THE BENEFITS OF PEMS

The new **Provider Enrollment and Management System** (PEMS) puts everything you need for **program enrollment** and other provider **information management** tasks right at your fingertips. **Enroll** or **reenroll** in multiple state health-care programs, perform **revalidation** tasks, add practice locations and more, all in a **single system**. PEMS has been built from the ground up and offers the following benefits:

PAPERLESS. One, "smart" online provider enrollment application for all programs. Real-time **data validation** to reduce errors and speed application processing.

SINGLE SYSTEM. An **NPI-based** system where you can manage all your Texas Medicaid and related program enrollment information and records in one place.

ONLINE MESSAGES. Timely, automatic notifications sent to your email and the PEMS message dashboard.

TRANSPARENCY. With PEMS, you have **instant access** to the status of your enrollment application and **real-time availability** of the changes you make to your provider information.

CLIENT ACCESS. Clients can find you faster using the Online Provider Lookup search tool. You control what they see, including what services you offer and how to contact you.

PREPARING FOR PEMS

PEMS is coming in December 2021. But you can prepare today! Review **Preparing for PEMS** to find out what you need to do to get ready.
