboratory claims. Failure to submit this data will result in a claim rejection on the TMHP Electronic Data Interchange (EDI).

When the place of service is 6, and the billing NPI belongs to a laboratory, there is no need to submit the same NPI in the facility ID field. This notation causes the claim to suspend processing unnecessarily, and may cause a delay in the disposition of the claim. For questions about the electronic fields, contact the commercial software vendor or the TMHP EDI Help Desk at 1-888-863-3638.

#### **2.4.2 Reimbursement**

The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8085 and §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for clinical laboratory services cannot exceed the Medicare payment for that service.

As the result of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982, independent laboratories are not directly reimbursed by Texas Medicaid when providing tests to clients who are registered as hospital inpatients. Hospital reimbursements (i.e., inpatient DRG reimbursement) include payment for all pathology and laboratory services, including those sent to referral laboratories. Hospital-based and referral laboratory providers must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. These services are not billable to Medicaid-covered clients.

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

Texas Medicaid pays up to the amount allowed for the total component for the same procedure, same client, same date of service, any provider.

- Providers who perform the technical service and interpretation must bill for the total component.
- Providers who perform only the technical service must bill for the technical component.
- Providers who perform only the interpretation must bill for the interpretation component.

Claims filed in excess of the amount allowed for the total component for the same procedure, same dates of service, same client, any provider, are denied. Claims are paid based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure, same dates of service, same client, any provider, the claim for the total component will be denied as previously paid to another provider. The same is true if a total component has already been paid and claims are received for the individual components. Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

#### **2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines**

The Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the [CMS NCCI web page](https://www.cms.gov/nccipublications) for correct coding guidelines and specific applicable code combinations.

### **3 \* Genetic Testing**

[Revised] Genetic testing is the study of heredity covering an array of techniques, including analysis of human deoxyribonucleic acid (DNA), ribonucleic acid (RNA), or protein. Genetic testing may be a benefit of Texas Medicaid program when all of the following conditions of medical necessity are met:

- [Revised] The client displays clinical features or is at direct risk of inheriting the mutation in question (pre-symptomatic).
- [Revised] The result of the test will directly impact the treatment being delivered to the client.
- [Revised] After history, physical examination, pedigree analysis, genetic counseling, and completion of conventional diagnostic studies, a definitive diagnosis remains uncertain.
- [Revised] Disease-specific criteria met.

[Revised] Definition of medical necessity for genetic testing is also made in accordance with Chapter 1372 of Subtitle E, Title 8 of the Texas Insurance Code, which requires biomarker testing to include relevant genetic tests, supported by medical and scientific evidence as described by one or more of the criteria outlined below:

- [Revised] A United States Food and Drug Administration (FDA) labeled indication for the test or an indicated test for a drug approved by the FDA.
- [Revised] A national coverage determination made by the Centers for Medicare and Medicaid Services (CMS), or a local coverage determination made by a Medicare administrative contractor.
- [Revised] Nationally recognized clinical practice guidelines.
- [Revised] Consensus statement recommendations for specific clinical circumstances when biomarker testing may optimize clinical care outcomes.

[Revised] Genetic testing includes:

- [Revised] Single-analyte tests
- [Revised] Multiplex panel tests
- [Revised] Whole genome sequencing (WGS)

[Revised] Providers may refer to the Texas Medicaid fee schedule for procedure codes that may be reimbursed for specific genetic testing.

**Referto:** *[Revised]* Subsection 2.2.1, “Online Fee Lookup (OFL) and Static Fee Schedules” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*)

[Revised] The following procedure codes may be reimbursed for Genetic Testing services:

| [Revised] Procedure Codes |       |       |       |       |       |       |       |       |       |
|---------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 81105                     | 81106 | 81107 | 81109 | 81110 | 81111 | 81112 | 81120 | 81121 | 81161 |
| 81162                     | 81163 | 81164 | 81165 | 81166 | 81167 | 81170 | 81177 | 81178 | 81179 |
| 81180                     | 81181 | 81184 | 81185 | 81186 | 81200 | 81201 | 81202 | 81203 | 81205 |
| 81206                     | 81207 | 81208 | 81209 | 81210 | 81212 | 81215 | 81216 | 81217 | 81218 |
| 81219                     | 81220 | 81221 | 81222 | 81223 | 81224 | 81225 | 81226 | 81227 | 81229 |
| 81233                     | 81235 | 81237 | 81238 | 81240 | 81241 | 81242 | 81243 | 81244 | 81245 |
| 81246                     | 81247 | 81248 | 81249 | 81250 | 81251 | 81252 | 81253 | 81254 | 81255 |
| 81256                     | 81257 | 81258 | 81259 | 81260 | 81261 | 81262 | 81263 | 81264 | 81265 |
| 81266                     | 81267 | 81268 | 81269 | 81270 | 81272 | 81273 | 81275 | 81276 | 81278 |
| 81279                     | 81287 | 81288 | 81290 | 81291 | 81292 | 81293 | 81294 | 81295 | 81296 |
| 81297                     | 81298 | 81299 | 81300 | 81301 | 81302 | 81303 | 81304 | 81305 | 81307 |
| 81310                     | 81313 | 81314 | 81315 | 81316 | 81317 | 81318 | 81319 | 81320 | 81321 |
| 81322                     | 81323 | 81324 | 81325 | 81326 | 81327 | 81329 | 81330 | 81331 | 81332 |
| 81334                     | 81336 | 81337 | 81340 | 81341 | 81342 | 81345 | 81349 | 81350 | 81351 |
| 81352                     | 81353 | 81355 | 81361 | 81362 | 81363 | 81364 | 81370 | 81371 | 81372 |
| 81373                     | 81374 | 81375 | 81376 | 81377 | 81378 | 81379 | 81380 | 81381 | 81382 |
| 81383                     | 81400 | 81401 | 81402 | 81403 | 81404 | 81405 | 81406 | 81407 | 81408 |
| 81410                     | 81411 | 81420 | 81425 | 81426 | 81427 | 81443 | 81449 | 81450 | 81451 |
| 81455                     | 81456 | 81457 | 81458 | 81459 | 81462 | 81463 | 81464 | 81507 | 81513 |
| 81514                     | 81519 | 81520 | 81528 | S3800 | S3840 | S3841 | S3842 | S3846 |       |

[Revised] Genetic testing is allowed once per lifetime, with some exception.

### 3.1 \* Documentation Requirements

[Revised] To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the equipment or supplies requested. Providers must maintain documentation of medical necessity in the client’s medical record.

[Revised] Documentation must support medical necessity for the procedure code and modifier billed. All services outlined in this handbook are subject to retrospective review to ensure that the documentation in the client’s medical record supports the medical necessity of the service(s) provided.

## 3.2 \* Authorization Requirements

[Revised] Prior authorization is not required for genetic testing unless otherwise described. Certain genetic tests do require prior authorization. Providers can refer to the provider handbooks for the guidelines and requirements listed for a specific service.

**Referto:** *[Revised]* Subsection 5.5, “Prior Authorization Submission Methods” in “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*)

[Revised] Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically-signed documents must have an electronic date on the same page as the signature. Electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable. All electronically-signed transactions and electronically-signed documents must be kept in the client’s medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, clients’ responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

[Revised] For tests requiring prior authorization, a completed Special Medical Prior Authorization (SMPA) Request Form must be signed, dated, and submitted by the ordering provider rendering direct care. Requests from laboratories will not be processed.

**Note:** *[Revised]* The provider is expected to share the authorization number with the lab submitting the claim.

[Revised] Any provider’s signature, including the prescribing provider’s, on a submitted document indicates the provider certifies, to the best of the provider’s knowledge, the information in the document is true, accurate, and complete.

### 3.2.1 \* Authorization Requirements for Whole Genome Sequencing

[Revised] WGS describes the sequencing of the entire human genome, including protein-coding regions (exons) and noncoding regions. WGS captures most genomic variation in a single test and is useful for clients who have rare disorders where hypothesis-driven approaches have failed to produce a diagnosis. WGS can identify or confirm the genetic etiology of a disorder in clients (procedure code 81425). When needed for additional diagnostic insight, comparator genomes can be used from a relative such as parents or siblings (procedure code 81426). Re-evaluation of the genome is also available when needed for additional diagnostic yield (procedure code 81427).

[Revised] Procedure codes 81425 and 81427 may be a benefit once per lifetime with any provider. Procedure code 81426 may be a benefit up to a maximum of twice per lifetime.

[Revised] Prior authorization is required for WGS and is considered medically necessary when all the following criteria are met for individuals under 21 years of age:

- [Revised] Pre-test genetic counseling is required for any individual undergoing WGS.
- [Revised] The individual has been evaluated by a physician board-certified in one of the following fields:
  - [Revised] Medical genetics
  - [Revised] Maternal-fetal medicine

- [Revised] Neonatology
- [Revised] Neurology
- [Revised] Developmental Pediatrics
- [Revised] The evaluation may be one of the following:
  - [Revised] In person
  - [Revised] Via synchronous audio-visual telemedicine in consultation with a consulting physician who has personally examined the individual
- [Revised] A three-generation pedigree must be completed, as appropriate.
- [Revised] The ordering physician must conduct a mandatory pre-test and commits to conducting post-test follow-up counseling.
- [Revised] Test results are expected to directly impact clinical decision-making and/or clinical outcome for the client being tested.
- [Revised] No other causative circumstances (e.g., environmental exposures, injury, prematurity, infection) can explain symptoms.
- [Revised] A genetic etiology is considered the most likely explanation for the phenotype, based on either of the following:
  - [Revised] Multiple congenital abnormalities affecting unrelated organ systems, or two of the following:
    - [Revised] Abnormality affecting at minimum a single organ system.
    - [Revised] Profound global developmental delay, intellectual disability, symptoms of a complex neurodevelopmental disorder, and/or severe neuropsychiatric condition.
    - [Revised] Family history strongly suggestive of a genetic etiology, including consanguinity.
    - [Revised] Period of unexplained developmental regression.
    - [Revised] Biochemical findings suggestive of an inborn error of metabolism where targeted testing is not available.
- [Revised] Clinical presentation does not fit a well-described syndrome for which single-gene or targeted panel testing (e.g., when comparative genomic hybridization [CGH]/chromosomal microarray analysis [CMA]) is available.
- [Revised] The differential diagnosis list and/or phenotype warrant testing of multiple genes and one of the following:
  - [Revised] WGS is more practical than the separate single gene tests or panels that would be recommended based on the differential diagnosis.
  - [Revised] WGS results may preclude the need for multiple and/or invasive procedures, follow-up, or screening that would be recommended in the absence of testing.

[Revised] Conditions that may be considered to qualify for WGS include, but are not limited to the following:

- [Revised] Unexplained or global developmental delay.
- [Revised] Moderate, severe, or profound intellectual disability diagnosed before 21 years of age.
- [Revised] Epileptic encephalopathy with onset before 3 years of age.
- [Revised] Clinical history strongly suggests a genetic cause and two or more of the following features are present:

- [Revised] Congenital anomaly
- [Revised] Significant hearing or visual impairment diagnosed before 21 years of age
- [Revised] Laboratory abnormalities suggestive of an inborn error of metabolism (IEM)
- [Revised] Autism spectrum disorder neuropsychiatric condition (e.g., bipolar disorder, schizophrenia, obsessive-compulsive disorder)
- [Revised] Hypotonia or hypertonia in infancy
- [Revised] Dystonia, ataxia, hemiplegia, neuromuscular disorder, movement disorder, or other neurologic abnormality
- [Revised] Unexplained developmental regression, unrelated to autism or epilepsy
- [Revised] Growth abnormality (e.g., failure to thrive, short stature, microcephaly, macrocephaly, or overgrowth)
- [Revised] Persistent and severe immunologic or hematologic disorder
- [Revised] Dysmorphic features
- [Revised] Consanguinity
- [Revised] Other first- or second-degree family member(s) with similar clinical features

[Revised] Re-evaluation (procedure code 81427) of a previously obtained WGS sequence (procedure code 81425) is considered medically necessary when the above criteria for WGS and any of the following conditions are met:

- [Revised] Onset of additional symptoms that broadens the phenotype assessed during the original exome/genome evaluation.
- [Revised] Birth or diagnosis of a similarly affected first-degree relative that has expanded the clinical picture.
- [Revised] New scientific knowledge suggests a previously unknown link between the individual's findings and specific genes/pathogenic or likely pathogenic variants, and at least 18 months have passed since the last analysis.

### 3.2.2 \* Authorization Requirements for Expanded Carrier Screening (ECS)

[Revised] ECS is genetic testing performed to identify individuals who are at risk of having children with an inherited recessive (both parents must have the variant to pass the disorder to children or X-linked disorder [variant only occurs in the X chromosome]). Carriers are typically asymptomatic but can pass the disorder-causing genetic variant(s) to their children. Carrier screening may be performed in the preconception or prenatal periods. Risk-based carrier screening is performed in individuals with an increased risk to be a carrier of a specific disorder based on population carrier frequency, family history and/or ethnicity and typically tests for a single gene, or a small number of genes, known to have the disorder-causing variant(s).

[Revised] ECS uses a panel test that screens for many genes simultaneously (5 genes up to 100s of genes) for disorders that are present in the general population and may have increased frequency in specific populations. The genes tested in an ECS panel vary by laboratory and may not all test for the same genes.

[Revised] A targeted screening approach may be appropriate instead of ECS. Instances when targeted screening would be appropriate include but are not limited to:

- [Revised] The individual or their reproductive partner is a known carrier for one or more conditions being screened.
- [Revised] The individual or their reproductive partner has a first- or second-degree relative who is affected with a condition being screened.

- [Revised] The individual or their reproductive partner has a first-degree relative with offspring affected with the condition being screened.
- [Revised] The individual or their reproductive partner are members of a population known to have a carrier frequency rate that exceeds the threshold for American College of Medical Genetics and Genomics Tier 1 risk-based screening.

[Revised] ECS (procedure code 81443) is limited to once per lifetime with any provider.

[Revised] Prior authorization may be granted for ECS (procedure code 81443) when the following criteria are met:

- [Revised] ECS is considered medically necessary when all the following criteria are met for females ages 10-55 years who are pregnant or considering pregnancy.
- [Revised] Pre-test genetic counseling from one of the following is required for any individual undergoing ECS:
  - [Revised] Board-certified physician in:
    - [Revised] Medical genetics
    - [Revised] Maternal-fetal medicine
    - [Revised] Obstetrics/Gynecology
    - [Revised] Family Medicine
  - [Revised] Board-certified genetic counselor
  - [Revised] Physician Assistant, Nurse Practitioner, Clinical Nurse Specialist, or Certified Nurse Midwife with training and expertise in genetics and genetic counseling
- [Revised] Knowledge of the pathogenic variant(s) may be used for the management of:
  - [Revised] Pregnancy or antenatal interventions
  - [Revised] Delivery or other care planning for the potentially affected fetus of a pregnant individual
  - [Revised] Pre-conception family planning
- [Revised] The ECS panel should screen for conditions:
  - [Revised] With childhood onset.
  - [Revised] Which can be diagnosed prenatally.
  - [Revised] With a well-defined phenotype.
  - [Revised] Known to cause cognitive or physical impairment.
  - [Revised] With a known pathogenic or likely pathogenic gene variant.
- [Revised] The ECS panel does not include genes associated with known adult-onset conditions, including but not limited to, hereditary cancers, dementia, or blood clotting disorders (e.g., hereditary breast and ovarian cancer, Lynch Syndrome, Alzheimer's Disease, Huntington's Disease, or Factor V Leiden).
- [Revised] The ECS panel must include sequencing of at least 15 genes including:
  - [Revised] Conditions in American College of Medical Genetics and Genomics (ACMG) Tier 2, with a carrier frequency of 1 in 100 or greater
  - [Revised] Conditions in ACMG Tier 1

- [Revised] X-linked conditions

**Note:** *[Revised] A first-degree relative is defined as a blood relative with whom an individual shares approximately 50% of his/her genes, including the individual’s parents, full siblings, and children. A second-degree relative is defined as a blood relative with whom an individual shares approximately 25% of his/her genes, including the individual’s grandparents, grandchild, uncle, aunt, niece, nephew, or half-sibling.*

**3.3 \* Breast Cancer Gene 1 and 2 (BRCA) Testing**

[Revised] Breast Cancer Gene 1 and 2 (BRCA) testing services are benefits of Texas Medicaid when billed with the following procedure codes:

| [Revised] Procedure Codes |       |       |       |       |       |       |       |       |       |
|---------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 81162                     | 81163 | 81164 | 81165 | 81166 | 81167 | 81212 | 81215 | 81216 | 81217 |

[Revised] Breast cancer gene 1, early onset (BRCA1) and breast cancer gene 2, susceptibility protein (BRCA2) are tumor repressor genes responsible for keeping breast cells from growing too rapidly or in an uncontrolled way. Mutations within the gene interrupt this regulatory function and increase the risk of breast and ovarian cancer, have been linked to other types of cancer such as pancreatic and prostate, and can be inherited from a person’s mother or father.

**Note:** *[Revised] Coverage of BRCA mutation analysis testing, including large rearrangement gene mutation analysis testing, are based on the National Comprehensive Cancer Network (NCCN) guidelines.*

[Revised] Interpretation of gene mutation analysis results is not separately reimbursable. Interpretation is part of the physician E/M service.

[Revised] BRCA gene mutation analysis testing must be ordered based on familial medical history and the availability of previous familial gene mutation analysis testing results and only if the test results will affect treatment decisions or provide prognostic information.

[Revised] Unaffected male or females with a family history of breast cancer, including diagnosis of ductal carcinoma in situ (DCIS), should only be considered for testing when the appropriate affected family member is unavailable. Clinical judgment should be used to determine if the client has a reasonable likelihood of a mutation, considering the client’s current age and the age of the unaffected female relatives who link the client with the affected relatives.

[Revised] It is mandatory that a client who is at risk for BRCA1, BRCA2, or BRCA large rearrangement genetic mutation receive genetic counseling before and after BRCA gene mutation testing.

[Revised] BRCA gene mutation analysis testing (procedure codes 81162, 81163, 81164, 81165, 81166, 81167, 81212, 81215, 81216, 81217) is limited to once per lifetime.

[Revised] The ordering provider is responsible for ordering the appropriate BRCA test (e.g., BRCA1 versus BRCA2) based on medical necessity of the testing criteria and genetic counseling results. If a client’s BRCA test has a positive result, any further BRCA testing services requested with documentation of medical necessity will be considered on a case-by-case basis by Medical Director review for prior authorization.

[Revised] Procedure codes 81162 and 81163 are for comprehensive BRCA gene mutation analysis testing. Procedure 81162 may only be used for clients who meet the criteria for both BRCA comprehensive and BRCA large rearrangement gene mutation analysis testing.

### 3.3.1 \* Genetic Counseling

[Revised] Genetic counseling must be provided by a trained genetic counselor, nurse specialist in genetics, or other medical provider possessing expertise in genetic counseling for clients before and after BRCA gene mutation testing.

[Revised] Both pre- and post-test counseling must provide the depth of content and time for the client to make an informed testing decision. The genetic counseling must be nondirective, and information about the purpose and nature of the tests must be provided to the client.

[Revised] Pre-test genetic counseling must include:

- [Revised] The risks and benefits of the specific genetic testing.
- [Revised] The limitations of the specific genetic testing to be performed and the limitations of interpreting test results for an unaffected individual.

### 3.3.2 \* Documentation

[Revised] Providers must maintain the following gene mutation analysis testing documentation in the client's medical record:

- [Revised] The appropriateness of the genetic testing
- [Revised] The client's specific high-risk criteria
- [Revised] The benefit of the specific genetic testing to be performed
- [Revised] Pre-testing genetic counseling, including all of the following:
  - [Revised] Pre-test counseling date with the name and qualifications of the counseling professional
  - [Revised] The risks, benefits, and limitations discussed with the client
  - [Revised] The client's ability to understand the risks, benefits, and limitations and the client's informed choice to proceed with the specific gene mutation analysis testing as evidenced by the client's signature on a consent form specific to the genetic mutation testing to be performed.
- [Revised] The client's previous BRCA comprehensive gene mutation analysis testing results to support medical necessity for ordering BRCA gene mutation analysis testing
- [Revised] Post-testing genetic counseling, including all the following:
  - [Revised] Post-test counseling date with the name and qualifications of the counseling professional
  - [Revised] The client's ability to understand the results of the gene mutation analysis testing and the appropriate medical treatment resulting from the test results.
- [Revised] The client's treatment plan and any treatment plan changes based on interpretation of the test results

[Revised] The medical record is subject to retrospective review.

### 3.3.3 \* Prior Authorization for BRCA Testing

[Revised] Prior authorization is required for initial BRCA testing (procedure codes 81162, 81163, 81164, 81165, 81166, 81167, 81212, 81215, 81216, 81217).

[Revised] For clients with a known familial BRCA variant, targeted testing for BRCA1 (procedure code 81215) and BRCA2 (procedure 81217) for the specific variant must be performed before utilizing more comprehensive tests.

[Revised] If the client is of Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent, testing for the three known founder variants (procedure code 81212) should be performed first.

[Revised] The prior authorization request must include documentation that indicates that the client meets one or more of the criteria below:

- [Revised] An individual (male or female) from a family with a known deleterious BRCA1/BRCA2 mutation
- [Revised] A female with a personal history of breast cancer, including invasive or ductal carcinoma in situ (DCIS), diagnosed at age 45 years or younger
- [Revised] A female with a personal history of breast cancer, including DCIS, diagnosed at any age and of an ethnicity associated with higher mutation frequency, such as: Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent
- [Revised] A female with a personal history of epithelial ovarian cancer, including fallopian tube and primary peritoneal cancers, diagnosed at any age
- [Revised] A male with a personal history of breast cancer, including DCIS, diagnosed at any age
- [Revised] A female with a personal history of breast cancer, including DCIS, diagnosed at age 50 years or younger, and has one of the following:
  - [Revised] An additional primary (2 primary sites, including bilateral or clearly separate ipsilateral) tumors occurring either synchronously or asynchronously
  - [Revised] At least one close blood relative with breast cancer at any age
  - [Revised] An unknown or limited family history
- [Revised] A female with a personal history of breast cancer, including DCIS, diagnosed at age 60 years or younger with triple negative breast cancer
- [Revised] A female with a personal history of breast cancer, including DCIS, diagnosed at any age, and has one of the following:
  - [Revised] At least one close blood relative with breast cancer diagnosed at age 50 years or younger
  - [Revised] At least two close blood relatives with breast cancer at any age
  - [Revised] At least one close blood relative with epithelial ovarian cancer, including fallopian tube and primary peritoneal cancers
  - [Revised] At least two close blood relatives with pancreatic cancer or prostate cancer (Gleason score 7 or greater) at any age
  - [Revised] A close male blood relative with breast cancer at any age
- [Revised] A male or female with a personal history of pancreatic cancer or prostate cancer (Gleason score 7 or greater) at any age regardless of ancestry with at least two close blood relatives with one of the following:
  - [Revised] Breast cancer
  - [Revised] Ovarian cancer, including fallopian tube and primary peritoneal cancers
  - [Revised] Prostate cancer (Gleason score 7 or greater)
  - [Revised] Pancreatic cancer
- [Revised] A male or female with a personal history of pancreatic cancer at any age and of an ethnicity associated with higher mutation frequency, such as Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent and one or more close blood relatives with pancreatic cancer

- [Revised] A male or female with a family history of breast or ovarian cancer, including DCIS with one of the following:
  - [Revised] At least one first or second degree blood relative meeting any of the criteria above; or
  - [Revised] At least one third degree blood relative who has breast cancer, including DCIS, or ovarian cancer, including fallopian tube and primary peritoneal cancers, and at least two close blood relatives with one of the following:
    - [Revised] Breast cancer, including DCIS, of which at least one with breast cancer was diagnosed at 50 years of age or younger
    - [Revised] Ovarian cancer, including fallopian tube and primary peritoneal cancers

**Note:** *[Revised] The term “close blood relative” includes first-degree male or female relatives (e.g., parents, siblings), second-degree relatives (e.g., aunts, uncles, grandparents), and third-degree relatives (e.g., first cousins, great grandparents), from the same side of the family as the client.*

[Revised] Prior authorization for additional BRCA testing may be considered on a case-by-case basis by Medical Director review when testing criteria for these studies are met for clients who:

- [Revised] Have previously been tested for BRCA sequencing gene mutation analysis testing and received negative results. Documentation of negative results for all previous BRCA1 sequencing gene mutation analysis testing is required.
- [Revised] Every reasonable effort and documentation of the specific efforts made to obtain the previous BRCA sequencing gene mutation analysis test results from the client’s genetic testing physician or the testing laboratory.

[Revised] A completed Hereditary Breast and Ovarian Cancer (HBOC) Genetic Testing Prior Authorization Request Form that has been signed and dated by the ordering provider must be submitted.

[Revised] A provider’s signature on a submitted document indicates that the provider certifies, to the best of the provider’s knowledge, the information in the document is true, accurate, and complete.

[Revised] For comprehensive sequencing (procedure codes 81162 or 81163), the ordering physician must indicate one of the following on the prior authorization request form:

- [Revised] The client’s familial genetic history that supports medical necessity for the requested BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing.
- [Revised] Every reasonable effort was made to obtain the client’s familial genetic history and have been unable to obtain BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing results for the affected family member(s). Documentation of the specific efforts made to obtain the client’s familial genetic history must be submitted with the request.

[Revised] To facilitate a determination of medical necessity and avoid unnecessary denials, the ordering physician must provide correct and complete information, including accurate medical necessity of the services requested. Medical documentation that is submitted by the ordering physician must verify the client’s diagnosis or family history. Requisition forms from the laboratory are not sufficient for the establishment of a client’s personal and family history.

[Revised] To complete the prior authorization process, the ordering provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

[Revised] A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

### 3.4 \* Genetic Testing for Colorectal Cancer

[Revised] Genetic testing is provided to clients who have a first- or second-degree relative who has or has had colorectal cancer in order to determine if the client may have increased risk for developing colorectal cancer.

**Note:** *[Revised] A first-degree relative is defined as: sibling, parent, or offspring. A second-degree relative is defined as: uncle, aunt, grandparent, nephew, niece, or half-sibling.*

[Revised] Interpretation of gene mutation analysis results are part of the evaluation and management service and will not be reimbursed separately.

[Revised] Genetic test results, when informative, may influence clinical management decisions. The documentation that is maintained in the client's medical record must reflect that the client or family member has been given information on the nature, inheritance, and implications of genetic disorders to help them make informed medical and personal decisions prior to the genetic testing. The testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client's medical record and made available upon request.

#### 3.4.1 \* Documentation Requirements

[Revised] Providers must maintain the following documentation in the client's medical record for genetic testing for colorectal cancer:

- [Revised] Documentation of formal pre-test counseling, including assessment of the client's ability to understand the risks and limitations of the test.
- [Revised] The client's informed choice to proceed with the genetic testing for colorectal cancer.

[Revised] The ordering provider must select the test based on the familial medical history and the availability of previous family testing results. The medical record is subject to retrospective review.

**Referto:** *[Revised]* The appropriate [Texas Medicaid fee schedule](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for genetic testing procedure codes that may be reimbursed.

#### 3.4.2 \* Authorization Requirements

[Revised] Prior authorization is required for gene mutation analysis. A completed Special Medical Authorization (SMPA) Request Form, signed and dated by the provider rendering direct care, must be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prior authorized services may be reimbursed once per lifetime when billed by any provider. Additional services will not be prior authorized.

[Revised] Prior authorization requests may be considered for Familial Adenomatous Polyposis (FAP) testing for clients of any age with well defined hereditary cancer syndromes and for which either a positive or negative result will change medical care. The client for whom the request is made must have more than 20 polyps or a first-degree relative with FAP and a documented mutation.

**Note:** *[Revised] Clients who are seven years of age or younger must have clear rationale for testing and documentation of medical necessity from the client's medical record must be submitted with the prior authorization request.*

[Revised] Prior authorization requests may be considered for Hereditary Nonpolyposis Colorectal Cancer (HNPCC) testing for clients of any age. Testing for HNPCC is used to determine whether an individual has an increased risk for colorectal cancer or other HNPCC-associated cancers. Results of the test may influence clinical management decisions. The request must include one or more of the following criteria for testing:

- [Revised] The client has three or more family members (at least one must be a first-degree relative) who have colorectal cancer, and FAP has been ruled out. Two successive generations were affected, and one or more of the relatives was diagnosed with colorectal cancer at 50 years of age or younger.

- [Revised] The client has had two HNPCC cancers.
- [Revised] The client has colorectal cancer and a first-degree relative who also has colorectal cancer or HNPCC extracolonic cancer at 50 years of age or younger or colorectal adenoma at 40 years of age or younger.
- [Revised] The client has had colorectal cancer or endometrial cancer at 50 years of age or younger.
- [Revised] The client has had right-sided colorectal cancer with an undifferentiated pattern on histology at 50 years of age or younger.
- [Revised] The client has had signet-cell type colorectal cancer at 50 years of age or younger.
- [Revised] The client has had colorectal adenoma at 40 years of age or younger.
- [Revised] The client is an asymptomatic individual with a first- or second-degree relative with a documented HNPCC mutation.

**Note:** *[Revised] Clients who are 20 years of age or younger must have clear rationale for testing and documentation of medical necessity from the client's medical record must be submitted with the prior authorization request.*

[Revised] The ordering provider's signature on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

[Revised] Requisition forms from the laboratory are not sufficient for verification of the personal and family history.

[Revised] To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate medical necessity of the services requested. Medical documentation that is submitted by the physician must verify the client's diagnosis or family history.

[Revised] Guidelines for MLH1 and MLH2 mutation testing are based on guidelines established by the American College of Medical Genetics and the American Gastroenterological Association.

[Revised] A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

### 3.5 \* Pharmacogenetics

**Referto:** *[Revised] Subsection 9.2.43, "Pharmacogenetics" in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*

### 3.6 \* Exclusions

[Revised] The following services are not benefits of the Texas Medicaid Program:

- [Revised] Genetic testing that is not supported by medical and scientific evidence as outlined in S.B. 989 Biomarker, or that does not show evidence of clinical utility. Clinical utility is defined under S.B.989 Biomarker Sec. 1372.003(a)(1-5), as a test result that provides information that is used in the formulation of a treatment or monitoring strategy that informs a patient's outcome and impacts the clinical decision. The most appropriate test may include both information that is actionable and some information that cannot be immediately used in the formulation of a clinical decision.
- [Revised] Genetic testing that does not predominately address the acute or chronic issue for which the test is being ordered, except that a test may include some information that cannot be immediately used in the formulation of a clinical decision.

## 4 Radiological and physiological laboratory services

### 4.1 Enrollment

To enroll in Texas Medicaid, physiological laboratory, portable X-ray supplier, independent diagnostic testing facility (IDTF), and radiological laboratory providers must be actively enrolled in Medicare.

#### 4.1.1 Enrollment Criteria for Mammography Providers

All mammography providers, including those providing stereotactic biopsies, must be certified by the Bureau of Radiation Control (BRC).

Additionally, the Department of State Health Services (DSHS) issues mammography certification to providers who render mammography services. Providers can submit this certification to the TMHP Provider Enrollment Department in lieu of certification issued by the Food and Drug Administration (FDA), because a mammography certification issued by DSHS is recognized by the FDA. TMHP will also accept mammography certification issued by the FDA. The certificate will contain the BRC certification number, dates of issue and expiration, type of service, and Texas Medicaid and Children with Special Health Care Needs (CSHCN) Services Program provider identifiers.

Providers must check the expiration date of their mammography certification and submit an updated mammography certification prior to the expiration date. The certifications can be uploaded to the Provider Enrollment and Management System (PEMS).

### 4.2 Services, Benefits, Limitations, and Prior Authorization

The following high-technology radiology services may be reimbursed by Texas Medicaid with prior authorization:

- Cardiac nuclear imaging
- Computed tomography (CT)
- Computed tomography angiography (CTA)
- Functional MRI (fMRI)
- Magnetic resonance angiography (MRA)
- Magnetic resonance elastography (MRE)
- Magnetic resonance imaging (MRI)
- Positron emission tomography (PET) scan imaging

**Note:** Providers and facilities are required to use the lowest possible radiation dose that is consistent with acceptable image quality for cardiac nuclear imaging, CT, and PET examinations of all clients. It is recommended that providers and facilities use national standards such as those established by the American College of Radiology (ACR) in their ACR Practice Guidelines and Technical Standards manual.

Radiology interpretations in any place of service will be denied if they are billed by the attending physician. Services that are billed by the attending physician are included in the facility fee and are not reimbursed separately.

**Note:** The 3-dimensional (3-D) obstetric ultrasound is not a benefit of Texas Medicaid.

**Referto:** PA section for exceptions to prior authorization.

### 4.2.1 Cardiac Nuclear Imaging

Cardiac nuclear imaging is a benefit of Texas Medicaid and may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 78414           | 78428 | 78451 | 78452 | 78453 | 78454 | 78466 | 78468 | 78472 | 78473 |
| 78481           | 78483 | 78494 | 78496 |       |       |       |       |       |       |

The cardiac nuclear imaging study may be reimbursed separately from the diagnostic radiopharmaceutical.

**Referto:** The [online fee lookup \(OFL\)](#) or the applicable fee schedules on the TMHP website at [www.tmhp.com](http://www.tmhp.com) to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

#### 4.2.1.1 Authorization Requirements

Authorization is required for cardiac nuclear imaging.

**Referto:** Subsection 4.2.6, “Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET” in this handbook.

### 4.2.2 Computed Tomography, Magnetic Resonance Imaging, and Related Services

CT, CTA, fMRI, MRA, MRE, MRI, and ultrasound transient elastography (TE) services are benefits of Texas Medicaid.

The following procedure codes may be reimbursed with prior authorization for CT, CTA, fMRI, MRA, MRE, and MRI radiology services

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 70336           | 70450 | 70460 | 70470 | 70480 | 70481 | 70482 | 70486 | 70487 | 70488 |
| 70490           | 70491 | 70492 | 70496 | 70498 | 70540 | 70542 | 70543 | 70544 | 70545 |
| 70546           | 70547 | 70548 | 70549 | 70551 | 70552 | 70553 | 70554 | 70555 | 71250 |
| 71260           | 71270 | 71271 | 71275 | 71550 | 71551 | 71552 | 71555 | 72125 | 72126 |
| 72127           | 72128 | 72129 | 72130 | 72131 | 72132 | 72133 | 72141 | 72142 | 72146 |
| 72147           | 72148 | 72149 | 72156 | 72157 | 72158 | 72159 | 72191 | 72192 | 72193 |
| 72194           | 72195 | 72196 | 72197 | 72198 | 73200 | 73201 | 73202 | 73206 | 73218 |
| 73219           | 73220 | 73221 | 73222 | 73223 | 73225 | 73700 | 73701 | 73702 | 73706 |
| 73718           | 73719 | 73720 | 73721 | 73722 | 73723 | 73725 | 74150 | 74160 | 74170 |
| 74174           | 74175 | 74176 | 74177 | 74178 | 74181 | 74182 | 74183 | 74185 | 75557 |
| 75559           | 75561 | 75563 | 75565 | 75571 | 75572 | 75573 | 75574 | 75580 | 75635 |
| 76376           | 76377 | 76380 | 76390 | 76391 | 76497 | 76498 | 77011 | 77046 | 77047 |
| 77048           | 77049 | 77084 |       |       |       |       |       |       |       |

The professional component may be reimbursed when the service is rendered in the office, inpatient hospital, or outpatient hospital setting by physician providers.

The technical component will be a benefit when rendered in the office setting by physician, radiation treatment center, portable X-ray supplier, radiological laboratory, and physiological laboratory providers.

Procedure codes 76497 and 76498 will be a benefit when rendered in the outpatient hospital setting by radiation treatment center providers.

The following revenue codes must be billed with the most appropriate corresponding procedure code for CT, CTA, fMRI, MRA, MRE, and MRI radiology services rendered by outpatient hospital providers:

| Revenue Codes |     |     |     |     |     |     |     |  |  |
|---------------|-----|-----|-----|-----|-----|-----|-----|--|--|
| 350           | 351 | 352 | 359 | 610 | 611 | 612 | 619 |  |  |

The addition of post 3-D reconstruction (procedure codes 76376 and 76377) CT, CTA, MRA, and MRI studies must be prior authorized. No additional payment will be made in absence of prior authorization.

**4.2.2.1 Functional MRI (fMRI)**

Texas Medicaid considers fMRI medically necessary when it is being used as part of a preoperative evaluation for a planned craniotomy and is required for localization of eloquent areas of the brain, such as those responsible for speech, language, motor function, and senses, which might potentially be put at risk during the proposed surgery.

Neurofunctional testing procedure code 96020 must be reported in conjunction with brain fMRI procedure code 70555. Procedure code 96020 is informational and will not be reimbursed separately.

**4.2.2.2 Intraoperative MRI (iMRI)**

Indications for intracranial neurosurgical procedures using intraoperative MRI (iMRI) include, but are not limited to, the following:

- Oncologic neurosurgical procedures
- Epilepsy
- Chiari surgery
- Deep brain stimulators

Only one iMRI procedure code may be billed per operative session. Procedure codes 70557, 70558, and 70559 must not be billed in conjunction with procedure code 61751, 77021, or 77022.

Intraoperative MRI procedure codes 70557, 70558, and 70559 that are billed with modifier 26 may be reimbursed to physician providers for interpretation.

Procedure codes 75559 and 75563 must be billed in conjunction with stress testing procedure codes 93015, 93016, 93017, and 93018.

**4.2.2.2.1 Laser Interstitial Thermal Therapy (LITT)**

Laser interstitial thermal therapy (LITT) is an iMRI procedure used when a patient has one of the following diagnoses and is not a surgical candidate:

- Relapsed brain metastasis
- Acute cerebrovascular insufficiency
- Radiation Necrosis
- Secondary malignant neoplasm of brain

LITT therapy is billed under procedure codes 61736 or 61737, and requires prior authorization.

4.2.2.3      **Magnetic Resonance Elastography (MRE)**

MRE is a diagnostic tool for assessing hepatic fibrosis by relying on visualization of the passage of acoustic waves through liver tissue while the patient is undergoing magnetic resonance imaging (MRI). MRE combines MRI imaging with low-frequency vibrations to create a visual map (elastogram) that identifies stiffness of the liver.

MRE (procedure code 76391) may be reimbursed for diagnosis or monitoring of liver fibrosis or cirrhosis in clients suspected of having, or who have been diagnosed with chronic liver disease.

Performance of MRE may be reimbursed two times per rolling year. Performance of MRE may not be reimbursed within 6 months following a liver biopsy or TE, as it is not medically necessary.

4.2.2.4      **Ultrasound Transient Elastography (TE)**

TE is a noninvasive device that uses a patented ultrasound-controlled attenuation parameter (CAP) technology, and aspartate-aminotransferase (AST) values to detect or monitor liver fibrosis. TE involves the analysis of ultrasonographic wave propagation and tissue deformation in patients suspected of having or diagnosed with chronic liver disease. TE is used to measure the presence and extent of liver fibrosis.

TE (procedure code 91200) may be reimbursed for the diagnosis or monitoring of liver fibrosis or cirrhosis in clients suspected of having, or who have been diagnosed with chronic liver disease.

Reimbursement for procedure code 91200 is limited to the following diagnosis codes:

| Diagnosis Codes |       |       |       |       |      |       |       |      |      |
|-----------------|-------|-------|-------|-------|------|-------|-------|------|------|
| K710            | K7110 | K7111 | K712  | K713  | K714 | K7150 | K7151 | K716 | K717 |
| K718            | K719  | K7400 | K7401 | K7402 | K742 | K7581 | K760  |      |      |

Performance of TE may be reimbursed up to two times per rolling year. Performance of TE may not be reimbursed within 6 months following a liver biopsy or MRE, as it is not medically necessary.

TE may be inappropriate and ineffective in clients with obesity, ascites, or narrow intercostal spaces.

4.2.2.5      **Authorization Requirements and Flexibility**

Authorization is required for CT, CTA, fMRI, MRA, MRE, and MRI procedures.

**Note:** Intraoperative MRI (iMRI) does not require prior authorization, except for LITT (procedure codes 61736 and 61737), which does require prior authorization. TE does not require prior authorization (procedure code 91200).

**Referto:** Subsection 4.2.6, “Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET” in this handbook.

If the ordering physician or radiologist determines that a CT, CTA, fMRI, MRA, MRE, or MRI procedure that is different from the authorized procedure is required or that additional procedures are required, the following will apply:

- The procedure performed is less complex than the procedure authorized but of the same modality (e.g., an MRI with contrast is prior authorized and the actual procedure performed is an MRI without contrast). Full reimbursement is allowed for the billed procedure.
- The authorized procedure is performed and an additional higher-level procedure of the same modality is deemed medically necessary within the same authorization period. A separate authorization is required. The additional procedure must be prior authorized separately and submitted on a separate claim.

- The procedure billed is more complex than the procedure authorized but of the same modality. No authorization update will result in reimbursement according to the rate of the lesser authorized code. For full reimbursement of the more complex procedure, the authorization requires an update.

The following table includes the recognized relationships for authorization flexibility:

| Level 1 (High) | Level 2 (Moderate) | Level 3 (Low) |
|----------------|--------------------|---------------|
| 70470          | 70460              | 70450         |
| 70482          | 70481              | 70480         |
| 70488          | 70487              | 70486         |
| 70492          | 70491              | 70490         |
| 70543          | 70542              | 70540         |
| 70546          | 70545              | 70544         |
| 70549          | 70548              | 70547         |
| 70553          | 70552              | 70551         |
| 71270          | 71260              | 71250         |
| 71552          | 71551              | 71271         |
| 72127          | 72126              | 71550         |
| 72130          | 72129              | 72125         |
| 72133          | 72132              | 72128         |
| 72156          | 72142              | 72131         |
| 72157          | 72147              | 72141         |
| 72158          | 72149              | 72146         |
| 72194          | 72193              | 72148         |
| 72197          | 72196              | 72192         |
| 73202          | 73201              | 72195         |
| 73220          | 73219              | 73200         |
| 73223          | 73222              | 73218         |
| 73702          | 73701              | 73221         |
| 73720          | 73719              | 73700         |
| 73723          | 73722              | 73718         |
| 74170          | 74160              | 73721         |
| 74178          | 74177              | 74150         |
| 74183          | 74182              | 74176         |
| 75559          | 75557              | 74181         |
| 75563          | 75561              |               |

#### 4.2.3 Positron Emission Tomography (PET) Scan Imaging

PET scan imaging services are benefits of Texas Medicaid and may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 78608           | 78811 | 78812 | 78813 | 78814 | 78815 | 78816 |

Procedure codes 78459, 78491, and 78492 are not reimbursed by Texas Medicaid.

The PET scan procedure may be reimbursed separately from the diagnostic radiopharmaceutical.

**Referto:** The [online fee lookup \(OFL\)](#) or the applicable fee schedules on the TMHP website at [www.tmhp.com](http://www.tmhp.com) to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

**4.2.3.1 Authorization Requirements**

Prior authorization is required for PET imaging services.

**Referto:** Subsection 4.2.6, “Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

**4.2.4 Radiology/Diagnostic Imaging Policy**

Radiography and fluoroscopy radiology/diagnostic imaging may be reimbursed by Texas Medicaid using the following procedure codes:

| Procedure Codes |       |       |       |       |
|-----------------|-------|-------|-------|-------|
| 74775           | 75956 | 75957 | 75958 | 75959 |

Procedure code 74775 may be reimbursed for services rendered to clients who are 20 years of age and younger.

The procedure code in Column A must be billed with the procedure codes in Column B by the same provider with the same date of service to be reimbursed:

| Column A | Column B       |
|----------|----------------|
| 75956    | 33880          |
| 75957    | 33881          |
| 75958    | 33883 or 33884 |
| 33884    | 33883          |
| 75959    | 33886          |

Texas Medicaid may reimburse the professional interpretation component only when the physician bills procedure codes 75956, 75957, 75958, or 75959. The professional and technical service may be reimbursed to the inpatient hospital through the DRG reimbursement.

**4.2.4.1 Authorization Requirements**

Prior authorization is not required for the radiology/diagnostic imaging procedure codes in this section.

**4.2.5 Physician-Performed Radiology Services**

**Referto:** Subsection 9.2.65, “Radiology Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

**4.2.6 Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET**

Prior authorization is not required for emergency department services, outpatient observation services, or inpatient hospital radiology services.

Prior authorization is required for outpatient nonemergent services (i.e., those that are planned or scheduled). Prior authorization must be obtained before the service is rendered.

The following table summarizes the authorization requirements for cardiac nuclear imaging services, CT, CTA, fMRI, MRA, MRE, MRI, and PET:

| Condition                                                     | Authorization Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Emergency department visit                                    | <p>Authorization is not required for emergency department radiology services that are rendered during an emergency department visit.</p> <ul style="list-style-type: none"> <li>For professional claims, the appropriate radiology procedure code must be billed with modifier U6.</li> <li>The facility may be reimbursed using the appropriate, corresponding emergency services revenue code.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Outpatient observation                                        | <p>Authorization is not required for radiology services rendered during outpatient observation.</p> <ul style="list-style-type: none"> <li>For professional claims, the appropriate radiology procedure code must be billed with modifier U6.</li> <li>The facility may be reimbursed using the appropriate, corresponding outpatient observation revenue code.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Nonemergent condition: planned or scheduled radiology service | <p>Texas Medicaid defines a nonemergent condition as a symptom or condition that is neither acute nor severe and can be diagnosed and treated immediately, or that allows adequate time to schedule an office visit for a history, physical, or diagnostic studies prior to diagnosis and treatment.</p> <p>Prior authorization is required for outpatient nonemergent (i.e., those studies that are planned or scheduled) cardiac nuclear imaging services, CT, CTA, fMRI, MRA, MRE, MRI, and PET scan.</p> <p><b>Important:</b> <i>The authorization number must be on the claim when it is submitted to TMHP for reimbursement. Only one authorization is allowed per claim. For the most accurate and efficient claims processing, TMHP recommends that the procedure code that is submitted on the claim match the procedure code that is authorized. Providers are encouraged to contact TMHP and update the prior authorization if the ordering physician or radiologist changes the actual procedure that is performed. Providers have 14 calendar days after the day on which the study was completed to update the prior authorization.</i></p> <p>Additional or alternate studies identified and ordered by the radiologist at the time of a prior-authorized study meet the definition of urgent condition and require retroactive authorization.</p> <p><b>Referto:</b> Subsection 4.2.6.1, “Retroactive Authorization” in this handbook.</p> |
| Outpatient urgent condition                                   | <p>Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures.</p> <p>Texas Medicaid defines an urgent condition as a symptom or condition that is not an emergency, but requires further diagnostic work-up or treatment within 24 hours to avoid a subsequent emergent situation.</p> <p><b>Referto:</b> Subsection 4.2.6.1, “Retroactive Authorization” in this handbook.</p> <p><b>Note:</b> <i>Additional or alternate studies identified and ordered by the radiologist at the time of a prior-authorized study meet the definition of urgent condition and require retroactive authorization.</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Condition                     | Authorization Requirements                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Outpatient emergent condition | <p>Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures.</p> <p>Texas Medicaid defines an emergent condition as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance use) such that a prudent layperson with an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to result in at least one of the following:</p> <ul style="list-style-type: none"> <li>• Placing the recipient's health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy</li> <li>• Serious impairment to bodily functions</li> <li>• Serious dysfunction to any bodily organ or part</li> </ul> <p>The physician must determine that a medical emergency, which imminently threatens life or limb exists and that the medical emergency requires advanced diagnostic imaging.</p> <p><b>Referto:</b> Subsection 4.2.6.1, "Retroactive Authorization" in this handbook.</p> |
| Inpatient hospital            | Authorization is not required for inpatient hospital radiology services.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Prior authorization of nonemergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the service and must be maintained in the client's medical record, both by the ordering physician (i.e., the physician who orders the study) and the performing facility.

Nationally-accepted guidelines and radiology protocols based on medical literature are used in the authorization processes for urgent, emergent, and nonemergent services. These include, but are not limited to:

- American College of Radiology (specifically, their Appropriateness Criteria)
- American Academy of Neurology
- American Academy of Orthopedic Surgeons
- American College of Cardiology
- American Heart Association
- National Comprehensive Cancer Care Network

**Referto:** Subsection 4.2.2.5, "Authorization Requirements and Flexibility" in this handbook for information about authorization flexibility for CT, CTA, fMRI, MRA, and MRI procedures.

#### 4.2.6.1 Retroactive Authorization

A request for retroactive authorization for an emergent or urgent cardiac nuclear imaging service, CT, MR, or PET must be submitted no later than 14 calendar days after the day on which the study was completed.

Retroactive authorization of urgent or emergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the study and must be maintained in the client's medical record, both by the ordering physician (i.e., the physician ordering the study) and the performing facility.

Retroactive authorization for outpatient urgent services is considered when all of the following criteria are met:

- The physician who renders the imaging service determines, during the provision of prior-authorized services, that additional or alternate procedures are medically indicated.
- The urgent condition requires additional or alternate advanced diagnostic imaging.

Retroactive authorization for outpatient emergent services is considered when all of the following criteria are met:

- The physician determines that a medical emergency that imminently threatens life or limb exists.
- The medical emergency requires advanced diagnostic imaging.

Retroactive authorization is not required when a prior-authorized CT or MR procedure is changed by the ordering physician or radiologist to a lesser procedure of the same modality (e.g., MRI with contrast is authorized and the actual procedure performed is MRI without contrast).

Documentation of medical necessity for a liver biopsy (procedure code 47000 or 47100) performed within 6 months following TE (procedure code 91200) or MRE (procedure code 76391) must be maintained in the client's records and is subject to retrospective review.

#### **4.2.6.2 Request Form and Documentation**

Regardless of method of submission, the ordering physician must complete and retain the Radiology Prior Authorization Request Form with an original signature in the client's medical record.

Providers must submit the form with the request information related to the medical necessity for the service, including all of the following:

- Diagnosis
- Treatment history
- Treatment plan
- Medications that the client is currently taking
- Previous imaging results

Providers may also be asked to provide additional documentation as necessary during the authorization process.

Section A of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the ordering physician before requesting prior authorization, regardless of the method of request for authorization.

Section B of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the physician who performs the service prior to requesting retroactive authorization for urgent or emergent studies.

Residents, physician assistants (PAs), and nurse practitioners (NPs) may order radiological procedures; however, the ordering or referring clinician must sign the authorization form and provide the group or supervising provider's NPI.

**Referto:** Section 3, "Inpatient Hospital (Medical/Surgical Acute Care Inpatient Facility)" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

Section 9, "Physician" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information on MRI and contrast material.

4.2.6.3 Methods of Submission

Authorization requests for cardiac nuclear imaging studies, CT, CTA, fMRI, MRA, MRE, MRI, and PET for Texas Medicaid clients must be submitted to TMHP. Providers can submit authorizations to TMHP:

- By fax to 833-912-1129
- By mail to:

Texas Medicaid & Healthcare Partnership  
Radiology Prior Authorization  
12365A Riata Trace Parkway  
Austin, TX 78727

Requests for retroactive authorization may be submitted by fax or mail.

4.2.7 Additional Radiology and Physiological Laboratory Services

4.2.7.1 Ambulatory Electroencephalogram

**Referto:** Subsection 9.2.26.2, “Ambulatory and Long-Term Electroencephalogram (Ambulatory EEG)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.7.2 Brachytherapy

**Referto:** Subsection 9.2.64.1, “Brachytherapy” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.7.3 Diagnostic Doppler Sonography

**Referto:** Subsection 9.2.27, “Diagnostic Doppler Sonography” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.7.4 Electrocardiograms

**Referto:** Subsection 9.2.26.6, “Electrocardiogram (ECG)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.7.5 Electromyography (EMG) and Nerve Conduction Studies (NCS)

**Referto:** Subsection 9.2.26.7, “Esophageal pH Probe Monitoring” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

Subsection 4.2.10, “Electrodiagnostic (EDX) Testing” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

4.2.7.6 Esophageal pH Probe Monitoring

**Referto:** Subsection 9.2.26.7, “Esophageal pH Probe Monitoring” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

4.2.7.7 Mammography Services

The following procedure codes will be denied if the provider does not have a BRC mammography certification on file:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| 77032           | 77053 | 77054 |

**Referto:** Subsection 9.2.15.4, “Prognostic Breast and Gynecological Cancer Studies” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about mammography services.

**4.2.7.8 Nonsurgical Vision Services**

**Referto:** Subsection 4.3.6.2, “Ophthalmic Ultrasound” in the *Vision and Hearing Services Handbook* (Vol. 2, *Provider Handbooks*).

**4.2.7.9 Obstetric Services**

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (Vol. 2, *Provider Handbooks*).

**4.2.7.10 Radiation Therapy Services**

**Referto:** Subsection 9.2.64, “Radiation Therapy” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for information about radiation therapy, including brachytherapy and stereotactic radiosurgery.

**4.2.7.11 Screening and Diagnostic Studies of the Breast**

**Referto:** Subsection 9.2.15.3, “Mammography (Screening and Diagnostic Studies of the Breast)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*).

**4.2.7.12 Sleep Studies**

**Referto:** Subsection 9.2.72, “Sleep Studies” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*).

**4.3 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered, including radiological and physiological laboratory services. Radiological and physiological laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

**4.4 Claims Filing and Reimbursement****4.4.1 Claims Information**

Claims for radiological and physiological laboratory services and portable X-ray supplier services must include the referring or ordering provider. Radiological and physiological laboratory services and portable X-ray supplier services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (Vol. 1, *General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (Vol. 1, *General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (Vol. 1, *General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

**4.4.1.1 Diagnosis Requirements**

A diagnosis is not required with a provider’s request for payment except when providing the following services:

- Ambulatory Electroencephalogram (A/EEG)

- Arteriogram
- Cardiac nuclear imaging
- Chest X-ray
- Computed tomography imaging (CT)
- Echography
- Electrocardiogram (ECG)
- Functional MRI (fMRI)
- Magnetic resonance angiography (MRA)
- Magnetic resonance imaging (MRI)
- Mammographies, noninvasive diagnostic studies
- Positron emission tomography (PET) scan
- Polysomnographies
- Venographies

Claims for all services provided to clients who are eligible for “Emergency Care Only” must have a diagnosis to be considered for reimbursement. As with all procedures billed to Texas Medicaid, most baseline screening or comparison studies are not a benefit.

**Referto:** Section 9, “Physician” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information on these services.

#### 4.4.1.2 Modifier Requirements for Type of Service Assignment

For the radiology, physiological lab, and X-ray procedures in this chapter, providers must bill modifier 26 for the interpretation component or modifier TC for the technical component. No modifier is necessary for the total component.

**Referto:** Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

Subsection 6.3.2, “Type of Service (TOS)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

#### 4.4.2 Reimbursement

Radiological and physiological laboratory and portable X-ray supplier providers are reimbursed in accordance with 1 TAC §355.8085. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Texas Medicaid pays only up to the amount allowed for the total component for the same procedure submitted for reimbursement by the same provider for the same client with the same date of service. Providers who perform the technical service and the interpretation must bill the total component. Providers who perform only the technical service must bill the technical component, and those who perform only the interpretation must bill the interpretation component. The total component and the technical or interpretation component for the same procedure are not reimbursed separately when billed by any provider with the same date of service; the first claim may be reimbursed and the additional claim(s) will be denied. Claims are considered for reimbursement based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure with the same date of service for the same client, regardless of provider, the claim for the total component is denied. The same is true if a total component has already been paid and claims are received for the individual components.

Radiology and physiological laboratory and portable X-ray services are not payable when the client is in an inpatient setting. The reimbursement for these services are included in the diagnosis-related group (DRG) payment.

Imaging services submitted by outpatient hospital providers may be reimbursed a flat fee.

Imaging services procedure codes can be found on the TMHP fee schedule website titled, “Hospital Outpatient Imaging Services.”

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

#### 4.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 1 General Information

The information in this handbook is intended for school districts and healthcare providers who provide school-based health services for children aged 20 years and younger. This handbook contains information about Texas Medicaid benefits, policies, and procedures applicable to these providers.

**Important:** *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.7, “Provider Responsibilities” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information).

## 2 School Health and Related Services (SHARS)

### 2.1 \* Overview

SHARS are direct medical services and transportation services available to children who are 20 years of age or younger, enrolled in Medicaid and are eligible to receive services under the Individuals with Disabilities Education Act (IDEA). The services must be included in the child’s individualized education program (IEP) established under IDEA.

Upon approval by the Centers for Medicare and Medicaid Services (CMS), SHARS may also include audiology evaluation and management services provided to eligible students under Section 504 of the Rehabilitation Act of 1973. The services must be included in the child’s written Section 504 Plan.

Local Education Agencies (LEAs), which include Texas independent school districts (ISDs) and public charter schools, must enroll in Texas Medicaid as a SHARS provider to be reimbursed for providing direct medical and transportation services to Medicaid enrolled students in a school setting.

The oversight of SHARS is a cooperative effort between the Texas Education Agency (TEA) and the Texas Health and Human Services Commission (HHSC).

According to Title 34 Code of Federal Regulations (CFR) §300.303, re-evaluations for SHARS services must occur at least once every 3 years, unless the parent and the public agency agree that a re-evaluation is unnecessary.

SHARS allows LEAs to be reimbursed for direct medical and transportation services that are determined to be medically necessary and are documented in the IEP.

The Centers for Medicare & Medicaid Services (CMS) require LEAs to be enrolled as SHARS Medicaid providers, participate in the Random Moment Time Study (RMTS), submit claims that are reimbursed on an interim basis, and submit an annual SHARS Cost Report.

To receive SHARS services, Medicaid-enrolled students must:

- Be enrolled in a public school’s special education program; and

- Be 20 years of age or younger; and
- Have a disability or chronic medical condition; and
- Have an IEP documenting disability and medical necessity; or
  - An IEP is a written plan mandated by IDEA that is developed by the school, in conjunction with the parents or guardians, teachers and other health professionals. This plan authorizes the services that can be provided and defines the individualized objectives of a child who has been found to have a disability.
  - The IEP is created by an ARD (Admission, Review, and Dismissal) Committee.
  - Title 34 CFR §300.320 outlines what must be included in an IEP.
  - The SHARS program cannot reimburse for services beyond what is detailed in the IEP.
- Have a written Section 504 plan, documenting disability and medical necessity for audiology evaluation and management services.
  - A Section 504 plan is a plan mandated by 29 United States Code (U.S.C.) Section 794, regulated by 34 CFR §104, and developed by the school, in conjunction with the parents or guardians, teachers, and school administration. The plan must include evaluation data along with placement information regarding the type of services the student needs.
  - Evaluation under a Section 504 plan may be conducted using the same process to evaluate the needs of students under IDEA. In accordance with 34 CFR §104.35, LEAs may choose to adopt a separate process for evaluating students under a Section 504 plan.
  - The SHARS program cannot reimburse for services under a Section 504 plan beyond audiology evaluation and management services.

SHARS covers the following services:

- **[Revised] Audiology, delivered by licensed audiologist**
- Counseling, individual and group, delivered by licensed master's level therapist
- Nursing services, including medication administration and nursing services delegated by a registered nurse (RN) (in compliance with RN delegated nursing tasks criteria as determined by the Texas Board of Nursing) to an employee or health aide
- Occupational therapy (OT), individual and group, delivered by licensed therapist or licensed assistant
- Personal care services (PCS)
- Physician services
- Physical therapy (PT), individual and group, delivered by licensed therapist or licensed assistant
- Psychological services, individual and group, delivered by a licensed psychiatrist/psychologist or a licensed specialist in school psychology (LSSP)
- Special transportation services
- Speech therapy (ST), individual and group, delivered by licensed therapist or licensed assistant

**Note:** *These services must be provided by qualified personnel who are employed by the LEA or under contract with the LEA.*

Subject to the specifications, conditions, limitations, and requirements established by HHSC, SHARS are the services outlined above and determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and who are 20 years of age or younger receive the benefits accorded to them by federal and state law guaranteeing a free and appropriate public education.

Care coordination between SHARS OT, PT, and ST providers and non-SHARS OT, PT, and ST providers is strongly encouraged to reduce or avoid duplication of services. Care coordination requires parental consent and must be carried out in a manner that complies with privacy and confidentiality requirements in accordance with state and federal law and regulations including Health Insurance Portability and Accountability Act (HIPAA) and Family Educational Rights and Privacy Act (FERPA).

Multi-disciplinary team evaluations performed collaboratively with any combination of OT, PT, ST, and Psychology are billable by each provider when performed during overlapping time periods.

Reimbursement is available for OT, PT, or ST prescribed on the student's IEP when delivered as co-treatment. Providers should document in the session notes the reason for co-treatment.

Co-treatment is defined as two different therapy disciplines performing therapy on the same client at the same time by a licensed therapist as defined in this handbook for each therapy discipline and rendered in accordance with the Executive Council of Physical Therapy and Occupational Therapy Examiners (ECPTOTE) and Texas Department of Licensing and Regulation (TDLR).

Providers of SHARS services must meet Texas Medicaid provider qualifications for each service according to the Texas Medicaid state plan and the Texas Medicaid Provider Procedures Manual (TMPPM).

All SHARS policies must be consistent with the Texas state plan and the following Texas Administrative Code rules:

- 1 TAC §354.1341 & §354.1342 SHARS
- 1 TAC §354.1003(a)(5)(J) Time Limits for Submitted Claims
- 1 TAC §355.8441(a)(12)(A) Reimbursement Methodologies for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Services
- 1 TAC §355.8443 Reimbursement Methodology for SHARS
- 1 TAC §355.101 - §355.114 Cost Determination Process

In accordance with 34 CFR §300.154, 1 TAC §354.1342, and FERPA, LEAs are required to obtain parental consent prior to disclosing personally identifiable student information maintained in a student's education record, and are also required to obtain parental consent for Medicaid-enrolled students prior to billing Medicaid for SHARS services prescribed in the Medicaid-enrolled student's IEP or Section 504 plan.

Providers must adhere to the documentation requirements for each SHARS service outlined in this handbook.

SHARS services may be provided in the following places of service: office, home, or other location (e.g., school).

A prescription is defined as a written order for services from the ordering physician or other eligible prescribing provider. Prescriptions are required for SHARS OT and PT services.

Other eligible prescribing provider is defined as an advanced practice registered nurse (APRN) under the delegation of a physician, or a physician assistant (PA) under the delegation of a physician.

Referrals are required for SHARS audiology and speech therapy (ST) services.

**Note:** *A prescription may serve as a referral.*

A referral is defined as a written document requesting evaluation for services from the referring physician or other eligible referring provider, defined as follows:

- For SHARS audiology - an audiologist referring for audiology services, an APRN under the delegation of a physician, or a PA under the delegation of a physician
- For SHARS ST services - a speech-language pathologist (SLP) with an unrestricted license to provide services independently referring for speech and language services, an APRN under the delegation of a physician, or a PA under the delegation of a physician

### **2.1.1 Eligibility Verification**

The following are means to verify Medicaid eligibility of students:

- Verify electronically through third party software or TexMedConnect.
- School districts may inquire about the eligibility of a student by submitting the student's Medicaid number or two of the following: name, date of birth, or Social Security number (SSN). A search can be narrowed further by entering the county code or sex of the student. Verifications may be submitted in batches without limitations on the number of students.
- Contact AIS at 1-800-925-9126.

## **2.2 Enrollment**

### **2.2.1 School Health and Related Services Enrollment**

To enroll in Texas Medicaid as a SHARS provider, the provider must:

- Be an LEA school that employs or contracts with individuals or entities that meet health care practitioner certification and licensing requirements in accordance with the Texas Medicaid state plan for SHARS.
- Since LEAs are government entities, they should select “public entity” on the enrollment application.
- Comply with all applicable federal and state laws and regulations governing the services provided.
- Be enrolled and approved for Texas Medicaid participation.
- Sign a written provider agreement.
- Comply with the terms of the provider agreement and all requirements of Texas Medicaid, including the rules, policies and procedures, manuals, bulletins, banners, standards, and guidelines published by Texas Health and Human Services Commission (HHSC) or its designee.
- Bill for services covered by Texas Medicaid in the manner and format prescribed by HHSC or its designee.

SHARS providers are required to notify parents or guardians of their rights to a “freedom of choice of providers” (42 CFR §431.51) under Texas Medicaid. SHARS providers may provide this notification during the initial Admission, Review, and Dismissal (ARD) process. If a parent requests that someone other than the employees or currently contracted staff of the SHARS provider LEA provide a required SHARS service listed in the student's IEP, the SHARS provider must make a good faith effort to comply with the parent's request. The SHARS provider can negotiate with the requested provider to provide the services under contract. The requested provider must meet, comply with, and provide all of the employment criteria and documentation that the SHARS provider normally requires of its employees and currently contracted staff. The SHARS provider can negotiate the contracted fee with the requested provider and is not required to pay the same fee that the requested provider might receive from Medicaid for similar services.

If the requested provider is a currently enrolled Medicaid provider, the requested provider can bill Medicaid for the services they provide. The services provided to the student can only be billed once; either by the requested provider or the SHARS provider. If the requested provider signs a contract with the SHARS provider, then only the SHARS provider can bill for the services provided by the requested provider.

### 2.2.2 Private School Enrollment

A private school may not participate in the SHARS program as a SHARS provider.

## 2.3 Services, Benefits, Limitations, and Prior Authorization

All of the SHARS procedures listed in the following sections require a valid diagnosis code. SHARS includes audiology services, counseling services, nursing services, occupational therapy services, personal care services, physical therapy services, physician services, psychological services (including testing), special transportation services, and speech therapy services.

**Reminder:** *SHARS are the services determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and who are 20 years of age and younger receive the benefits accorded to them by federal and state law in order to participate in the educational program.*

### 2.3.1 \* Audiology Services

Audiology services include, but are not limited to, the following:

- Identification of children with hearing loss
- Determination of the range, nature, and degree of hearing loss, including the referral for medical or other professional attention for the amelioration of hearing
- Provision of amelioration activities, such as language amelioration, auditory training, speech reading (lip reading), hearing evaluation and speech conversion
- Determination of the child's need for group and individual amplification
- Hearing services

[Revised] Audiology services must be provided by a professional who holds a valid state license as an audiologist. An audiology assistant who is licensed by the state may provide services within the guidelines of state licensure when the assistant or intern is acting under the supervision of a qualified audiologist.

A referral is required for audiology services. The referral must be updated a minimum of one time every three calendar years.

The LEA must maintain the referral in the student's medical record.

Audiology services must be referred by a physician or other eligible referring provider. A referral for audiology services must be signed and dated within three calendar years before the initiation of services.

In order for audiology services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the referring licensed physician, or other eligible referring provider, must be listed on the claim and kept in the student's medical record.

Within SHARS, Medicaid-enrolled audiologists may refer for their own services or those of another SHARS audiologist. They may not refer for any services outside of SHARS or for SHARS services of other disciplines.

SHARS audiologists whose evaluations serve as the referral must be enrolled in Texas Medicaid as either individual practitioners or ordering, referring, or prescribing (ORP) providers. When submitting claims for SHARS audiology services, LEAs must include the referring provider's NPI in the referring provider NPI field of the claim form.

[Revised] IDEA requires that a student receiving services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate referral is not required for a re-evaluation. The need for a re-evaluation should be determined by the student's ARD committee.

Only the time spent with the student present is billable; time spent without the student present is not billable. Direct audiology evaluation time with the student present is billable. Indirect time for interpretation and report writing is not billable.

[Revised] Hearing aids and fittings are not covered by the SHARS program, but may be reimbursed through Texas Medicaid outside of the SHARS program. Audiologists and hearing aid fitters and dispensers employed by or contracted with school districts must enroll in Texas Medicaid as individual practitioners and choose "Hearing Aid" on the enrollment application to be reimbursed for hearing aid devices and accessories, and fitting and dispensing visits and revisits.

[Revised] Functional listening evaluations are not billable.

#### \* Audiology Services Procedure Codes

| [Revised] Procedure Code | [Revised] Individual or Group | [Revised] Provider   | [Revised] Student Population | [Revised] Unit of Service |
|--------------------------|-------------------------------|----------------------|------------------------------|---------------------------|
| 92552 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92552 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92553 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92553 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92555 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92555 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92556 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92556 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92557 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92557 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92567 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92567 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92568 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |

| [Revised] Procedure Code | [Revised] Individual or Group | [Revised] Provider   | [Revised] Student Population | [Revised] Unit of Service |
|--------------------------|-------------------------------|----------------------|------------------------------|---------------------------|
| 92568 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92582 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92582 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92592 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92592 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92593 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92593 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92620 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | 60 minutes                |
| 92620 with modifier U4   | Individual                    | Licensed audiologist | 504                          | 60 minutes                |
| 92621 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | 15 minutes                |
| 92621 with modifier U4   | Individual                    | Licensed audiologist | 504                          | 15 minutes                |
| 92630 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92630 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |
| 92633 with modifier TM   | Individual                    | Licensed audiologist | IEP                          | Untimed                   |
| 92633 with modifier U4   | Individual                    | Licensed audiologist | 504                          | Untimed                   |

**Referto:** Subsection 2.7.2.1, “Interim Claiming” in this handbook.

**\* Audiology Services Modifiers**

| [Revised] Modifier | [Revised] Description                                                               |
|--------------------|-------------------------------------------------------------------------------------|
| 52                 | Reduced Services                                                                    |
| TM                 | Audiology services provided to students with individualized education program (IEP) |
| U4                 | Audiology services provided to students with Section 504 plan                       |

**Referto:** Subsection 2.4, “Documentation Requirements” in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

[Revised] Audiometry is the testing of a person's ability to hear various sound frequencies and is performed with the use of calibrated electronic equipment. The results of the audiometry test may be recorded on a grid or graph called an audiogram. Audiometry is used to identify and diagnose hearing loss.

[Revised] Pure tone audiometry (procedure codes 92552 and 92553) is limited to one per day, any provider. If both procedure codes are billed for the same date of service, same provider, and same student, procedure code 92553 will be reimbursed and procedure code 92552 will be denied.

[Revised] Speech audiometry threshold (procedure codes 92555 and 92556) is limited to one of either procedure code per day, any provider. If both procedure codes are billed for the same date of service, same provider, and same student, procedure code 92556 will be reimbursed and procedure code 92555 will be denied.

[Revised] Comprehensive audiometry (procedure code 92557) is limited to one per day, same provider. This service includes testing of both ears. If procedure codes 92552, 92553, 92555, or 92556 are billed for the same date of service, same provider, and same student as procedure code 92557, only procedure code 92557 will be reimbursed.

[Revised] Procedure codes 92553 and 92556 are not reimbursed on the same day by the same provider for the same student. Instead of billing both procedure codes for the same date of service, same provider, and same student, providers should bill with the more appropriate, comprehensive audiometry procedure code 92557.

[Revised] Tympanometry (procedure code 92567) is limited to one per day, any provider. Acoustic reflex testing, threshold (procedure code 92568) is limited to one per day, any provider.

[Revised] Conditioning play audiometry (procedure code 92582) is limited to one per day, any provider.

[Revised] The use of procedure codes 92552, 92553, 92555, 92556, 92557, 92567, 92568, and 92582 implies that testing is performed in both ears. Audiologists must use modifier 52, reduced services, if a test is applied to one ear instead of both.

Hearing aid check – one ear (procedure code 92592) and hearing aid check – two ears (procedure code 92593) are not reimbursed on the same day by the same provider for the same student. If both procedure codes are billed for the same date of service, same provider, and same student, procedure code 92593 will be reimbursed and procedure code 92592 will be denied.

[Revised] Auditory processing evaluation (procedure codes 92620 and 92621) is billable on an individual basis only. The maximum billable time for the first hour of an auditory processing evaluation (procedure code 92620) is 60 minutes (1 unit). The maximum billable time for each additional 15 minutes of an auditory processing evaluation (procedure code 92621) is 60 minutes (4 units).

[Revised] Auditory processing evaluation (procedure code 92620) is limited to one per day, any provider.

[Revised] Auditory rehabilitative treatment (procedure codes 92630 and 92633) is limited to one per day, any provider. Session notes for therapy services (procedure codes 92630 and 92633) are required.

### **2.3.2 Nursing Services**

Nursing services are defined as the promotion of health, prevention of illness, and the care of ill, disabled and dying people through the provision of services essential to the maintenance and restoration of health. SHARS nursing services are skilled nursing tasks, as defined by the Texas Board of Nursing (BON) that are included in the student's IEP.

Examples of reimbursable nursing services include, but are not limited to, the following:

- Inhalation therapy
- Ventilator monitoring

- Nonroutine medication administration
- Tracheostomy care
- Gastrostomy care
- Ileostomy care
- Catheterization
- Suctioning
- Client training
- Assessment of a student’s nursing service’s needs

Nursing services must be provided by a registered nurse (RN), advanced practice registered nurse (APRN) (including nurse practitioners [NPs] and clinical nurse specialists [CNSs]), licensed vocational nurse/licensed practical nurse (LVN/LPN), or a school health aide or other trained, unlicensed assistive person delegated and supervised by an RN or APRN.

As defined by 22 TAC §225.4, nurse-delegated tasks are those in which a registered nurse authorizes an unlicensed person to perform tasks of nursing care in selected situations and indicates that authorization in writing. Nurse-delegated tasks includes tasks listed in 22 TAC §225.10 and must meet the professional standards of the Texas Board of Nursing.

Personal Care Services (PCS) cannot be billed as a nursing service. If a SHARS provider is not sure whether to bill a service as PCS or a nursing service, the SHARS provider must discuss the services provided to the student with the RN or APRN who can make that determination.

A prescription is not needed to provide nursing services through SHARS.

Only the time spent with the student present is billable. Time spent without the student present is not billable.

Private duty nursing (PDN) is not a SHARS covered service.

Direct nursing care services are billed in 15-minute increments and medication administration is reimbursed on a per-visit increment. The RN or APRN determines whether these services must be billed as direct nursing care or medication administration.

Providers of nursing services must follow the Texas BON guidelines for documenting the administration of medication.

**Nursing Services Procedure Codes**

| Procedure Code                | Individual or Group    | Unit of Service                      |
|-------------------------------|------------------------|--------------------------------------|
| T1002 with modifier TD        | Individual             | 15 minutes                           |
| T1002 with modifier TD and UD | Group                  | 15 minutes                           |
| T1002 with modifier U7        | Delegation, Individual | 15 minutes                           |
| T1002 with modifier U7 and UD | Delegation, Group      | 15 minutes                           |
| T1003 with modifier TE        | Individual             | 15 minutes                           |
| T1003 with modifier TE and UD | Group                  | 15 minutes                           |
| T1502 with modifier TE        | Unspecified            | Medication, administration per visit |

| Procedure Code         | Individual or Group | Unit of Service                                  |
|------------------------|---------------------|--------------------------------------------------|
| T1502 with modifier TD | Unspecified         | Medication administration, per visit             |
| T1502 with modifier U7 | Unspecified         | Delegation, medication administration, per visit |

**Referto:** Subsection 2.7.2.1, “Interim Claiming” in this handbook.

### Nursing Services Modifiers

| Modifier | Description                                   |
|----------|-----------------------------------------------|
| TD       | Nursing services provided by an RN or APRN    |
| TE       | Nursing services delivered by an LVN/LPN      |
| UD       | Nursing services delivered on a group basis   |
| U7       | Nursing services delivered through delegation |

The following 15-minute procedure codes for direct nursing services are limited to 16 combined units (four hours) per day:

| Procedure Codes        |                               |                        |                               |                        |                               |
|------------------------|-------------------------------|------------------------|-------------------------------|------------------------|-------------------------------|
| T1002 with modifier TD | T1002 with modifier TD and UD | T1002 with modifier U7 | T1002 with modifier U7 and UD | T1003 with modifier TE | T1003 with modifier TE and UD |

The following procedure codes are limited to a total of four combined medication administration visits per day:

| Procedure Codes        |                        |                        |
|------------------------|------------------------|------------------------|
| T1502 with modifier TD | T1502 with modifier U7 | T1502 with modifier TE |

All of the nursing services minutes that are delivered to a student during a calendar day must be added together before they are converted to units of service.

Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day.

### Nursing Services Modifiers

| Modifier | Description                                   |
|----------|-----------------------------------------------|
| TD       | Nursing services provided by an RN or APRN    |
| TE       | Nursing services delivered by an LVN/LPN      |
| U7       | Nursing services delivered through delegation |
| UD       | Nursing services delivered on a group basis   |

## 2.3.3 Occupational Therapy (OT) Services

OT evaluation services include determining what services, assistive technology, and environmental modifications a student requires for participation in the special education program.

Occupational therapy services include the following:

- Improving, developing, maintaining, or restoring functions impaired or lost through illness, injury, or deprivation.
- Improving the ability to perform tasks for independent functioning when functions are impaired or lost.
- Preventing, through early intervention, initial or further impairment or loss of function.

Occupational therapy uses purposeful activities to obtain or regain skills needed for activities of daily living (ADL) and/or functional skills needed for daily life lost through an acute medical condition, acute exacerbation of a medical condition, or chronic medical condition related to injury, disease, or other medical causes.

ADLs are basic self-care tasks such as feeding, bathing, dressing, toileting, grooming, and mobility.

A prescription is required for OT services. The prescription must be updated a minimum of one time every three calendar years.

Occupational therapy services must be prescribed by a physician or other eligible prescribing provider. A prescription for OT services must be signed and dated within three calendar years before the initiation of services.

OT services may be reimbursed up to (but not to exceed) the amount designated in the prescription.

In order for OT services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the prescribing licensed physician, or other eligible prescribing provider, must be listed on the claim and kept in the student's medical record.

IDEA requires that a student receiving SHARS services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate prescription is not required for a re-evaluation.

The need for a re-evaluation should be determined by the student's ARD committee.

The LEA must maintain the prescription in the student's medical record.

Occupational therapy must be provided by a professional who is licensed by the Texas Board of Occupational Therapy Examiners to provide OT within his or her licensed scope of practice. An occupational therapist assistant (OTA) must act under the supervision of a qualified occupational therapist.

Services provided by an unlicensed person acting under the supervision of a licensed occupational therapist are not a benefit of Texas Medicaid.

OT treatment may be provided in an individual or group setting.

OT evaluation is billable on an individual basis only.

If an evaluation is performed over several days, the provider must submit the same evaluation procedure code for each evaluation session. The procedure code submitted must reflect the complexity level of the entire evaluation.

The therapist who performs the evaluation should use professional clinical judgment to decide which evaluation code to use. The selection of low (procedure code 97165), moderate (procedure code 97166), or high complexity (procedure code 97167) evaluation codes must be based on professional clinical judgment and may not be made by staff other than the rendering therapist.

The occupational therapist or OTA can only bill for time spent with the student present, including time spent assisting the student with learning to use adaptive equipment and assistive technology.

Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time), report writing, and time spent manipulating or modifying the adaptive equipment is not billable.

### Occupational Therapy Services Procedure Codes

| Procedure Code                                  | Individual or Group | Provider                                | Unit of Service |
|-------------------------------------------------|---------------------|-----------------------------------------|-----------------|
| 97150 with modifier GO                          | Group               | Licensed occupational therapist         | 15 minutes      |
| 97150 with modifier GO and U1                   | Group               | Licensed occupational therapy assistant | 15 minutes      |
| 97165 (low), 97166 (moderate), and 97167 (high) | Individual          | Licensed occupational therapist         | 15 minutes      |
| 97530 with modifier GO                          | Individual          | Licensed occupational therapist         | 15 minutes      |
| 97530 with modifier GO and U1                   | Individual          | Licensed occupational therapy assistant | 15 minutes      |

**Referto:** Subsection 2.7.2.1, “Interim Claiming” in this handbook.

Session notes for procedure codes 97530 and 97150 (therapy services) are required.

**Referto:** Subsection 2.4, “Documentation Requirements” in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

Providers must use a 15-minute unit of service for billing.

The following direct therapy procedure codes must be billed in 15-minute increments and are limited to a combined total of 4 units (one hour) per day:

| Procedure Codes               |                               |
|-------------------------------|-------------------------------|
| 97150 with modifier GO        | 97530 with modifier GO        |
| 97150 with modifier GO and U1 | 97530 with modifier GO and U1 |

The maximum billable time for the following OT evaluation procedure codes is 12 units (three hours), which may be billed over several days within a 30-day period:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| 97165           | 97166 | 97167 |

### Occupational Therapy Modifiers

| Modifier  | Description                                                   |
|-----------|---------------------------------------------------------------|
| GO        | OT therapy, individual/group, by licensed therapist           |
| GO and U1 | OT therapy, individual/group, by licensed/certified assistant |

**Note:** OT services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.

**Referto:** Subsection 2.3.10, “Telehealth and Telemedicine Services” in this handbook for more information on SHARS telehealth services.

### 2.3.4 Personal Care Services

Personal care services (PCS) are medical support services provided to students who require assistance with activities of daily living (ADLs) and instrumental activities of daily living (IADLs) because of a physical, functional, cognitive, or behavioral limitation related to a student's disability or chronic health condition.

PCS are medically necessary only when the student's physical, functional, cognitive, or behavioral limitation related to the student's disability or chronic health condition inhibits the student's ability to accomplish ADLs or IADLs.

PCS are not educational in nature and may not be reimbursed for activities that teach the student academic or functional skills.

#### 2.3.4.1 \* PCS Provider Requirements

All PCS providers must:

- Be employed by or contracted with the local education agency (LEA).
- Meet the requirements of 42 CFR § 440.167.
- [Revised] Have demonstrated the understanding and competence necessary to perform the eligible PCS tasks required by a student's IEP, including written documentation procedures.

[Revised] PCS providers must understand and be competent to perform PCS in the following two competence areas:

- Appropriate techniques for assisting with ADLs and IADLs, including basic body mechanics, mobility, and techniques for transferring students.
- The needs of students with disabilities, including appropriate techniques for managing adverse behaviors of the student and communicating with students with communication or sensory impairments.

The LEA may use the following methods to determine whether an individual is qualified to perform PCS in the two competence areas:

- A review of the individual's education, related certification, or related training
- [Revised] An evaluation from one or more qualified employees of the LEA verifying competence, which may additionally consider work experience, evaluations from other qualified employees of the LEA, and on-site demonstration.

The LEA may provide training to develop understanding and competence if the individual lacks understanding and competence in an area of PCS.

[Revised] LEAs must document the PCS provider's ability to perform assistance generally with ADLs and IADLs for students enrolled in special education. In a centralized location, the LEA must keep a statement that is signed and dated by a qualified employee of the LEA, that the individual is able to perform PCS tasks under the direction of a qualified employee of the LEA.

[Revised] For the purposes of verifying PCS provider qualifications, a qualified employee of the LEA is defined as:

- [Revised] An individual with current special education teacher certification under 19 TAC §233.8 whose work responsibilities include working with PCS providers; or
- [Revised] An individual whose primary work responsibilities include supervising, training, and confirming the qualifications of PCS providers; or
- [Revised] A licensed health care practitioner eligible to provide reimbursable services under a SHARS benefit other than PCS.

A prescription is not needed to provide PCS through SHARS.

### 2.3.4.2 Activities Eligible for PCS

PCS facilitate the completion of ADLs and IADLs through direct intervention or indirect intervention, which includes but is not limited to the following:

- Hands-on assistance
- Performing the tasks for the student
- Cueing or redirecting the student to perform a task

PCS are not intended to teach the student how to independently perform the task.

For the purposes of reimbursement, activities eligible for personal care services are limited to the ADLs and IADLs listed in this section. ADLs are activities that are essential to daily self-care. IADLs are activities related to living independently in the community.

**Note:** *Health Maintenance Activities (HMAs) and nurse-delegated tasks, as defined by 22 TAC §225.4, should be considered Nursing Services and may only be billed under PCS if the task is listed as an ADL or IADL.*

For the purposes of reimbursement, the activities that are eligible for PCS are limited to the following ADLs and IADLs. ADLs are activities that are essential to daily self-care. IADLs are activities related to living independently in the community.

| ADLs                   | Description                                                                                                                                                                                                                                                                                                         |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Bathing                | Assisting the student with any or all parts of bathing, including selecting appropriate water temperature and flow speed; turning water on and off; laying out and putting away supplies; transferring in and out of the bathtub or shower; washing and drying hair and body; and clean-up after task is completed  |
| Dressing               | Assisting the student with any or all parts of getting dressed, including putting on, fastening, and taking off all items of clothing; donning and removing shoes or prostheses; and choosing and laying out weather-appropriate clothing                                                                           |
| Eating                 | Assisting the student with some or all parts of eating and drinking, including feeding the student; assistance with utensils or special or adaptive eating devices; and clean-up after task is completed.                                                                                                           |
| Locomotion or mobility | Assisting the student with moving between locations, including assisting the student with walking or using a wheelchair, walker, or other mobility equipment                                                                                                                                                        |
| Personal hygiene       | Assisting the student with some or all parts of personal hygiene, including routine hair care; oral care; ear care; shaving; applying makeup; managing feminine hygiene; washing and drying face, hands, and perineum; basic nail care; applying deodorant; routine skin care; and clean-up after task is completed |

| ADLs         | Description                                                                                                                                                                                                                                                            |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Positioning  | Assisting the student with positioning their body while in a chair, bed, or other piece of furniture or equipment, including changing and adjusting positions; moving to or from a sitting position; turning side-to-side; and assisting the student to sit upright    |
| Toileting    | Assisting the student with some or all parts of toileting, including using a commode, bedpan, urinal, or toilet chair; transferring on and off; cleansing; changing diapers, pads, and incontinence supplies; adjusting clothing; and clean-up after task is completed |
| Transferring | Assisting the student with moving from one surface to another with or without a sliding board, including moving from a bed, chair, wheelchair, or vehicle to a new surface; moving to or from a standing or sitting position; and moving the student with lift devices |

| IADLs                                | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Escort                               | Assisting the student in making transportation arrangements for medical and other appointments; accompanying the student to a SHARS-eligible service or health care appointment on or off campus to assist with needed ADLs or with carrying equipment (feeding pump, oxygen tank, etc.) or other necessary supplies; accompanying the student between locations to facilitate assistance with needed ADLs or assistance with carrying equipment or other necessary supplies. Escort includes monitoring a student's behaviors that create an unsafe situation for the student, such as removing a seatbelt, attempting to open the vehicle door while the vehicle is in motion, or elopement. Escort duration includes the entire time that the PCS provider accompanies the student during a SHARS-eligible service or health care service on or off campus. |
| Meal preparation                     | Assisting the student in preparing meals and snacks, including cooking; assembling ingredients; cutting, chopping, grinding, or pureeing food; setting out food and utensils; serving food; preparing and pouring a predetermined amount of liquid nutrition; cleaning the feeding tube; cleaning the area after a meal; and washing dishes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Medication assistance                | Assisting the student with oral medications that are normally self-administered                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Money management                     | Assisting the student with managing their day-to-day finances, including paying bills and adhering to a budget                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Telephone use or other communication | Assisting the student in making or receiving telephone calls, managing, and setting up communication devices, and sending and receiving communication for the student                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

**Note:** For students receiving services in a school-based residential program managed by the LEA, the LEA may be reimbursed for the additional ADLs and IADLs listed in subsection 2.12.2, "Services, Benefits, and Limitations," in the *Children's Services Handbook* (Vol. 2, *Provider Handbooks*), as appropriate.

PCS does not include the following:

- ADLs or IADLs that a typically developing child of the same chronological age could not safely and independently perform without adult supervision
- Services that provide direct intervention when the student has the physical, behavioral, and cognitive abilities to perform the ADL or IADL without adult supervision
- Services used for or intended to provide respite care, childcare, or restraint of a student
- Stand-by supervision related to safety
- Teaching a life skills or vocational curriculum
- Services delivered solely for the purpose of education, such as reading, English, language arts, writing, mathematics, science, social studies, physical education, functional curriculum, or electives
- Orientation and mobility or sign language interpretive services

- Any form of assistance that does not facilitate the above-listed ADLs and IADLs. Supervision, monitoring, cueing, and redirection are not independently considered ADLs or IADLs, but may be used to facilitate the completion of ADLs and IADLs.

PCS may be billed simultaneously with another SHARS-eligible service if the student is receiving assistance with ADLs and IADLs from a PCS provider while receiving the SHARS-eligible service from another provider.

PCS may not be billed for activities that are encompassed in the other SHARS-eligible service being provided by the same provider.

Only the time spent on authorized PCS tasks for each student is eligible for reimbursement.

For PCS services to be reimbursed they must be listed in the student's IEP.

If PCS are provided on the bus, documentation of the type of personal care service that was performed must be included on service logs. Personal care services provided on a bus shall not be provided by a bus monitor, bus aide, or transportation aide.

PCS may be provided in a group setting. A provider may perform PCS for more than one student over the span of the day as long as each student's care is based on their IEP and needs. The time the provider is assisting one student must not overlap with the time the provider is working with another student. PCS must be provided to one student at a time but may be provided to multiple students sequentially.

#### Personal Care Services Procedure Codes

| Procedure Code         | Setting            | Unit of Service  |
|------------------------|--------------------|------------------|
| T1019 with modifier U5 | Individual, School | 15 minutes       |
| T1019 with modifier U6 | Individual, Bus    | Per one-way trip |

**Referto:** Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Procedure code T1019 with modifier U6 may not be billed more than a total of four one-way trips per day.

#### Personal Care Services Modifiers

| Modifier | Description                                                    |
|----------|----------------------------------------------------------------|
| U5       | Personal care services in school, individual                   |
| U6       | Personal care services on the bus, individual per one-way trip |

### 2.3.5 Physical Therapy (PT) Services

Physical therapy services include, but are not limited to, the following:

- Rehabilitative treatment concerned with restoring function or preventing disability caused by illness, injury, or birth defect
- Evaluation of the purpose of determining the nature, extent, and degree of the need for physical therapy services
- Physical therapy services provided for the purpose of preventing or alleviating movement dysfunction and related functional problems
- A PT evaluation includes evaluating the student's ability to move throughout the school and participate in classroom activities and the identification of movement dysfunction and related functional problems.

A prescription is required for PT services. The prescription must be updated a minimum of one time every three calendar years.

Physical therapy services must be prescribed by a physician or other eligible prescribing provider. A prescription for PT services must be signed and dated within three calendar years before the initiation of services.

PT services may be reimbursed up to (but not to exceed) the amount designated in the prescription.

In order for PT services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the licensed physician, or other eligible prescribing provider, must be listed on the claim and kept in the student's medical record.

IDEA requires that a student receiving SHARS services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate prescription is not required for a re-evaluation.

The need for a re-evaluation should be determined by the student's ARD committee.

The LEA must maintain the prescription in the student's medical record.

Physical therapy must be provided by a professional who is licensed by the Texas Board of Physical Therapy Examiners to provide PT within his or her licensed scope of practice. A licensed physical therapist assistant (PTA) must act under the supervision of a licensed physical therapist.

Services provided by an unlicensed person acting under the supervision of a licensed physical therapist is not a benefit under Texas Medicaid.

If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed therapist, the services cannot be regarded as skilled therapy.

PT evaluation is billable on an individual basis only. Procedure codes 97161, 97162, and 97163 may be submitted for initial evaluations and re-evaluations.

If an evaluation is performed over several days, the provider must submit the same evaluation procedure code for each evaluation session. The procedure code submitted must reflect the complexity level of the entire evaluation.

The physical therapist who performs the evaluation should use professional clinical judgment to decide which evaluation code to use. The selection of low (procedure code 97161), moderate (procedure code 97162), or high complexity (procedure code 97163) evaluation codes must be based on professional clinical judgment and may not be made by staff other than the rendering therapist.

The physical therapist can only bill time spent with the student present, including time spent helping the student to use adaptive equipment and assistive technology.

Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time) and report writing, is not billable.

### Physical Therapy Services Procedure Codes

| Procedure Code                | Individual or Group | Provider                            | Unit of Service |
|-------------------------------|---------------------|-------------------------------------|-----------------|
| 97110 with modifier GP        | Individual          | Licensed physical therapist         | 15 minutes      |
| 97110 with modifier GP and U1 | Individual          | Licensed physical therapy assistant | 15 minutes      |
| 97150 with modifier GP        | Group               | Licensed physical therapist         | 15 minutes      |

| Procedure Code                                  | Individual or Group | Provider                            | Unit of Service |
|-------------------------------------------------|---------------------|-------------------------------------|-----------------|
| 97150 with modifier GP and U1                   | Group               | Licensed physical therapy assistant | 15 minutes      |
| 97161 (low), 97162 (moderate), and 97163 (high) | Individual          | Licensed physical therapist         | 15 minutes      |

**Referto:** Subsection 2.7.2.1, “Interim Claiming” in this handbook.

Session notes for procedure codes 97110 and 97150 (therapy services) are required.

**Referto:** Subsection 2.4, “Documentation Requirements” in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

The following direct therapy procedure codes must be billed in 15-minute increments and are limited to a combined total of 4 units (one hour) per day

| Procedure Codes               |                               |
|-------------------------------|-------------------------------|
| 97110 with modifier GP        | 97150 with modifier GP        |
| 97110 with modifier GP and U1 | 97150 with modifier GP and U1 |

The maximum billable time for the following PT evaluation procedure codes is 12 units (three hours), which may be billed over several days within a 30-day period:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| 97161           | 97162 | 97163 |

### Physical Therapy Modifiers

| Modifier  | Description                                                   |
|-----------|---------------------------------------------------------------|
| GP        | PT therapy, individual/group, by licensed therapist           |
| GP and U1 | PT therapy, individual/group, by licensed/certified assistant |

**Note:** PT services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.

**Referto:** Subsection 2.3.10, “Telehealth and Telemedicine Services” in this handbook for more information on SHARS telehealth services.

## 2.3.6 Physician Services

Physician services include diagnostic and evaluation services to determine a child’s medically related disabling condition that results in the child’s need for services in the school setting.

Physicians are responsible for writing prescriptions for students that require PT or OT services.

In the school setting, speech therapy, and audiology services may be referred by either a physician or other eligible referring provider within the scope of his or her practice under state law in accordance with 42 CFR §440.110(c).

Physician services must be provided by a licensed physician Doctor of Medicine (M.D.) or Doctor of Osteopathic Medicine (D.O.).

Physician services may also be provided by an APRN under the delegation of a physician, or a PA under the delegation of a physician.

The following are billable physician services and must be provided on an individual basis:

- The diagnosis or evaluation time spent with the student present.
- The time spent without the student present reviewing the student's records for writing a prescription or referral for specific SHARS services.
- The diagnosis or evaluation time spent with the student present, or the time spent without the student present reviewing the student's records for the evaluation of the sufficiency of an ongoing SHARS service to see whether any changes are needed in the current prescription or referral for that service.
- When reviewing the student's records, the provider must use professional judgment to determine whether or not the student needs to be seen in person.

Procedure code T1023 is limited to 1 unit of service per day.

**Referto:** Subsection 2.7.2.1, "Interim Claiming" in this handbook.

SHARS physician services are billable only when they are provided on an individual basis.

**Note:** *Physician services delivered via telemedicine are a benefit of the SHARS program under Texas Medicaid.*

**Referto:** Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telemedicine services.

## **2.3.7 Psychological Testing and Counseling/Psychological Services**

### **2.3.7.1 Psychological Testing**

Psychological Testing Services include the following activities:

- Administering psychological tests and other assessment procedures and interpreting testing and assessment results
- Obtaining, integrating, and interpreting information about a student's behavior and conditions related to learning and functional needs, planning, and managing a program of psychological services
- Evaluating a student for the purpose of determining the student's eligibility for specific psychological, health or related services, the needs for specific SHARS services, and the development or revision of IEP goals and objectives
- Assessing the effectiveness of the delivered services on achieving the goals and objectives of the student's IEP

Billable time includes the following:

- Psychological, educational, or intellectual testing time spent with the student present
- Necessary observation of the student associated with testing
- A parent or teacher consultation with the student present that is required during the assessment because a student is unable to communicate or perform certain activities
- Test interpretation and report writing

Psychological testing is billable if it leads to the creation of an IEP for a student with disabilities who is eligible for Medicaid and who is 20 years of age or younger, whether or not the IEP includes SHARS.

An assessment write-up during an ARD meeting is billable, however, participation in the ARD meeting itself is not billable under SHARS.

Psychological testing (procedure codes 96130 and 96131) must be provided by a professional who is a licensed specialist in school psychology (LSSP), a licensed psychologist, or a licensed psychiatrist in accordance with 19 TAC 89.1040(b)(1) and 42 CFR 440.60(a).

A prescription is not needed to provide psychological testing through SHARS.

When billing, minutes of psychological testing are not accumulated over multiple days. Psychological testing can only be billed based on accumulated time per calendar day.

The following one-hour procedure codes are limited to eight hours (8 units) over a 30-day period:

| Procedure Code | Unit of Service      |
|----------------|----------------------|
| 96130          | Initial (1 hour)     |
| 96131          | Each additional hour |

**Important:** One unit (1.0) is equivalent to one hour or 60 minutes. Providers may bill in partial hours, expressed as 1/10th of an hour (six-minute segments). For example, express 30 minutes as a billed quantity of 0.5.

**Referto:** Subsection 2.7.2.1, “Interim Claiming” in this handbook.

Time spent for the interpretation of testing results without the student present is billable time.

**2.3.7.2 Counseling Services**

Counseling services include, but are not limited to, the following:

- Assisting the child or parents in understanding the nature of the child’s disability
- Assisting the child or parents in understanding the special needs of the child
- Assisting the child or parents in understanding the child’s development
- Assisting to identify the psychological, behavioral, emotional, cognitive, and social factors that are important to the prevention, treatment, or management of physical health problems
- Assessing the need for specific counseling services
- To help a child with a disability benefit from special education

Counseling services must be provided by one of the following:

- Licensed Clinical Social Worker (LCSW)
- Licensed Marriage and Family Therapist (LMFT)
- Licensed Professional Counselor (LPC)
- Counseling services may also be delivered by a psychologist, psychiatrist, or a licensed psychological associate.

**Note:** Medicaid does not allow services delivered by LPC, LCSW, or LMFT interns to be billed under SHARS.

A prescription is not needed to provide counseling services through SHARS.

LEAs may receive reimbursement for emergency counseling services if the student’s IEP includes a behavior improvement plan (BIP) that documents the need for emergency services.

Health and Behavior Assessment and Intervention (HBAI) services are designed to identify the psychological, behavioral, emotional, cognitive, and social factors important to prevention, treatment, or management of physical health symptoms.

The following HBAI procedure codes (96158, 96159, 96164, and 96165) are limited to three units (one hour) per day, cumulative between procedure codes (initial procedure code plus two additional 15 minutes), same procedure, same provider:

- The initial 30 minutes (procedure codes 96158 and 96164) are limited to one unit per day.
- Each additional 15 minutes (procedure codes 96159 and 96165) are limited to two units per day.

| Procedure Code                                 | Individual or Group | Unit of Service | Provider Type   |
|------------------------------------------------|---------------------|-----------------|-----------------|
| 96158 with modifier UB                         | Individual          | 30 minutes      | LPC, LCSW, LMFT |
| 96159 with modifier UB (add-on procedure code) | Individual          | 15 minutes      | LPC, LCSW, LMFT |
| 96164 with modifier UB                         | Group               | 30 minutes      | LPC, LCSW, LMFT |
| 96165 with modifier UB (add-on procedure code) | Group               | 15 minutes      | LPC, LCSW, LMFT |

Individual psychotherapy is defined as therapy that focuses on a single person.

The following individual psychotherapy procedure codes (90832, 90834, and 90837) are limited to two services per day, same procedure, same provider, and will be denied as follows:

- Procedure codes 90834 and 90837 will be denied if submitted on the same day as procedure code 90832.
- Procedure codes 90832 and 90837 will be denied if submitted on the same day as procedure code 90834.
- Procedure codes 90832 and 90834 will be denied if submitted on the same day as procedure code 90837.

| Procedure Code         | Individual or Group | Unit of Service | Provider Type   |
|------------------------|---------------------|-----------------|-----------------|
| 90832 with modifier UB | Individual          | 30 minutes      | LPC, LCSW, LMFT |
| 90834 with modifier UB | Individual          | 45 minutes      | LPC, LCSW, LMFT |
| 90837 with modifier UB | Individual          | 60 minutes      | LPC, LCSW, LMFT |

Group psychotherapy is a type of psychotherapy that involves one or more therapists working with several clients at the same time.

Group psychotherapy (procedure code 90853) is limited to one service per day, same procedure, same provider.

Procedure codes 90832, 90834, and 90837 will be denied if submitted on the same day as 90853.

| Procedure Code         | Individual or Group | Unit of Service                  | Provider Type   |
|------------------------|---------------------|----------------------------------|-----------------|
| 90853 with modifier UB | Group               | Untimed, one per date of service | LPC, LCSW, LMFT |

Session notes are required for all counseling services.

**Referto:** Subsection 2.4, “Documentation Requirements” in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

**Counseling Services Delivered by Licensed/Certified Therapist Modifier**

| Modifier | Description                                               |
|----------|-----------------------------------------------------------|
| UB       | Counseling services, individual/group, by LPC, LCSW, LMFT |

**Note:** Counseling services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.

**Referto:** Subsection 2.3.10, “Telehealth and Telemedicine Services” in this handbook for more information on SHARS telehealth services.

**2.3.7.3 Psychological Services**

Psychological services are counseling services provided to help a child with a disability benefit from special education and must be listed in the IEP.

Psychological services must be provided by a licensed psychiatrist, a licensed psychologist, or an LSSP.

LEAs may contract for specific types of psychological services, such as clinical psychology, counseling psychology, neuropsychology, and family therapy, that are not readily available from the LSSP who is employed by the LEA. 22 TAC §465.38 (Psychological Services for Schools) does not prohibit public schools from contracting with licensed psychologists, licensed psychological associates, and provisionally licensed psychologists who are not LSSPs to provide psychological services, other than school psychology, in their areas of competency. Such contracting must be on a short-term or part-time basis and cannot involve the broad range of school psychological services listed in 22 TAC §465.38(b)(1).

LEAs may receive reimbursement for emergency psychological services if the student’s IEP includes a behavior improvement plan that documents the need for the emergency services. These services may exceed the one-hour daily limit.

HBAI services are designed to identify the psychological, behavioral, emotional, cognitive, and social factors important to prevention, treatment, or management of physical health symptoms.

The following HBAI procedure codes (96158, 96159, 96164, and 96165) are limited to three units (one hour) per day, cumulative between procedure codes (initial procedure code plus two additional 15 minutes) same procedure, same provider, for non-emergency situations:

- The initial 30 minutes (procedure codes 96158 and 96164) are limited to one unit per day.
- Each additional 15 minutes (procedure codes 96159 and 96165) are limited to two units per day.

| Procedure Code                                    | Individual or Group | Unit of Service | Provider Type                                            |
|---------------------------------------------------|---------------------|-----------------|----------------------------------------------------------|
| 96158 with modifier AH                            | Individual          | 30 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |
| 96159 with modifier AH<br>(add-on procedure code) | Individual          | 15 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |
| 96164 with modifier AH                            | Group               | 30 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |
| 96165 with modifier AH<br>(add-on procedure code) | Group               | 15 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |

Individual psychotherapy is defined as therapy that focuses on a single person.

The following individual psychotherapy procedure codes (90832, 90834, and 90837) are limited to two services per day, same procedure, same provider, and will be denied as follows:

- Procedure codes 90834 and 90837 will be denied if submitted on the same day as 90832.
- Procedure codes 90832 and 90837 will be denied if submitted on the same day as 90834.
- Procedure codes 90832 and 90834 will be denied if submitted on the same day as 90837.

| Procedure Code         | Individual or Group | Unit of Service | Provider Type                                            |
|------------------------|---------------------|-----------------|----------------------------------------------------------|
| 90832 with modifier AH | Individual          | 30 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |
| 90834 with modifier AH | Individual          | 45 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |
| 90837 with modifier AH | Individual          | 60 minutes      | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |

Group psychotherapy is a type of psychotherapy that involves one or more therapists working with several clients at the same time.

Group psychotherapy (procedure code 90853) is limited to one service per day, same procedure, same provider.

Procedure codes 90832, 90834, and 90837 will be denied if submitted on the same day as procedure code 90853.

| Procedure Code         | Individual or Group | Unit of Service                     | Provider Type                                            |
|------------------------|---------------------|-------------------------------------|----------------------------------------------------------|
| 90853 with modifier AH | Group               | Untimed, one per date<br>of service | Licensed psychiatrist,<br>Licensed psychologist,<br>LSSP |

Session notes are required for all psychological services.

**Referto:** Subsection 2.4, “Documentation Requirements” in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

**Note:** *Psychological services delivered via telehealth or telemedicine are a benefit of the SHARS program under Texas Medicaid.*

**Referto:** Subsection 2.3.10, “Telehealth and Telemedicine Services” in this handbook for more information on SHARS telehealth and telemedicine services.

### 2.3.8 Special Transportation Services

Transportation services in a school setting may be reimbursed when they are provided on a specially adapted vehicle and if the following criteria are met:

- Provided to or from a Medicaid-covered service on the day for which the claim is made
- A child requires transportation in a specially adapted vehicle to serve the needs of the disabled
- A child resides in an area that does not have school bus transportation, such as those in close proximity to a school
- The Medicaid services covered by SHARS are included in the student’s IEP

- The special transportation service is included in the student's IEP

Transportation services are provided on a specially adapted school bus to or from the location where the school-based service is provided.

A specially adapted vehicle is one that has been physically modified (e.g., addition of a wheelchair lift, addition of harnesses, or addition of child protective seating).

If an LEA already provides a modification for all students, then the modification is not considered a special adaptation.

Bus monitor or other personnel accompanying children on the bus is not considered an allowable special adaptive enhancement for Medicaid reimbursement under SHARS specialized transportation.

The student's IEP must document the need for transportation to be provided on a specially adapted vehicle.

Specialized transportation services reimbursable under SHARS requires the Medicaid enrolled special education student has the following documented in his or her IEP:

- The student requires a specific physical adaptation or adaptations of a vehicle in order to be transported
- The reason the student needs the specialized transportation

If a SHARS student rides the regular school bus to and from school with other nondisabled students, then that student is not required to have specialized transportation services listed in their IEP.

The cost of the regular school bus ride cannot be billed to SHARS.

The fact that a child may receive a service through SHARS does not necessarily mean that transportation services may be reimbursable.

Reimbursement for covered transportation services is on a per-student one-way trip basis. If the student receives a billable SHARS service (including personal care services on the bus) and is transported on the school's specially adapted vehicle, the following one-way trips may be billed:

- From the student's residence to school
- From the school to the student's residence
- From the student's residence to a provider's office that is contracted with the LEA
- From a provider's office that is contracted with the LEA to the student's residence
- From the school to a provider's office that is contracted with the LEA
- From a provider's office that is contracted with the LEA to the student's school
- From the school to another campus to receive a billable SHARS service
- From the campus where the student received a billable SHARS service back to the student's school

Covered transportation services from a child's residence to school and return are not reimbursable if, on the day the child is transported, the child does not receive Medicaid services covered by SHARS (other than transportation). This service must not be billed by default simply because the student is transported on a specially adapted bus.

Transportation services procedure code T2003 is limited to a total of four one-way trips per day.

### **2.3.8.1 Documentation for Special Transportation Services**

Documentation of each one-way trip provided must be maintained by the LEA (e.g., trip log).

Trip logs must be maintained daily to record one-way specialized transportation trips. This documentation must also include the number of one-way trips per day and the time for each trip (can be indicated using AM/PM).

At a minimum, trip logs must also include the following:

- Name of the LEA
- Route name or number
- Bus driver's name
- Dates of service and indicate day of the week
- If a service is not provided on a school day, Monday–Friday, mark the student as absent
- Copy of the school district's calendar (to be submitted once during the annual desk review)
- Student's full name and Medicaid number

**Note:** *If the Medicaid number is not in the log, a separate ledger detailing student name, date of birth, and Medicaid status and number must be provided.*

- Dated signature of the bus driver

**Note:** *Dated signatures should be captured after all trips have been documented.*

LEAs must adhere to all HIPAA and FERPA guidelines when documenting and submitting special transportation logs.

### **2.3.9 Speech and Language Services**

Speech and language services include, but are not limited to, the following:

- Identification of students with speech or language disorders
- Diagnosis and appraisal of specific speech or language disorders
- Referral for medical or other professional attention necessary for the habilitation of speech or language disorders
- Provision of speech or language services for the habilitation or prevention of communicative disorders.

Speech and language services must be delivered by a qualified speech-language pathologist (SLP) holding an unrestricted Texas state license to provide services independently.

Speech and language services may also be delivered by a licensed SLP intern acting under the supervision and direction of a licensed SLP, or a licensed assistant in speech-language pathology acting under the supervision and direction of a licensed SLP.

A referral is required for ST services. The referral must be updated a minimum of one time every three calendar years.

The LEA must maintain the referral in the student's medical record.

Speech and language services must be referred by a physician or other eligible referring provider. A referral for speech therapy services must be signed and dated within three calendar years before the initiation of services.

In order for ST services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the referring licensed physician, or other eligible referring provider, must be listed on the claim and kept in the medical record.

Within SHARS, Medicaid-enrolled SLPs who may practice independently may refer for their own services or those of another SHARS provider of the same discipline. They may not refer for any services outside of SHARS or for other SHARS services of other disciplines.

A speech evaluation that documents the medical necessity for speech therapy may serve as the referral.

SHARS SLPs whose evaluations serve as the referral must be enrolled in Texas Medicaid as either individual practitioners or ordering, referring, or prescribing (ORP) providers. When submitting claims for SHARS audiology services, LEAs must include the referring provider's NPI in the referring provider NPI field of the claim form.

IDEA requires that a student receiving SHARS services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate referral is not required for a re-evaluation. The need for a re-evaluation should be determined by the student's ARD committee.

### 2.3.9.1 Supervision Requirements for SLPs

A supervisor of an intern or assistant shall:

- Ensure that all services provided are in compliance with 16 TAC §111.154 and current state licensure

A supervisor of an assistant shall:

- Be responsible for evaluations, interpretation, and case management
- Not designate anyone other than a licensed speech-language pathologist or intern in speech-language pathology to represent speech-language pathology to an Admission, Review, and Dismissal (ARD) meetings, except as provided by 16 TAC §111.51 and §111.52.

A licensed intern or assistant shall abide by the decisions made by his or her supervisor relating to the intern's or assistant's practice and duties. If the supervisor requests that the intern or assistant violate this policy, the Act, or any other law, the intern or assistant shall refuse to do so and immediately notify the Texas Department of Licensing and Regulation (TDLR) and any other appropriate authority.

The SLP who provides the direction must ensure that the personnel who carry out the directives meet the minimum qualifications set forth in the rules of the TDLR that relate to licensed interns or assistants in speech-language pathology.

### Speech Therapy Services Procedure Codes

| Procedure Code                                 | Individual or Group | Provider                           | Unit of Service |
|------------------------------------------------|---------------------|------------------------------------|-----------------|
| 92507 with modifier GN and U8                  | Individual          | Licensed speech-language therapist | Untimed         |
| 92507 with modifier GN and U1                  | Individual          | Licensed speech-language assistant | Untimed         |
| 92508 with modifier GN and U8                  | Group               | Licensed speech-language therapist | Untimed         |
| 92508 with modifier GN and U1                  | Group               | Licensed speech-language assistant | Untimed         |
| 92521, 92522, 92523, or 92524 with modifier GN | Individual          | Licensed speech-language therapist | 15 minutes      |

**Referto:** Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Session notes are required for procedure codes 92507 and 92508.

**Referto:** Subsection 2.4, “Documentation Requirements” in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

ST evaluation (procedure codes 92521, 92522, 92523, and 92524) is billable on an individual basis only. ST is billable on an individual (procedure code 92507) or group (procedure code 92508) basis.

The maximum billable time for ST evaluation procedure codes 92521, 92522, 92523, and 92524 with modifier GN is 12 units (three hours), which may be billed over several days, within a 30-day period.

Speech evaluation (procedure codes 92521, 92522, and 92523, and 92524) will be denied if submitted on the same date of service as speech therapy (procedure codes 92507 and 92508).

Procedure code 92522 will be denied if submitted on the same date of service as procedure code 92523.

Procedure code 92523 will be denied if submitted on the same date of service as procedure code 92522.

Providers can only bill time spent with the student present, including assisting the student with learning to use adaptive equipment and assistive technology.

Time spent without the student present, such as report writing and training teachers or aides to work with the student (unless the student is present during training), is not billable.

The following direct therapy procedure codes are limited to a total of one unit per day:

| Procedure Codes               |                               |
|-------------------------------|-------------------------------|
| 92507 with modifier GN and U8 | 92508 with modifier GN and U8 |
| 92507 with modifier GN and U1 | 92508 with modifier GN and U1 |

### Speech Therapy Modifiers

| Modifier  | Description                                                                            |
|-----------|----------------------------------------------------------------------------------------|
| GN        | SLP evaluation by licensed speech-language therapist                                   |
| GN and U1 | SLP therapy, individual/group, by licensed/certified speech-language therapy assistant |
| GN and U8 | SLP therapy, individual/group, by licensed speech-language therapist                   |

**Note:** ST services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.

**Referto:** Subsection 2.3.10, “Telehealth and Telemedicine Services” in this handbook for more information on SHARS telehealth services.

### 2.3.10 Telehealth and Telemedicine Services

LEAs that participate in the SHARS program may be reimbursed for telehealth and telemedicine services delivered to children in school-based settings, or while receiving remote instruction.

A school-based setting is defined in Texas Government Code §548.0203 as a school district or an open enrollment charter school.

Remote instruction is defined according to requirements set forth by TEA and includes technology-based learning in home or community-based settings.

Providers may be reimbursed for telehealth and telemedicine services delivered to children in school-based settings, or while learning remotely with the following criteria:

- Reimbursement for providers is only available when the patient site is a school, home, or community-based setting.

- A patient site is the physical location of the student while the service is being rendered.
- Reimbursement for providers is only available when the distant site is a school or office-based setting.
- A distant site is the physical location of the Texas Medicaid provider rendering the service.
- A telehealth or telemedicine visit may not be conducted if the provider and student are both physically located at the same school at the time the services are rendered.
- All medical necessity criteria for in-person services apply when services are delivered to children in school-based settings.

Providers must be able to defer to the needs of the student receiving services, allowing the mode of service delivery (synchronous audiovisual, synchronous telephone (audio-only), or in-person) to be accessible.

Providers should obtain informed consent for treatment from the student's parent or legal guardian and the student prior to rendering a telehealth or telemedicine service. Verbal consent is permissible and should be documented in the student's medical record.

Services delivered by synchronous audiovisual or synchronous telephone (audio-only) technology may require participation of a parent or caregiver to assist with the treatment.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law.

A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for additional information about telehealth or telemedicine and informed consent. All telehealth or telemedicine services must adhere to documentation, privacy, and security requirements as outlined in this handbook and those in the *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)*.

### 2.3.10.1 Telehealth Services

Telehealth services are a benefit of Texas Medicaid and SHARS. Telehealth services has the meaning assigned by Texas Occupations Code (TOC) §111.001. Telehealth services are defined as healthcare services, other than telemedicine medical services or a teledentistry service, delivered by a health professional licensed, certified, or otherwise entitled to practice in Texas and acting within the scope of the health professional's license, certification, or entitlement to a patient at a different physical location than the health professional using telecommunications or information technology.

Telehealth services must be provided in compliance with standards established by the respective licensing or certifying board of the professional providing the services.

LEAs that participate in the SHARS program may be reimbursed for telehealth occupational therapy (OT), physical therapy (PT), speech therapy (ST), counseling, and psychological services.

All other reimbursement and billing guidelines that are applicable to in-person services will also apply when OT, PT, ST, counseling, and psychological services are delivered as telehealth services.

OT, PT, ST, counseling, and psychological telehealth services provided by LEAs during school hours through SHARS may be delivered via synchronous audiovisual technologies.

Synchronous audiovisual technology is defined as an interactive, two-way audio and video telecommunications platform that meets the privacy requirements of HIPAA.

Counseling and psychological telehealth services provided by LEAs during school hours through SHARS may also be delivered via synchronous telephone (audio-only) technologies.

Synchronous telephone (audio-only) technology is defined as an interactive, two-way audio telecommunications platform, including telephone technology, that uses only sound and meets the privacy requirements of HIPAA.

### **Synchronous Audiovisual Technology**

The following procedure codes may be provided to children eligible through SHARS as telehealth services via synchronous audiovisual technology if clinically appropriate (as determined by the treating provider), safe and agreed to by the student receiving services.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telehealth services provided by synchronous audiovisual technology must be billed using modifier 95.

The following procedure codes must be billed for telehealth services delivered via synchronous audiovisual technology:

| <b>Procedure Code</b>                                 | <b>Individual or Group</b> | <b>Unit of Service</b>           | <b>Provider</b>             |
|-------------------------------------------------------|----------------------------|----------------------------------|-----------------------------|
| 90832 with modifier UB and 95                         | Individual                 | 30 minutes                       | LPC, LCSW, LMFT             |
| 90832 with modifier AH and 95                         | Individual                 | 30 minutes                       | Licensed psychologist, LSSP |
| 90834 with modifier AH and 95                         | Individual                 | 45 minutes                       | Licensed psychologist, LSSP |
| 90834 with modifier UB and 95                         | Individual                 | 45 minutes                       | LPC, LCSW, LMFT             |
| 90837 with modifier AH and 95                         | Individual                 | 60 minutes                       | Licensed psychologist, LSSP |
| 90837 with modifier UB and 95                         | Individual                 | 60 minutes                       | LPC, LCSW, LMFT             |
| 90853 with modifier AH and 95                         | Group                      | Untimed, one per date of service | Licensed psychologist, LSSP |
| 90853 with modifier UB and 95                         | Group                      | Untimed, one per date of service | LPC, LCSW, LMFT             |
| 92507 with modifier GN, U8, and 95                    | Individual                 | Untimed, one per date of service | Licensed speech therapist   |
| 92507 with modifier GN, U1, and 95                    | Individual                 | Untimed, one per date of service | Licensed speech assistant   |
| 92508 with modifier GN, U8, and 95                    | Group                      | Untimed, one per date of service | Licensed speech therapist   |
| 92508 with modifier GN, U1, and 95                    | Group                      | Untimed, one per date of service | Licensed speech assistant   |
| 92521, 92522, 92523, or 92524 with modifier GN and 95 | Individual                 | 15 minutes                       | Licensed speech therapist   |
| 96158 with modifier AH and 95                         | Individual                 | 30 minutes                       | Licensed psychologist, LSSP |
| 96158 with modifier UB and 95                         | Individual                 | 30 minutes                       | LPC, LCSW, LMFT             |

| Procedure Code                                                   | Individual or Group | Unit of Service | Provider                                  |
|------------------------------------------------------------------|---------------------|-----------------|-------------------------------------------|
| 96159 with modifier AH and 95 (add-on procedure code)            | Individual          | 15 minutes      | Licensed psychologist, LSSP               |
| 96159 with modifier UB and 95 (add-on procedure code)            | Individual          | 15 minutes      | LPC, LCSW, LMFT                           |
| 96164 with modifier AH and 95                                    | Group               | 30 minutes      | Licensed psychologist, LSSP               |
| 96164 with modifier UB and 95                                    | Group               | 30 minutes      | LPC, LCSW, LMFT                           |
| 96165 with modifier AH and 95 (add-on procedure code)            | Group               | 15 minutes      | Licensed psychologist, LSSP               |
| 96165 with modifier UB and 95 (add-on procedure code)            | Group               | 15 minutes      | LPC, LCSW, LMFT                           |
| 97110 with modifier GP and 95                                    | Individual          | 15 minutes      | Licensed physical therapist               |
| 97110 with modifier GP, U1, and 95                               | Individual          | 15 minutes      | Licensed physical therapy assistant       |
| 97150 with modifier GP and 95                                    | Group               | 15 minutes      | Licensed physical therapist               |
| 97150 with modifier GP, U1, and 95                               | Group               | 15 minutes      | Licensed physical therapy assistant       |
| 97150 with modifier GO and 95                                    | Group               | 15 minutes      | Licensed occupational therapist           |
| 97150 with modifier GO, U1, and 95                               | Group               | 15 minutes      | Licensed occupational therapy assistant   |
| 97161 (low), 97162 (moderate), and 97163 (high) with modifier 95 | Individual          | 15 minutes      | Licensed physical therapist               |
| 97165 (low), 97166 (moderate), and 97167 (high) with modifier 95 | Individual          | 15 minutes      | Licensed occupational therapist           |
| 97530 with modifier GO and 95                                    | Individual          | 15 minutes      | Licensed occupational therapist           |
| 97530 with modifier GO, U1, and 95                               | Individual          | 15 minutes      | Licensed occupational therapist assistant |

### Synchronous Telephone (Audio-Only) Technology

The following procedure codes may be provided to children eligible through SHARS as telehealth services via synchronous telephone (audio-only) technology to students with whom the treating provider has an ‘established relationship’ and if clinically appropriate (as determined by the treating provider), safe, and agreed to by the student receiving services.

HHSC encourages the use of synchronous audiovisual technology over telephone (audio-only) delivery of telehealth services whenever possible. Therefore, if delivered by synchronous telephone (audio-only) technology, providers must document in the student’s medical record the reason(s) for why a synchronous audiovisual platform was not used.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telehealth services provided by synchronous telephone (audio-only) technology must be billed using modifier 93.

| Procedure Code                                        | Individual or Group | Unit of Service                  | Provider                    |
|-------------------------------------------------------|---------------------|----------------------------------|-----------------------------|
| 90832 with modifier AH and 93                         | Individual          | 30 minutes                       | Licensed psychologist, LSSP |
| 90832 with modifier UB and 93                         | Individual          | 30 minutes                       | LPC, LCSW, LMFT             |
| 90834 with modifier AH and 93                         | Individual          | 45 minutes                       | Licensed psychologist, LSSP |
| 90834 with modifier UB and 93                         | Individual          | 45 minutes                       | LPC, LCSW, LMFT             |
| 90837 with modifier AH and 93                         | Individual          | 60 minutes                       | Licensed psychologist, LSSP |
| 90837 with modifier UB and 93                         | Individual          | 60 minutes                       | LPC, LCSW, LMFT             |
| 90853 with modifier AH and 93                         | Group               | Untimed, one per date of service | Licensed psychologist, LSSP |
| 90853 with modifier UB and 93                         | Group               | Untimed, one per date of service | LPC, LCSW, LMFT             |
| 96158 with modifier AH and 93                         | Individual          | 30 minutes                       | Licensed psychologist, LSSP |
| 96158 with modifier UB and 93                         | Individual          | 30 minutes                       | LPC, LCSW, LMFT             |
| 96159 with modifier AH and 93 (add-on procedure code) | Individual          | 15 minutes                       | Licensed psychologist, LSSP |
| 96159 with modifier UB and 93 (add-on procedure code) | Individual          | 15 minutes                       | LPC, LCSW, LMFT             |
| 96164 with modifier AH and 93                         | Group               | 30 minutes                       | Licensed psychologist, LSSP |
| 96164 with modifier UB and 93                         | Group               | 30 minutes                       | LPC, LCSW, LMFT             |
| 96165 with modifier AH and 93 (add-on procedure code) | Group               | 15 minutes                       | Licensed psychologist, LSSP |
| 96165 with modifier UB and 93 (add-on procedure code) | Group               | 15 minutes                       | LPC, LCSW, LMFT             |

### 2.3.10.2 Telemedicine Services

Telemedicine medical services, also known as telemedicine services, are a benefit of Texas Medicaid and SHARS. Telemedicine medical services has the meaning assigned by TOC §111.001. Telemedicine services are defined as health care services delivered by a physician licensed in the state of Texas, or a health professional acting under the delegation and supervision of a physician licensed in Texas and

acting within the scope of the physician's or health professional's license to a patient at a different physical location than the physician or health professional using telecommunications or information technology.

Telemedicine medical services must be provided in compliance with standards established by the respective licensing or certifying board of the professional providing the services.

LEAs that participate in the SHARS program may be reimbursed for telemedicine psychological and physician services.

All other reimbursement and billing guidelines that are applicable to in-person services will also apply when psychological and physician services are delivered as telemedicine services.

Psychological and physician telemedicine services provided by LEAs during school hours through SHARS may be delivered via synchronous audiovisual technologies.

Synchronous audiovisual technology is defined as an interactive, two-way audio and video telecommunications platform that meets the privacy requirements of HIPAA.

Psychological telemedicine services provided by LEAs during school hours through SHARS may also be delivered via synchronous telephone (audio-only) technologies.

Synchronous telephone (audio-only) technology is defined as an interactive, two-way audio telecommunications platform, including telephone technology, that uses only sound and meets the privacy requirements of HIPAA.

### **Synchronous Audiovisual Technology**

The following procedure codes may be provided to children eligible through SHARS as telemedicine services via synchronous audiovisual technology if clinically appropriate (as determined by the treating provider), safe and agreed to by the student receiving services.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telemedicine services provided by synchronous audiovisual technology must be billed using modifier 95.

| <b>Procedure Code</b>                                 | <b>Individual or Group</b> | <b>Unit of Service</b>           | <b>Provider Type</b>  |
|-------------------------------------------------------|----------------------------|----------------------------------|-----------------------|
| 90832 with modifier AH and 95                         | Individual                 | 30 minutes                       | Licensed psychiatrist |
| 90834 with modifier AH and 95                         | Individual                 | 45 minutes                       | Licensed psychiatrist |
| 90837 with modifier AH and 95                         | Individual                 | 60 minutes                       | Licensed psychiatrist |
| 90853 with modifier AH and 95                         | Group                      | Untimed, one per date of service | Licensed psychiatrist |
| 96158 with modifier AH and 95                         | Individual                 | 30 minutes                       | Licensed psychiatrist |
| 96159 with modifier AH and 95 (add-on procedure code) | Individual                 | 15 minutes                       | Licensed psychiatrist |
| 96164 with modifier AH and 95                         | Group                      | 30 minutes                       | Licensed psychiatrist |
| 96165 with modifier AH and 95 (add-on procedure code) | Group                      | 15 minutes                       | Licensed psychiatrist |

| Procedure Code         | Individual or Group | Unit of Service | Provider Type |
|------------------------|---------------------|-----------------|---------------|
| T1023 with modifier 95 | Individual          | Untimed         | MD, DO        |

### Synchronous Telephone (Audio-Only) Technology

The following procedure codes may be provided to children eligible through SHARS as telemedicine services via synchronous telephone (audio-only) technology to students with whom the treating provider has an ‘established relationship’ and if clinically appropriate (as determined by the treating provider), safe, and agreed to by the student receiving services.

HHSC encourages the use of synchronous audiovisual technology over telephone (audio-only) delivery of telemedicine services whenever possible. Therefore, if delivered by synchronous telephone (audio-only) technology, providers must document in the student’s medical record the reason(s) for why a synchronous audiovisual platform was not used.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telemedicine services provided by synchronous telephone (audio-only) technology must be billed using modifier 93.

| Procedure Code                                        | Individual or Group | Unit of Service                  | Provider Type         |
|-------------------------------------------------------|---------------------|----------------------------------|-----------------------|
| 90832 with modifier AH and 93                         | Individual          | 30 minutes                       | Licensed psychiatrist |
| 90834 with modifier AH and 93                         | Individual          | 45 minutes                       | Licensed psychiatrist |
| 90837 with modifier AH and 93                         | Individual          | 60 minutes                       | Licensed psychiatrist |
| 90853 with modifier AH and 93                         | Group               | Untimed, one per date of service | Licensed psychiatrist |
| 96158 with modifier AH and 93                         | Individual          | 30 minutes                       | Licensed psychiatrist |
| 96159 with modifier AH and 93 (add-on procedure code) | Individual          | 15 minutes                       | Licensed psychiatrist |
| 96164 with modifier AH and 93                         | Group               | 30 minutes                       | Licensed psychiatrist |
| 96165 with modifier AH and 93 (add-on procedure code) | Group               | 15 minutes                       | Licensed psychiatrist |

**Referto:** *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for additional information on restrictions for services delivered by synchronous telephone (audio-only) technologies.

### 2.3.11 Prior Authorization

Prior authorization through TMHP is not required for Medicaid services provided by a SHARS provider.

## 2.4 Documentation Requirements

Documentation of services should be generated at the time of service or shortly thereafter, in order to maintain an accurate medical record. Documentation of services must occur within 1 week (7 days) of the time the service is rendered.

The following service log documentation is required for all SHARS services prescribed in the student's IEP or Section 504 plan:

- Student's name
- Student's date of birth
- Student's Medicaid identification number on every page of the chart/record/note
- Date of service; and for each date of service:
  - Billable start and stop time
  - Total billable minutes
  - Student observation
  - Procedure code(s)
  - Note activity performed. Documentation of service provided must support the services billed.
- The SHARS provider's printed name, title, and original handwritten or electronic signature
  - Any electronic signature technologies that are used must comply with all federal and state statutes and administrative rules.

Service logs for PCS must include all elements of a SHARS service log with the following:

- The specific PCS task
- The total billable minutes for each ADL and IADL recorded

The total billable minutes for PCS are determined by the combined total billable minutes for each ADL and IADL recorded.

The total billable minutes for PCS performed by a PCS provider cannot exceed the PCS provider's total number of hours at the place of service.

Session notes for evaluations are not required; however, documentation must include the billable start time, billable stop time, and total billable minutes with a notation of the activity performed (e.g., audiology evaluation, speech therapy evaluation). Service providers are expected to perform and document evaluations in accordance with discipline-specific standards of practice and retain records in the student's file.

Session notes are required for therapy. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

Session notes will include all elements of a service log plus:

- Student's progress towards goals (if applicable)
- Note whether the service was provided individually or in a group
- The related IEP objective

If a SHARS provider is supervising an assistant or intern, then the supervising provider must adhere to current state licensure signature requirements.

All SHARS services require documentation to support the medical necessity of the service rendered. SHARS services are subject to retrospective review and recoupment if documentation does not support the service billed.

The following are mandatory general requirements for all providers:

- All entries are legible to individuals other than the author, dated (month, day, and year), and signed by the performing provider.
- Each page of the medical record documents the client's name and Texas Medicaid number.

**Referto:** "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information on additional mandatory general documentation requirements for all providers.

### 2.4.1 \* Record Retention

Student-specific records that are required for SHARS become part of the student's educational records and must be maintained for seven years. All records that are pertinent to SHARS must be maintained by the LEA until all audit questions, appeal hearings, investigations, or court cases are resolved. Records must be stored in a secure and readily accessible location and format and must be available for state or federal audits.

The following is a checklist of the minimum documents to collect and maintain:

- Signed consent to bill Medicaid by parent or guardian
- IEP
- Current provider qualifications (licenses)

**Note:** *[Revised] Qualified PCS provider documentation must include a signed and dated statement from a qualified employee of the LEA, as described by the PCS Provider Requirements, verifying the individual is able to perform PCS tasks in accordance with the required PCS competence areas. Supporting documents or information must also be included as applicable.*

- Attendance records
- Prescriptions and referrals
- Medical necessity documentation (e.g., diagnoses and history of chronic conditions or disability)
- Session notes or service logs, including provider signatures, for each service/event
- Supervision logs
- Special transportation logs
- Claims submittal and payment histories
- Assessments/evaluations
- Written agreements (contracts) for contracted service providers
- Copies of signed Certification of Funds (COF) letters and supporting documentation, including quarterly COF reports
- E-signature authorization forms(s) if applicable

## 2.5 Managed Care Clients

SHARS services are available to clients regardless of Medicaid service delivery mechanism (traditional Medicaid or Medicaid Managed Care). SHARS services are carved-out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client's Managed Care Organization (MCO).

## 2.6 Third Party Liability

SHARS claims are subject to Third Party Liability via the pay and recover later method.

**Referto:** “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*) for more information.

## 2.7 Claims Filing and Reimbursement

### 2.7.1 Claims Information

Claims for SHARS must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Claims must be submitted within 365 days from the date of service, or no later than 95 days after the end of the federal fiscal year (FFY) (i.e., January 3), whichever comes first.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims and additional general information about claims filing.

#### 2.7.1.1 Appealing Denied SHARS Claims

SHARS providers that appeal claims denied for exceeding benefit limitations must submit documentation of medical necessity with the appeal. Documentation submitted with an appeal must include the pages from the IEP and ARD documents that show the authorization of the services, including the specified frequency and duration and the details of the need for additional time or the reasons for exceeding the benefit limitations.

Each page of the documentation must have the student's name and Medicaid number.

### 2.7.2 Reimbursement Guidelines: Cost Reporting and Interim Claims

During the cost report period, LEAs participating in SHARS are reimbursed on an interim claiming basis using SHARS interim rates. In order to accommodate participating SHARS districts that require interim cash flow to offset the financial burden of providing for students, an interim fee-for-service claiming system still exists for SHARS. It is important that SHARS providers understand that SHARS interim payments are provisional in nature. Providers are reimbursed for direct medical services and transportation services provided under the SHARS Program on a cost basis using federally mandated allocation methodologies in accordance with 1 TAC §355.8443.

There is no lifetime benefit cap for SHARS services provided so long as the services are medically necessary and documented in the student's IEP. The services provided to the student at the school do not affect the type or amount of Medicaid services the student receives outside the school setting.

### 2.7.2.1 Interim Claiming

LEAs must submit the following:

- At least one interim claim for each direct medical service that an eligible student receives within the cost report period.
- Interim claims for all personal care services that an eligible student receives within the cost report period
- Interim claims for all eligible specialized transportation trips provided within the cost report period.

#### Untimed Units

For untimed procedure codes, claims that are submitted for reimbursement must include one unit of service for each unit billed. Untimed codes are reimbursed on a per unit basis and are subject to frequency limitations for each SHARS service category.

#### Timed Units

For timed procedure codes, providers must only report billable time when the midpoint of the total duration for the procedure code has been passed. All claims for reimbursement of timed procedure codes are based on the actual amount of billable time associated with the SHARS service.

For those services for which the unit of service is 15 minutes based on code description for SHARS services (i.e., 1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour for 15-minute units.

Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information may be reimbursed as a unit of 1.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

For example,  $68 \text{ total billable minutes} / 15 = 4 \text{ units} + 8 \text{ minutes}$ . Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore,  $68 \text{ total billable minutes} = 5 \text{ units of service}$ .

#### Examples of Billing Units Based on 15 Minutes

| Minutes           | Units   |
|-------------------|---------|
| 0 min - 7 mins    | 0 units |
| 8 mins - 22 mins  | 1 unit  |
| 23 mins - 37 mins | 2 units |
| 38 mins - 52 mins | 3 units |
| 53 mins - 67 mins | 4 units |
| 68 mins - 82 mins | 5 units |

All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service.

For 30-minute codes at least 16 minutes must pass in order to report a code with 1 unit = 30 minutes.

For those services for which the unit of service is an hour (1 unit = 60 minutes = one hour), partial units must be billed in tenths of an hour and rounded up or down to the nearest six-minute increment.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student and divide by 60 to convert to billable units of service. If the total billable minutes are not divisible by 60, the minutes are converted to partial units of service as follows:

#### Examples of Billing Units Based on an Hour

| Minutes           | Units     |
|-------------------|-----------|
| 0 mins - 3 mins   | 0 units   |
| 4 mins - 9 mins   | 0.1 unit  |
| 10 mins - 15 mins | 0.2 unit  |
| 16 mins - 21 mins | 0.3 unit  |
| 22 mins - 27 mins | 0.4 unit  |
| 28 mins - 33 mins | 0.5 unit  |
| 34 mins - 39 mins | 0.6 unit  |
| 40 mins - 45 mins | 0.7 unit  |
| 46 mins - 51 mins | 0.8 unit  |
| 52 mins - 57 mins | 0.9 unit  |
| 58 mins - 63 mins | 1 unit    |
| 64 mins - 69 mins | 1.1 units |
| 70 mins - 75 mins | 1.2 units |
| 76 mins - 81 mins | 1.3 units |
| 82 mins - 87 mins | 1.4 units |
| 88 mins - 93 mins | 1.5 units |

#### 2.7.2.2 Cost Reporting

The total allowable costs for providing services for SHARS must be documented by submitting the required annual cost report.

The provider's final reimbursement amount is arrived at by a cost report, cost reconciliation, and cost settlement process. The provider's total costs for both direct medical and transportation services as reported in the cost report are adjusted using the federally mandated allocation methodologies.

The provider's interim payments will be reimbursed in compliance with 1 TAC §355.8443.

Submittal of a SHARS cost report is mandatory for each provider that requests and receives interim payments. Failure to file a SHARS cost report will result in sanctions, which includes recoupment of all interim payments for the cost report period in which the default occurs.

CMS requires annual cost reporting, cost reconciliation, and cost settlement processes for all Medicaid SHARS services delivered by LEAs. CMS requires that LEAs, as public entities, not be paid in excess of their Medicaid-allowable costs and that any overpayments be recouped through the cost reconciliation

and cost settlement processes. In an effort to minimize any potential recoupments, HHSC has assigned SHARS interim rates that are as close as possible to each district's Medicaid allowable costs for providing each SHARS service.

Each SHARS provider is required to complete an annual cost report for all SHARS that were delivered during the previous FFY (October 1 through September 30). The cost report is due on or before April 1 of the year following the reporting period.

The following certification forms must be submitted and received by HHSC for the cost report. The annual cost report includes two certification forms which must be completed to certify the provider's incurred actual costs:

- Cost report certification
- Claimed expenditures

The certification forms received by HHSC for the cost report must be:

- The original certification pages.
- Signed by the business officer or other financial representative who is responsible for legally binding the district.
- Notarized.

The primary purpose of the cost report is to document the provider's costs for delivering SHARS, including direct costs and indirect costs, and to reconcile the provider's interim payments for SHARS with its actual total Medicaid-allowable costs.

All annual SHARS cost reports that are filed are subject to desk review by HHSC or its designee.

### **2.7.2.3 Cost Reconciliation and Cost Settlement**

The cost reconciliation process must be completed within 24 months of the end of the reporting period covered by the annual SHARS cost report. The total Medicaid-allowable costs are compared to the provider's interim payments for SHARS delivered during the reporting period, which results in a cost reconciliation.

If a provider has not complied with all cost report requirements or a provider's interim payments exceed the actual certified Medicaid-allowable costs of the provider for SHARS to Medicaid clients, HHSC will recoup the federal share of the overpayment by one of the following methods:

- Offset all future claims payments to the provider until the amount of the federal share of the overpayment is recovered
- Recoup an agreed-upon percentage from future claims payments to the provider to ensure recovery of the overpayments within one year
- Recoup an agreed-upon dollar amount from future claims payments to ensure recovery of the overpayment within one year

If the actual certified Medicaid-allowable costs of a provider for SHARS exceed the provider's interim payments, HHSC will pay the federal share of the difference to the provider in accordance with the final, actual certification agreement and submit claims to CMS for reimbursement of that payment in the federal fiscal quarter following payment to the provider.

HHSC issues a notice of settlement that denotes the amount due to or from the provider.

### **2.7.2.4 Informal Review of Cost Reports Settlement**

An LEA or the Superintendent, Chief Financial Officer, Business Officer, or other LEA Official with legal authority who disagrees with the adjustments made during the cost reconciliation process has the right to request an informal review of the adjustments. Requests for informal reviews must be sent by certified

mail and received by HHSC within the time frame designated on the settlement notice. Furthermore, the request for informal review must include a concise statement of the specific actions or determinations the LEA disputes, the LEA's recommended resolution, and any supporting documentation deemed relevant to the dispute. Failure to follow these instructions will result in the denial of the request for an informal review.

For more information on the Cost Report and SHARS interim rates please reference the Cost Report Instructions and the HHSC Rate Analysis SHARS webpage at <https://pfd.hhs.texas.gov/acute-care/school-health-and-related-services-shars>. Further information can be found in 1 TAC §355.8443.

SHARS providers can also contact a SHARS Rate Analyst by email at [ProviderFinance-SHARS@hhs.texas.gov](mailto:ProviderFinance-SHARS@hhs.texas.gov) or by telephone at 512-730-7400.

**Referto:** “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information on reimbursement and the Federal Medical Assistance Percentage (FMAP).

### 2.7.2.5 Quarterly Certification of Funds

SHARS providers are required to certify on a quarterly basis the amount reimbursed during the previous federal fiscal quarter. TMHP Provider Enrollment mails the quarterly Certification of Funds statement to SHARS providers after the end of each quarter of the FFY (October 1 through September 30). The purpose of the statement is to verify that the LEA incurred costs on the dates of service that were funded from state or local funds in an amount equal to, or greater than, the combined total of its interim rates times the paid units of service. While the payments were received the previous FFY, the actual dates of service could have been many months prior. Therefore, the certification of public expenditures is for the dates of the FFY quarter and not the dates of service paid within the quarter.

In order to balance amounts in the Certification of Funds, providers will receive, or have access to, the Certification of Funds Claims Information Report. For help balancing the amounts in the statement, providers can contact the TMHP Contact Center at 800-925-9126.

**Referto:** “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*).

The Certification of Funds statement must be:

- Signed by the business officer or other financial representative who is responsible for signing other documents that are subject to audit.
- Notarized.
- Returned to TMHP within 25 calendar days of the date printed on the letter.

Failure to do so may result in recoupment of funds or the placement of a vendor hold on the provider's payments until the signed Certification of Funds statement is received by TMHP. Providers must contact the TMHP Contact Center at 800-925-9126 if they do not receive their Certification of Funds statement.

On an annual basis, SHARS providers are required to certify through their cost reports their total, actual, incurred costs, including the federal share and the nonfederal share.

**Referto:** Subsection 2.7.2, “Reimbursement Guidelines: Cost Reporting and Interim Claims” in this handbook for additional information about cost reporting.

## 2.8 Random Moment Time Study (RMTS)

CMS requires SHARS providers to participate in the RMTS to be eligible to submit claims and receive reimbursement for SHARS services. SHARS providers must comply with the Texas Time Study Guide, which includes, but is not limited to, Mandatory Annual RMTS Contact training certification of RMTS

participants for all four annual RMTS quarters, and compliance with participation requirements for selected sampled moments. The four annual RMTS quarters are October through December, January through March, April through June, and July through September.

An existing LEA can only become a SHARS provider effective October 1, each year and they must participate in all four RMTS quarters for that annual period. SHARS providers that do not participate in all four required RMTS quarters, or are RMTS non-compliant, cannot be a SHARS provider for that entire annual period (October 1 through September 30) and will be required to return any Medicaid payments received for SHARS services delivered during that annual cost report period. The LEA can return to participating in the SHARS program the following FFY beginning on October 1.

A new LEA (i.e., a newly formed district that began operations after October 1) can become a SHARS provider effective with the first day of the federal quarter in which it participates in the RMTS. New SHARS providers may not submit claims or be reimbursed for SHARS services provided prior to the RMTS quarter in which they begin to participate, and they must participate in all remaining RMTS quarters for that annual period.

LEAs can access the Texas Time Study Guide, on the HHSC website at <https://pfd.hhs.texas.gov/time-study/time-study-independent-school-districts-isd>

SHARS providers can contact the HHSC Time Study Unit by email at [TimeStudy@hhsc.texas.gov](mailto:TimeStudy@hhsc.texas.gov) or by telephone at 512-491-1715.

## 1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)*.

The information in this handbook is intended for home health agencies, hospitals, nurse practitioners (NP), clinical nurse specialists (CNS), certified nurse midwives (CNM), licensed professional counselors (LPC), licensed marriage and family therapists (LMFT), licensed clinical social workers (LCSW), physicians, physician assistants (PA), psychologists, licensed psychological associates, provisionally licensed psychologists, and licensed dietitians.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information).

## 2 Enrollment

Providers may provide telecommunication services for Texas Medicaid clients under the provider’s National Provider Identifier (NPI). No additional enrollment is required to provide telemedicine medical service or telehealth services.

Home health agency and hospital providers who wish to provide telemonitoring services must notify the Texas Medicaid & Healthcare Partnership (TMHP) as follows:

- Current providers must use the Provider Enrollment and Management System (PEMS) to indicate that they provide telemonitoring services.
- Newly enrolling or re-enrolling home health agency or outpatient hospital providers must indicate whether they provide telemonitoring services during the enrollment process.

**Referto:** Subsection 3.1, “Provider Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about CNM provider enrollment.

Subsection 8.1, “Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about NP and CNS provider enrollment.

Subsection 9.1, “Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about physician provider enrollment.

Subsection 10.1, “Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about PA provider enrollment.

Subsection 4.1, “Provider Enrollment” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for information about mental health services provider enrollment.

Subsection 4.1, “Provider Enrollment” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for information about psychologist and licensed psychological associate provider enrollment.

Subsection 2.11.1, “Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for information about licensed dietitian enrollment.

### 3 Services, Benefits, Limitations, and Prior Authorization

Telemedicine and telehealth services must be provided in compliance with standards established by the respective licensing or certifying board of the professional providing the services.

The use of telemedicine and telehealth services within intermediate care facilities for individuals with intellectual disabilities (ICF-IID) and State Supported Living Centers is subject to the policies established by the Health and Human Services Commission (HHSC).

More than one medically necessary telemedicine service or telehealth service may be reimbursed for the same date and same place of service if the services are billed by providers of different specialties.

All confidentiality and Health Insurance Portability and Accountability Act (HIPAA) standards apply to telemedicine medical service and telehealth transmissions.

**Referto:** Subsection 1.7.7, “Release of Confidential Information” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about confidentiality standards.

#### 3.1 Patient Health Information Security

The software system used by the distant site provider must allow secure authentication of the distant site provider and the client.

The physical environments of the client and the distant site provider must ensure that the client’s protected health information remains confidential. A parent or legal guardian may be physically located in the patient site or distant site environment during a telehealth or telemedicine service with a child.

A parent or legal guardian must provide written or verbal consent to the distant site provider to allow any other individual to be physically present in the distant or patient site environment during a telehealth or telemedicine service with a child.

An adult client must also provide written or verbal consent to the distant site provider to allow any other individual to be physically present in the distant or patient site environment during a telehealth or telemedicine service.

Providers of telehealth or telemedicine must maintain the confidentiality of protected health information (PHI) as required by Federal Register 42, Code of Federal Regulations (CFR) Part 2, 45 CFR Parts 160 and 164, Chapters 111 and 159 of the Texas Occupations Code, and other applicable federal and state law.

Providers of telehealth or telemedicine must also comply with the requirements for authorized disclosure of PHI relating to clients in state mental health facilities and residents in state supported living centers, which are included in, but not limited to, 42 CFR Part 2, 45 CFR Parts 160 and 164, Texas Health and Safety Code §611.004, and other applicable federal and state law.

All client health information generated or utilized during a telehealth or telemedicine service must be stored by the distant site provider in a client health record. If the distant site provider stores the patient health information in an electronic health record, the provider should use software that complies with Health Insurance Portability and Accountability Act (HIPAA) confidentiality and data encryption requirements, as well as with the United States Department of Health and Human Services (HHS) rules implementing HIPAA.

## **3.2 General Guidelines for Texas Medicaid MCOs**

Texas Medicaid managed care organizations (MCOs) are prohibited from denying reimbursement for covered services solely because they are delivered remotely. MCOs must consider reimbursement for all medically necessary Medicaid-covered services that are provided using telemedicine or telehealth.

Texas Medicaid MCOs must determine whether to reimburse for a telemedicine or telehealth service based on clinical and cost effectiveness, among other factors.

Texas Medicaid MCOs cannot deny, limit, or reduce reimbursement for a covered health-care service or procedure based on the provider's choice of telecommunications platform to provide the service or procedure using telemedicine or telehealth.

Providers should refer to individual MCO policies for additional coverage information.

Clinical and cost effectiveness determinations that result in prohibiting a service from being delivered using a synchronous audio-only technology, or store and forward technology in conjunction with synchronous audio-only technology are not considered denying, limiting, or reducing reimbursement for a covered health care service.

## **3.3 Services Provided through Telecommunications**

### **3.3.1 Definitions of Terminology for Telemedicine and Telehealth Services**

The following are definitions of terms used in telemedicine and telehealth services:

Telecommunications - The exchange of information by electronic and electrical means.

Platform - The technology, system, software, application, modality, or other method or means of delivery through which a health professional remotely interfaces with a client when providing a health care service or procedure as a telemedicine service or telehealth service.

Audiovisual - Synchronous audiovisual technology or store and forward technology in conjunction with synchronous audio-only technology.

Synchronous audiovisual technology - An interactive, two-way audio and video telecommunications platform that meets the privacy requirements of the Health Insurance Portability and Accountability Act.

Synchronous audio-only, also called synchronous telephone (audio-only), technology - An interactive, two-way audio telecommunications platform, including telephone technology, that uses only sound and meets the privacy requirements of the Health Insurance Portability and Accountability Act.

Store and forward technology - A telecommunications platform that stores and transmits or grants access to a person's clinical information for review by a health professional at a different physical location than the person that meets the privacy requirements of the Health Insurance Portability and Accountability Act.

In-person (or in person) - Within the physical presence of another person.

Not all Medicaid-covered services are authorized by HHSC for telemedicine or telehealth delivery in fee-for-service. Providers must always ensure the covered service is allowable by HHSC for telemedicine or telehealth services delivery.

**Note:** *For example, if a service is authorized for telemedicine or telehealth delivery only when using synchronous audiovisual technology, that service may not be delivered using store and forward technology, store and forward technology in conjunction with synchronous audio-only technology, synchronous audio-only technology, or asynchronous audio-only technology.*

Telemedicine or telehealth may be provided if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit.

### 3.3.2 Telemedicine and Telehealth Conditions for Reimbursement

Conditions for reimbursement applicable to telemedicine and telehealth provided using a synchronous audiovisual technology platform, or using store and forward technology in conjunction with synchronous audio-only are those that meet the following conditions:

- Must be designated for reimbursement by HHSC.
- Must be clinically effective and cost-effective, as determined and published in the benefit language by HHSC.
- May not be denied solely because an in-person medical service between a provider and client did not occur.
- May not be limited by requiring the provider to use a particular synchronous audiovisual technology platform to receive reimbursement for the service.

Other conditions for reimbursement applicable to services may vary by service type. Providers may refer to the appropriate TMPPM handbook for additional information on synchronous audiovisual technology platform coverage conditions.

**Note:** *Telemedicine and telehealth services that HHSC has determined are clinically effective and cost-effective when provided via a synchronous audiovisual technology platform or using store and forward technology in conjunction with synchronous audio-only technology can be found in the appropriate TMPPM handbooks.*

Conditions for reimbursement applicable to behavioral health services provided using a synchronous audio-only technology platform are those that meet the following conditions:

- Must be designated for reimbursement by HHSC.
- Provider must obtain informed consent from the client, client's parent, or the client's legally authorized representative prior to rendering a behavioral health service through a synchronous audio-only technology platform; except when doing so is not feasible or could result in death or injury to the client. Verbal consent is permissible and must be documented in the client's medical record.

- Must be clinically effective and cost-effective, as determined and published in the benefit language by HHSC.
- May not be denied solely because an in-person medical service between a provider and client did not occur.
- May not be limited by requiring the provider to use a particular synchronous audio-only technology platform to receive reimbursement for the service.
- Other conditions for reimbursement applicable to behavioral health services may vary by service type. Providers may refer to the appropriate TMPPM handbook for additional information on audio-only coverage conditions.

Conditions for reimbursement applicable to non-behavioral health services provided using a synchronous audio-only technology platform:

- Must be designated for reimbursement by HHSC.
- Clinically effective and cost-effective, as determined and published by HHSC.
- May not be denied solely because an in-person medical service between a provider and client did not occur.
- May not be limited by requiring the provider to use a particular synchronous audio-only technology platform to receive reimbursement for the service.

**Note:** *Behavioral or non-behavioral health services that HHSC has determined are clinically effective and cost-effective when provided via a synchronous audio-only technology platform can be found in the appropriate TMPPM handbooks.*

Telemedicine and telehealth services are reimbursed in accordance with 1 TAC §355.

In the event of a Declaration of State of Disaster, HHSC will issue direction to providers regarding the use of telemedicine or telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law.

Declaration of State of Disaster is when to an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Texas Government Code §418.014.

## 3.4 Telemedicine Services

Telemedicine medical services, also known as telemedicine, are allowable for Texas Medicaid. Telemedicine has the meaning assigned by *Texas Occupations Code* §111.001. Telemedicine services are defined as health-care services delivered by a physician licensed in Texas or a health professional who acts under the delegation and supervision of a health professional licensed in Texas and within the scope of the health professional's license to a client at a different physical location using telecommunications or information technology. Telemedicine excludes teledentistry services.

### 3.4.1 Distant Site

A distant site is the location of the provider rendering the service. Distant-site telemedicine benefits include services that are performed by the following providers, who must be enrolled as a Texas Medicaid provider:

- Physician
- CNS
- NP
- PA

- CNM
- Federally Qualified Health Center (FQHC)

A distant site provider is the physician, or PA, NP, CNM, FQHC, Rural Health Clinic (RHC), or CNS who is supervised by and has delegated authority from a licensed Texas physician, who uses telemedicine to provide health-care services to a client in Texas.

Distant site providers must be licensed in Texas.

Distant site providers that provide mental health services must be appropriately licensed or certified in Texas, or be a qualified mental health professional-community services (QMHP-CS), as defined in 26 TAC §301.303(48).

A valid practitioner-patient relationship must exist between the distant site provider and the patient. A valid practitioner-patient relationship exists between the distant site provider and the patient if:

- The distant site provider meets the same standard of care required for and in-person service.
- The relationship can be established through:
  - A prior in-person service.
  - A prior telemedicine service that meets the delivery method requirements specified in *Texas Occupations Code* §111.005(a)(3).
  - The current telemedicine service that meets the delivery method requirements specified in *Texas Occupations Code* §111.005(a)(3).

A call coverage agreement established in accordance with Texas Medical Board (TMB) administrative rules in 22 TAC §174.1.

The distant site provider must obtain informed consent to treatment from the patient, patient’s parent, or the patient’s guardian prior to rendering a telemedicine medical service.

Distant site providers that communicate with clients using electronic communication methods other than phone or facsimile must provide clients with written notification of the physician’s privacy practices prior to evaluation and treatment. A good faith effort must be made to obtain the client’s written acknowledgment of the notice, including by email response.

A distant site provider should provide patients who receive a telemedicine service with guidance on the appropriate follow-up care.

Procedure codes that are reimbursed to distant site providers when billed with the 95 modifier (synchronous audiovisual technology) are included in the individual TMPPM handbooks. Procedure codes that indicate remote (telemedicine) delivery in the description do not need to be billed with the 95 modifier.

Procedure codes that are reimbursed to distant site providers when billed with the 93 modifier (audio-only services) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the 93 modifier.

Behavioral health procedure codes that are reimbursed to distant site providers when billed with the FQ modifier (audio-only services) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the FQ modifier.

Texas Medicaid MCOs must reimburse the following procedure codes when delivered via telemedicine services:

| Procedure Codes |       |       |       |       |       |  |  |  |  |
|-----------------|-------|-------|-------|-------|-------|--|--|--|--|
| G0406           | G0407 | G0408 | G0425 | G0426 | G0427 |  |  |  |  |

### 3.4.2 Telemedicine Service Delivery

The following delivery methods may be used to provide telemedicine within fee-for-service (FFS) Medicaid:

- Synchronous audiovisual technology between the distant site provider and the client in another location
- Synchronous audio-only technology between the distant site provider and the client in another location
- Store and forward technology in conjunction with synchronous audio-only technology between the distant site provider and the client in another location. The distant site provider must use one of the following:
  - Clinically relevant photographic or video images, including diagnostic images
  - The client's relevant medical records, such as medical history, laboratory and pathology results, and prescriptive histories

A Texas Medicaid managed care organization (MCO) is not required to provide reimbursement for telemedicine services that are provided through the following methods:

- A text-only email message
- A facsimile transmission

Texas Medicaid MCOs may optionally provide reimbursement for telemedicine services that are provided through asynchronous audio-only technology, such as voice mail technology. Distant site providers should contact each MCO to determine whether an MCO provides reimbursement for a specified modality.

#### 3.4.2.1 Prescriptions Generated from a Telemedicine Medical Service

A distant site provider may issue a valid prescription as part of a telemedicine service. An electronic prescription (e-script) may be used as permitted by applicable federal and state statutes and rules.

The same standards that apply for the issuance of a prescription during an in-person setting apply to prescriptions issued by a distant site provider.

The prescription must be issued for a legitimate medical purpose by the distant site provider as part of a valid practitioner-patient relationship.

The prescribing physician must be licensed in Texas. If the prescription is for a controlled substance, the prescribing physician must have a current valid U.S. Drug Enforcement Administration (DEA) registration number.

A licensed health professional acting under the delegation and supervision of a physician licensed in Texas may also issue a valid prescription. Prescribing must be in accordance with the required prescriptive authority agreement or other forms of delegation.

If the prescription is for a controlled substance, the health professional must have a current valid DEA registration number. If the prescription is for a schedule II controlled substance, the health professional must comply with DEA regulations regarding the use of electronic prescriptions. The health professional may also use the official prescription forms issued with their name, address, phone number, DEA registration number, delegating physician's name, and delegating physician's DEA registration number.

As applicable, all drug prescriptions must meet the requirements of the Texas Controlled Substance Act (*Texas Health and Safety Code* §481), the Texas Dangerous Drug Act (*Texas Health and Safety Code* §483), and any other federal or state statutes or rules.

Telemedicine medical services used for the treatment of chronic pain with scheduled drugs via audio-only is prohibited, unless a patient:

- Is an established chronic pain patient of the physician or health professional issuing the prescription;
- Is receiving a prescription that is identical to a prescription issued at the previous visit; and
- Has been seen by the prescribing physician or health professional defined under Section 111.001(1) of Texas Occupations Code, in the last 90 days either in-person or via telemedicine using audio-visual communication.

Treatment of a client for acute pain with scheduled drugs using telemedicine is permitted. Acute pain is defined by 22 TAC §172.1(1).

All physicians must comply by 22 TAC §175.3 when issuing prescriptions through a telemedicine service.

### **3.4.3 Patient Site**

A patient site is the place where the client is physically located. A client's home may be the patient site for telemedicine.

Patient-site providers that are enrolled in Texas Medicaid may only be reimbursed for the facility fee using procedure code Q3014. Procedure code Q3014 is payable to NP, CNS, PA, physicians, and outpatient hospital providers. Charges for other services that are performed at the patient site may be submitted separately. Procedure code Q3014 is not a benefit if the patient site is the client's home.

#### **3.4.3.1 School-Based Setting**

Telemedicine provided in a school-based setting by a physician, even if the physician is not the client's primary care physician or provider, are benefits if all of the following criteria are met:

- The physician is an authorized health-care provider enrolled in Texas Medicaid.
- The client is a child who is receiving the service in a primary or secondary school-based setting.
- The parent or legal guardian of the client provides consent before the service is provided.

Telemedicine services provided in a school-based setting are also a benefit if the physician delegates provision of services to a nurse practitioner, clinical nurse specialist, or physician assistant, as long as the nurse practitioner, clinical nurse specialist, or physician assistant is working within the scope of their professional license and within the scope of their delegation agreement with the physician.

### **3.4.4 Telemedicine Services for FQHCs**

#### **3.4.4.1 Distant Site**

FQHCs may be reimbursed the distant-site provider fee for telemedicine services at the Prospective Payment System (PPS) rate or Alternative Prospective Payment System (APPS) rate.

FQHC practitioners may be employees of the FQHC or contracted with the FQHC.

FQHCs may be reimbursed the facility fee (procedure code Q3014) as an add-on procedure code that should not be included in any cost reporting that is used to calculate a PPS or APPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an FQHC must submit documentation of medical necessity that indicates that the client needed multiple distant-site provider consultations. An FQHC can use a signed letter from the client's treating health-care provider at the FQHC to document the client's medical need for receiving multiple distant-site provider consultations on the same date of service. The letter must state that the client suffered an illness or injury that required additional diagnosis or treatment by a distant-site provider.

If an FQHC is eligible for payment of both an encounter fee and a facility fee for the same client on the same date of service, the FQHC must submit a claim for the facility fee separate from the claim that was submitted for the encounter.

### 3.4.5 Telemedicine Services for RHCs

RHCs may be reimbursed the distant-site provider fee for telemedicine services at the PPS rate. RHC practitioners may be employees of the RHC or contracted with the RHC.

The facility fee (procedure code Q3014) may be reimbursed as an add-on procedure code that should not be included in any cost reporting that is used to calculate the RHC AIR (All Inclusive Rate) PPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an RHC must submit documentation of medical necessity that the client needed multiple distant-site provider consultations. An RHC can use a signed letter from the client's treating health care provider at the RHC documenting that the client suffered an illness or injury requiring additional diagnosis or treatment by a distant site provider. This will suffice to document the client's medical need for purposes of receiving additional facility fee payments for the same client on the same date of service. The letter must state that the client suffered an illness or injury that required additional diagnosis or treatment by a distant-site provider.

If an RHC is eligible for payment of both an encounter fee and a facility fee for the same client on the same date of service, the RHC must submit a claim for the facility fee separate from the claim submitted for the encounter.

The facility fee should not be included in any cost reporting that is used to calculate the RHC All Inclusive Rate (AIR) prospective payment system (PPS) per-visit encounter rate.

**Note:** *Telemedicine and telehealth services must be billed with modifier 95. Procedure codes that indicate remote delivery (telemedicine medical services or telehealth services) in the description do not need to be billed with modifier 95.*

### 3.4.6 Documentation Requirements for Telemedicine

Medical records must be maintained for all telemedicine services.

Documentation for a service provided via telemedicine must be the same as for a comparable in-person service.

If a patient has a primary care provider who is not the distant site provider and the patient or their parent or legal guardian provides consent to a release of information, a distant site provider must provide the patient's primary care provider with the following information:

- A medical record or report with an explanation of the treatment provided by the distant site provider
- The distant site provider's evaluation, analysis, or diagnosis of the patient

Unless the telemedicine services are rendered to a child in a school-based setting, distant site providers of mental health services are not required to provide the patient's primary care provider with a treatment summary.

For telemedicine provided to a child in a school-based setting, a notification provided by the telemedicine physician to the child's primary care provider must include a summary of the service, exam findings, prescribed or administered medications, and patient instructions.

If the child does not have a primary care provider, the notification must be provided to the child's parent or legal guardian. In addition to providing treatment information, the notification must include a list of primary care providers from which the child's parent or legal guardian may select a primary care provider.

## 3.5 Telehealth Services

Telehealth services, also known as telehealth, are allowable for Texas Medicaid. Telehealth has the meaning assigned by *Texas Occupations Code* §111.001. Telehealth services are defined as health-care services, other than telemedicine medical services or a teledentistry service, delivered by a health professional licensed, certified or otherwise entitled to practice in Texas and acting within the scope of the health professional's license, certification or entitlement to a patient at a different physical location other than the health professional using telecommunications or information technology.

Telehealth services are reimbursed in accordance with 1 TAC §355.

### 3.5.1 Distant Site

A distant site is the location of the provider rendering the service. A distant site provider is the health professional licensed, certified, or otherwise entitled to practice in Texas who uses telehealth services to provide health care services to a patient in Texas.

Licensed psychological associates (LPAs), provisionally licensed psychologists (PLPs), post-doctoral psychology fellows, and pre-doctoral psychology interns under psychologist supervision may also deliver telehealth services. All requirements outlined in the Outpatient Mental Health Services benefit language must be met.

Distant site providers that provide mental health services must be appropriately licensed or certified in Texas or be a QMHP-CS as defined in 26 *Texas Administrative Code* §301.303(48).

A distant-site provider that is located outside of state lines while rendering services is considered an out-of-state provider.

The distant site provider must obtain informed consent to treatment from the patient, patient's parent or the patient's legal guardian prior to rendering a telehealth service.

Distant site providers should meet all other telehealth service requirements specified in Texas Occupations Code §111.

Procedure codes that are benefits for distant site providers when billed with the 95 modifier (synchronous audiovisual technology) are included in the individual TMPPM handbooks. Procedure codes that indicate remote (telehealth service) delivery in the description do not need to be billed with the 95 modifier.

Procedure codes that are a benefit for distant site providers when billed with the 93 modifier (synchronous audio-only technology) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the 93 modifier.

Behavioral health procedure codes that are a benefit for the distant site providers when billed with the FQ modifier (synchronous audio-only technology) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the FQ modifier.

### 3.5.2 Patient Site

A patient site is the place where the client is physically located while the service is rendered. Patient-site providers that are enrolled in Texas Medicaid may only be reimbursed for the facility fee using procedure code Q3014. Charges for other services that are performed at the patient site may be submitted separately.

A client's home may be the patient site for telehealth. Procedure code Q3014 is not a benefit if the patient site is the client's home.

### 3.5.3 Distant-Site Telehealth Services for FQHCs

FQHCs may be reimbursed the distant-site provider fee for telehealth services at the Prospective Payment System (PPS) rate or Alternative Prospective Payment System (APPS) rate.

FQHC practitioners may be employees of the FQHC or contracted with the FQHC.

The facility fee (procedure code Q3014) may be reimbursed as an add-on procedure code and should not be included in any cost reporting that is used to calculate a PPS or APPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an FQHC must submit documentation of medical necessity indicating that the client needed multiple distant site provider consultations.

An FQHC can use a signed letter from the client's treating health care provider at the FQHC documenting that the client suffered an illness or injury requiring additional diagnosis or treatment by a distant site provider. This will suffice to document the client's medical need for purposes of receiving additional facility fee payments for the same client on the same date of service.

If an FQHC is eligible for payment of both an encounter and a facility fee for the same client on the same date of service, the FQHC must submit claims for the facility fee separate from claims submitted for the encounter.

### 3.5.4 Distant-Site Telehealth Services for RHCs

RHCs may be reimbursed the distant-site provider fee for telehealth services at the PPS rate.

RHC practitioners may be employees of the RHC or contracted with the RHC.

The facility fee (procedure code Q3014) may be reimbursed as an add-on procedure code that should not be included in any cost reporting that is used to calculate the RHC AIR (All Inclusive Rate) PPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an RHC must submit documentation of medical necessity indicating that the client needed multiple distant site provider consultations.

A signed letter from the client's treating health care provider at the RHC documenting that the client suffered an illness or injury requiring additional diagnosis or treatment by a distant site provider will suffice to document the client's medical need for purposes of receiving additional facility fee payments for the same client on the same date of service.

If an RHC is eligible for payment of both an encounter and a facility fee for the same client on the same date of service, the RHC must submit claims for the facility fee separate from claims submitted for the encounter.

### 3.5.5 Telehealth Service Delivery

The following delivery methods may be used to provide telehealth services within FFS Medicaid:

- Synchronous audiovisual technology between the distant site provider and the client in another location
- Synchronous audio-only technology between the distant site provider and the client in another location
- Store and forward technology, in conjunction with synchronous audio-only technology between the distant site provider and the client in another location. The distant site provider must use one of the following:
  - Clinically relevant photographic or video images, including diagnostic images

- The client's relevant medical records, such as medical history, laboratory and pathology results, and prescriptive histories

A Texas Medicaid MCO is not required to provide reimbursement for telehealth services that are provided through the following methods:

- A text-only email message
- A facsimile transmission

Texas Medicaid MCOs may optionally provide reimbursement for telehealth services that are provided through asynchronous audio-only technology, including voice mail technology. Distant site providers should contact each MCO to determine whether an MCO provides reimbursement for a specified modality.

### **3.5.6 Telehealth Service Documentation Requirements**

Medical records must be maintained for all telehealth services.

Documentation for a telehealth service must be the same as a comparable in-person service.

If a client has a primary care provider, and the client or their parent or legal guardian provides consent to release information, a distant site provider must provide the client's primary care provider with the following information:

- A medical record or report with an explanation of the treatment provided by the distant site provider
- The distant site provider's evaluation, analysis, or diagnosis of the client

Providers of mental health services are not required to provide a client's primary care provider with a treatment summary.

ECI providers are not required to provide the client's primary care physician with a treatment summary.

## **3.6 Home Telemonitoring Services**

Home telemonitoring services, also known as remote patient monitoring, is a benefit of Texas Medicaid. Home telemonitoring is a health service that requires scheduled remote monitoring of data related to a client's health, and transmission of the data from the client's home to a licensed home health agency, hospital, FQHC, or RHC. Data and information collected remotely will be transmitted from the client's home to the home health agency, hospital, FQHC, or RHC. The data transmission must comply with standards set by HIPAA.

Home telemonitoring providers must establish a plan of care (POC) with outcome measures based on the physician or requesting provider's order for each client, and the POC and outcome measures must be reviewed by the client's physician.

The RN, NP, CNS, or PA in a licensed home health agency, hospital, FQHC, or RHC is responsible for reporting data to the physician or requesting provider. Telemonitoring providers must be available 24 hours a day, 7 days a week. Although transmissions are generally at scheduled times, they can occur any time of the day or any day of the week, according to the client's plan of care.

Scheduled periodic reporting of the client data to the physician or requesting provider is required in the event of a measurement outside the parameters established in the physician's orders, or at least once per month when there have been no readings outside the established parameters.

Collection and interpretation of a client's data for home telemonitoring services (procedure code 99091) is a benefit in the office or hospital setting when services are provided by a physician or other qualified health care professional. Procedure code 99091 is limited to once in a 30-day period to the physician or provider ordering the services.

Home telemonitoring is a benefit for clients who have been diagnosed with either diabetes or hypertension or both.

Home telemonitoring services are also a benefit for clients who are 20 years of age and younger, with one or more of the following conditions:

- End-stage solid organ disease
- Organ transplant recipient
- Requiring mechanical ventilation

The physician or requesting provider who orders home telemonitoring services has a responsibility to ensure the following:

- The client has a choice of home telemonitoring providers.
- The client has the right to discontinue home telemonitoring services at any time.

**Note:** A nurse practitioner (NP), clinical nurse specialist (CNS) or physician assistant (PA) are considered requesting providers and may request home telemonitoring and sign prior authorization forms.

Although Texas Medicaid supports the use of home telemonitoring, clients are not required to use this service.

### 3.6.1 Facility Services

The provision and maintenance of home telemonitoring equipment is the responsibility of the home health agency, hospital, FQHC, or RHC. Procedure code S9110 with modifier U1 is reimbursed one time to a home health agency or hospital for the initial setup and installation in the client's home. A claim for a subsequent set up and installation will not be reimbursed unless there is a documented new episode of care. There will not be reimbursement for the addition of monitoring parameters during the current episode of care. Monthly home telemonitoring services (procedure code S9110 with the appropriate modifier) are a benefit when services are provided by a home health agency or hospital. Home health agency and hospital providers must submit revenue code 780 with procedure code S9110 and one of the appropriate modifiers listed in the table within this section.

Use one of the following modifiers with monthly home telemonitoring services procedure code S9110 to indicate the number of days per month data is transmitted from the client's home to the home telemonitoring provider:

| Modifier | Number of Days Per Month     |
|----------|------------------------------|
| U2       | 1 through 5 days per month   |
| U3       | 6 through 10 days per month  |
| U4       | 11 through 15 days per month |
| U7       | 16 through 20 days per month |
| U8       | 21 through 25 days per month |
| U9       | 26 through 30 days per month |

The unit of reimbursement for procedure code S9110 and the appropriate modifier is a rolling month.

Providers must bill the appropriate modifier to indicate the number of days that transmissions of data were received and reviewed for the client within a rolling month.

Providers are not required to submit modifiers U2, U3, U4, U7, U8, or U9 for telemonitoring on the prior authorization request, but are required to submit the appropriate modifier on the claim for reimbursement based on the number of days as outlined in the table.

Documentation supporting medical necessity for home telemonitoring services must be maintained in the client's medical record by the entity providing the service (home health agency, hospital, FQHC, or RHC) and is subject to retrospective review. All paid home telemonitoring services not supported by documentation of medical necessity are subject to recoupment.

### **3.6.2 Federally Qualified Health Centers and Rural Health Clinic Billing**

FQHC and RHC providers may be reimbursed outside the encounter rate for the provision of home telemonitoring services if the services follow all requirements as outlined in this section and in the following subsections 3.7.1, "Prior Authorization of Telemonitoring Services," and 3.8.1, "Documentation Requirements."

Procedure code G0511 may be reimbursed to an FQHC or RHC for the provision of home telemonitoring services.

Initial equipment set up, patient education on use of equipment, monthly collection and transmission of physiologic data, and physician or requesting provider services must be billed by one provider under procedure code G0511.

Procedure code G0511 is reimbursed once per month, per client. The place of service code reported on the claim must reflect the physical location of the client. At least 16 days of data collection per month are required for reimbursement.

## **3.7 Prior Authorization**

Prior authorization is not required for telemedicine or telehealth services; however, it may be required for the individual procedure codes billed.

### **3.7.1 Prior Authorization of Telemonitoring Services**

Procedure code 99091 does not require prior authorization.

Procedure code S9110 with or without modifier U1 requires prior authorization. Home telemonitoring services may be approved for up to 180 days per prior authorization request.

Procedure code S9110 with modifier U1 can only be prior authorized once per episode of care even if monitoring parameters are added after initial setup and installation, unless the provider submits documentation that extenuating circumstances require another installation of home telemonitoring equipment.

Procedure code S9110 for the transmission of client data will be prior authorized no more than once per month for the duration of the prior authorization period.

Procedure code G0511 requires prior authorization and is reimbursed once per month when services are provided by FQHC and RHC providers. Modifiers are not required. Prior authorization requests that are submitted by home health agencies or hospital providers with procedure code G0511 will be denied.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician or requesting provider must provide correct and complete information, including documentation for medical necessity for the equipment, services or supplies requested. The physician or requesting provider and the home telemonitoring provider must maintain documentation of medical necessity in the client's medical record.

The initial request for prior authorization must be received no more than three business days from the date the home telemonitoring services are initiated. Requests received after the three-business day period will be denied for dates of service that occurred before the date the request was received.

Requests for additional home telemonitoring services received after the current prior authorization period ends will be denied for dates of service provided before the date the request was received.

Prior authorization requests for home telemonitoring must include all of the following:

- A completed Home Telemonitoring Services Prior Authorization Request Texas Medicaid form.
- The physician or requesting provider's signature dated within 30 days before the start of care.
- The frequency of the clinical data ordered by the physician or requesting provider.

An NP, CNS, or PA may sign the prior authorization request form. The NP, CNS, or PA's name, NPI, signature, and date must appear on the form.

The client's diagnoses or conditions and risk factors are necessary to qualify for home telemonitoring services.

For clients of any age who have diabetes or hypertension, at least one of the following risk factors will be required for approval of home telemonitoring services:

- Two or more hospitalizations in the previous 12-month period
- Frequent or recurrent emergency department visits
- A documented history of poor adherence to medication regimens
- Documented risk of falls
- A documented history of care access challenges

For clients who are 20 years of age or younger, one of the following conditions is required:

- End-stage solid organ disease
- Organ transplant recipient
- Mechanical ventilation

If the physician or requesting provider has not signed and dated the request form, the request must be accompanied by a written order or prescription that is signed and dated by the physician, or a complete verbal order from the physician. A complete written order or verbal order contains the following:

- Home telemonitoring transmission frequency
- The client's qualifying condition(s) and risk factors for home telemonitoring services.
- The ordered services including applicable procedure codes or descriptions.
- Dates of service matching or greater than those on the prior authorization request form.

If the initial setup and deployment is to be authorized, orders for initial requests must include the initial setup procedure code or description.

**Note:** *A verbal order is considered current when the date received is on, or no more than, 30 days before the start of home telemonitoring services for the requested authorization period. A written order or prescription is considered current when it is signed and dated on, or no more than, 30 days before the start of home telemonitoring services.*

A request received without a physician's or a requesting provider's signature, documented verbal order, or written prescription will not be approved and may be denied.

## 3.8 Documentation Requirements

Documentation for a telecommunication service must be the same as for a comparable in-person service.

### 3.8.1 Documentation Requirements for Telemonitoring Providers

Home telemonitoring providers, the home health agency, hospital, FQHC, or RHC must maintain all documentation in the client's medical record that shows:

- The home telemonitoring equipment is:
  - Capable of monitoring any data parameters included in the plan of care.
  - A Food and Drug Administration (FDA) Class II hospital-grade medical device.
  - Capable of measuring and transmitting the client's weight, oxygen levels in blood, glucose levels in blood, or blood pressure data.
- The monitoring equipment is being used, which must be demonstrated with data transmission information such as the:
  - Date of transmission.
  - Frequency of transmission.
  - Clinical data that was provided to the client's primary care physician or the requesting provider.
- The provider's staff is qualified to install the home telemonitoring equipment and to monitor the client's data, which will be transmitted according to the client's plan of care.
- No other provider is also monitoring the client's clinical data.
- Whether the client is able to operate the equipment or has a willing and able person to assist in completing electronic transmission of data. (Not required if the equipment does not require active participation from the client.)
- There are written protocols, policies, and procedures about the provision of the home telemonitoring services that are available to HHSC or its designee upon request and that they address the:
  - Authentication and authorization of users.
  - Authentication of the origin of client data transmitted.
  - Prevention of unauthorized access to the system or information.
  - System security, including the integrity of information that is collected, program integrity, and system integrity.
  - Maintenance of documentation about system and information usage.
  - Information storage, maintenance, and transmission.
  - Synchronization and verification of patient profile data.

## 4 Claims Filing and Reimbursement

### 4.1 Claims Information

Claims for telecommunication services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form or the UB-04 CMS-1450 paper claim form. Providers may purchase CMS-1500 paper claim forms or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

#### 4.1.1 Telemonitoring Services

Providers submitting claims for clients who have dual eligibility for Medicaid and Medicare must first submit their claims to Medicare for procedure code 99091. Claims for procedure code S9110 with any modifier should not be submitted to Medicare. Procedure code S9110 is not payable by Medicare.

### 4.2 Reimbursement

For fee information, providers can refer to the Online Fee Lookup (OFL) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

## 5 Claims Resources

| Resource                       | Location                                                                                                                                                     |

# 1 General Information

The information in this handbook is intended for optometrists (doctors of optometry), ophthalmologists, and opticians who render services related to the eye and vision and for hearing aid professionals (fitters and dispensers, physicians, and audiologists) who provide hearing evaluations or fitting and dispensing services. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

**Important:** *All providers are required to read and comply with subsection 4.1, "Enrollment" in this handbook. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook* (Vol. 2, Provider Handbooks).

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in section 8, "Carve-Out Services" in the *Medicaid Managed Care Handbook* (Vol. 2, Provider Handbooks).

## 1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, "Payment Window Reimbursement Guidelines" in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, Provider Handbooks) for additional information about the payment window reimbursement guidelines.

## 2 Nonimplantable Hearing Aid Devices and Related Services

### 2.1 Enrollment

To enroll in Texas Medicaid, hearing aid professionals (physicians, audiologists, and hearing aid fitters and dispensers) who provide hearing evaluations or fitting and dispensing services must be licensed by the licensing board of their profession to practice in the state where the service is performed. Hearing aid providers are eligible to enroll as individuals and facilities.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

#### 2.1.1 School Districts, State Agencies, and Inpatient Facilities

To be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss (other than audiology evaluation and therapy services reimbursed to School Health and Related Services [SHARS] providers), audiologists employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or group practitioners by choosing “Audiologist” on the enrollment application.

To be reimbursed for hearing aid devices and accessories, and fitting and dispensing visits and revisits, audiologists and hearing aid fitters and dispensers employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or facilities by choosing “Hearing Aid” on the enrollment application.

### 2.2 Services, Benefits, Limitations, and Prior Authorization

The Texas Medicaid hearing services benefit includes those services that are medically necessary for clients of any age who have suspected or identified hearing loss that can be improved or ameliorated using a hearing aid device. Such services may be reimbursed to audiologists or hearing aid fitters and dispensers.

**Note:** *Hearing-related services that are medically necessary because of a medical condition that cannot be improved or ameliorated using a nonimplantable hearing aid device are not considered part of the Texas Medicaid hearing services benefit. Providers may refer to the other Texas Medicaid Provider Procedures Manual Handbooks for benefit and limitation information about other hearing-related services.*

Texas Medicaid clients of any age are eligible to receive medically necessary hearing aid devices and services through the hearing services benefit outlined in the following sections. The Texas Medicaid hearing services benefit includes a broad range of hearing services for clients of all ages and reimburses providers who are appropriately enrolled with Texas Medicaid in accordance with their licensure and scope of practice. Prior authorization is not necessary for benefits within program limitations unless specifically addressed in the sections below.

The following hearing services are benefits of Texas Medicaid to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians according to their licensure, scope of practice, and enrollment as indicated:

- Audiologists and physicians may be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss.
- Hearing aid fitters and dispensers may be reimbursed for hearing aid devices and accessories and fitting and dispensing visits and revisits.
- Physicians may be reimbursed for physician otology and otorhinolaryngology (ENT) services.

Texas Medicaid clients whose jobs are contingent on their possessing a hearing aid or who appear to have vocational potential and who need a hearing aid may be referred to the Texas Workforce Commission (TWC) for hearing aids.

### 2.2.1 Limitations and Required Forms

All services provided to Texas Medicaid clients must be medically necessary. Unless otherwise specified, services may be reimbursed without prior authorization within the set limitations. In addition to services that always require prior authorization, providers may request prior authorization for medically necessary services that exceed benefit limitations.

Required forms, which are indicated in the specific sections below, are not required to be submitted with the claim, but the forms must be completed and maintained in the client's medical record and made available upon request by the Texas Health and Human Services Commission (HHSC) or the Texas Medicaid & Healthcare Partnership (TMHP) for retrospective review.

### 2.2.2 Hearing Screenings

Hearing screening provided due to client concern, or at the provider's discretion, is a benefit for clients of any age when the client is referred by a Medicaid-enrolled physician, and the screening is provided by a Medicaid-enrolled provider licensed to perform these services.

**Note:** *A nurse practitioner, clinical nurse specialist, or a physician assistant under physician supervision and delegation may also refer the client for hearing screening.*

Routine newborn hearing screenings and Texas Health Steps (THSteps) medical checkup hearing screenings are benefits for Texas Medicaid clients, and are included in the reimbursement for the routine service or visit.

#### 2.2.2.1 Routine Hearing Screenings

Routine hearing screenings that are required as part of the newborn hospital stay and as part of a THSteps medical checkup are included in the Texas Medicaid hearing services benefit. These routine screenings are not reimbursed to audiologists, hearing aid fitters and dispensers, or physicians.

##### Newborn Hearing Screen

The newborn hearing screening is included in the reimbursement to the hospital for the newborn hospital stay and is not reimbursed separately. A newborn hearing screening must be offered to each newborn by the facility where the birth occurs, through a program mandated by the Texas State Legislature and certified by the Texas Department of State Health Services (DSHS). The screening is covered as part of the newborn delivery. An infant born outside a birthing facility and not admitted to a birthing facility shall be referred to a facility that provides newborn hearing screening. If a facility is not required by legislative mandate to perform newborn hearing screening, a referral must be made to a facility that offers the screening.

**Referto:** Subsection 4.3.10, "Newborn Examination" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information about the newborn hearing screening.

##### THSteps Medical Checkup Hearing Screen

Hearing screening is a required component of the THSteps medical checkup, and a standardized audiometric hearing screening is required at specific ages according to the periodicity schedule.

**Referto:** The THSteps Medical Checkups Periodicity Schedule including the footnotes, which is available on the [Texas HHS website](#), for coverage criteria when performed as part of a THSteps medical checkup.

Subsection 4.3.12.2.3, "Hearing Screening" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information on THSteps checkup hearing screening.

#### 2.2.2.2 Additional Hearing Screenings

A hearing screening requested outside of a routine newborn or THSteps medical checkup may be reimbursed as medically necessary without prior authorization using procedure code 92551.

Further diagnostic testing may also be reimbursed using the appropriate procedure code as indicated in subsection 2.2.3, “Audiology and Audiometry Evaluation and Diagnostic Services” in this handbook.

**2.2.2.3 Abnormal Hearing Screening Results**

If the screening returns abnormal results, the client must be referred to a Texas Medicaid-enrolled provider who is a licensed audiologist or physician who provides audiology services. Clients who are 20 years of age or younger and have abnormal screening results must be referred to a Texas Medicaid-enrolled provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

The referring physician who performs the screening must complete the Physician’s Examination Report, which is maintained in the client’s medical record. A new Physician’s Examination Report must be completed whenever there is a change in the client’s hearing or a new hearing aid is needed. Retro-spective review may be performed to ensure documentation supports the medical necessity of the service.

In addition to being referred to an appropriate provider for further testing, clients who are 35 months of age and younger and have suspected hearing loss must be referred to Early Childhood Intervention (ECI) as soon as possible but no longer than 7 days after identification, even if the client was referred to an appropriate provider for further testing.

The client’s responsible adult may refuse to permit the referral or decline ECI services at any time. The provider must document the client’s responsible adult’s decision in the client’s medical record.

**Referto:** Subsection 2.9, “Early Childhood Intervention (ECI) Services” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about ECI.

**2.2.3 Audiology and Audiometry Evaluation and Diagnostic Services**

Audiometry is a benefit of Texas Medicaid for clients of any age. Physicians must recommend hearing evaluations based on examination of the client. Only physicians or licensed audiologists will be reimbursed for hearing evaluations. Hearing aid fitters and dispensers are not reimbursed for hearing evaluations.

**Important:** *The date of service for audiology and audiometry evaluations and diagnostic services is the date the service is rendered to the client. The date of service that is billed on the claim must match the date of service that is documented in the client’s medical record.*

The following audiometry procedure codes are benefits of Texas Medicaid for a basic comprehensive audiometry survey:

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 92550           | 92551 | 92552 | 92553 | 92555 | 92556 | 92557 |  |  |  |

The following additional procedure codes may be benefits for audiometric testing:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92558           | 92563 | 92565 | 92567 | 92568 | 92570 | 92571 | 92572 | 92575 | 92576 |
| 92578           | 92579 | 92582 | 92583 | 92584 | 92587 | 92588 | 92650 | 92651 | 92652 |
| 92653           |       |       |       |       |       |       |       |       |       |

**Referto:** The appropriate Texas Medicaid fee schedule on the TMHP web site at [www.tmhp.com](http://www.tmhp.com) for procedure codes that may be reimbursed to individual types of providers.

Automated auditory brainstem response (AABR) and otoacoustic emissions (OAE) are benefits for clients of any ages when performed to identify and diagnose hearing loss and for newborns when performed for the purpose of a newborn hearing screening.

**Note:** AABR and OAE tests performed as part of the newborn hearing screen are reimbursed as part of the hospital visit and are not reimbursed separately.

### 2.2.3.1 Otological Examinations

Otological examinations are a benefit when medically necessary and provided by a Medicaid-enrolled physician licensed to perform this service.

Procedure codes 92504 and 92505 are benefits for otological examinations.

An otological examination may also include physician evaluation and management (E/M) services provided to diagnose or treat medical conditions.

**Referto:** Subsection 9.2.60.3, “Group Clinical Visits” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about medically necessary physician E/M services.

### 2.2.3.2 Vestibular Evaluations

Vestibular evaluations are a benefit when medically necessary and provided by a Medicaid-enrolled physician or nonphysician provider licensed to perform this service.

The following procedure codes for vestibular evaluations are benefits:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92531           | 92532 | 92533 | 92534 | 92537 | 92538 | 92540 | 92541 | 92542 | 92544 |
| 92545           | 92546 | 92547 |       |       |       |       |       |       |       |

### 2.2.3.3 Evaluative and Therapeutic Services

The following procedure codes may be reimbursed for evaluative and therapeutic services:

| Procedure Codes |       |       |  |  |  |  |  |  |  |
|-----------------|-------|-------|--|--|--|--|--|--|--|
| 92620           | 92621 | 92625 |  |  |  |  |  |  |  |

Audiology providers may be reimbursed for services rendered in the office setting for procedure code 92621.

### 2.2.3.4 Intraoperative Neurophysiology Monitoring (IONM)

Audiology providers may be reimbursed for performing intraoperative neurophysiology monitoring (IONM) with the following procedure codes:

| Procedure Codes |       |  |  |  |  |  |  |  |  |
|-----------------|-------|--|--|--|--|--|--|--|--|
| 95940           | 95941 |  |  |  |  |  |  |  |  |

**Referto:** Section 9.2.28.3, “Evoked Potential Testing” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about intraoperative neurophysiology monitoring.

### 2.2.3.5 Forms and Documentation

Providers of hearing evaluations must have a report in the client’s record. Providers must include in the report hearing evaluation test data. The Hearing Evaluation and Fitting and Dispensing Report (Form 3503) must be completed by the physician or audiologist who conducts the diagnostic testing. The provider who signs the report must maintain it in the client’s file. The report includes audiometric

assessment results of the hearing evaluation and must provide objective documentation that amplification improves communication ability. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

For physician diagnostic hearing services (procedure codes 92502, 92504, 92540, 95940, and 95941), providers must maintain documentation of medical necessity in the client's medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

### **2.2.3.6 Prior Authorization**

Hearing screening and testing services do not require prior authorization. Documentation of medical necessity must be maintained by the provider in the client's medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Providers should use the [Special Medical Prior Authorization \(SMPA\) Request Form](#) for all prior authorization requests.

### **2.2.3.7 Limitations**

Newborn hearing screenings provided during the birth admission are considered part of the newborn delivery payment to the facility and are not reimbursed as separate procedures.

An otological examination is a benefit of Texas Medicaid when medically necessary and provided by a Medicaid-enrolled physician licensed to perform this service.

An otological examination may also include physician E/M services provided to diagnose or treat medical conditions.

**Referto:** Subsection 9.2.60.3, "Group Clinical Visits" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about medically necessary physician E/M services.

Audiometry survey procedure codes and evoked potential and otoacoustic emissions screening procedure codes may be reimbursed once per day.

Procedure codes 92551, 92552, and 92553 for pure tone audiometry are limited to one of any of these procedure codes per day, same provider, same client.

Procedure codes 92553 and 92556 are not reimbursed on the same day by the same provider for the same client. If both procedure codes are billed for the same date of service, same provider, and same client, they are denied with instructions to bill with the more appropriate, comprehensive audiometry procedure code 92557.

Procedure codes 92558, 92587, 92588, 92650, 92651, 92652, and 92653 may be reimbursed once per day, same provider, same client, assuming testing is done in both ears and must be billed with modifier 52 if the testing is only performed on one ear.

Procedure codes 92620, 92621, and 92625 may be reimbursed to the same provider four times each per rolling year. Providers must submit a prior authorization request for additional reimbursement of either procedure code.

#### 2.2.3.7.1 Tympanometry

Tympanometry (procedure code 92567) must be limited to selected individual cases where its use demonstrably adds to the provider's ability to establish a diagnosis and provide appropriate treatment. Tympanometry is limited to three services per rolling year when billed by any provider and is based on medical necessity, which must be documented in the client's medical record.

#### 2.2.3.7.2 Electrical Testing

Electrical testing may be reimbursed for services rendered to clients of any age.

Electrical testing (procedure code 92547) must be billed with the same date of service by the same provider as procedure codes 92540, 92541, 92542, 92544, 92545, or 92546.

#### 2.2.3.7.3 Vestibular Evaluation

Vestibular evaluation is a benefit of Texas Medicaid when medically necessary and provided by a provider who is licensed to provide this service.

Hearing pathway tests such as audiometry, AABR, and electrocochleography (ECoG) can also be used for the same purpose and are frequently combined with vestibular tests.

#### 2.2.3.7.4 AABR and OAE Hearing Screening Services

An electroencephalogram (EEG) may be reimbursed for the same date of service as evoked response testing by any provider.

Procedure code 92591 may be reimbursed as often as is medically necessary.

Texas Medicaid may reimburse physicians for ear and throat examination procedure codes 92502, 92504, and 92540. Audiologists will not be reimbursed for these services.

**Referto:** Subsection 9.2.60, "Physician Evaluation and Management (E/M) Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about these services.

Procedure codes 95940 and 95941 may be reimbursed in addition to each evoked potential test. Procedure codes 95940 and 95941 are limited to a maximum of 2 hours per day, per client, any provider, without documentation of medical necessity. Procedure codes 95940 and 95941 cannot be reported by the surgeon or anesthesiologist.

### 2.2.3.8 SHARS Audiology Services

Audiology services may be reimbursed to school districts and state agencies that are enrolled with Texas Medicaid as SHARS providers.

**Referto:** Subsection 2.3.1 \*, "Audiology Services" in the *School Health and Related Services (SHARS) Handbook (Vol. 2, Provider Handbooks)* for more information about SHARS services.

Other hearing evaluation, diagnostic, and hearing aid services may be reimbursed to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians as outlined in this section.

### 2.2.3.9 Noncovered Services

Texas Medicaid does not reimburse for a hearing screening completed in a day care, Head Start location, or a school, unless it is performed in a school-based health clinic as follow-up to an acute care medical visit. Separate procedure codes must not be billed for these services.

### 2.2.4 Hearing Aid Devices and Accessories (Nonimplantable)

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following devices and accessories:

| Service                 | Limitation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

Replacement ear molds may be reimbursed as often as is medically necessary without prior authorization. Documentation of medical necessity must be maintained in the client's medical record.</p> <p><b>Procedure codes:</b> V5264 and V5265</p> <p><b>Date of service:</b> The date of service for the ear mold is the date the ear mold is dispensed to the client.</p> |
| Batteries (Replacement only) | <p><b>Limitation:</b> Replacement batteries may be reimbursed as often as is medically necessary when a hearing aid device has been previously reimbursed by Texas Medicaid.</p> <p><b>Note:</b> <i>If a hearing aid has not been reimbursed by Texas Medicaid in the last 5 years, the replacement batteries may be reimbursed on appeal with a statement that documents medical necessity.</i></p> <p><b>Procedure code:</b> V5266</p> <p><b>Date of service:</b> The date of service is the date the client receives the replacement batteries.</p>                                                                                                                                                                                                                   |

The following monaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements that are rendered to clients of any age when they are billed with the appropriate modifier LT or RT to indicate for which ear the hearing aid device was purchased and fitted:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| V5030           | V5040 | V5244 | V5245 | V5246 | V5247 | V5254 | V5255 | V5256 | V5257 |
| V5298           |       |       |       |       |       |       |       |       |       |

Procedure codes V5171, V5172, and V5181 may be reimbursed for monaural hearing aids that are rendered to clients who are 20 years of age and younger only.

The following binaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements that are rendered to clients who are 20 years of age and younger:

| V5100 | V5211 | V5212 | V5213 | V5214 | V5215 | V5221 | V5249 | V5250 | V5251 |
|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| V5252 | V5253 | V5258 | V5259 | V5260 | V5261 |       |       |       |       |

Binaural hearing aid procedure codes must be submitted with a quantity of 1 per procedure code. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for reimbursement rates.

**Referto:** Subsection 2.4.2, "Reimbursement" in this handbook for more information about manual pricing.

### 2.2.4.1 Forms and Documentation

Monaural hearing aids may be reimbursed for clients who have no medical contraindication for using a hearing aid and who have documentation of medical necessity. The following documentation of medical necessity must be maintained in the client's medical record:

- Hearing loss in the better ear of 35 dB or greater for the pure tone average of 500, 1000, 1500, and 2000 Hz, or a spondee threshold in the better ear of 35 dB or greater when pure tone thresholds cannot be established
- Documentation of communication need and a statement that the patient is alert and oriented and able to use the device appropriately by themselves or with assistance

Clients who are 21 years of age and older must meet the medical necessity criteria outlined above and have at least a 35 dB hearing loss in both ears to qualify for the purchase of a monaural hearing aid device.

Clients who are 20 years of age and younger must meet the medical necessity criteria outlined above and have at least a 35 dB hearing loss in both ears to qualify for the purchase of binaural hearing aid devices.

Claims for non-implantable hearing aid devices must be submitted with a manufacturer invoice showing the net acquisition cost of the non-implantable hearing aid device.

An invoice printed from an email or the Internet will not be accepted and should not be submitted with the claim as documentation to show the net acquisition cost of the hearing aid device unless the invoice reflects the actual price the provider paid for the hearing aid device.

**Note:** *The requirement to submit the net acquisition cost of the hearing aid device applies only to non-implantable monaural and binaural hearing aid devices including, but not limited to, procedure code V5298.*

**Referto:** Subsection 6.3.1.1, "Place of Service (POS) Coding" in "Section 6: Claims Filing" (Vol. 1, *General Information*) for more information about coding place of service for other locations.

### 2.2.4.2 Prior Authorization

Prior authorization is not required for medically necessary hearing aid devices and supplies that are provided within the limitations outlined in the table above.

Prior authorization is required for the following:

- *Replacement hearing aid devices that are required within the same 5-year period.* A replacement hearing aid device may be considered for prior authorization when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and measures to be taken to prevent reoccurrence must be submitted with the prior authorization request. Replacements will not be authorized when the equipment has been abused or neglected by the client, the client's family, or the caregiver.
- *Hearing aid repair in excess of one per rolling year.* The prior authorization request must include documentation supporting the need for the requested repair.
- *Hearing aid accessories for clients who are birth through 20 years of age.* Requests for prior authorization for children's hearing aid accessories including, but not limited to, chin straps, clips, boots, and headbands will be considered when the requests are submitted with documentation that shows that the client is birth through 20 years of age and that the requested supply is medically necessary for the proper use or functioning of the hearing aid device.
- *Hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age (using procedure code V5298).*

The prior authorization request must include:

- The medical necessity for the requested hearing aid device.

- The name of the manufacturer.
- The model number, serial number, and the dates that the warranty is in effect for the requested hearing aid.
- Additional medically necessary repairs or modifications beyond 1 per year.  
For additional repairs or modifications, requests for prior authorization must include documentation that supports the need for the requested repair.

For services that require prior authorization, prior authorization must be obtained before the services are rendered. The prior authorization number must be included on the claim form when the claim is submitted to TMHP.

Prior authorization requests must be submitted to the TMHP Special Medical Prior Authorization (SMPA) Department with documentation that supports medical necessity for the requested device, service, or supply. Authorization may be submitted on the TMHP website at [www.tmhp.com](http://www.tmhp.com) or by fax to 1-512-514-4213.

**Important:** *For clients who are birth through 20 years of age, if the authorization request is denied because it does not meet benefit criteria, the TMHP SMPA Department will refer the request to the TMHP Comprehensive Care Program (CCP) Department for consideration under CCP. The provider is not required to complete additional forms or request referral to the TMHP CCP Department.*

Providers may use the form of their choice to submit the required information to the TMHP SMPA Department. No specific request form is required.

**Referto:** “Section 6: Claims Filing” (Vol. 1, General Information) for more information about the authorizations and claims filing processes.

### 2.2.4.3 Limitations

The following services and supplies must be provided to Texas Medicaid clients if a nonimplantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting/implantation of the device
- The re-assessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

Hearing devices are a benefit for clients of any age. Some types of hearing devices are age restricted.

A hearing aid dispensed through Texas Medicaid must meet the following criteria:

- Be a new and current model
- Meet the performance specifications indicated by the manufacturer
- Include, at minimum, a standard 12-month warranty that begins on the dispensing date of the hearing aid.

Providers must dispense each hearing aid reimbursed through Texas Medicaid with all necessary hearing aid accessories and supplies, including a 1-month supply of batteries. The reimbursement for monaural and binaural procedure codes includes the required hearing aid package as follows, and no separate reimbursement will be made for these items:

- Acquisition cost of the hearing aid (the actual cost or net cost of the hearing aid after any discounts or rebates have been deducted)

- Manufacturer's postage and handling charges, including shipping insurance
- All necessary hearing aid accessories or supplies
- Instructions for care and use
- A 1-month supply of batteries

**Note:** TMHP does not supply the hearing aid devices, supplies, and accessories. Providers must purchase equipment directly from manufacturers and submit claims to TMHP for reimbursement using the appropriate procedure codes.

Procedure code V5298 may be reimbursed with prior authorization for hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age.

Services for residents in a skilled nursing facility (SNF), intermediate care facility (ICF), or extended care facility (ECF) must be ordered by the attending physician. The order must be on the client's chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

### 2.2.5 Hearing Aid Services

The following additional hearing aid related procedures are benefits for services that are rendered to clients of any age:

| Procedure Codes |       |       |       |       |       |       |       |       |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|--|
| 92590           | 92592 | 92594 | V5010 | V5011 | V5264 | V5265 | V5266 | V5275 |  |

The following additional hearing aid related procedures are benefits for services that are rendered to clients who are 20 years of age and younger only:

| Procedure Codes |       |       |  |  |  |  |  |  |  |
|-----------------|-------|-------|--|--|--|--|--|--|--|
| 92591           | 92593 | 92595 |  |  |  |  |  |  |  |

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following services:

| Service                       | Limitation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fitting and dispensing visits | <p><b>Limitation:</b> 1 fitting per hearing aid procedure code per 5 rolling year period, regardless of the number of times a device is returned as unacceptable during a 30-day trial period</p> <p><b>Procedure code:</b> V5011</p> <p><b>Limitation:</b> 1 dispensing fee each time a hearing aid is dispensed and a new 30-day trial period begins</p> <p><b>Procedure codes:</b> V5090 and V5241 (for clients of any age) and V5110, V5160, V5200, and V5240 (for clients who are 20 years of age and younger)</p> <p>The dispensing fee may be reimbursed separately from the fitting of the hearing aid.</p> <p>The post-fitting check is included in the reimbursement for the dispensing procedure and is not reimbursed separately.</p> |

| Service    | Limitation                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Revisit(s) | <p><b>Limitation:</b> 2 per calendar year when billed by any provider</p> <p><b>Procedure codes:</b> 92592 (first and second revisits for monaural fittings for clients of any age) and 92593 (first and second revisits for binaural fittings for clients who are 20 years of age and younger)</p> <p>Hearing aid revisits are limited to a total of two per calendar year by any provider. Additional hearing aid checks may be reimbursed with prior authorization.</p> |

### 2.2.5.1 Forms and Documentation

The forms and documentation required for the fitting and dispensing visits are as follows:

- Physician's Examination Report—The referring physician who performs the screening must complete the Physician's Examination Report, which is maintained in the client's medical record.
 

***Note:** An advanced practice registered nurse (APRN) or a physician assistant (PA) under physician supervision and delegation may also complete the Physician's Examination Report.*
- Hearing Evaluation and Fitting and Dispensing Report (Form 3503)—The Hearing Evaluation and Fitting and Dispensing Report (Form 3503) must be completed by the fitter/dispenser that conducts the fitting and dispensing visit. The provider who signs the report must maintain it in the client's file. The report includes audiometric assessment results of the hearing evaluation and must provide objective documentation to support improved communication ability with amplification. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.
- Client Acknowledgement Statement (created by the provider)—At the time the hearing aid device and supplies are dispensed, the client must sign a client acknowledgement statement to verify the client was evaluated and offered an appropriate hearing aid that meets the client's hearing need. The acknowledgement statement must include language that indicates the client is responsible for paying any hearing aid rental fees if charged. The provider must obtain the signed acknowledgment statement before dispensing the hearing aid device and supplies and must keep the signed acknowledgment statement in the client's file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.
- Prior to dispensing a hearing instrument, a provider must enter into a written contract with the client that meets the Texas Department of Licensing and Regulation (TDLR) rule requirements in 16 TAC §112.140. The signed contract should verify that:
  - The client has a 30-day trial period for the hearing aid.
  - If the client is not satisfied with the purchased hearing aid, the client may return it to the provider within the 30-day trial period. If the device is returned within the 30-day trial period, the provider may charge the client a rental fee not to exceed \$2.00 per day. This fee is not a benefit of Texas Medicaid. The 30-day trial period and any charged rental fee must meet TDLR rule requirements in 16 TAC §112.140.
  - The contract must be executed prior to dispensing and must be maintained in the client's file.
  - The client must receive a copy of the executed contract.
  - All charges and fees associated with the trial period must be stated in the contract, which shall also include the name, address, and telephone number of TDLR.

After at least 30 days and the successful completion of the trial period, the provider must update the statement to indicate that the trial was successful and the client accepted the dispensed hearing aid device. The updated statement must be maintained in the client's file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

For hearing aids that are dispensed in a provider's office, if a client fails to return by the end date of the trial period, the provider must contact the client. After 3 attempts have been made, if the client does not return to the provider's office, the provider must document all attempts to contact the client and must maintain this documentation in the client's file. Retrospective review may be performed to ensure documentation supports the contact attempts and the client's failure to return to the provider's office. This requirement does not apply for services that are rendered to clients who receive hearing aids in other places of service (i.e., nursing homes).

### **2.2.5.2 Prior Authorization**

Prior authorization is not required for fitting and dispensing visits and revisits.

### **2.2.5.3 Limitations**

The following hearing aid visits may be reimbursed by Texas Medicaid:

- The fitting and dispensing visits that encompass a 30-day trial period and include a post-fitting check 5 weeks after the trial period has been successfully completed
- A first revisit as needed after the post-fitting check
- A second revisit as needed after the first revisit
- Additional hearing aid checks may be reimbursed within a period of six months after a second revisit. Providers must submit a prior authorization request and documentation of medical necessity for the additional hearing aid checks.

The fitting visit includes the fitting, dispensing, and post-fitting check of the hearing aid. A trial period of up to 30 days is authorized by *Texas Occupations Code* §402.401. The 30-day trial period, and any charged rental fee, must meet the Texas Department of Licensing and Regulation (TDLR) rule requirements in 16 TAC §112.140.

Providers must allow each Texas Medicaid client a 30-consecutive-day trial period that begins with the dispensing date. This trial period gives the client time to determine whether the hearing aid device meets the client's needs. If the client is not satisfied with the purchased hearing aid, the client may return it to the provider, who must accept it. If the device is returned within 30 days of the date it was dispensed, the provider may charge the client a rental fee not to exceed \$2 per day. This fee is not a benefit of Texas Medicaid and will not be reimbursed. The client is responsible for paying the hearing aid rental fees if the provider chooses to charge a fee for the rental of returned hearing aid devices.

During the trial period, providers may dispense additional hearing aids as medically necessary until either the client is satisfied with the results of the hearing aid or the provider determines that the client cannot benefit from the dispensing of another hearing aid. The dispensing date of each additional hearing aid starts a new trial period.

The licensed audiologist or fitter/dispenser must perform a post-fitting check of the hearing aid within 5 weeks of the initial fitting.

The first and second revisits are available if additional visits are required after the post-fitting check.

- *First revisit.* The first revisit must include a hearing aid check.

- *Second revisit.* The second revisit is available as needed after the post-fitting check and first revisit. The second revisit must include either a real ear measurement or aided sound field testing according to the guidelines specified for the hearing evaluation. If the aided sound field test scores suggest a decrease in hearing acuity, the provider must include pure tone and speech audiometry readings from the first evaluation.

Services for residents in an SNF, ICF, or ECF must be ordered by the attending physician. The order must be on the client's chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

Home visit hearing evaluations and fittings are permitted only with documentation of client need in the physician's, advanced practice registered nurse (APRN) or a physician assistant (PA) written order.

**Note:** *APRN or a PA under physician supervision and delegation may also perform the evaluation.*

## 2.3 Documentation Requirements

All services, including hearing services, require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

Required forms for nonimplantable hearing devices and services, which are indicated in the specific sections above, are not submitted with the claim to TMHP, but the forms must be completed and maintained in the client's medical record and made available upon request by HHSC or TMHP for retrospective review.

## 2.4 Claims Filing and Reimbursement

### 2.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 1.7.12, "Billing Clients" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

"Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Providers must file all claims electronically or on the appropriate Centers for Medicare & Medicaid Services (CMS) paper claim form after providing the services.

**Exception:** *Claims for non-implantable hearing aid devices must be submitted on the CMS-1500 paper claim form because electronic claim submissions do not allow for the submission of attachments.*

Claims must include the following information:

- The most appropriate *International Classification of Diseases*, Tenth Revision, Clinical Modification (ICD-10-CM) diagnosis code that represents the purpose for the service.
- The most appropriate Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code(s) that represent the service(s) provided.
- The appropriate information as indicated on the provider enrollment letter (Electronic claims must also include the most appropriate attested taxonomy code.)

**Note:** *For Texas Medicaid managed care clients, all hearing aid benefits and otology, and audiometry services are administered by the client's Medicaid managed care organization (MCO).*

#### **2.4.1.1 Non-implantable Hearing Aid Devices**

To be reimbursed for a non-implantable hearing aid device, providers must submit documentation with the paper claim showing their cost for the hearing aid device. The Texas Health and Human Services Commission (HHSC) requires providers to submit non-implantable hearing aid claims using the CMS-1500 paper claim form because electronic claim submissions do not allow for the submission of attachments.

Providers must use the net acquisition cost as the amount billed on the claim. The net acquisition cost is the actual price the provider paid for the device, including the wholesale cost plus sales tax, shipping and handling, and any reductions resulting from discounts or rebates. Providers must not use usual and customary fees as the amount billed.

The documentation submitted with the claim must be a manufacturer invoice showing the net acquisition cost of the non-implantable hearing aid device. An original invoice that includes the manufacturer name, model number, serial number, and warranty expiration date must be submitted. Invoice templates will not be accepted.

An invoice printed from an email or the Internet will not be accepted and should not be submitted with the claim as documentation to show the net acquisition cost of the hearing aid device unless the invoice reflects the actual price the provider paid for the hearing aid device.

#### **2.4.1.2 Third Party Liability**

Standard third party liability (TPL) rules apply to all hearing services claims.

**Referto:** "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*).

#### **2.4.2 Reimbursement**

Hearing aid devices and all hearing and audiological services are reimbursed in accordance with 1 TAC §355.8141. To be reimbursed for both audiology services and hearing aid fitting and dispensing services, audiologists must enroll with Texas Medicaid as audiologists and also as hearing aid fitters and dispensers. Audiology services must be billed using the audiologist provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates "Audiologist," and hearing aid and fitting and dispensing services must be billed with the hearing aid provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates "Hearing Aid."

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider's documented invoice cost if there is no MSRP available.

Manually priced items are indicated with "Note Code 5" in the Texas Medicaid fee schedule.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

Providers may refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### **2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines**

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

### **3 Implantable Hearing Devices and Related Services**

#### **3.1 Enrollment**

To enroll in Texas Medicaid, hearing services professionals who provide implantable hearing devices and services must be appropriately enrolled according to their licensure and scope of practice.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

#### **3.2 Services, Benefits, Limitations and Prior Authorization**

Implantable hearing devices, including the cochlear implant device, the auditory brainstem implant (ABI), and the bone anchored hearing device (BAHD), are benefits of Texas Medicaid for clients of all ages.

The following services and supplies must be provided to Texas Medicaid clients if an implantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting of the device
- The reassessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

Hearing devices are a benefit for clients of any age. Some types of hearing devices are age restricted.

### 3.2.1 Cochlear Implants

The following procedure codes may be reimbursed for the cochlear implant device, separate components, and services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 69930           | L7368 | L8499 | L8614 | L8615 | L8616 | L8617 | L8618 | L8619 | L8621 |
| L8622           | L8623 | L8624 | L8627 | L8628 | L8629 |       |       |       |       |

The following procedure codes may be reimbursed for diagnostic analysis of the cochlear implant:

| Procedure Codes |       |       |       |  |  |  |  |  |  |
|-----------------|-------|-------|-------|--|--|--|--|--|--|
| 92601           | 92602 | 92603 | 92604 |  |  |  |  |  |  |

**Note:** ASCs are paid based on a global fee, with the exception that certain pieces of equipment may be reimbursed separately from the ASC or HASC global rate.

#### 3.2.1.1 Prior Authorization

Prior authorization is required for the following:

- Cochlear implant surgery, device, and replacement parts
- Sound processor repair or replacement
- Battery recharger unit
- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted by the provider to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

**Note:** Requests for clients who are 20 years of age or younger who do not meet the medical necessity criteria may be considered through Comprehensive Care Program (CCP).

Documentation submitted for review must indicate who will be providing the cochlear implant device (i.e., the facility or the Durable Medical Equipment (DME) or medical supplier). The supplier's provider number must be included on the prior authorization request.

Prior authorization for a unilateral or bilateral cochlear implant may be granted for clients who are 9 months of age and older with documentation of all of the following criteria:

- Cognitive ability to use auditory cues and written documentation of agreement by the client or the client's parent or guardian that the client will participate in a program of post-implantation auditory rehabilitation. This documentation must be maintained in the client's medical record.
- Postlingual deafness or prelingual deafness.
- Freedom from middle-ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system.
- No contraindications to surgery.
- Inability to derive benefit from appropriately fitted hearing aid devices.
- Documentation of poor speech discrimination and a recommendation for cochlear implant candidacy and the most appropriate ICD-10-CM diagnoses for severe-to-profound bilateral sensorineural hearing loss.

The initial lithium-ion battery recharger unit, additional medically necessary units, and additional replacement batteries beyond the limitations indicated in the following sections may be reimbursed with prior authorization. Documentation must be submitted with the prior authorization request to support medical necessity for the request.

**Referto:** Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients’ responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

### 3.2.1.2 Limitations

#### Surgery

Procedure code 69930 with the appropriate modifier LT or RT may be reimbursed for unilateral cochlear implantation. Procedure code 69930 with modifier 50 may be reimbursed for bilateral cochlear implantation performed simultaneously.

#### Device and Components

Procedure codes L8627, L8628, and L8629 for the cochlear implant device and components may be reimbursed for clients who are 9 months of age and older as follows:

- The device must be approved by the Food and Drug Administration (FDA) and be age-appropriate for the client.
- One per day may be reimbursed with prior authorization.

The cochlear implant device and the surgery to implant the device may be reimbursed separately.

#### Replacement Batteries and Related Items

Replacement batteries and related items for the cochlear implant device include non-rechargeable batteries, rechargeable batteries, and recharger units as follows:

| Procedure Code                                                        | Prior Authorization | Limitation                               |
|-----------------------------------------------------------------------|---------------------|------------------------------------------|
| L8621 (Zinc air non-rechargeable)                                     | Not required        | Maximum of 50 per month                  |
| L8622 (Alkaline non-rechargeable)                                     | Not required        | Maximum of 31 per month                  |
| L8623 (Lithium-ion rechargeable)                                      | Not required        | 2 batteries per calendar year            |
| L8624 (Lithium-ion rechargeable)                                      | Not required        | 2 batteries per calendar year            |
| L7368 (Battery recharger unit for lithium-ion rechargeable batteries) | Required            | 1 replacement unit every 5 rolling years |

Replacement batteries for clients with bilateral cochlear implants and two sound processors may be reimbursed when billed with the applicable battery procedure code and the appropriate LT or RT modifier.

Replacement batteries for the cochlear device are limited to clients with a cochlear implant procedure, device, or supply that has been billed within the past five rolling years. Replacement batteries for clients who did not receive the cochlear implant through Texas Medicaid will be considered for reimbursement on appeal with a physician’s statement documenting medical necessity.

Additional batteries and lithium-ion battery recharger units beyond these limitations may be reimbursed with prior authorization.

3.2.1.3 Auditory Rehabilitation

Auditory rehabilitation is a benefit of Texas Medicaid when it is medically necessary for clients who have received a surgically implanted hearing device, or who have prelingual or postlingual hearing loss when the treating physician has determined that auditory rehabilitation would be beneficial.

The following procedure codes may be reimbursed for auditory rehabilitation:

| Procedure Codes |       |       |       |  |  |  |  |  |  |
|-----------------|-------|-------|-------|--|--|--|--|--|--|
| 92626           | 92627 | 92630 | 92633 |  |  |  |  |  |  |

One auditory rehabilitation evaluation and 12 visits per 180 day period may be reimbursed without prior authorization. Additional visits during a six rolling month period for clients who are 12 months of age through 20 years of age require prior authorization.

Procedure code 92627 is an add-on procedure and must be billed with the primary procedure code 92626 to be considered for reimbursement.

Procedure code 92627 may be reimbursed up to four times per day to the same provider.

**Note:** Additional therapy services may be a benefit through the Texas Medicaid speech therapy benefit.

**Referto:** The *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook* (Vol. 2, *Provider Handbooks*) for information about speech therapy.

Personal frequency modulated (FM) systems are not benefits of Texas Medicaid.

3.2.2 Auditory Brainstem Implant (ABI)

The following procedure codes may be reimbursed for the ABI, related components, and services:

| Procedure Codes |       |       |       |       |       |  |  |  |  |
|-----------------|-------|-------|-------|-------|-------|--|--|--|--|
| 92640           | L8499 | L8614 | L8621 | L8622 | S2235 |  |  |  |  |

3.2.2.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- ABI surgery, device, and replacement parts
- Sound processor repair or replacement
- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Prior authorization requests and claims for ABI is limited to clients with a condition of neurofibromatosis, type II or Schwannomatosis.

**Referto:** Subsection 2.2.1, “Limitations and Required Forms” in this handbook for additional information about replacement batteries.

Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

3.2.2.2 Limitations

ABI is a benefit for clients who are 12 years of age and older.

Diagnostic analysis of the ABI (procedure code 92640) is limited to 2 hours per day when billed by any provider.

Zinc air batteries (procedure code L8621) are limited to a maximum of 50 per month. Alkaline batteries (procedure code L8622) are limited to a maximum of 31 per month.

Non-rechargeable batteries (procedure codes L8621 and L8622) do not require prior authorization. Procedure codes L8621 and L8622 must be billed using a left (LT) or right (RT) modifier. Since the ABI is not ear-specific, procedure codes L8621 and L8622 may be billed using either the LT or RT modifier.

Replacement batteries for the ABI are limited to clients with an ABI surgical procedure, device, or replacement part that has been billed within the past 5 rolling years. Replacement batteries for clients who did not receive their ABI through Texas Medicaid are considered for reimbursement on appeal with a physician's statement documenting medical necessity.

### 3.2.3 Bone-Anchored Hearing Device (BAHD)

The following procedure codes must be submitted for the BAHD and related components:

| Procedure Codes |       |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 69714           | 69716 | 69717 | 69719 | 69726 | 69727 | 69728 | 69729 | 69730 | 92622 | 92623 |
| L8625           | L8690 | L8691 | L8692 | L8693 | L8694 | V5266 |       |       |       |       |

#### 3.2.3.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- BAHD implant surgery, revision, device, and replacement parts
- Sound processor repair or replacement

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Providers should use the [Special Medical Prior Authorization \(SMPA\) Request Form](#) for all prior authorization requests.

Prior authorization requests may be granted for clients who are 5 years of age and older with all of the following:

- Documentation of previous attempts at hearing aid devices and why these devices are inadequate or have failed
- Documentation of scores on hearing tests for bone conduction thresholds and on maximum speech discrimination
- Documentation of audiological testing showing good inner ear function
- Documentation of a multidisciplinary assessment including physical, cognitive, communicative, and behavioral limitations describing the client's auditory disability and expected benefit with use of the BAHD implant
- Documentation of an appropriate diagnosis.

Benefit-eligible conditions may include, but are not limited to the following:

- Conductive hearing loss
- Sensorineural hearing loss
- Other anomalies of external ear with impairment of hearing
- Anomalies of skull and face bones

**Referto:** Subsection 3.2.4, "Sound Processor Replacement and Repair" in this handbook for more information about sound processor repair or replacement.

### **3.2.3.2 Limitations**

Implanted BAHDs are a benefit for clients who are 5 years of age and older.

A BAHD sound processor that is specifically worn on a soft headband is a benefit for clients five years old or younger. If chosen by a client, a BAHD sound processor worn on a soft headband is also a benefit for clients who are five years of age or older. The BAHD sound processor is not implanted. A BAHD sound processor worn on a soft headband may be reimbursed using procedure code L8692.

Replacement batteries for the BAHD (procedure code V5266) do not require prior authorization. The replacement batteries are limited to clients with a hearing device that has been billed within the past five rolling years. Replacement batteries for clients who did not receive the hearing device through Texas Medicaid will be considered for reimbursement on appeal with a physician's statement documenting the medical necessity.

Procedure codes L8691, L8692, L8693, and L8694 will be denied as part of another service when billed by any provider with the same date of service as procedure code L8690.

Procedure code L8692 for the BAHD device and components may be reimbursed once per day with prior authorization.

Bilateral BAHD procedures are not benefits of Texas Medicaid.

### **3.2.4 Sound Processor Replacement and Repair**

#### **3.2.4.1 Prior Authorization**

Replacement and repair of a sound processor require prior authorization.

Documentation by the provider must explain the need for the replacement of the sound processor. The processor must be used for a minimum of 12 months before replacement of the unit will be considered.

The prior authorization request must include evidence of the purchase, such as the manufacturer's warranty.

Repair of a sound processor will be considered for prior authorization with documentation of medical necessity for the requested repair. Repair of a sound processor will be manually priced at the time the prior authorization is reviewed and granted. If the actual cost of the repair differs from the prior authorized fee, the provider must contact the SMPA Department to update the authorization before filing a claim for the repair services.

#### **3.2.4.2 Limitations**

Procedure code L8499 with modifier RB may be reimbursed for sound processor repair.

Repair or replacement of a sound processor is not a benefit during the manufacturer's warranty period.

Procedure code 92623 is an add-on procedure and must be billed with the primary procedure code (92622) on the same day, by the same provider to be considered for reimbursement.

### **3.2.5 Electromagnetic Bone Conduction Hearing Device - Removal Only**

The removal of the electromagnetic bone conduction hearing aid may be reimbursed by Texas Medicaid using procedure code 69711.

The removal or repair of an electromagnetic bone conduction hearing device is limited to two procedures per lifetime when billed by any provider.

The implantation of the device is not a benefit of Texas Medicaid.

### 3.3 Documentation Requirements

All implantable hearing aid services require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 3.4 Claims Filing and Reimbursement

#### 3.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 1.7.12, “Billing Clients” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

“Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

**Note:** *For Texas Medicaid managed care clients, all implantable hearing devices and services are administered by the client’s Medicaid MCO.*

##### 3.4.1.1 Third Party Liability

Standard TPL rules apply to all hearing services claims.

**Referto:** “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*).

#### 3.4.2 Reimbursement

Implantable hearing aids and related services are reimbursed in accordance with 1 TAC §355.8141.

Implantable hearing aids and related services are reimbursed at the lesser of the billed charges or the published Texas Medicaid fee. Unless otherwise indicated, providers may not make additional charges to the client for covered services; such charges constitute a breach of the Texas Medicaid contract.

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider’s documented invoice cost. Manually priced items are indicated with “MP” in the reimbursement rate table at the end of this article.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

Providers may refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### **3.4.2.1 NCCI and MUE Guidelines**

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## **4 Vision Care Professionals**

### **4.1 Enrollment**

To enroll in Texas Medicaid, optometrists (doctors of optometry [ODs]) and ophthalmologists must be licensed by the licensing board of their profession to practice in the state where the service is performed, at the time the service is performed, and be enrolled as Medicare providers.

An optometrist or ophthalmologist cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

### **4.2 Provider Responsibilities**

Suppliers of eyewear must comply with all Medicaid provider responsibilities and adhere to the following guidelines:

- Do not delay the ordering of eyewear or the dispensing of eyeglasses to the client while payment is pending from TMHP.
- Deliver the eyewear in a reasonable amount of time (usually two or three weeks from the date the order is placed by the client).
- Check the client’s eligibility
- Visit TexMedConnect or access the Medicaid Client Portal for providers to determine whether eyeglasses have been reimbursed by Texas Medicaid within the last 24 months. Providers should ask clients if they recently received vision care services that may not be documented in My Account yet.
- Submit claims for eyewear services as soon as possible so the client’s record indicates that eyewear or eyeglasses have been dispensed.
- Have the client, parent, or guardian sign and date the Medicaid Vision Eyewear Client Certification Form and retain it in their records. When a client chooses an eyeglass or contact lens option beyond the program limitations, or if eyeglasses or contact lenses are replaced because of loss or destruction, the client must acknowledge their choice and his/her liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification Form. The form must remain in the provider’s records.
- Do not charge a Medicaid client more than a patient not enrolled in Texas Medicaid for noncovered services (e.g., tints, oversized lenses, or frames).
- Keep invoices on file for a minimum of five years.

- Submit claims using the date eyeglasses were ordered as the date of service (DOS) (the start of the 95-day filing period), not the date the eyeglasses were dispensed.

### 4.3 Services, Benefits, Limitations, and Prior Authorization

Examination and treatment of eye conditions, including prescribing and dispensing of medically necessary eyeglasses or contact lenses, are benefits of Texas Medicaid and may be reimbursed to optometrist, ophthalmologist, and optician providers within the scope of practice for each.

The following services are included in other services and will not be considered for separate reimbursement:

- Vision screening conducted to meet State screening requirements, such as the DSHS School Vision and Hearing Screening Program.
- Expenses for medical supplies, equipment, and other items that are not specifically made-to-order for the client are considered to have been incurred on the date the item is delivered.

**Note:** *Medicaid clients 22 years old and younger who have been determined by their provider to have a vision impairment that may require intensive or comprehensive vision impaired related services should be referred to the Texas Health and Human Services Commission (HHSC) Blind Children's Vocational Discovery and Development Program. Adults, youths and students who have been determined by their provider to have a vision impairment that may require intensive or comprehensive vision impaired related services should be referred to the Texas Workforce Commission (TWC).*

**Note:** *Vision Services requests for clients birth through 20 years of age who do not meet criteria as outlined in this handbook may be considered through the Texas Health Steps (THSteps)-Comprehensive Care Program (CCP).*

#### Ophthalmologist and Optometrist

Examination and treatment services rendered by an ophthalmologist or optometrist are not limited to the procedure codes included in this handbook.

**Referto:** The [Texas Medicaid fee schedules](#) on the TMHP web site at [www.tmhp.com](http://www.tmhp.com) for a complete list of procedure codes that may be reimbursed by Texas Medicaid.

#### Optician

Services rendered by an optician are limited to fitting and dispensing of medically necessary eyeglasses and contact lenses.

**Note:** *In accordance with the Omnibus Reconciliation Act of 1986, Section 9336, a Doctor of Optometry is considered a physician, with respect to the provision of any item or service the optometrist is authorized to perform by state law or regulation.*

#### 4.3.1 Services Performed in Long-Term Care Facilities

Ophthalmological, optometric, and eyeglass or contact lens services provided in a skilled or intermediate care facility may be reimbursed when the client's attending physician has ordered the service and the signed order is included in the client's medical record at the nursing facility.

The ordering physician's name and National Provider Identifier (NPI) and taxonomy code must be documented on the claim when ophthalmological, optometric, and eyeglasses or contact lenses services are performed in a skilled or intermediate care facility.

#### 4.3.2 Services Performed in Federally Qualified Healthcare Centers (FQHC)

Vision services rendered by FQHC providers may be reimbursed based on an all-inclusive rate per visit.

**Referto:** Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about vision services that may be reimbursed to FQHC providers.

### 4.3.3 THSteps Medical Checkup Vision Screening

A vision screening must be completed during each THSteps medical checkup with standardized screenings performed at specific ages, as listed in the THSteps Periodicity Schedule. Providers may perform a vision screening during an acute care visit with the appropriate screening tools or refer at-risk infants and children to an optometrist or ophthalmologist who is experienced with the pediatric population and who can perform further testing, diagnosis, and treatment.

**Referto:** Subsection 4.3.12.2.4, “Vision Screening” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for information about THSteps medical checkup vision screenings.

#### 4.3.3.1 Vision Screening Outside of a THSteps Preventive Care Medical Checkup

Vision screening for clients who are birth through 20 years of age may be completed at any primary care provider’s office visit upon the following:

- Request from a parent
- Referral from a school vision screening program
- Referral from a school nurse

Clients who are birth through 20 years of age must be screened for eye abnormalities by history, observation, and physical exam. Clients who are identified as high risk must be referred to a Medicaid-enrolled optometrist or ophthalmologist.

### 4.3.4 Noncovered Services

The following services and supplies are not a benefit of Texas Medicaid:

- Artificial eyes for clients who are 21 years of age and older.  
**Note:** *Artificial eyes for clients who are birth through 20 years may be considered under Texas Health Steps-Comprehensive Care Program (THSteps-CCP).*
- Eyeglasses for residents of institutions where the reimbursement formula and vendor reimbursement include this service.
- Eyeglasses or contact lenses prescribed or dispensed to clients at a hospital or nursing facility without documented orders of the attending physician in the client’s medical records.
- Low vision aids.  
**Note:** *Clients may be referred to TWC for low vision aids.*
- Optional eyeglass features that are requested by the client but that do not increase visual acuity (e.g., lens tint, industrial hardening, and decorative accessories or lettering).
- Plano sunglasses.
- Extended color vision examination, dark adaptation examination, and vision screening.
- Spectacle (eyeglass) fitting services when billed separately.

Clients may be billed for noncovered frames and other items beyond Medicaid benefits. Providers must have the client sign and date the Medicaid Vision Eyewear Client Certification Form and retain it in the provider’s records. The client payment amount is not considered other insurance and must not be entered as a credit amount in the electronic field.

**Example:** Texas Medicaid may reimburse providers a total of \$32.55 for eyeglass frames that are within the provider's selection for Medicaid reimbursement plus the allowed cost per lens. If the client chooses a pair of frames (such as \$200 frames) that are outside of the provider's selections for Medicaid reimbursement and if the client chooses other items or services that are not a benefit of Texas Medicaid (such as tinted lenses for an extra \$10 charge), the client is responsible for and may be billed for the balance of the cost of the frames (\$172.07) and the other items that are not a benefit of Medicaid (\$10 for tinted lenses).

The provider may withhold the noncovered eyewear, contacts, or eyeglasses until the client pays for those items. If the client fails to pay for the noncovered items or has not returned for finished eyewear within a reasonable length of time (two to three months), the provider may return any reusable items to stock. Any payment made by TMHP for frames or lenses must be refunded to Texas Medicaid. If a client requests eyewear that is beyond program benefits (for example, scratch-resistant coating), Medicaid allows reimbursement up to the maximum fee. The provider may charge the client the difference between the Medicaid payment and the customary charge for the eyewear requested, when the client has been shown the complete selection of Medicaid-covered eyewear and when the following conditions are met:

- The client rejects the Medicaid-covered eyewear and wants eyewear that complies with Texas Medicaid specifications, but is not included in the selection of Medicaid-covered eyewear.
- The client indicates a willingness to pay the difference between the Medicaid payment and the actual charge. The provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and retain it in the provider's records.

### 4.3.5 Vision Testing

Vision testing and examination and treatment of eye conditions are benefits of Texas Medicaid and may be reimbursed to ophthalmologist or optometrist providers.

Routine eye examinations with refraction testing may be reimbursed using the following procedure codes:

| Procedure Codes |       |  |  |  |  |  |  |  |  |
|-----------------|-------|--|--|--|--|--|--|--|--|
| S0620           | S0621 |  |  |  |  |  |  |  |  |

Medical evaluation and examination may be reimbursed when accompanied by a medical condition other than refractive error using the following procedure codes:

| Procedure Codes |       |       |       |       |  |  |  |  |  |
|-----------------|-------|-------|-------|-------|--|--|--|--|--|
| 92002           | 92004 | 92012 | 92014 | 92015 |  |  |  |  |  |

Procedure codes 92002, 92004, 92012, and 92014 are limited to one service per day by any provider.

Procedure codes 92002 and 92004 are limited to one new client visit every three years when no other professional services have been billed by the physician, or another physician of the same specialty in the same group practice, within the past three years.

A new client is defined as one who has not received any professional services from a physician or physician within the same group practice, of the same specialty, within the past three years.

An established client is one who has received professional services from a physician or physician within the same group practice, of the same specialty, within the past three years.

**Referto:** Subsection 9.2.60.1.1, "New and Established Patient Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for information about new patient and established patient E/M services.

Vision testing procedure codes are subject to the CMS NCCI relationships. Claims that are submitted by physicians with the same specialty who are in the same group practice are processed as if they were the same provider. Providers should refer to the *Current Procedural Terminology (CPT) Manual* for additional information about intermediate and comprehensive ophthalmological services.

#### **4.3.5.1 Routine Vision Testing**

Procedure codes S0620 and S0621 are considered routine eye examinations and are limited to diagnosis codes Z0100 or Z0101.

Procedure codes S0620 and S0621 will be denied if billed with the same date of service as procedure codes 92020, 92265, 92270, 92273, 92274, 92285, 92286, and 92287.

Clients who are birth through 20 years of age are eligible for a routine eye examination with refraction testing for the purpose of obtaining eyeglasses or contact lenses once every 12 months. The limitation for refraction testing can be exceeded for clients who are birth through 20 years of age only when:

- The parent, teacher, or school nurse requests the refraction testing and it is medically necessary.
- There is a significant change in vision, and documentation supports a diopter (d) change of 0.5 or greater in the sphere, cylinder, prism measurements, or axis changes.

Clients who are 21 years of age and older are eligible for a routine eye examination with refraction testing for the purpose of obtaining eyeglasses or contact lenses once every 24 months. The limitation for refraction testing can be exceeded for clients who are 21 years of age and older only when there is a significant change in vision, and documentation supports a diopter change of 0.5 or more in the sphere, cylinder, prism measurements, or axis changes.

#### **4.3.5.2 Medically Necessary Eye Examinations**

An eye examination with or without refraction (procedure code 92002, 92004, 92012, 92014, or 92015) may be reimbursed for medical evaluations and examinations of the eye. Procedure codes 92002, 92004, 92012, 92014, and 92015 will not be reimbursed for routine exams.

Documentation in the client's medical record must support the medical necessity of the service performed.

Procedure codes 92002, 92004, 92012, and 92014 may be reimbursed when it is medically necessary to ophthalmologist or optometrist providers for medically necessary eye examinations without refraction.

Procedure code 92015 may be reimbursed to ophthalmologist or optometrist providers for refraction in addition to the eye examination procedure code 92002, 92004, 92012, or 92014. A refractive state (procedure code 92015) will be denied as part of another service if it is billed with the same date of service by any provider as procedure code S0620 or S0621.

### **4.3.6 Special Ophthalmological Services and Diagnostic Testing**

#### **4.3.6.1 Ophthalmological Examination and Evaluation with General Anesthesia**

An ophthalmological examination and evaluation under general anesthesia (procedure codes 92018 and 92019) performed by an ophthalmologist may be medically necessary when a client has significant injury or cannot otherwise tolerate the procedure while conscious.

Procedure codes 92018 and 92019 may be reimbursed once per service, per day, when billed by any provider.

### 4.3.6.2 Ophthalmic Ultrasound

Ophthalmic ultrasound is a diagnostic test that uses high frequency sound waves to provide additional information about the interior of the eye and surrounding areas. The following procedure codes may be reimbursed for ophthalmic ultrasound services:

| Procedure Codes |       |       |       |       |       |       |       |       |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|--|
| 76510           | 76511 | 76512 | 76513 | 76514 | 76516 | 76519 | 76529 | 76999 |  |

Procedure codes 76510, 76511, 76512, 76513, 76516, are limited to two services per calendar year by any provider.

Corneal pachymetry (procedure code 76514) is used to determine the corneal thickness. Procedure code 76514 (unilateral or bilateral code) may be reimbursed once per lifetime, when billed by any provider, and is restricted to the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| H1811           | H1812   | H1813   | H1820   | H18211  | H18212  | H18213  | H18221  |
| H18222          | H18223  | H18231  | H18232  | H18233  | H18461  | H18462  | H18463  |
| H18511          | H18512  | H18513  | H18521  | H18522  | H18523  | H18531  | H18532  |
| H18533          | H18541  | H18542  | H18543  | H18551  | H18552  | H18553  | H18591  |
| H18592          | H18593  | H18601  | H18602  | H18603  | H18611  | H18612  | H18613  |
| H18621          | H18622  | H18623  | H21551  | H21552  | H21553  | H40001  | H40002  |
| H40003          | H40011  | H40012  | H40013  | H40021  | H40022  | H40023  | H40031  |
| H40032          | H40033  | H40041  | H40042  | H40043  | H40051  | H40052  | H40053  |
| H40061          | H40062  | H40063  | H4010X0 | H4010X1 | H4010X2 | H4010X3 | H4010X4 |
| H401110         | H401111 | H401112 | H401113 | H401114 | H401120 | H401121 | H401122 |
| H401123         | H401124 | H401130 | H401131 | H401132 | H401133 | H401134 | H401210 |
| H401211         | H401212 | H401213 | H401214 | H401220 | H401221 | H401222 | H401223 |
| H401224         | H401230 | H401231 | H401232 | H401233 | H401234 | H401310 | H401311 |
| H401312         | H401313 | H401314 | H401320 | H401321 | H401322 | H401323 | H401324 |
| H401330         | H401331 | H401332 | H401333 | H401334 | H401410 | H401411 | H401412 |
| H401413         | H401414 | H401420 | H401421 | H401422 | H401423 | H401424 | H401430 |
| H401431         | H401432 | H401433 | H401434 | H40151  | H40152  | H40153  | H4020X0 |
| H4020X1         | H4020X2 | H4020X3 | H4020X4 | H40211  | H40212  | H40213  | H402210 |
| H402211         | H402212 | H402213 | H402214 | H402220 | H402221 | H402222 | H402223 |
| H402224         | H402230 | H402231 | H402232 | H402233 | H402234 | H40231  | H40232  |
| H40233          | H40241  | H40242  | H40243  | H4031X0 | H4031X1 | H4031X2 | H4031X3 |
| H4031X4         | H4032X0 | H4032X1 | H4032X2 | H4032X3 | H4032X4 | H4033X0 | H4033X1 |
| H4033X2         | H4033X3 | H4033X4 | H4041X0 | H4041X1 | H4041X2 | H4041X3 | H4041X4 |
| H4042X0         | H4042X1 | H4042X2 | H4042X3 | H4042X4 | H4043X0 | H4043X1 | H4043X2 |
| H4043X3         | H4043X4 | H4051X0 | H4051X1 | H4051X2 | H4051X3 | H4051X4 | H4052X0 |
| H4052X1         | H4052X2 | H4052X3 | H4052X4 | H4053X0 | H4053X1 | H4053X2 | H4053X3 |
| H4053X4         | H4061X0 | H4061X1 | H4061X2 | H4061X3 | H4061X4 | H4062X0 | H4062X1 |
| H4062X2         | H4062X3 | H4062X4 | H4063X0 | H4063X1 | H4063X2 | H4063X3 | H4063X4 |
| H40811          | H40812  | H40813  | H40821  | H40822  | H40823  | H40831  | H40832  |

| Diagnosis Codes |         |         |         |         |        |        |         |
|-----------------|---------|---------|---------|---------|--------|--------|---------|
| H40833          | H4089   | H409    | H42     | H44511  | H44512 | H44513 | T868401 |
| T868402         | T868403 | T868411 | T868412 | T868413 | Q150   | Z947   |         |

The one per lifetime limitation for procedure code 76514 does not apply when submitted with the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |        |        |         |
|-----------------|---------|---------|---------|---------|--------|--------|---------|
| H1811           | H1812   | H1813   | H18211  | H18212  | H18213 | H18231 | H18232  |
| H18233          | H18511  | H18512  | H18513  | H21551  | H21552 | H21553 | T868401 |
| T868402         | T868403 | T868411 | T868412 | T868413 | Z947   |        |         |

When billing for two or more services, providers must bill with one of the diagnosis listed as an exception to the limit.

Procedure code 76999 is limited to one service per day, same procedure, same provider, and may be reimbursed with prior authorization.

Ophthalmic ultrasounds may be reimbursed when they are billed with the same date of service by the same provider as an eye examination visit or consultation.

Ophthalmic ultrasounds (procedure codes 76514 and 76516) are limited to one service, per day, by any provider.

Ophthalmic coherence biometry with intraocular lens power calculation will be considered medically necessary when the measurements are used to calculate the intraocular lens power prior to cataract extraction.

Ophthalmic biometry procedure codes 76519 and 92136 are duplicative tests and cannot be performed together. Procedure codes 76519 and 92136 are limited two services per lifetime, any provider, any combination.

Procedure code 76519 is defined as a bilateral service for the technical component and unilateral service for the professional component. The professional component is only billed when a decision to remove the cataract has been made by the patient and surgeon.

- Two services per day are allowed when the professional component is performed on both eyes on the same date.
- One physician may do the technical component and another physician the professional component. Each will need to use the appropriate modifier. The professional component should also have the anatomic modifier (LT or RT) appended.

When the scan is performed with a calculation done on the first eye, the provider must bill the total component for procedure code 76519 with modifier LT or RT to identify the eye on which the service was performed, or bill procedure code 76519 with total component plus procedure code 76519 with professional component and modifier LT or RT.

When the calculation is performed on the second eye, the provider must only bill procedure code 76519 with professional component and modifier LT or RT to identify the eye on which the service was performed.

If the technical and professional components are performed on both eyes on the same date, the provider must bill procedure code 76519 with the LT or RT modifier and procedure code 76519 with professional component and the corresponding LT or RT modifiers.

Ophthalmic biometry may be repeated after 12 months if the patient decides to have the surgery later or the procedure is performed by a different provider. Requests for a second ophthalmic biometry in less than 12 months will not be payable without documentation of significant change in vision. Documentation must include at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

#### Prior Authorization Requirements

Procedure code 76999 requires prior authorization. Prior Authorization requests must be submitted on the SMPA Request Form and must include the following documentation:

- A clear, concise description of the ophthalmic ultrasound being performed.
- Reason for recommending this particular procedure.
- A statement confirming that a CPT or HCPCS code is not available for the procedure requested.
- The client's diagnosis.
- Documentation that this procedure is not investigational or experimental.
- The physician's intended fee for this procedure, including a comparable CPT or HCPCS code.

**Note:** *Services and procedures that are investigational or experimental are not a benefit of Texas Medicaid.*

#### 4.3.6.3 Gonioscopy

Gonioscopy is an eye examination to look at the front part of the eye (anterior chamber) between the cornea and the iris. A microscope (slit lamp) is used to look inside the eye.

Procedure code 92020 will be denied as part of another service if billed on the same date of service by the same provider as procedure codes S0620 and S0621.

Procedure code 92020 may be reimbursed for gonioscopy when billed with one of the diagnosis codes in the following table:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| H20011          | H20012 | H20013 | H20021 | H20022 | H20023 | H20031 | H20032 |
| H20033          | H20041 | H20042 | H20043 | H20051 | H20052 | H20053 | H2010  |
| H2011           | H2012  | H2021  | H2022  | H2023  | H20811 | H20812 | H20813 |
| H20821          | H20822 | H20823 | H209   | H2101  | H2102  | H2103  | H211X1 |
| H211X2          | H211X3 | H21211 | H21212 | H21213 | H21221 | H21222 | H21223 |
| H21231          | H21232 | H21233 | H21241 | H21242 | H21243 | H21251 | H21252 |
| H21253          | H21261 | H21262 | H21263 | H21271 | H21272 | H21273 | H2129  |
| H21301          | H21302 | H21303 | H21311 | H21312 | H21313 | H21321 | H21322 |
| H21323          | H21331 | H21332 | H21333 | H21341 | H21342 | H21343 | H21351 |
| H21352          | H21353 | H2141  | H2142  | H2143  | H21501 | H21502 | H21503 |
| H21511          | H21512 | H21513 | H21521 | H21522 | H21523 | H21531 | H21532 |
| H21533          | H21541 | H21542 | H21543 | H21551 | H21552 | H21553 | H21561 |

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| H21562          | H21563  | H2181   | H2182   | H22     | H31401  | H31402  | H31403  |
| H31411          | H31412  | H31413  | H31421  | H31422  | H31423  | H3411   | H3412   |
| H3413           | H348110 | H348111 | H348112 | H348120 | H348121 | H348122 | H348130 |
| H348131         | H348132 | H348310 | H348311 | H348312 | H348320 | H348321 | H348322 |
| H348330         | H348331 | H348332 | H35031  | H35032  | H35033  | H35051  | H35052  |
| H35053          | H3521   | H3522   | H3523   | H3582   | H36821  | H36822  | H36823  |
| H36829          | H3689   | H47231  | H47232  | H47233  | H40001  | H40002  | H40003  |

| H4062X3         | H4062X4 | H4063X0 | H4063X1 | H4063X2 | H4063X3 | H4063X4 | H40811  |
| H40812          | H40813  | H40821  | H40822  | H40823  | H4089   | H409    | H42     |
| Q150            |         |         |         |         |         |         |         |

#### 4.3.6.4 Corneal Topography

Corneal topography is a computer assisted diagnostic tool that creates a three-dimensional map of the shape and curvature of the cornea. Procedure code 92025 may be reimbursed for corneal topography. Procedure code 92025 is considered medically necessary to diagnose, monitor, and treat various visual conditions such as, the following:

- Pre-operatively for evaluation of irregular astigmatism prior to cataract surgery
- Monocular diplopia
- Bullous keratopathy
- Post-surgical or post traumatic astigmatism, measuring at a minimum of 3.5 diopters

- Post penetrating keratoplasty surgery
- Corneal dystrophy
- Complications of transplanted cornea
- Post traumatic corneal scarring
- Keratoconus
- Pterygium and/or corneal ectasia that cause visual impairment

Corneal topography may be reimbursed when it is billed with the same date of service by the same provider as an eye examination visit or consultation.

Corneal topography (procedure code 92025) is limited to one service, per day, and two services per calendar year, by any provider.

#### **4.3.6.5 Sensorimotor Examination**

A sensorimotor examination is an evaluation of the function of the ocular neuro-muscular system. This exam consists of interpretation and reporting of multiple ocular deviation measurements, including:

- Visual motor integration
- Reversal frequency (letters and numbers)
- Motor speed and precision
- Visual memory
- Visualization to test eye movement and control
- Focusing ability
- Eye teaming ability
- Depth perception
- Visual perception skills

Sensorimotor examination (procedure code 92060) is limited to one service per day and two services per calendar year by any provider. Procedure code 92060 may be reimbursed in addition to an eye examination visit.

#### **4.3.6.6 Orthoptic Training**

Orthoptics, a component of vision training or vision therapy, are exercises designed to improve the function of the eye muscles with an emphasis on binocular vision and eye movements.

Procedure codes 92065 and 92066 may be reimbursed for orthoptic training when it is billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| H50011          | H50012 | H50021 | H50022 | H50031 | H50032 | H50041 | H50042 |
| H5005           | H5006  | H5007  | H5008  | H50111 | H50112 | H50121 | H50122 |
| H50131          | H50132 | H50141 | H50142 | H5015  | H5016  | H5017  | H5018  |
| H5021           | H5022  | H50311 | H50312 | H5032  | H50331 | H50332 | H5034  |
| H50411          | H50412 | H5042  | H5043  | H5051  | H5052  | H5053  | H5054  |
| H5055           | H50611 | H50612 | H5069  | H50811 | H50812 | H5089  | H5111  |
| H5112           | H518   | H53011 | H53012 | H53013 | H53021 | H53022 | H53023 |
| H53031          | H53032 | H53033 | H5501  | H5502  | H5503  | H5504  | H5509  |

| Diagnosis Codes |       |       |  |  |  |  |  |
|-----------------|-------|-------|--|--|--|--|--|
| H5581           | H5582 | H5589 |  |  |  |  |  |

Orthoptic training is limited to 12 services per lifetime per client, when it is billed with one of the diagnosis codes in the above diagnosis table.

Providers must document in the medical record a diagnosis, treatment plan, and the reason for continuous treatment if the client attends multiple training sessions.

Procedure codes 92065 and 92066 may be reimbursed in addition to an eye examination visit.

#### 4.3.6.7 Visual Field Examinations

The following procedure codes may be reimbursed for visual field examinations:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| 92081           | 92082 | 92083 |

Procedure codes 92081, 92082, and 92083 may be reimbursed once per day and twice per calendar year by any provider, for any combination of visual field examinations.

Procedure codes 92081, 92082 and 92083 are considered medically necessary under the following conditions:

- Disorder of the eyelids potentially affecting the visual field.
- A documented diagnosis of glaucoma.
- A suspected diagnosis of glaucoma with supporting evidence documented.
- A documented disorder of the optic nerve, the neurologic visual pathway, or retina.
- A recent intracranial hemorrhage, an intracranial mass or a recent measurement of increased intracranial pressure with or without visual symptomatology.
- A recently documented occlusion and/or stenosis of cerebral and precerebral arteries, a recently diagnosed transient cerebral ischemia or giant cell arteritis.
- A history of a cerebral aneurysm, pituitary tumor, occipital tumor or other condition potentially affecting the visual fields.
- A visual field defect demonstrated by gross visual field testing (e.g., confrontation testing).
- An initial workup for buphthalmos, congenital anomalies of the posterior segment or congenital ptosis.
- A disorder of the orbit, potentially affecting the visual field (e.g., orbital tumor, thyroid disease, etc.).
- A significant eye injury.
- A pale or swollen optic nerve documented by a recent examination.
- New functional limitations which may be due to visual field loss (i.e., reports by family that patient is running into things).
- Medication treatment (e.g., hydroxychloroquine) which has a high risk of potentially affecting the visual system.
- Initial evaluation for macular degeneration related to central vision loss or has experienced such loss resulting in vision measured at or below 20/70.

4.3.6.8      **Serial Tonometry**

Serial tonometry is used to determine the pressure of intraocular fluid in the diagnosis of certain conditions, such as glaucoma. Serial tonometry includes a series of pressure checks over the course of a day to measure peaks and acute elevations in intraocular pressure (diurnal curve).

Procedure code 92100 may be reimbursed once per day and twice per calendar year by any provider.

4.3.6.9      **Computerized Ophthalmic Diagnostic Imaging**

The following procedure codes are a benefit of Texas Medicaid when medically indicated and may be reimbursed for Computerized Ophthalmic Diagnostic Imaging (CODI):

| Procedure Codes |       |       |       |  |  |  |  |  |  |
|-----------------|-------|-------|-------|--|--|--|--|--|--|
| 92132           | 92133 | 92134 | 92137 |  |  |  |  |  |  |

Procedure codes 92132, 92133, 92134, and 92137 are limited to one service per day, and two services per calendar year, any provider.

Procedure code 92132 will be denied as part of another service if billed on the same date of service by any provider as procedure code 76513.

Additional services may be requested for procedure codes 92134 and 91237, with prior authorization, for a total of 12 services per calendar year.

Prior authorization requests must be submitted on a SMPA Request Form and must include documentation of medical necessity for the following circumstances:

- Monitoring patients with conditions affecting the optic nerve (e.g., optic neuropathy) or retinal disease (e.g., macular degeneration, diabetic retinopathy) and in the evaluation and treatment of certain macular abnormalities (e.g., macular edema, atrophy associated with degenerative retinal diseases) including:
- Patients being treated with bevacizumab, aflibercept, pegaptanib sodium, dexamethasone, or ranibizumab for either diabetic retinopathy or macular degeneration.
- Patients being treated with chloroquine (CQ) and/or hydroxychloroquine (HCQ) for the development of retinopathy.

4.3.6.10     **Ophthalmic Coherence Biometry**

Ophthalmic coherence biometry with intraocular lens power calculation will be considered medically necessary when the measurements are used to calculate the intraocular lens power prior to cataract extraction.

Ophthalmic biometry procedure codes 76519 and 92136 are duplicative tests and cannot be performed together. Procedure codes 76519 and 92136 are limited two services per lifetime, any provider, any combination.

Procedure code 76519 is defined as a bilateral service for the technical component and unilateral service for the professional component. The professional component is only billed when a decision to remove the cataract has been made by the patient and surgeon.

- Two services per day are allowed when the professional component is performed on both eyes on the same date.
- One physician may do the technical component and another physician the professional component. Each will need to use the appropriate modifier. The professional component should also have the anatomic modifier (LT or RT) appended.

When the scan is performed with a calculation done on the first eye, the provider must bill the total component for procedure code 76519 with modifier LT or RT to identify the eye on which the service was performed, or bill procedure code 76519 with total component plus procedure code 76519 with professional component and modifier LT or RT.

When the calculation is performed on the second eye, the provider must only bill procedure code 76519 with professional component and modifier LT or RT to identify the eye on which the service was performed.

If the technical and professional components are performed on both eyes on the same date, the provider must bill procedure code 76519 with the LT or RT modifier and procedure code 76519 with professional component and the corresponding LT or RT modifiers.

Ophthalmic biometry may be repeated after 12 months if the patient decides to have the surgery later or the procedure is performed by a different provider. Requests for a second ophthalmic biometry in less than 12 months will not be payable without documentation of significant change in vision. Documentation must include at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

**4.3.6.11 Ophthalmoscopy, Extended Ophthalmoscopy, and Fluorescein Angiography**

Ophthalmoscopy, extended ophthalmoscopy, and fluorescein angiography may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 92201           | 92202 | 92227 | 92228 | 92229 | 92230 | 92235 | 92240 | 92242 | 92250 |
| 92260           |       |       |       |       |       |       |       |       |       |

Procedure codes 92201, 92202, 92227, 92229, 92230, and 92260 are reimbursed for the total component only.

Routine ophthalmoscopy is part of a general and special ophthalmologic service whenever indicated. It is a non-itemized service and is not reported separately.

Extended ophthalmoscopy (procedure codes 92201 and 92202) is a method of examining the posterior portion of the eye when the level of examination requires a complete view of the back of the eye and documentation is greater than that required during routine ophthalmoscopy. Extended ophthalmoscopy must add information not available from the standard evaluation services and/or information that will demonstrably affect the treatment plan.

Extended ophthalmoscopy is considered medically necessary for the following conditions:

- Infants (0-24 months) undergoing treatment and/or monitoring of retinopathy of prematurity
- Histoplasmosis
- Choroidal neoplasms
- Glaucoma
- Optic nerve pathology
- Diabetic retinopathy

- Hypertensive retinopathy
- Vascular occlusion
- Retinal neovascularization
- Macular pathology
- Retinal tear, thinning, schisis or detachment
- Hereditary retinal dystrophies
- Other visible retinal disorders requiring detailed imaging for adequate documentation

Extended ophthalmoscopy is not medically necessary under the following situations:

- Routine replacement of standard ophthalmoscopy with extended ophthalmoscopy to document the appearance of healthy retinal anatomy.
- Duplicative documentation of retinal pathology with extended ophthalmoscopy in conjunction with fundus photography, fluorescein angiography, etc., unless the additional diagnostic procedures provide new information to assist in clinical decision-making.
- Repeated performance in the presence of controlled and/or stable disease.

Repeat extended ophthalmoscopy is medically necessary when there is a change in signs, symptoms or specific condition. The frequency for providing extended ophthalmoscopy depends upon the medical necessity in each client which relates to the diagnosis. While most clients will require up to two services per year, in some cases, additional services may be reimbursed up to 12 services per year.

The client's medical record must contain documentation that fully supports the medical necessity for extended ophthalmoscopy. Retinal drawings must meet the following specifications:

- Must be a separate detailed sketch, minimal size of 3-4 inches
- All items must be identified and labeled
- Drawings in four-six standard colors are preferred. However, non-colored drawings are acceptable, if clearly labeled
- All abnormalities should be included in drawing

Procedure codes 92201 and 92202 are limited to one service per day and 12 services per calendar year by any provider.

Remote retinal imaging (procedure codes 92227, 92228, and 92229) is a benefit of Medicaid when the images are obtained by a provider at one facility, and then transmitted electronically, to be reviewed and interpreted at another site by an ophthalmologist or other qualified health care professional under the direction of a retinal specialist.

Procedure codes 92227, 92228, 92229, 92235, 92240, 92242, 92250 and 92260 are limited to one service per day and two services per calendar year by any provider.

Procedure code 92230 must be billed with modifier LT or RT to identify the eye on which the service was performed.

Procedure codes S0620 and S0621 will be denied if billed on the same date of service as procedure codes 92227, 92228, 92229, 92230, 92235, 92240, 92242, 92250 or 92260.

Fundus photography (procedure code 92250) is considered medically necessary when an existing clinical condition is subject to change in extent, appearance or size with potential direct impact on and the management of client care. These conditions include, but are not limited to the following:

- Macular degeneration

- Glaucoma
- Neoplasms of the retina or choroid
- Chorioretinal inflammation, scars, and other disorders of choroid
- Retinal hemorrhages
- Ischemia
- Retinal detachment
- Diabetic retinopathy
- Assessment of recently performed retinal laser surgery
- Lupus erythematosus
- Hypertension
- Multiple sclerosis
- Rheumatoid arthritis
- Sickle-cell anemia

**Note:** *Fundus photography performed for a routine screen of a normal eye, in the absence of a clinical condition, that is subject to change in extent, appearance or size is not a benefit of Texas Medicaid.*

**4.3.6.12 Other Specialized Vision Services**

The following procedure codes may be reimbursed by Texas Medicaid when the services are medically necessary:

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 92265           | 92270 | 92273 | 92274 | 92285 | 92286 | 92287 |  |  |  |

Procedure code 92265 is performed to evaluate nerve and muscle function of the eye muscles and considered medically necessary when performed for the diagnosis and evaluation of myasthenia gravis as well as other neuromuscular conditions effecting eye movement.

Procedure code 92273 is an acceptable alternative adjunctive modality useful in establishing loss of retinal function and distinguishing retinal from optic nerve lesions.

Procedure code 92274 is considered medically necessary for detecting chloroquine (Aralen) and hydroxychloroquine (Plaquenil) toxicity.

Procedure code 92285 may be indicated when photo-documentation is required to track the progression or lack of progression of an eye condition, or to document the progression of a particular course of treatment. This procedure should not be used to simply document the existence of a condition in order to enhance the medical record.

Procedure codes 92286 and 92287 are performed to evaluate the integrity of the cornea, iris and other anterior segment structures.

Texas Medicaid considers procedure code 92286 medically necessary for patients who meet one or more of the following criteria:

- Slit lamp evidence of endothelial dystrophy
- Slit lamp evidence of corneal edema
- Are about to undergo a secondary intraocular lens implantation

- Previous intraocular surgery requiring cataract surgery
- Are about to undergo a surgical procedure associated with a higher risk to corneal endothelium, i.e., phacoemulsification or refractive surgery
- Evidence of posterior polymorphous dystrophy of the cornea or iridocorneal-endothelium syndrome
- Will be fitted with extended wear contact lenses after intraocular surgery

Procedure codes 92265, 92270, 92273, 92274, 92285, 92286, and 92287 may each be reimbursed once per day and twice per calendar year by any provider.

Procedure codes S0620 and S0621 will be denied if billed on the same date of service as procedure codes 92265, 92270, 92273, 92274, 92285, 92286, or 92287.

For other professional services, fitting services are included in the reimbursement for prosthetic eyeglasses or contact lenses.

Microfluidic analysis of tear osmolality is a CLIA-waived lab test and may be performed by optometrists in the office setting.

**Referto:** Subsection 2.2.13, “Urinalysis and Chemistry” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for information about microfluidic analysis (procedure code 83861).

4.3.7 Eyeglasses

Eyeglasses are a benefit of Texas Medicaid when the following criteria are met:

- Medically necessary
- Prescribed by a doctor of medicine, optometry, or osteopathy
- Prescribed to significantly improve vision or correct a medical condition
- In compliance with eyeglass program specifications for frames and lenses as stated in 1 Texas Administrative Code (TAC) §354.1017 and §363.503, Specifications for Eyewear

Eyeglasses may be provided to clients of any age when there is no other option available to correct or ameliorate a visual defect.

Eyeglasses are limited to once every 24 months. Additional services within the 24-month period may be considered when documentation in the client’s medical record supports medical necessity for a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes. A new 24-month benefit period for eyewear begins with the placement of the new eyewear.

The prescription for eyeglasses must be given to the client upon request. A provider may not withhold a prescription for eyeglasses from a client even if Medicaid reimbursement for the eye examination has not been received.

The fitting of eyeglasses is considered part of the dispensing procedure and is not separately reimbursed.

4.3.7.1 Frames

The following procedure codes may be reimbursed for eyeglass frames:

| Procedure Codes |       |  |  |  |  |  |  |  |  |
|-----------------|-------|--|--|--|--|--|--|--|--|
| V2020           | V2025 |  |  |  |  |  |  |  |  |

Frames are limited to one per 24 calendar months by any provider.

### 4.3.7.2 Eyeglass Lenses

The following eyeglass lens procedure codes may be reimbursed for single vision lenses:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| V2100           | V2101 | V2102 | V2103 | V2104 | V2105 | V2106 | V2107 | V2108 | V2109 |
| V2110           | V2111 | V2112 | V2113 | V2114 | V2115 | V2118 | V2121 |       |       |

The following eyeglass lens procedure codes may be reimbursed for bifocal lens:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| V2200           | V2201 | V2202 | V2203 | V2204 | V2205 | V2206 | V2207 | V2208 | V2209 |
| V2210           | V2211 | V2212 | V2213 | V2214 | V2215 | V2218 | V2219 | V2220 | V2221 |

The following eyeglass lens procedure codes may be reimbursed for trifocal lenses:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| V2300           | V2301 | V2302 | V2303 | V2304 | V2305 | V2306 | V2307 | V2308 | V2309 |
| V2310           | V2311 | V2312 | V2313 | V2314 | V2315 | V2318 | V2319 | V2320 | V2321 |

The following eyeglass lens procedure codes may be reimbursed for variable asphericity lenses:

| Procedure Codes |  |  |  |  |  |  |  |       |  |
|-----------------|--|--|--|--|--|--|--|-------|--|
| V2410           |  |  |  |  |  |  |  | V2430 |  |

Eyeglass lenses are limited to one pair per 24 calendar months, any provider.

Providers must bill a quantity of two when billing for bilateral lenses with the same prescription.

### 4.3.7.3 Add-On Lenses

The following procedure codes may be reimbursed for add-on services:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| V2700           | V2710 | V2715 | V2718 | V2730 | V2755 | V2770 | V2780 |  |  |

Add-on procedure codes will not be reimbursed unless they are billed with the appropriate lens procedure code by the same provider for the same date of service.

Procedure code V2755 may be reimbursed for ultraviolet (U-V) protection when billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| H2701           | H2702  | H2703  | H27111 | H27112 | H27113 | H27121 | H27122 |
| H27123          | H27131 | H27132 | H27133 | Q123   | Z961   |        |        |

Procedure code V2755 will be denied when billed for the same date of service by the same provider as procedure code V2784.

#### 4.3.7.4 Polycarbonate Lenses

Polycarbonate lenses (procedure code V2784) may be reimbursed when billed with one of the diagnosis codes in the following table:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| D8984           | E083521 | E083522 | E083523 | E083531 | E083532 | E083533 | E083541 |
| E083542         | E083543 | E093521 | E093522 | E093523 | E093531 | E093532 | E093533 |
| E093541         | E093542 | E093543 | E103521 | E103522 | E103523 | E103531 | E103532 |
| E103533         | E103541 | E103542 | E103543 | E113521 | E113522 | E113523 | E113531 |
| E113532         | E113533 | E113541 | E113542 | E113543 | E133521 | E133522 | E133523 |
| E133531         | E133532 | E133533 | E133541 | E133542 | E133543 | F840    | F842    |
| F843            | F845    | F848    | F849    | F951    | G20A1   | G20A2   | G20B1   |
| G20B2           | G20C    | G2111   | G2119   | G213    | G214    | G218    | G3180   |
| G3183           | G3184   | G3186   | G35     | G3781   | G3789   | G40001  | G40009  |
| G40011          | G40019  | G40101  | G40109  | G40111  | G40119  | G40201  | G40209  |
| G40211          | G40219  | G40301  | G40309  | G40311  | G40319  | G40A01  | G40A09  |
| G40A11          | G40A19  | G40B01  | G40B09  | G40B11  | G40B19  | G40C01  | G40C09  |
| G40C11          | G40C19  | G40401  | G40409  | G40411  | G40419  | G40501  | G40509  |
| G40801          | G40802  | G40803  | G40804  | G40811  | G40812  | G40813  | G40814  |
| G40821          | G40822  | G40823  | G40824  | G40841  | G40842  | G40843  | G40844  |
| G4089           | G40901  | G40909  | G40911  | G40919  | G7100   | G7101   | G7102   |

| T85311D         | T85311S | T85318A | T85318D | T85318S | T85320A | T85320D | T85320S |
| T85321A         | T85321D | T85321S | T85328A | T85328D | T85328S | T85390A | T85390D |
| T85390S         | T85391A | T85391D | T85391S | T85398A | T85398D | T85398S | T8579XA |
| T8579XD         | T8579XS | T85890A | T85890D | T85890S | T85898A | T85898D | T85898S |

In addition to the diagnoses listed in the table, polycarbonate lenses also may be reimbursed when the client meets the following criteria:

- Lens power in at least one meridian of -5.25/+4.00 diopters or more and the eyeglasses are not functional in regular standard glass or plastic lens materials due to weight, thickness, or aberration
- Monocular vision with functional vision in one eye
- Retinal detachment or risk for retinal detachment (e.g., lattice degeneration, history of retinal detachment in the family, posterior vitreous detachment)

Polycarbonate lens claims must include a lens procedure code with lens power in one meridian of -5.25/+4.00d or more.

If the eyeglass lenses are not functional in regular standard glass or plastic due to weight, thickness, or aberration or for diagnosis not listed, providers must submit documentation of medical necessity. If documentation is not submitted with the claim, the polycarbonate lenses will be denied.

Procedure code V2755 will be denied when billed for the same date of service by the same provider as polycarbonate lenses.

#### 4.3.7.5 Dispensing of Eyeglasses

Dispensing of eyeglasses includes the design, verification, fitting, adjustment, sale, and delivery to the client of (1) fabricated and finished spectacle lenses, (2) frames, or (3) other ophthalmic devices, prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

Providers must be able to dispense standard size frames at no cost to the eligible client.

Providers must offer each client the following frame options:

- 20 years of age or younger: a choice of six styles in three colors for each type of frame.
- 21 years of age or older: a choice of three styles in three colors for each type of frame. A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.

The type of frame choices that are a benefit are:

- Metal
- Zylonite
- Combination of metal and zylonite

When a client chooses eyeglass options beyond the program limitations, the client must be informed their choice is not a benefit of Texas Medicaid and acknowledge his or her liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification form.

#### **4.3.7.6 Repair of Eyeglasses**

The eyeglass supplier is required to perform minor repairs on request (without charge) on eyeglasses that they have dispensed regardless of the client's age.

A repair costing \$2.00 or less is considered a minor repair and is included in the eyeglass reimbursement.

Repair of eyeglasses is not a benefit for clients 21 years of age and older.

Repair of prosthetic eyeglasses, when the actual cost of materials exceeds \$2.00 is a benefit for all ages.

Eyeglass repair costing \$2.00 or more may be reimbursed using procedure code V2799 and requires the following:

- The cost of repair supplies cannot exceed the cost of replacement eyeglasses.
- All eyeglass repair materials must be new and at least equivalent to the original item.
- The provider must maintain the following in the client's medical record:
  - An itemized list of repairs
  - The replacement cost to determine whether criteria are met for repair

#### **4.3.7.7 Replacement of Eyeglasses**

Replacement of lost or destroyed eyeglasses is a benefit of Texas Medicaid for clients from birth through 20 years of age. If the eyeglasses are lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

Claims for replacement lenses must be submitted with the RB modifier to ensure accurate processing. Prior authorization is not required for the replacement of eyeglasses.

Replacement of eyeglasses within the 24-month period is a benefit only when medically necessary due to a significant change in visual acuity. A new prescription must document at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

#### 4.3.7.8 Undeliverable Eyeglasses

If a client cancels an order for eyeglasses prior to their completion and delivery or if the eyeglasses become unusable because the client dies or his prescription changes prior to completion and delivery of the eyeglasses, the provider is still entitled to reimbursement based on the services furnished and the materials used, up to the time the provider learned of the cancellation of the eyeglasses or the fact that the eyeglasses would not be usable. This applies to lenses only, not to the frames.

#### 4.3.8 Contact Lenses

Contact lenses may be considered for clients of any age if there is no other option available to correct or ameliorate a visual defect.

Contact lenses are limited to once every 24 months. Additional services within the 24-month period may be considered when documentation in the client's medical record supports medical necessity for a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes. A new 24-month benefit period for eyewear begins with the placement of the new non-prosthetic eyewear.

Prior authorization is required for all contact lenses unless provided in a medical emergency. Prior authorization decisions are based on the provider's written documentation supporting the need for contact lenses as the only means of correcting the vision defect.

The following procedure codes may be reimbursed for contact lenses:

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| V2500           | V2501 | V2502 | V2510 | V2511 | V2512 | V2513 | V2520 |
| V2521           | V2522 | V2523 | V2530 | V2531 | V2599 |       |       |

Therapeutic soft (hydrophilic) contact lenses (procedure codes V2520, V2521, V2522, V2523) or gas-permeable fluid ventilated scleral lenses (procedure codes V2530 and V2531) are considered medically necessary prosthetics when used as moist corneal bandages for the treatment of severe ocular surface diseases.

##### 4.3.8.1 Dispensing of Contact Lenses

Dispensing of contact lenses include the fabrication, ordering, adjustment, dispensing, sale, and delivery to the client of the contact lens(es) prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

When a client chooses contact lens options beyond the program limitations, the client must be informed their choice is not a benefit of Texas Medicaid and acknowledge his or her liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification Form.

##### 4.3.8.2 Contact Lens Fitting and Modification

The following procedure codes may be reimbursed for the fitting and modification of a contact lens:

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| 92310           | 92311 | 92312 | 92313 | 92314 | 92315 | 92316 | 92317 |
| 92325           | 92326 |       |       |       |       |       |       |

Procedure codes 92310, 92325, and 92326 are limited to one service per day, any provider.

##### 4.3.8.3 Contact Fitting for Corneal Bandage Lens

A contact lens fitting for placement of a corneal bandage lens may be medically necessary for eye protection and pain control due to a disease or injury.

The following procedure codes may be reimbursed for corneal bandage fitting:

| Procedure Codes |       |  |  |  |  |  |  |
|-----------------|-------|--|--|--|--|--|--|
| 92071           | 92072 |  |  |  |  |  |  |

The emergency condition necessitating a corneal bandage must be documented on the claim.

Procedure code 92071 is limited to one service per eye, per day, by any provider.

Modifier LT or RT must be included on the claim to identify the eye on which the service was performed. When procedure code 92071 is performed on both eyes on the same date of service, one procedure may be reimbursed at the full rate and the second procedure may be reimbursed at half rate.

Procedure code 92072 is limited to one service per lifetime by the same provider.

Procedure code 92072 will be denied if billed on the same date of service by the same provider as procedure code 92071.

Procedure codes 92071 or 92072 must be billed on the same date of service as one of the following procedure codes V2511, V2512, V2513, V2520, V2521, V2522, and V2523.

#### 4.3.8.4 Prior Authorization Requirements

Prior authorization for contact lenses must be submitted on a SMPA Request Form, signed and dated by the prescribing physician or optometrist and must include the following documentation:

- Diagnosis causing the refractive error (such as keratoconus)
- Current and new prescriptions supporting a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes
- Which eye(s) need to be treated
- The procedure code(s) requested
- A brief statement addressing the medical necessity for vision correction by contact lens(es) and specifying why eyeglasses are inappropriate or contraindicated for this client

**Note:** Additional contact lenses may be considered more frequently than the limitations previously outlined in this handbook, when documentation in the client's medical record supports medical necessity for a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes.

**Note:** Non-prosthetic contact lenses for emergency placement do not require prior authorization. The emergency condition necessitating a corneal bandage must be documented on the claim.

Authorization for contact lenses may be considered for 60 days.

Temporary contact lenses after cataract surgery may be prior authorized for diagnosis code Z961 when medically necessary.

#### 4.3.8.5 Replacement of Contact Lenses

Replacement of lost or destroyed contact lenses is a benefit of Texas Medicaid for clients from birth through 20 years of age. If the contact lenses are lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

Replacement of contacts within the 24-month period is a benefit only when medically necessary due to a significant change in visual acuity. A new prescription must document at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.

- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

Prior authorization is required for replacement of contact lenses.

The appropriate eyeglass and frame or contact lens procedure codes must be billed with modifier RB to indicate replacement.

### 4.3.9 Eyeglasses and Contact Lenses

#### 4.3.9.1 Medicare Coverage for Eyewear

Eye examinations for the purpose of prescribing, fitting, or changing eyeglasses or contact lenses because of refractive errors are not a benefit of Medicare. These services must be filed directly to Texas Medicaid when performed for a Medicaid Qualified Medicare Beneficiary (MQMB) client. Medicare coverage is limited to eye examinations for treatment of eye disease or injury and for a diagnosis of aphakia. When performing an eye examination with refraction for an MQMB client diagnosed with aphakia or disease or injury to the eye, the following procedures must be followed:

- Procedure code 92015 must be used to bill Texas Medicaid for the refractive portion of the examination and is payable with a diagnosis of aphakia or ocular disease only.
- The medical portion of the eye examination (procedure code 92002, 92004, 92012, or 92014) is covered by Medicare and must be billed to Medicare first. Medicare forwards this portion of the examination automatically to TMHP for deductible and coinsurance payment consideration according to current guidelines.

**Referto:** Section 2.7, “Medicare Crossover Claim Reimbursement” in the *Section 2: Texas Medicaid Fee-for-Service Reimbursement (Vol. 2, Provider Handbooks)* for more information about current coinsurance and deductible payment guidelines.

**Important:** *Providers performing eye exams for refractive errors on Medicaid Qualified Medicare Beneficiary (MQMB) clients must bill TMHP. Do not send the refraction (procedure code 92015) to Medicare first. Texas Medicaid will not waive the 95-day filing deadline if the claim is billed to Medicare in error, nor will Medicare transfer the refraction to Texas Medicaid for payment.*

Medicare allows payment of one pair of conventional eyewear (contact lens or glasses) for clients who have had cataract surgery with insertion of an intraocular lens (IOL). Medicare considers the IOL the prosthetic device. Texas Medicaid providers must bill Medicare for the conventional (nonprosthetic) eyewear provided following an IOL insertion and bill Texas Medicaid for any replacements of the conventional (nonprosthetic) eyewear using the procedure codes in Section 4.3.7, “Eyeglasses” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* and Section 4.3.8, “Contact Lenses” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)*.

#### 4.3.9.2 Prosthetic Eyeglasses or Contact Lenses

Prosthetic eyeglasses or contact lenses are lenses that replace the eye’s organic lens when it is absent due to congenital or acquired aphakia. Aphakia may be the result of a congenital abnormality or defect, or an acquired condition as a result of trauma, or cataract removal without IOL insertion.

Prosthetic eyeglasses or contact lenses may be provided based on medical necessity. Prosthetic contact lenses may be provided, with prior authorization, for clients of any age with congenital or acquired aphakia. Eye examinations for aphakia (including congenital aphakia) and disease or injury to the eye may be reimbursed as often as is medically necessary.

**Note:** *Fitting services are included in the reimbursement for prosthetic eyeglasses.*

One pair of prosthetic eyeglasses or contact lens(es) is a benefit during a client's lifetime.

The following aphakia diagnosis codes must be used when billing for prosthetic eyeglasses:

| Diagnosis Codes |       |       |      |  |  |  |  |
|-----------------|-------|-------|------|--|--|--|--|
| H2701           | H2702 | H2703 | Q123 |  |  |  |  |

Replacement of prosthetic eyeglasses or contact lens(es) is a benefit of Texas Medicaid regardless of age under the following circumstances:

- Loss or destruction
- Significant change in visual acuity with a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes

The provider must maintain documentation in the client's medical record supporting the medical necessity for the replacement eyeglasses or contact lens(es).

If the prosthetic eyewear is lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

The appropriate eyeglass and frame or contact lens procedure codes must be billed with modifier RB to indicate replacement.

**Referto:** Section 4.3.7, "Eyeglasses" in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* and Section 4.3.8, "Contact Lenses" in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* for the eyeglass lens, frame, contact lens procedure codes and dispensing requirements that apply to eyewear.

### 4.3.9.3 Eyeglasses or Contact Lenses following Cataract Surgery

#### 4.3.9.3.1 Temporary Eyewear

Temporary eyeglasses or contact lenses after cataract surgery may be reimbursed when they are billed with the appropriate lens and frame procedure codes and diagnosis code Z961.

Temporary eyeglasses or contact lens(es) for these clients may be considered up to four months after surgery until the client is ready for permanent eyeglasses or contact lens(es) when medically necessary. The date of surgery is used to determine the convalescence period for temporary eyeglasses or contact lens(es). There are no limitations on the number of temporary contact lens(es) during the postsurgical convalescence period. Temporary eyeglasses or contact lens(es) will be denied if dispensed more than four months after the date of surgery.

#### 4.3.9.3.2 Permanent Eyewear

Permanent eyeglasses or contact lens(es) following cataract surgery may be provided based on medical necessity for clients of any age. Permanent contact lenses require prior authorization.

**Note:** *Fitting services are included in the reimbursement for permanent eyeglasses.*

One pair of permanent eyeglasses or contact lens(es) is a benefit during a client's lifetime.

Providers must use diagnosis code Z961 to indicate the presence of an IOL when billing for permanent eyewear following cataract surgery.

Replacement of permanent eyeglasses or contact lens(es) is a benefit of Texas Medicaid regardless of age under the following circumstances:

- Loss or destruction
- Significant change in visual acuity with a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes

The provider must maintain documentation in the client's medical record supporting the medical necessity for the replacement eyeglasses or contact lens(es).

If the permanent eyewear is lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

The date of cataract surgery is not required on the claim for:

- Permanent contact lens(es) or eyeglasses after surgery
- Prosthetic contact lens(es) or eyeglasses after cataract surgery without IOL insertion

Providers must include diagnosis code Z961 to indicate the presence of an IOL on the claim.

#### **4.3.9.4 Intraocular Lens (IOL) and Additional Eyewear**

Intraocular lenses are benefits of Texas Medicaid. If conventional eyewear is medically necessary in addition to the IOL, the IOL is considered the prosthetic device, and the eyewear and any replacements are considered nonprosthetic.

**Referto:** Section 9.2.49.4, "Intraocular Lens (IOL)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about IOL benefits.

Section 4.3.7, "Eyeglasses" in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* and Section 4.3.8, "Contact Lenses" in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* for more information about nonprosthetic eyewear

#### **4.3.9.5 Artificial Eyes**

For clients who are birth through 20 years of age, artificial eyes may be considered under CCP.

#### **4.3.10 Surgical Vision Services**

**Referto:** Subsection 6.54, "Fluocinolone Acetonide (Retisert)" in the *Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks)* for more information about fluocinolone acetonide benefits.

Subsection 9.2.49, "Ophthalmology" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about surgical vision services.

#### **4.3.11 Prior Authorization**

Prior authorization is required for:

- Unlisted ultrasound procedures.
- Computerized ophthalmic diagnostic imaging, posterior segment, with interpretation and report, unilateral or bilateral; retina, beyond the maximum limits outlined in this handbook.
- All contact lenses, except corneal bandage lens(es) for emergency placement.
- All services requested through THSteps-CCP.

Requests for prior authorization must be received and approvals must be obtained before services are rendered. Requests received after the service date will be denied.

Prior authorization requests may be submitted to the TMHP Special Medical Prior Authorization Department via mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically-signed documents must have an electronic date on the same page as the signature. Electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable. All electronically-signed transactions and electronically-signed documents must be kept in the client's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

To complete the prior authorization process by paper, the provider must fax or mail the completed Special Medical Prior Authorization (SMPA) Request Form to the TMHP-SMPA department and retain a copy of the signed and dated prior authorization form in the client's medical record.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated prior authorization form in the client's medical record.

The SMPA form must be signed and dated within 60 days before the date of service. Services will not be authorized prior to the ordering provider's signature date.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the equipment or supplies requested. The physician must maintain documentation of medical necessity in the client's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies.

## **4.4 Documentation Requirements**

In addition to documentation requirements outlined in the prior authorization sections of this handbook, all services require documentation to support the medical necessity of the service rendered. Vision services are subject to retrospective review and recoupment if documentation does not support the service billed.

The client must sign and date the Medicaid Vision Eyewear Client Certification Form, and the provider must retain it in the provider's records.

When a client chooses an eyeglasses or contact lens option beyond the program limitations, eyeglasses or contact lenses are replaced because of loss or destruction the client must acknowledge their choice and liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification Form and retain it in the provider's records.

The current and previous prescriptions must be documented in the client's medical record.

The provider must make the client's medical record available for review upon request by the following:

- HHSC

- Office of the Attorney General
- TMHP

## 4.5 Claims Filing and Reimbursement

### 4.5.1 Claims Filing

Vision care service claims must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

When submitting the client's old and new prescriptions to show an axis change or a diopter change of .5 or more, enter the new prescription in Block 24D, line 5, and the old prescription in Block 24D, line 6 of the CMS-1500 paper claim form.

Claims for eye examination services require a diagnosis. Claims for eye examinations that lack a diagnosis are listed as an incomplete claim on the Remittance and Status (R&S) report and must be resubmitted for payment consideration. Electronic claims that lack a diagnosis will be rejected. A letter with the reason for rejection and instructions for resubmission will be mailed the following business day.

When the eye exam limitation is exceeded for clients who are 20 years of age and younger, identify one of the following situations in Block 19 of the CMS-1500 paper claim form:

- A school nurse, teacher, or parent requests the eye examination.
- The eye examination is medically necessary.

### 4.5.2 Reimbursement

Providers must reflect the highest level of specificity for vision related diagnoses on claims or other documentation. Professional services by an optometrist for contact lenses and prosthetic eyewear are reimbursed in accordance with 1 TAC §355.8001 and §355.8085.

Procedure codes described as bilateral are inclusive codes, and right and left studies billed on the same day will be reimbursed at a quantity of one.

Procedure codes described as "unilateral or bilateral" will be reimbursed for the same amount whether one or both sides are tested.

FQHCs are paid an all-inclusive rate per visit for payable services in accordance with 1 TAC, §355.8261.

Suppliers of lenses and frames are reimbursed the lesser of their billed amount or of the established maximum allowable fee in accordance with 1 TAC, §355.8001. See the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

[Vision Services](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

#### 4.5.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

If applicable and consistent with CMS billing guidelines, procedure codes must be billed with modifier LT (left side) or RT (right side) to identify the eye on which the service was performed.

## 5 Claims Resources

Refer to the following sections and forms when filing claims:

| Resource                                           | Location                                                                                                                                                     |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acronym Dictionary                                 | "Appendix C: Acronym Dictionary" ( <i>Vol. 1, General Information</i> )                                                                                      |
| Automated Inquiry System (AIS)                     | Subsection A.10, "TMHP Telephone and Fax Communication" in "Appendix A: State, Federal, and TMHP Contact Information" ( <i>Vol. 1, General Information</i> ) |
| CMS-1500 Paper Claim Filing Instructions           | Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" ( <i>Vol. 1, General Information</i> )                              |
| State, federal, and TMHP contact information       | "Appendix A: State, Federal, and TMHP Contact Information" ( <i>Vol. 1, General Information</i> )                                                            |
| TMHP electronic claims submission information      | Subsection 6.2, "TMHP Electronic Claims Submission" in "Section 6: Claims Filing" ( <i>Vol. 1, General Information</i> )                                     |
| TMHP Electronic Data Interchange (EDI) information | "Section 3: TMHP Electronic Data Interchange (EDI)" ( <i>Vol. 1, General Information</i> )                                                                   |

## 6 Contact TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday through Friday from 7 a.m. to 7 p.m., Central Time.
